I've gotten quite a bit of mail reguarding the flip. So here is the "official" press release.

BTW: I ran this thru ocr so there might be some typos.

JF

WLLZ-FM SWITCHES FORMAT;
ROCK STATION BECOMES V98.7 SMOOTH JAZZ

Wednesday, December 20, 1995 -- Today, at 10:00 a.m., WLLZ, Detroit's rocker, changed over from Today's Rock to V98.7 Smooth Jazz, a smtion featurin- the sounds of Kenny G. Luther Vandross, Whitney, David Sanborn, Maria Carey and many others, it was annouriced by Ozzie Sattler, vice president and general manager of the station.

"It's a brand new format that wit] be unique in the Motor Ciry, " said Sattler, 'The new V98.7 Smooth Jazz will be oti the leading odge of the Ne@v Adult Contemporary sound here in Detroit and well positioned to break away from [he pack. "

The musicians fearured on the station, accordin& to Sattler, will be thc contemporary jazz-oriented group who fortn the core of successful New Adutt Contemporary stations across the Utiited StaLes, "IL's the sound that's brought solid success to smtions from our sister.station, KTWV in Los Angties to WNUA in Chicago, and it's one of the fastest growitig formits in tlae couiilry," Sattler added, "We believe it can be a unique and powerful format here as well, appealing to all age groups, but most powerfully to mcn and women in tht key upscale 25-54 demographic."

- more -

The station concluded that a format change was appropriate after significant market research. "We've been aware for quite some time that the market was saturated with rock stations, all competing for the same group of core listeners,' said Sattler, who also serves as the station's Program Director. 'So we wcnt out and asked a wide variety of people about the type of music they prefer and just don't get enough of, Overwhelmingly. they indicated a strong desire for a radio station that plays a blend of music from certain important artists -- a group of names that came up over and over again in our research. "

Sattler further indicated that the station would begin airing the format without any on-air talent --just music -- which will be both instrumenlal and vocal, wilh a slight emphasis on the instrLimental. Announcers who complemcnt the music will be added. later. He also indicated that there

would be no personnel impact at the staeion as a result of the format change.

V98,7 Smooth Jazz will impleitient a significant marketing campaigan. 'We're goina to be very agaressive gettina the word about our new stalion out To listeners, advertiser s and the general public," said Sattler. "We want eveiybqdy in DeTroit to know there's a new kid in town. We also want everyone to know that some things will be the same as ever. We'll continue to be dedicated to our community, to our listeners and to our advertisers."

V98.7 Smooth Jazz is a CBS Radio Sration. The CBS Radio Stition group is a division of CBS, Inc., a wholly-owned subsidiary of Wesiinghouse Electric

2. Even Worse Station Promos

Newsgroup: rec.radio.broadcasting
Date: 1996-01-01 00:00:00 UTC
From: Ray Dennis <cbmbest@ix.netcom.com>
Message-ID: <4c89pk$909@vixen.cso.uiuc.edu>
Source record: 27451

We've heard about some tacky station ID's, but there are also some bad promos and commericials out there.

I remember back in the early 70's, I had just reported to WXLW in Indianapolis as their new PD and we were still running the old format prior to our switch to top 40. The station was an old-line CBS affiliate playing big band music and running everything CBS had to offer, including, yes, Arthur Godfrey.

It was during the time that we were still into the Apollo space program and were going to be running the coverage from CBS. We had some older staff members in the continuity department and I just happened to intercept a promo that was to be cut that said: "Shoot the moon with WXLW."

The "new" WIS site is still in the same place. That is, it is still the same transmitter site that the old 1320 was. It is that four tower array that you pass when you drive into Columbia off I-26. It is 5 kilowatts daytime, but only 1 kilowatt at night, but it is directional the other way from you, so that's why you can't get it at night. 560 (WVOC) is 5 kw at night, but they also don't radiate much signal in your direction at night. Hope this helps explain it!

>that there are so many people in the 'talent pool' that employers can
>afford to be choosier about who they hire.

Once upon a time in radio, no degree was required. Now, in mnay cases, the
ONLY way in is through a degree program, with some sort of experience.

Having worked in radio for a while, and now having over 90 commercial stations
a clients, I can tell you that the face of radio is changing RAPIDLY. Yeah,
once upon a time, radio was this fun little business run by the seat of your
pants by guys with a firm handshake and a ready smile. Those days are already
over in the large markets and the medium and small markets are close to it.

>>although I for one do look for a
>>well-rounded education and evidence that a person is well-read and
>>informed.

>The easiest way for many people to do just that is look at their degree
>status. And many do. Still, it can be done and need not always be a
>broadcasting degree.

But a degree none the less...

>> The only thing that really counts is what comes out of the
>>speaker.

That only applies to one very small side of the business, talent. Those of us
who keep the station on the air by selling time, most of us now have college
degrees.

>Ideally, this is true. But you've got to get the position first!
>Experience vs degree is a very old dilemma, and I believe it must be
>handled on a case-by-case basis. There are a whole lot of degreed people
>out there with no business in radio, and a whole lot of people with no
>degree who would do great in radio.

A non-arguement, as this applies to all business....

Radio today is BIG BUSINESS and the folks who make descisions currently come from what could easily be called the "middle-period" of radio. Some old guys, 99.9% male, who come from the old school. Many more though, are degreed and expect it from thier employees. A broadcasting degree helps, but a college degree in general is best.

Remember here too that, I must say, that only about 1/3 of the folks working at stations are talent/broadcast related. The rest are either administrative or sales. Lots of broadcast careers don't involve on-air work.

Bob is right on. I got hired at KSPZ for two reasons

My sister was the evening jock
I had played on the station softball team and hit a home run

Got hired on as a board op for overnights. Right place right time, owner wanted live radio. I listened to the station night and day, paid attention to the other jocks & what they were doing. It was all I had to go on, my degree is in Graphic design. Just try to constantly improve and be well read and you can succeed. Have fun & good luck

8. What happened to Tom Clay?

Newsgroup: rec.radio.broadcasting
Date: 1996-01-01 00:00:00 UTC
From: aj014@detroit.freenet.org
Message-ID: <4c89os$8t9@vixen.cso.uiuc.edu>
Source record: 27520

As a life-long resident of Southeast Michigan, I fondly remember disk jockey Tom Clay as "Jack the Bellboy" playing top 40 on Detroit's WJBK radio in the late '50's. After leaving that station amid an alleged payola scandal, Clay returned to the local airwaves several times in the '60's on such diverse stations as WQTE (middle of the road), CKLW (top 40) and for a brief time WHFI-FM (middle of the road). In all cases, his production style was unique and never duplicated, at least not in this part of the country.

It has now come to my attention that Tom recently died. Those of us who remember him and respected his talent wonder what became of him over the years and what the circumstances surrounding his death were. Do you know? Please reply to this message or drop e-mail to me at aj014@detroit.freenet.org.

To jog your memory, here is a portion of a recent Internet announcement about Tom:

>From: tpryan@m-net.arbornet.org (Tim P. Ryan)
>Newsgroups: rec.music.dementia

Other Detroit area broadcasters will also be missed.

Tom Clay - One of the trademarked 'Jack The Bellboy's from 1950's Top 40 radio. He became one of Detoit's well known voices. He got caught up in the late 50's "payolla" scandels, and did not work much until a mid-60's stint on Detroit/Windsor's CKLW - The Big 8. Moved to California and had some success their. His biggest national claim to fame was his Spoken word record "What the world needs now is love / Abraham, Martin and John". Using those songs as a background he wove a narrative/interview/news-soundbites/ piece that was downright powerful. You may have heard it in July of 1971 as it reached #8 on the Billboard charts.
"Q: What is prejudice" (asked by Tom Clay)
"A: I think it's when somebody is sick" (response from a young girl).

>speaker/monitor/computer/soundcard complex demodulates FM radio?

If there's any frequency-selective part in the circuit (like a capacitor and some wire -- forms a tuned circuit), it can turn FM into a varying-amplitude (i.e., AM) signal.

Then all you need is something nonlinear ... like a transistor, especially one that wasn't made to work at FM frequencies ... to demodulate the AM into a weak audio signal.

Regards,
Andy

10. Stations with film music programs?

>speaker/monitor/computer/soundcard complex demodulates FM radio?

The manual that came with the speakers probably has a page near the front
or the back with FCC information, including recommendations for reducing
interference like the kind you're having. Give it a try.

As for the mechanism, probably a complicated interaction between inadvertent
tuned circuits and nonlinear elements (amplifiers, etc.), and may not be
worth understanding completely. Could be in the speakers, the sound card,
or both.

14. First radio gig...

Newsgroup: rec.radio.broadcasting
Date: 1996-01-01 00:00:00 UTC
From: lwheeler@agr.state.tx.us
Message-ID: <4c89p2$8u1@vixen.cso.uiuc.edu>
Source record: 27526

I've been in some aspect of radio news for about fifteen years...but I sure didn't start there. My first radio job was working overnights at a "beautiful music" station in Pueblo, Colorado in 1980. My main job was to change out the reel-to-reels of music every hour or so. At the top of every hour I got to read the time and the weather...that was it. Nothing glamorous, but it was invaluable experience....and it was a radio gig. One day the p.d. called me in to read outloud from a newspaper. He literally trained me to read news and my overnight job became a day shift...still changing tapes, but getting alittle more time on the air.
The point I'm trying to make is to some of the "up and coming" broadcasters who have vented their frustrations at trying to get their foot in the door. It's actually pretty easy to get that "first job" in radio...sure you're gonna get rejected at the number one station, but I guarantee you, for a first job, you'll be better off and can actually get some pretty great experience at the number twenty-five station instead. Just my two-cents...

-Lisa Wheeler lwheeler@agr.state.tx.us

Ooh. There was a little bitty tremor off Crescent City while ago.

Mr. Bell seems to think the Pacific Ring of Fire is about to blow in
one world-wide cataclysm. First, it's Mount Pinatubo in 1991,
followed by el Nino in '93, followed by a large earthquake on January
17, 1994, followed by another quake exactly one year later, followed
by two earthquakes in Southern Mexico.

Coincidence? I don't think so! There'll soon be something else doing
in the Pacific Basin. Mark my word.

>County where it's more on an even field signal wise.

When I moved to LA in the fall of 1989, KKBT was calling itself "Rock with a Beat." They were sort of a Hot AC station (perhaps with a bit of an edge). A typical hour included Linda Ronstadt/Aaron Neville (All My Life), Alannah Myles (Black Velvet), Tom Petty (Free Fallin'), and Eddie Money (Peace in Our Time). Sometime around February of 1990 they switched to Urban CHR. They went on a big promotional campaign afterwards; in the months (years) that followed, you started seeing signs up all over LA advertising 92.3 as "The Beat" along with pictures of contemporary R&B artists such as Whitney Houston and Luther Vandross.

That said, I have a few questions about The Beat:

Is there still a "House Party" in their morning drive? John London "showed up" on KMEL (KKBT's sister station here in the SF bay area) on the morning of March 20, 1995 and KMEL started its own "House Party." I have heard it said that John London is broadcasting from LA, and that in fact, the "House Party" is simulcast in LA and SF (except for local cut-in of news and weather). I've heard this from a variety of sources, but I haven't been able to confirm it.

If there is no "House Party", what is their morning drive like? Who is doing it?

Who are the other members of the air staff these days?

There is a public affair show called "Street Soldiers" that is occasionally simulcast on KKBT and KMEL. It normally airs on KMEL on Monday nights at 10pm PT, but it is not always simulcast. When it is not simulcast, does KKBT have its own version of "Street Soldiers?"

thanks

We in the SF Bay Area are lucky to have KALW-FM running several CBC
shows... most notably As It Happens (daily 5-6:30p) and Sunday Morning
which runs twice through, on (duh) Sunday morning: 6-9a (with CBC news
on the hour) and a repeat from 9-noon with BBC/NPR news on the hour.

I wish they had more CBC stuff, but what they have is way better than
most places in the States.

" original Monitor could have hoped for. I actually experimented with a
" budget and got a nosebleed at that altitude. The talent, alone, at
" today's salaries would run in the millions. There'd be no way a network
" could break even.

To keep the talent expense down I think the trick is to link up with another company whereby you could cross-promote the stars with their other projects; perhaps a movie studio or TV network might be in order. This appears to be the way NBC did it, since nearly everyone (I remember at least) who did Monitor had a gig on NBC TV somewhere. Imagine Robin Williams doing Monitor or perhaps Danny DeVito or ....

I'm trying to locate a jock/PD named Gary Sanders (I'll wait for six people to try to make a pun around "Larry Sanders"). Last I heard of him was 2 years ago, when he was at WKOJ-FM in Monticello, New York.

Anyone know him?

(I just found a tape he had given me quite a while ago...and he's a very good adult rock jock.)

Thanks to anyone who can help....

Phil

If any of these broadcasts are available via satellite, and the broadcasters are willing, we would love to put them up on AudioNet.

As you may or not know, WWW.AudioNet.Com is the largest audio site on the Net. We broadcast 8 different stations.networks, and about 50 live events each week.

In 1986, then Christian pop station KLTY (94.9--not to be confused with the current KLTY at 94.1) in the Dallas, TX area was sold and became Rhythmic CHR KHYI, Y-95. Y-95 featured a very brash presentation with liners such as "Lock in and jerk your knob off" or "Get out of the way...wimps!". Some indavertent humor came out of the latter when they ran this liner, then followed it with "Seasons in the Sun".
It was an entertaining start to what unfortunately developed into one of the ugliest Top 40 battles I have ever heard, one that ultimately left no survivors.

>advice. This isn't a happy camper with the jerk.

On a related note of radio-shrinks not getting the whole
picture and only having one minute before the commercial to straighten
things out.

A woman called Dr Toni Grant and complained that her hubby
wanted "kinky sex" and she didn't feel so inclined.

Dr. Grant told the woman that is she didn't do these things,
hubby would find another woman who would. - Pretty good advice on the
face of it.

Then the woman said: "He wants me to put on high heels and
stand on him."

"So," says the good Doctor, "Do it."

"But I weigh 250lbs!"

I can't recall how she handled it from then on but the correct
response should have been "I bet he only asks once."

WLLZ will prob pull share from a number of stations. Targets include
WWJ/WJR/WJZZ.

The "Smooth Jazz" format aims directly at men 35+, with
35-64 professionals at the heart. These listeners are very valuable and most
often found listening to Talk or Sports (WWJ/WJR) There will also be some
pull from WJZZ just by formal spill, but I think WMXD is pretty safe.

Here in Chicago, WNUA, a similar format station is alwyas in the top 5 with
men and is a solid #6 person 12+ in the summer Arbitron.

We should also consider the fact that WLLZ is a Group W station, about to
merge with WWJ/WYST. The Smooth Jazz format fits in well with the current
CBS(now Group W) stations market niche.

Well the format is not unique, itas quiet similar to WHLI which has been arond for a very long time. WLUX thought has the chance to make some impact in that they can do so in Suffolk County. The signal is good, better than HLI in the county and with aggressive sales force they can sell it and earn some dollars. ratings wise they will never liekly be a big factor but with the right staff and appraoch they can make it work....

Scott--

Ironically, what nobody remembers is that at the very beginning of Z-100's ascendancy (before we were serving the universe from the top of the Empire State Building), we used to trumpet the fact that we were actually located in scenic suburban Secaucus! Then someone let the Powers That Be know that the location was less than hip, and the legal ID got buried at :52!

OK...so we can finally put the wraps on 1995. Just your normal, uneventful,quiet year in local radio...._NOT_ ! 1995 saw a bunch of changes at stations on both sides of the border-format & personnel-wise,your normal controversies and other fun stuff. Strap yourselves in...here we go:

Format changes-Buffalo:

-WBUF ended the 3 AC battle in late March when it switched to a NAC/jazz format. In changing to Smooth Jazz 92-9,it also switched calls to WSJZ-and later,improved on what it had done as B 93-with the station now getting 4 shares. (Come next year,it'll also get new studios-joining sister stations WHTT-AM/FM at the Buffalo Hilton downtown in 4th-floor facilities.)
-WUFX put the Fox back in its cage,jumping to a modern AOR format as 103.3 the Edge on June 22nd(it also changed calls to WEDG). The Edge got new studios as well,moving into WGRF(97 Rock)'s digs on Franklin St.in July. ("Iron" Mike Bensson,one of the jocks blown out in the switchover,moved his act across the border in August,heading to AORer CHTZ(97.7 HTZ FM)in St.Catharines as its PM driver.)
-WWWS turned off the ticker on its business news/talk format from BRN and jumped to urban oldies via ABC/SMN's Urban Gold format. It,too,got new digs-sort of,if you can call a closet facilities(it joined WGR and WKSE in getting new studios at 695 Delaware Ave.-'GR got Kiss' old air studio,while Kiss got a brand new one-in what was the program director's office). Also, River City consolidated the advertising and executive branches of those stations in a new office at Fountain Plaza,inside the Hyatt hotel downtown.
-As the year was ending,WWKB announced that it would be switching to satellite country,dumping its entire lineup-the most well-known commodity being Howard Stern-as well as the Buffalo Sabres;they returned to WGR with a new announcing team in place as Rick Jeanneret moved to TV play-by-play on the Empire Sports Network.

*Toronto:
-CJCL & CKYC switched frequencies & formats in early February,as Telemedia did some moving. CJCL's sports format moved down the dial to 590 (making it The Fan 590;later in the year,it lost the Leafs rights to CILQ/ Q 107),while the country on CKYC(Country 59)moved up to 1430. The latter station has to be sold near the end of '96;Fairchild Communications has been mentioned as a buyer.
-Speaking of Telemedia,it paid over $15 million for CJEZ(97.3),switching it from classic hits(as Z 97.3)to AC(as EZ Rock 97-3).
-Westcom transformed CHOG from CHR(AM 640)to news/talk(Talk640).

*Rochester:
-WRQI(95.1/95.5)shot down its classic Rock-It,and hit a Nerve with its modern rock format.

-WHRR(93.3)shut off the soft AC format on the bird,and got its feet wet as classic rocker The River. Don Imus' syndicated show aired for a while in AM drive,but went nowhere fast.
-The Lincoln Group added WPXY(CHR;98 PXY)to its station roster-joining WHAM(1180;N/T),WVOR(100.5;AC)and WHTK(1280;hot talk). It had WEZO,but sold that to Livingston Radio when 'PXY was purchased.

*Also of note:WQRT in Salamanca moved from country to classic rock,and CHSC(1220)in St.Catharines was sold to Cultis Broadcasting,owner of Welland's CHOW(1470;country)

*People:
-WGR(550)saw a lot of its air talent leave:Rich Michaels & Barry Buetel left for Cleveland(Buetel later returned),and Rocco Pendola now calls Miami home. Ron Dobson came on board as its mew midday talker. That's nothing compared to...
-WBLK's revolving door in AM drive. During '95,Bryan Scott,Kim Fox,Lou St.James,Don Allen,Jr.,Winston Brown,Frank Dawkins and Terri Davis all were part of the show(at one point or another). Not far behind was...
-CKEY(FM 101 The Planet)'s door in the AM drive shift. Jon Summers,Kerry Gray,Scruff Connors,"Airborne Eddy" and Dave Justice all took turns doing mornings for the Planet. About the only constant was news reader Tammi Jeanneret(related to Rick via marriage).
-Tom Donahue left WGR to become the PD at WNUC,and made the station more local-with a bit of help from former WYRKers Steve Mortenson,Sharon Nicholas and Buddy Shula;Carol Williams was also in AM drive,but left for Metro Networks' local operation,and just as quickly...
-stepped in near the end of '95 as Rob Lucas' new sidekick on WMJQ(Q 102)-thanks to Nancy Barrow's jumping to crosstown AC WJYE,along with morning show producer Tom Kernan.
-Larry Levite retired as the GM of WBEN/WMJQ.
-Frank Lorenz retired as the president/owner of WBLK,after selling the station to American Radio Systems.
-Jesse Dylan left Toronto's AM 640(and his long on-air partnership with Gene Valaitis as Jesse & Gene)when his contract wasn't renewed. Jane Hawtin came on board to handle AM drive(along with Gene,who added hosting duties for Poplife Radio-syndicated in Canada),and handle a TV gabfest for Westcom.
-More defections from CFRB:Andy Barrie moved to CBL/740 as Metro Morning's new host,and Henry Shannon retired as the station's traffic reporter.

*Here's what some have been anxiously waiting for all year..the 1995 awards for the other stuff you don't see,called the Muckonis-honoring the off-beat, bad and sometimes ugly events of the year(with apologies to the National Association of Broadcasters and the Marconis):

-The Jumping the Shotgun Award:To WGRF(97 Rock),for nearly preventing the Bills/Miami playoff game from being sold out. In the days before the game,ticket sales were brisk..until 97 reported(whether erroneously, deliberately,or as a joke isn't known;still,at least WIVB-TV reported this) that the blackout was lifted when it wasn't...slowing sales to a crawl.
-The Gang That Couldn't Promote Straight Award:To CFNY(102.1 the Edge).

The station announced in mid-April that tickets for a concert for the group Live would be given out at a secret location-which turned out to be CHTZ (97.7 HTZ FM). One problem:When CFNY got there,HTZ had a barbecue party for its listeners and its motorhome's speakers blaring. And,attendees of HTZ's shindig got the chance to win Tragically Hip tix. 'FNY had other problems: it couldn't figure out how to form the ticket line for Live...which didn't matter:some of its tix found its way into the hands of HTZ plants.
-The You Reap what You Sow Award:To Jim Meltzer,former WGR general manager. After weekend talker Mary Davis-normally the calm type-took extreme exception to a caller on one of her shows in mid-March,Meltzer allegedly told Davis,"Don't be little Mary Sunshine anymore,you might be better being Mary the Bitch." If this was a true story,you can guess who the buck stopped with regarding its previous talk show hosts.
-The Burdens of Talking to a Celebrity Award:To Rob Christie,AM driver at Toronto's CKFM(Mix 99.9). In trying to get an interview with "Baywatch" star David Hasselhoff,Christie started the "Hasslewatch". If a listener could persuade Hasselhoff to do the interview,that person would win the "Hasselpack"-tickets for 2 to "Sunset Boulevard",dinner for 2 and various other goodies. Turns out no one won the prize because,as Toronto Life noted in its December Best & Worst of the City article,"Torontonians were willing to harass him for free...Hass,whose stay in the city was a living hell(his words)finally turned himself in. 'People were coming up to me day and night, telling me I had to call the Mix. There was no place in Toronto I could go to get away.'"
-The _Real_ Dumb & Dumber Award:To CHUM's Brian Henderson and CFTR (680 News)'s Dick Smyth:Henderson for blaming(on-air)the legal-aid funding problem on too many Jewish mothers encouraging their sons to become lawyers,and to Smyth,who-in Henderson's defense-piped in on 680 News,noting that a quick look at the Toronto phone book revealed that "there indeed is a disproportionate number of Jewish lawyers." Naturally,a controversy enused. (IMO:BFD. So what if they are?)(item also in December issue of Toronto Life.)
-The Didn't You Learn Your Lesson the _First_ Time? Award:To WEDG(103.3 the Edge),who got caught by Warner Brothers Records for playing an unauthorized copy of the Red Hot Chili Peppers' track Warped. Last year-as AORer WUFX/103.3 the Fox-it played a bootleg copy of an Aerosmith song.
-The Is It Live or Is It Memorex? Award:To WGR,who claimed in a station promo run after the September primary elections that they aired the candidates' reactions live-but was more like tape-delayed;their audio was behind by about 5-10 seconds. Exactly what was 'GR's fear-that someone would slip and say one of the infamous "seven words you can never say" that George Carlin made famous? Usually,that happens when someone thinks their mike is off.(To be fair,that didn't happen in the general election in November.)
-The Give It a Rest Award:To the many stations that seemingly embraced what seems to be the new consultant catch-phrase:"we only stop the music _____ an hour." Buffalo's WJYE and WMJQ(Q 102),Erie's WRTS(Star 104)and Rochester's WVOR all get this....honor,with 'VOR going the rest 1 step..uh, better,by only stopping for commercials once an hour.
-The Here's Some Money...Buy Yourself a Clue Award:To Terry Rodda,GM of WKSE(Kiss 98.5). He fell for the Nieman Marcus cookie trick,which Janet

Snyder and Nicholas Picholas gave away on the morning show(legend is,you can get it for a price;not so). Rodda suspended the duo for a day,and then found out about the whole affair and was not happy about getting taken. He also gets this honor for claiming that WWKB's jump to satellite country-and how it would be presented-would be unique.(Soon after the cookie affair, Rodda-in an apparent example of the Peter Principle at work-was named VP of River City's 4 stations locally.)
-The Talk That Knocks 'em Dead Award:To St.Catharines' CKTB,where a caller in late June actually collapsed on the air. Paramedics were called to the scene and were heard(not on the air,however)trying without success to revive her.
-The Fly the Slippery Skies Award:To WGR traffic reporter "Captain" Bob Masse,Bob's Metro Traffic(now WBEN)countrpart Mark Webster,and pilot Keith McNulty,who were shaken up but not seriously injured when a traffic plane used by WGR & Metro hit an ice patch and flipped over in a strong wind gust.

Finally,I can't let it end without noting all those who dispatched messages to me in cyberspace. There's too many to note:all the tipsters, Dr.Maims,680 News' John McKay,and many others(I'll put it in a future watch). Thanks also to Sean Healy,who assisted with the Watch from Hamilton. That(hopefully)puts the wraps on 1995. Will 1996 be the same? Probably will.

43. St Louis Obits in 1995 and other last minute news....

Newsgroup: rec.radio.broadcasting
Date: 1996-01-03 00:00:00 UTC
From: ssimon9@ix.netcom.com
Message-ID: <4cdelu$1fu@vixen.cso.uiuc.edu>
Source record: 27455

Happy New Year to all, and a successful 1996 for everyone.

Here are some additional obituaries from St. Louis radio in 1995:

Art Fleming, 70: The former host of JEOPARDY was a broadcaster with KMOX from 1980-1993, first, as the host of Total Information PM, and then co-hosted with Dave Strauss, the very popular Sunday Night Trivia Show.

Mort Crowley, 63: St. Louis' top morning man in the 1960's at top 40 KXOK, left the station in the 1970's, only to return for a short time in 1985-86 under new ownership. In the meantime, Crowley was a fill-in weekend host at KMOX. After leaving St Louis, he was a correspondent for Gannett Radio in Washington, hosted talk shows for the old Sun Network in Floria, and worked at WNAM in Neenah, WI. Prior to arriving in St. Louis, astute top 40 historian will remember his days at the Big 89, WLS, back in the early 60's.

Al "Scoop" Sanders, 54: I apologize, but don't have any biographical information about Mr. Sanders, who worked in St. Louis in the late 60's and early 70's.

BAH, HUMBUG, SAYS KMOX TO "CALL FOR ACTION"
by Scott Simon

ST. LOUIS -- Shortly before Christmas, KMOX General Manager Rod Zimmerman pulled the plug on the station's 20-year, "Call For Action" off-air public service department.

Staffed Monday through Saturday by volunteers from 11-1 p.m., people could call to either get assistance or be referred to an agency for assistance with almost any type problem, much like what TV stations do with consumer reporters and their staffs. The difference is that KMOX never "blew their horn" about things Call For Action did for people, it wasn't a promotional tool for the station.

Zimmerman said that the number of calls had dropped, and that other agencies in the city were duplicating services.

In its heyday, Call For Action was receiving 1,000 calls a month. Zimmerman, when commenting on its demise, said calls had dropped to 300 per month.

Hey Rod, you don't think that NOT PROMOTING Call For Action on the air for at least the last year had anything to do with that, do you?

And how many volunteer agencies have the facility of a 50,000 red-hot watt blowtorch radio station to be their backbone?

The reason behind his cancellation is simple. It was a creative idea by his long-time predecessor, the late Robert Hyland, back in 1975. And Zimmerman has little respect for successful traditions enacted by his predecessor. Station staffers tell me that Zimmerman still continues to criticize the way Hyland managed this once-great station, even though Hyland died almost four years ago.

It couldn't be a financial decision. Call For Action was staffed by volunteers, so the only cost continuing cost was telephones and office supplies, all which could be itemized as a tax deduction for volunteer and charitable services.

And if the Zimmerman ever claims that stoppping Call For Action was a financial budget cut, then you SHOULD have promoted on the air what successful things you did for people, and put Call For Action in the hands of the station's Promotion Department. Good promotions get more listeners, and usually ends up making more money.

Here's a simple example of why KMOX doesn't have its act together.

On Dec. 29, the station aired a year-end editorial by station editorial director Marie Boykin, on what things should happen in the St. Louis area in 1996. The list was fine, but the editorial became a joke when it ended with the statement that KMOX will strive for more civic cooperation in 1996.

Excuse me, but cancelling Call For Action doesn't sound very cooperative to me. And for that, this reporter is requesting a copy of the editorial, and IS CONSIDERING A REPLY WITH OPPOSING VIEWS.

Zimmerman just isn't a major player in St. Louis. It was surprising that the Suburban Journals of Greater St. Louis tabbed him to be its chair person for the paper's annual "Old Newsboys Day", which raises money for children's charities.

When this reporter was an editor at the Journals in the 1980's, the one-day drive raised over $200,000. Seven years later, the total was only $188,000. While the money goes to a good cause, it should have been a higher amount.

The reason is that Zimmerman just doesn't have the persona or aura to get people emotionally motivated the way Hyland could. And all Zimmerman can do is criticize him.

And he's failed to grasp the emotional makeup of St. Louis. We're the biggest small town in America. Everybody knows everybody else, or at least tries to make a connection. We know who's a St. Louisan and who isn't.

That doesn't mean we're snooty and stuck up. We accept people who move into the city, but only when they don't try to change us, our traditions, and our customs. And when they don't, we usually don't listen, and they generally leave town after a couple of years.

Example of media managers who have made significant market by successfully assimilating into the community and making positive financial, viewer and listener impacts on their stations includes John Beck at KSHE, Dick Williams at WIL, and Allan Cohen at Channel 4. Even Bill Bolster, now at NBC O&O WNBC-TV, New York, did it at Channel 5 in the 1980's.

Well, Group W officially took control of the station yesterday, let's see how long this management marriage continues, or when the divorce procedings begin.

JOE BUCK KNOWS TELEVISION

Many of you know Joe Buck for his work on Sunday's FOX football broadcasts, and also will carry him to FOX's coverage of Major League Baseball this summer.

At the age of 26, the son of Jack Buck is making his mark, as an entertaining broadcaster.

However, on New Year's night over the air of KMOX on "Sports Open Line", Joe put a black mark on his record.

While reading scores of football games that day, he finally got to to games in progress, specifically the Rose Bowl game between Northwestern and USC, he wouldn't tell the score of the game that had just started the third quarter.

Paraphrasing his comments, Buck said that Northwestern is coming back, they're going to try on on-side kick, but if I tell you the score, you'll just leave and watch the game.

This reminded me of the silly days in television (have they ever stopped??) when sportscasters on TV wouldn't tell you the scores of NCAA tournament basketball games in progress because their station would show the tape-delay game broadcast immediately following the newscast? They thought viewers wouldn't watch the game if they knew the score.

Well, in young Buck's case, all it did was prompt people to think, "wow, this is a pretty good game, I guess I'd better watch it!"

Sorry Joe, NOT giving the score backfired.

Joe works in television, knows television, knows people will watch something entertaining on television, but unfortunately, he hurt KMOX Radio. Building up Northwestern's comeback helped people to decide that watching the game was more important than listening to another of endless sports talk shows.

The game had quite a bit of significance for St. Louis listeners and viewers. Six Northwestern players, including starting quarterback Steve Schnur, played their prep ball in St. Louis.

What should Joe have said? "And early in the 3rd quarter at the Rose Bowl in Pasadena, USC leads Northwestern, 32 to 31." Simple as that, it keeps your listeners, and tells the story.

On this occasion, the self-proclaimed "America's Sports Voice" was oddly silent about something as simple as a football score.

44. Noted in Passing - Alison Steele - Sunday NYT Magazine

Newsgroup: rec.radio.broadcasting

Airwavers who are fans of the late Alison Steele will want to track down a copy of the Sunday New York Times Magazine (December 31st, 1995). On page 20, in a long section devoted to people of note who passed away last year, is a homage to the late, legendary Alison Steele of WNEW-FM and "K-Rock" (WXRK-FM). Vin Scelsa of K-Rock penned a very touching reminiscence of Ms. Steele which captured the essence of her rapport with her listeners. Also included is a picture of Alison in a slinky nightgown, posed reclining on a bed (!), which looks like it was done for some coffee-table picture book.

Cheers,

Donna, your friendly radio consultant (and broadcast historian)
says-- Mexican 'border stations' have a history of being a home
to a wide assortment of phonies, charlatans, etc. from the 1920's
when "Doctor" Brinkley escaped to Mexico to sell his famous 'goat
gland' cure for impotence via Mexican radio. Did you read the book
about the super-high power Mexican stations-- "Border Radio" by
Fowler & Crawford? According to them, Rev. Ike was on XERF, as was
Wolfman Jack-- what a combination!

In Canada campus stations a noncoms, our goal is to serve the community.
That involves readimg psa material, and doing current local news. We
handle the news in two ways, local is covered on a show called Morning
File, mostly soft news. The international news is heard 4 times a day,
BBC World service. It is station policy to play 40% new releas 30%
canadian, and 10% local canadian.

The tiltle for the on air staff is programmer, or producer, and it's
their responsibility to follow the rules, federal, and station. I'd
suggest talking to those who feel that news, and psa's are a waste of

time, explain that news is done in the commercial relm, and find out from them how they'd like to see things develop. If that fails, make it policy, and part of their job description. Never imply that they are dumb, and don't know what their talking about. They are not, if it is an ego thing break the news that their not god gently, but firmly.

For one thing, we're not talking satellite broadcasting here: it's
terrestrial DAB, from transmitters around the urban areas involved. For
another thing, the Canadians are already doing it. There may be some
leakage around the border, but it won't go very far into the U.S.

What about one of the consumer DATs instead? You can pick up the Sony 790 for under $700 or the portable TCD-7 for about the same. Used decks show up at good prices as people upgrade, as well.

> other possibilities... i found a digital cassette recorder at radio shack
> for $200 (i forget which of the two competing formats it was...) but it
> wasn't portable...still a $400 trade-off isn't bad. hopefully blank

The only thing I'd buy at Rat_Shak is 'maybe' a TV antenna (if I needed one).
(snip)

> if i ever work at a station with digital audio (.wav compatible) one of
> those ZIP drives looks real nice...nicely portable and under $200, with
> 100 meg capacity (and probably even higher capacities available.)

These are a good choice if you're working someplace where they've got the technology (as you pointed out). They're not blindingly fast, but they're handy and reasonably priced.

>
> oh yeah! i've also thought about a cd-recordable drive! for about $999
> i could write the information directly to disc, and wouldn't have to worry
> about any file compatibility problems, or carting a drive or MD player
> around...

But then you'll have to acquire all the software and knowledge to burn your own CDs. Not that this isn't a good idea, but it takes a lot of experimentation (expensive) before you finally get it together.

My recommendation - a used or inexpensive consumer DAT.

HELP!!!

About 12-13 years ago, I had a copy of this great parody of the radio business called "9", done by former WPRO-FM/WABC jock Howard Hoffman. "9" was a "history" of the "evolution" of a Top 40 station in the suburban NY area. This has to be the best poke at the industry ever done, and as I have lost my copy over the years, I am _anxiously_ looking for another copy of "9". If anybody has a copy that they could dub for me, or if Mr. Hoffmann himself sees this posting, can anybody help me out??? I would KILL for another copy of this (or at least kiss my ex-mother-in-law)!

Thanx!

Larry left WBZ in the late 80's to go to WHDH. They let him go a few
years later. He has done a few guest stints on WRKO, Boston filling
in for Chuck Adler but is pretty much retired.

Cross-posted to: rec.radio.broadcasting,rec.radio.shortwave

Does anyone know the postal address for Radio KVTO in Berkeley, CA? They operate on AM 1450. I picked them up here in Finland and would like to send them a reception report if I only had their address. My letter was returned from 601 Ashby Ave, Berkeley, CA 94710, which one source gave as their address. If you know how to reach KVTO, please e-mail me directly at mtm@clinet.fi or post here.

I believe former game show host Bill Cullen also did some hosting or features on NBC's Monitor.
Just as an aside, I was discussing Monitor with a good friend who recently retired from radio after 42 years on the air. We speculated about just jow much it would cost these days to get such a program on the air. However, we also concluded that -- given the current state of radio, and the current financial situation most stations and networks face these days, that discussion would be fruitless.
Oh, if only I had the recorder running...

Nice thing about "Mr. Movie" -- other than the fact that he IS a very nice guy, as I can certify from meetin' him -- is that the guy has total recall. And I don't mean the movie.... No, you can ask Steve about some 1947 movie you saw where a woman was be
ing unjustly accused of murdering her husband and you think Joan Crawford was in it. He can nail it from there. Amazing. Steve's continued to do both TV and local radio around Philly, but I always thought he'd be a hit if he were syndicated corrrectly.

One important line was left out by accident. It should read...

1130 - KSDO San Diego - Talk - could use more newscasts in the afternoon
and evening. We should have at least one station doing all-news from 3-7pm,
NOON-1 and 6-9am during drivetime and lunchtime somewhere here aimed at
our city; KSDO has the 6-9am and 4-7pm news for the commuters driving in
San Diego. Rush rules in the 9am-NOON and Roger Hedgecock in the early PM.

Again, the beta test of Delphi Internet is apparently skipping lines when I
upload some stuff.

From: ab415@lafn.org
Message-ID: <4cdemv$1h7@vixen.cso.uiuc.edu>
Source record: 27477

johnross@halcyon.com (John Ross) writes:
#My earlier comments about the fundamental flaws in American broadcasting were
#based on a couple of basic premises:

#1) The broadcast spectrum is a public resource.
Agreed.

#2) Radio stations do not have a "natural" right to conduct business; they have
#a license which obligates them to operate in the public interest. If they can
#make money at the same time, good for them. But if they fail to provide
#service, the public (in the form of government regulation) should lift their
#licenses.

Agreed, although one can disagree on what is "the public interest",
and whether any particular station, or stations in general are
"operating in the public interests"

#3) As Lewis Hill said almost fifty years ago, if you ask broadcasters why they
#don't offer "better" programs, they'll tell you they're giving their listeners
#what the listeners want; if you ask listeners what they want, they'll choose
#among the things that they know about--the currently avaialble programs.

#This is known as a vicious circle. Someplace on the radio dial there should be
#at least one broadcaster who creates programs for their own sake, with the
#freedom to experiment with musical styles, literature and, yes, wind chimes
#and whale farts. Many of these experiments will fail, but a few will succeed
#in expanding the tastes and interests of some listeners. And of that
#successful few, there may even be the makings of a new commercial format.

We already do that to some extent on NPR, Pacifica, and
other "community" stations. But beyond that:

1. But who decides where these stations go, what programming is played, etc.
If we're just reading poems over the air, most people will think "oh, how
quaint" and not make a big issue out of it. But, allow (or don't allow)
something the least bit controversial, and we have another political holy
war on our hands.

2. You wanna pay for whale farts over the radio? Fine. I personally can
think of, oh, say 200 other things I'd rather pay for. And, I bet most of
the other millions of people in the US. would come up with their own list
of 200 other things they'd rather pay for (either directly or through
taxes)

The point is, unless someone wants this kind of thing badly enough to
pay for it, it's just not going to happen. And, the usual tactic of
saying "ooh, there's something wrong with the people who would not support

such a program" turns more people off than on, so to speak.

#As for the argument that the CBC and BBC are publicly funded and therefore
#subject to pressures that commercial stations do not have, it may be true (so
#far as it goes), but it's irrelevant. At both the CBC (directly funded by the
#Canadian government) and the BBC (funded by an annual license fee on TV
#receivers),

A tax. Let's call a spade a spade.

#the program makers are insulated from the need to produce the
#highest possible audience numbers at all times. Therefore, those program
#makers are able to do things that may not always interest a mass audience.

But do they *really*?

First, let's dispense with the CBC's radio operations. From what I can tell, they're not that different from NPR, except that they rely almost solely on governmental, rather than public funding. Their programming is not that different than that of NPR, and, at least in major cities, is only one of very many radio choices. (I can get more NPR signals, all doing something different, in LA, than I can get CBC signals in Vancouver)

Now, let's consider the BBC. (This is information I'm getting from the 1993 World Radio TV Handbook. UK readers please jump in if you feel the need).

BBC domestic radio currently operates five nationwide networks, three regional networks, and several local stations. (There are commercial stations and networks in Britain as well, these are growing in number and importance)

Radio 1 (now called 1FM) plays mostly rock music. Radio 2 plays a softer style of pop. Radio 3 is for classical music, Radio 4 for news and spoken word programs, and Radio 5 carries mostly sports, with some educational programs thrown in.

The three local networks are located in Scotland, Wales and Northern Ireland.

OK, so out of 5 local networks, two play rock and pop, as a US station would.

One plays classical and cultural stuff. Most major US cities have at least one such station.

Two do news and sports. We have those too. (The "educational" programs on R5 might find a home on an NPR-type station here in the US).

So, most of the "noncommercial" programming is on R3, and some on R5. However, it's probably a sure bet that the lion's share of the programs of R3 and R5 are relatively run-of-the-mill, with only a few hours given over to really strange stuff.

Also, not only British mores, but radio and other laws would probably
prevent anything really shocking, except in limited circumstances. Note
that this differs from the US. The Brits might put up with a risque
Benny Hill, for example, but any defamation of the Queen, etc. is
Right Out! (Just ask the Sex Pistols!)

#Neither BBC nor CBC Radio is perfect, and both are facing serious financial
#problems right now, but they treat their listeners with more respect than most
#broadcaster in this country, where many broadcasters would sell their souls
#for a half-point increase in audience share.

It could be argued that a supercilious, artsy attitude toward the listener,
as if certain programs were "bitter medicine to be swallowed", is as
disrepectful to the listener as the "soul-selling" US broadcaster.

(Although, the BBC is probably more responsive to its listeners than
we seem to be giving them credit for in this thread).

#But as I said earlier, between debt service, payrolls and overhead, that
#half-point is probably essential to most American broadcasters's survival. And
#since the first instinct of any organism is to survive, they have no choice
#but to continue fine tuning a limited number of formats to deliver as many
#listners as possible to potential advertisers.

Well, barring radical solutions such as asking people to work for free,
this is where we are. My suggestion is, rather than engaging in the
usual grass-is-greener envy, typical of certain US citizens in discussions
of Europe, that we try to work within the system as it stands in order to
at least incrementally, increase the creativity level in US radio broadcasting.

Neither I nor anyone else on this group have any magic power to make
a complacent American audience start rioting in the streets, demanding that
all US broadcasters replace their popular syndicated programs with . . .I
don't know, perhaps some bum found singing in the subway. But, on this
newsgroup, we can report stations, either in our local areas or discovered
through our travels, that seem to be doing something different than
all the rest.

If you find a station that plays wind chimes all day long, and consider
that noteworthy, fine. But don't overlook little things (an AC with a slightly
expanded playlist, for example. Or, maybe news and traffic reports that
are above average in some way)

The journey of a thousand miles starts with one step.

66. Speeding up music?

Newsgroup: rec.radio.broadcasting

From: alr@world.std.com
Message-ID: <4cden0$1h8@vixen.cso.uiuc.edu>
Source record: 27478

Hello RRB,

I was talking with some folks from my old station (hot AC) the other day, and was informed of a couple of changes that are taking place there. I was wondering if folks had any thoughts on these issues... The station is being run by a new PD who is evidently being run by a new consultant, and the first of the following changes really galls me!

*Speeding up the music. They are planning to re-cart all the music, speeding it up to make time for more songs/hour. Can they really make a reasonable amount of time this way without making the station sound horrible? I was under the impression that stations had stopped doing this years ago!

*Editing songs to make them shorter/using "radio versions." This station has gone out on a limb to play "correct" versions whenever possible. This meant that full-length album versions of just about everything were played. When the station played "Hard to Say I'm Sorry," they also played "Get Back" because they were together on the album. Listeners have grown to expect full versions from the station. My concern is that they will notice cut versions on the station, and that they won't like it.

I'm pretty upset about these changes because the station has typically sounded so good. It is engineered well, sounds like a million bucks, and many of the people are terrific. I wish only well for the station and it's people, and I'm afraid for both... (I'm afraid escpecially for the former, since there has already been major housecleaning.)

I'm interested in your thoughts... am I justified in my concern or am I overestimating the audience?

Thanks,
Alan

I believe Rush's rock-jock pseudonym was "Paul Christy" not to be confused with "Jeff Christy" who worked at Super CFL in Chicago back in the 60's... Rush got chewed out back in '69 by his PD for making disparaging remarks about Democrats after the Democratic response to Tricky Dick's State of the Union speech. Of course, today, Clinton's policies put him to the *right* of Tricky Dick, but Rush *still* doesn't like him. Go figure.

Stop hitting me, get that light outta my eyes. If I go down I'm taking you with me!

Yeah, it was about 18 years ago. I started there just before the whole thing about Love Canal broke national. What a great time it was to be alive in Niagara Falls with chemicals buried everywhere. Of course, being so close to the Falls, Chamber of Commerce guys, who had all of this great news to deal with, didn't have very far to drive.

I worked with some pretty neat guys back then, Joe Chille (great guy), Doug Hawkes (good friend & a wonderful talent & teacher), and the Voice Of Niagara...Tom Darrow. Poor Tom, after the Miss USA Pageant left Niagara Falls for good, he checked into the VA Hospital's habitual monkey spanker wing. When the pageant was in town, Tom was getting more than John Holmes and Ron Jeremy combined, with only 8% of the combined plumbing.
WJJL was a proving ground for some great Buffalo talents...I sometimes remeber my stay there with the fondest of memories.

Magoo

....you mean I haven't told this story here???

I worked with Rush during his first Kansas City tour in
1976 at KUDL-AM/FM. I was interning at KUDL-AM as afternoon
news producer and did 2 minute local newscasts on KUDL-FM.
He was indeed a "shock-ish" jock on KUDL-FM, "DISCO 98",
doing middays as "Jeff Christie". (I used to go into
hysterics when he'd look straight at me, and introduce
something like "Elton John...someone shaved my wife
tonight...on Cuddle FM." He also did a Sunday night talk
show on the AM.

Most people who have ever heard me on the air know that
while God blessed we with talent and wit, he did not give me
the greatest voice in the world. Rush, er, Jeff, er, Rush
used to say on the air that "One of the reasons I like to
have Wyatt around is that he makes me sound like a
Bass-Baritone." When I had him on my morning show shortly
after taking WZEP talk five years ago I mentioned this to
him, and pointed out that one of the reasons I wanted him on
my station is that he makes me look svelt.

74. FCC/NAB Join to Silence Free Radio Berkeley

Newsgroup: rec.radio.broadcasting
Date: 1996-01-03 00:00:00 UTC
From: frbspd@crl.com
Message-ID: <4cdem9$1gd@vixen.cso.uiuc.edu>
Source record: 27486

****

MEDIA RELEASE FROM FREE RADIO BERKELEY

FOR IMMEDIATE RELEASE, TUESDAY, JANUARY 2, 1996

****

FCC and NAB Join Forces to Silence Free Radio Berkeley

One week after filing a motion in Federal Court asking for an injunction to stop Free Radio Berkeley (FRB) from broadcasting, the Federal Communications Commission (FCC) has been joined by the National Association of Broadcasters (NAB) in its effort to stop the growth of the micro radio movement across the United States. By filing a "friend of the court" ("amicus") brief the NAB now stands in support of the FCC motion to enjoin Free Radio Berkeley.

Free Radio Berkeley has remained a First Amendment thorn in the side of the FCC since its ... FIRST broadcast on April 11, 1993. Since the FCC's motion for a preliminary injunction was denied by a Federal District Court on January 20, 1995 the micro radio movement has continued to grow, giving the people of this country access, almost for the first time to the air waves. This joint action by the FCC and NAB sets the stage for another First Amendment confrontation. The case will be heard District Court in Oakland, California on February 2, 1995 in Courtroom #2, at the Federal Building, 13th and Clay streets. A free speech support demonstration will start at 9:00 AM, the hearing begins at 10:30 AM.

Since the beginning of this legal battle the FCC has steadfastly refuse to recognize the merits and constitutiona issues raised by Free Radio Berkeley. Now they seek to have Free Radio Berkeley and Stephen Dunifer permanently barred from the airwaves without ever letting a court even consider our substantive constitutional arguments.
.
Luke Hiken, Dunifer's attorney, filed a responding brief on behalf of Free Radio Berkeley on Friday, December 22. It was accompanied by a supporting brief filed by the National Lawyers Guild'S Committee on Democratic Communications (NLGCDC) on behalf of itself and the Media Alliance and the Women's International News Gathering Service (WINGS). Another amicus brief will be filed on behalf of Free Radio Berkeley listeners, community organizations, and other micropower free radio stations.

Speaking for the National Lawyers Guild Committee on Democratic Communications, Attorney Alan Korn commented,

"In spite of the Communications Act's requirement that the FCC regulate the airwaves "in the public interest," and that they ensure the best use of new technologies, the FCC refuses to promote citizen access, arguing instead that it is more "efficient" to allow corporations and the Rupert Murdochs of the world to control the airwaves. Meanwhile, merger mania in the broadcast industry continues unabated. At no time in our history have so many broadcast stationns been controlled by so few. Entire communities, cultures and ideas are now systematically excluded from the airwaves. It is only by reclaiming the airwaves by direct grassroots action that the American public can regain its voice and begin to engage in true self expression, which is the essence of self-government. This is why the National Lawyers Guild Committee on Democratic Communications is committed to fight for the legal rights of Stephen Dunifer and Free Radio Berkeley".

Speaking for Free Radio Berkeley and as the named defendant, Stephen Dunifer said:

"With the outrageous claim that the Federal Court has jurisdiction to issue an injunction against me, but does not have jurisdication to hear my challenge to the constitutionality of the FCC's rules barring low power radio, the FCC is attempting to shield itself from judicial scrutiny and deprive me of my First Amendment rights and due process. Who are they to determine what is in the public interest when their own chairman, Reed Hundt has stated that 'the FCC 's current implementation of the public interest mandate is intellectually indefensible' ? Free Radio Berkeley and all the other micropower broadcasters will not be silenced by this by this self-serving cabal of corporate broadcast media interests and their lackey, the FCC. As the guardian of the airwaves as a public trust, the FCC is guilty of desertion, reckless endangerment and dereliction of duty. What are they going to do to stop this movement - make the possession of a transistor a felony offense ?"

Allen Hopper, another member of the legal team stated. "

The FCC's audacity is amazing. They themselves have gone into federal district court, and have invoked the jurisdiction of the court to ask for their injunction against FRB. Now they argue that the court doesn't have jurisdiction to determine whether the regulations their injunction request is based upon are constitutional. They are essentially telling Judge Wilken that she has jurisdiction, but if and only if she agrees to grant their injunction. Otherwise, says the FCC, "no jurisdiction." The FCC's audacity is even more incredible when you look back to their position before the 9th Circuit Court of Appeals in the case of Dougan v. FCC, where Bill Dougan challenged the FCC's regulations in the Court of Appeals; the very court the FCC now argues has "exclusive jurisdiction" to hear challenges to their regulations. In Dougan, the FCC argued to the court that "Jurisdiction to decide Dougan's arguments is vested in [the] United States District Court." The FCC's blatant attempts at forum shopping, and at evading judicial review of their unconstitutional ban on micro radio, should and will be rejected by the Court. We believe that the Court will deny the FCC's request for summary judgment, and we are

ready for a trial on the merits, at which we will prove that the FCC's ban of micro radio is not in the public interest, and violates the First Amendment.
"Seeing the NAB filing an amicus brief supporting the FCC reminds me of the argument that the FCC made when the NLG's CDC filed its amicus brief: that the court should refuse the brief because the CDC and FRB attorney Luke Hiken are "one and the same, interchangeable." That charge is much more accurate when applied to the NAB (the lobbying arm of the corporate media cabal) and the FCC; they really are two heads of the same monster."

Copies of all legal documents are available upon request.

Thanks, I did look in the manual, but couldn't find any hints on
reducing interference other than interference caused to other devices by
the speakers.
A shielded cable between the speakers didn't work much better,
but since coiling up the slack the situation has improved to where I
can't hear the station above the background noise - poor antennas
obviously have their use too :-)

I received an aircheck from a friend of 101.9 The Fox from Melbourne, Australia. I'm trying to identify the jock I heard...I believe his name is Mark Malloy? He's the afternoon guy on that station...the tape is from last year sometime. If anyone can assist with details, I'd appreciate it. Also...if you want a copy (it's a 90-minute, I believe, unscoped), e-mail me.

Larry Glick was moved from nights to afternoons at WBZ...(Where a lot of the long-distant-listeners couldn't hear him like they could at night..)

After about a year...he got hired to do middays at WHDH. Then eventually to nights at WHDH...and then he announced he was retiring.

There continues to be talk that he may re-appear...But I'll bet Larry is loving retirement & keeping busy...

I recently posted a question in the OTR mailing list asking about Gene.
One of the respondents (I forget who, sorry) said he had died five years
ago. And another mentioned that he's in the callbook.

I hope the former is wrong. But both could be right!

BTW, if anyone knows of a Gene Shepherd page, I'd like to link to it from
my WDHC page.... http://www.univox.com/radio/wdhc.html

Happy new year!

Till I was 13 I lived just 2 miles from the WKBW "towers of power" (aka the transmitter site). The signal would overpower our radios and we'd have to listen to the station on 640 instead of 1520 to get a clear signal!

The antics of Joey Reynolds and Dan Neverith were often the subject of our lunchtime talk at school....Not just D.J.'s these guys ENTERTAINED! Listening to KB was like hearing a morning show any time the radio was on!

We moved to Florida in 1965 and I could only hear KB a little each night. Still it gave me some idea what was going on back home.

Awhile back I got a chance to listen to Joey on WBZT 1290 in West Palm Beach. At a time when I really needed something to cheer me up there's Joey who sounds just about the same as he did at KB. I've never met the man but I hope he knows he and the others who made "WKBW one of America's 2 great radio stations" was appreciated!

83. Fwd: McLuhan "Projections" For 1996

Newsgroup: rec.radio.broadcasting
Date: 1996-01-03 00:00:00 UTC
From: WhodaguyRJ@aol.com
Message-ID: <4cdemo$1gv@vixen.cso.uiuc.edu>
Source record: 27495

As we say in Hawaii, folks, "Hauoli Makahiki Hou (Happy New Year.') Attached is from the monthly newsletter from some McLuhan disciples with some forecasts about what's around the bend.

Interesting concepts to ponder.

December 20, 1995

The "Official" Top Ten McLuhan Center Projections for 1996

1. The Internet Follies

Projection: Business media will start to make fun of firms and individuals who have mis-read and mismanaged the Internet "phenomenon."

Reasoning: The Internet is very real and potent, but the media and public typically "over-expect" from new technologies by as much as two to four years. There is a lot of Darwinian stuff that the Internet has to go through before any of the capital investments expended in 95 will be justified. Many large firms, which should have known better, made fools of themselves.

2. Millennium Madness

Projection: The Millennium is coming. Look for a segmenting into two groups. The "scare-mongers" (who may be aided and abetted in 96 by a REALLY serious quake somewhere); and the "award-givers," who, ably assisted by mainstream media, will begin their "Best of the Millennium" award presentations.

Reasoning: Odds favor a bad quake SOMEWHERE; and, as for the "award-givers," the traditional media need a good hot story that has a multi-year life cycle.

3. Generation GAAAAP

Projection: Media (and sociologists) will notice that the generation gap is wider than at any point in recorded history.

Reasoning: As McLuhan said, when you move at the speed of light, a week is like a year. Teenagers today are older than their parents.

4. Doctor Against Doctor

Projection: The medical profession will break down, and internal wars will start.

Reasoning: Take the politics of HMOs, add the fact that the medical profession has not exactly surpassed itself in recent years (more cancer today than when the Cancer Society started!) and you have the ripe ingredients for conflict and dissent.

5. Gold Moves

Projection: Gold will break into a new trading range.

Reasoning: The experts who say that the "New Economy" doesn't need a gold standard should cut back on their Melatonin. Look at the Swiss franc. Demand/supply imbalances have not been reflected in the market -- so far. Inflation is not dead -- and it is quite possible to have pockets of inflation within a larger disinflationary trend.

6. Violent Pacifists

Projection: Groups with otherwise peaceful goals will seriously undertake to hurt people.

Reasoning: As McLuhan said, electronic technology scrubs off identity. These conceptual "holy-rollers" will not be able to enjoy their smugness unless someone else pays the price.

7. Tigers Roar

Projection: Asian tigers, including India, start to may hay while the sun shines.

Reasoning: The US election year will give the Asian Tigers the stability they have long needed. Previous predictions about this group were 2-3 years too soon.

8. UFOs: The Plot Thickens

Projection: More data will be released from a wide variety of conflicting sources.

Reasoning: Duhh...

9. History Rewrites Itself

Projection: Archeological find which calls into question our entire concept of history.

Reasoning: Actually these have come up before, but never has there existed an information delivery mechanism to get the word out before the friendly

museum curators of the world get a chance to sweep
things under the rug..

10. Roaring Nineties

Projection: 1996-- a good year around the world.

Reasoning: Yes, Virginia, any resemblance to the
Roaring Twenties is NOT coincidental.

Unofficial Stock Market Pick for 96:

Eventually there will a need to be have standard
graphic format on the Internet to accommodate 3D and
VR. We like Fractal Design at this point, and think it
bears close watching.

richwood@commspec.com writes:
#RR>Rush will tell you that he is an entertainer, but the content of his
#RR>show tells people that he is a source of reliable political and news
#RR>information. I don't just mean to pick on Rush, either. He is just
#RR>the most visible target.

I think most people who believe heavily in Rush, are just inclined to
believe right-wing sources over center- or left-wing ones, period. They've
finally found a major voice that validates their own opinions, and they're
happy as a snake about it.

Actually, the content and accuracy of the show tells me he's an
#entertainer. :) When he gets into areas like the environment and
#argues that there's no hole in the ozone layer while scientists are
#actually measuring it, I don't see accuracy. I see an entertainer. Not
#much different than Jane Fonda shilling for the whales. Neither one has
#any expertise in those areas.

Whereas I don't feel that Rush is an environmental expert at all, I
view his statements as a populist backlash against the "stop driving
today or we'll all die!" crowd. It's getting more and more difficult
for the common person to separate true environmental problems from
media- or activist-inspired scare-stories

(I had a recent discussion with a coworker, who was concerned about Electro-magnetic fields
from electric cars being a serious danger. Right!
Anymore than say, the electrical system in conventional automobiles?)

When I hear that all Democrats are bad and all Republicans are
#good, I look at Newt Gingrich's sense of ethics and I see Rush as an
#entertainer. A partisan one, for sure, but just an entertainer. To me,
#reliability requires some sense of objectivity. When every opinion is
#colored by partisanship, it's hard to find reliability in anything more
#than the assurance that Republicans will never do anything bad. Or,
#more realistically, that Rush will ever talk about it when they
#invariably do.

And his response to that would be along the lines of, "Well, the rest
of the media picks on Republicans harder than it does Democrats, so my
partisanship is just in response to the biases in other media".

(Do I think the media is biased? I don't know, and I don't really
really have the inclination to sit down in front of the news and
keep a running tally of instances of "bias". I do get the general feeling,
though, that they lean left on social and moral issues, but lean
right on economic issues).

In my area of the world, Sen. Alphonse D'Amato is a joke whenever
#ethics is discussed. We just don't see the two as compatible. To see
#him dog Clinton for the same kinds of things he, himself, has been
#investigated for is a very strange sight. Elmer Gantry and Jimmy
#Swaggart would be proud.

A lot of US political discourse has degenerated to the "root-root-root
for the home team" level. I guess it's ok for professional or college
spectator sports; it seems counter-productive in setting policies we all
will live by.

#RR>I believe we _should_ have a responsibility to be honest and
#RR>straightforward, but we all know that matters not.
#
It appears this is a matter of errors by omission. Laura doesn't
#claim a degree in psychology any more than Rush claims to be a
#political scientist. They're entertainers. Until either one attempts to
#perform brain surgery, we're probably all relatively safe. Though many
#have suggested listeners have been Limbaughtomized.

Dr. Laura claims to be a "licensed marriage and family therapist". Whether
that requires a degree in psychology (as opposed to simply passing an
examination) is something I don't really know (also, the exact requirements
may vary from state to state).

I don't remember Rush ever claiming to be a "political scientist"
(whatever that is--in my humble opinion, any title or line of study
that has the word "science" tacked on to it, probably has very little
actual science in it). He has claimed that "this show is about what
I think about" and similar statements.

"...political talk shows are like soap operas. You can miss a month
of the show and still come back just where you left off."
Amen...and that's the biggest problem the format has. It's got
to keep renewing itself by keeping in touch with new develop-
ments, information, and viewpoints...it has to BREAK stories, or
at least move them to the front of the public's awareness, in-
stead of just providing heavily filtered and predictable comment
long after the fact. If I don't bring my listeners something or
someone they haven't heard about before, and do it consistently
day in and day out, I feel I've let them down. If you don't leave
your listeners with a feeling they may have missed something
if they even missed one day's program, you're not doing the job
right. (That's not by any means an original insight with me...it's
something that a lot of the best hosts, PDs and producers I've
ever been in contact with, all agree on.)
Sure, have an identifiable viewpoint...that's crucial to your
image as a personality. But have something new to say...

If the following is accurate one is led to believe that
reports of Shep's demise are highly exaggerated.

***

>Date: Wed, 24 May 1995
>To: radow@netcom.com
>Subject: Jean Shepard

Just an update on Jean Shepard. Got a call today from another Jean Shepard
fan Barry Farber who let me know that Shep will be at Princeton University
this Friday May 26th at 8PM for a "concert" tickets can be bought from WPRB
FM by calling 603-258-3655 for $16. I've got a call into the station to see
if they can help me with an address to get in touch with Shepard directly.
Thought you guys would be interested in knowing about the concert. I can't
make it but if anyone out there who does go see Shepard if you can get an
address and telephone number from Shepard it would be greatly appreciated.
Hope if anyone goes they will share how it was with the above mailing list
which represents all those who have responded to my e-mail inquiry about Jean
Shepard. Thanks

Here in Chicago, Mitzi Miles does such a show (it's such a hokey concept, but she does her best... and she's a true talent) on Mix 101.9, WTMX. She can be reached at wtmx1019@aol.com. What's ironic is that this show airs on a station that is trying to be much hipper than the run of the mill AC... they've dumped Mariah and Michael in favor of Toad the Wet Sprocket, Melissa Etheridge (no "Your Little Secret" yet...) and the Cranberries (no "Zombie" yet...), playing only soft rock that's had AC airplay. The show seems a little incongruous in that format.

Of course, I'm waiting for them to add Psychedelic Furs, Depeche Mode and Alice in Chains. Not holding my breath, though...

Or it could be that the audio is decoded on the tuner board in the usual
manner with a descriminator and feed to sound card's analog input. Since
the analog input is high impedience and unbalanced, you could definately
pick up noise from the digital circuits inside the computer.

) in Colorado Springs is
hot ac. They are in competition with another station (KKMG). What KVUU
has done, utilizing the wizard for windows system that all of our stations
are run by, is speeding up the music by 3%. It actually sounds more
upbeat than KKMG, and listeners like listening to KVUU, in their minds,
the music at KKMG is dragging. It's a clever trick.

I have never understood the hype over playing the (as you put it
"correct), album version of a song. The only people who will even notice
are the maybe 5% of your audience that owns the album anyway. The
station I work for (Hot AC/CHR) has been moving away from the album
versions toward edited versions for the past couple of years.
Complaints? Few to none. Many songs seem to employ the "infinite fade"
syndrome, ie chorus repeated 4,136 times to stretch the song out by 2:30
or so. Fade it early, who's gonna miss it? Hot AC/CHR is supposed to be
a fast-paced format, and frankly, album versions contain a lot of
self-indulgent fluff on the part of the artist.

While I agree that pitching up songs is annoying (and I thought had gone
out with 70s) I see no problem with edited versions of songs.

101. Orban 8200 (digital optimod)

Newsgroup: rec.radio.broadcasting
Date: 1996-01-04 00:00:00 UTC
From: Mike <miker@nrv.net>
Message-ID: <4cg147$oj1@vixen.cso.uiuc.edu>
Source record: 27367

Are there happy 8200 owners out there? We installed one a couple years ago and removed it a couple months later. It just could not compete in an agressive market. The folks at Orban told me that it should blow the analog unit away and indicated that we were the only ones unhappy with it. I have spoken to several engineers sence then and all had the same opinion of the unit as me. I also find it hard to believe that Orban is unaware of this. I think 10k is a little high for a dust collector.

I also heard that CRL is doing it right on their unit. I never liked their analog equipment but maybe this is a change. I wonder if they would take an 8200 in on trade? Well I can dream can't I ?

Please send me your opinions on the box and I will compile the results making them public here.

Mike miker@nrv.net

102. Public resource?

Newsgroup: rec.radio.broadcasting
Date: 1996-01-04 00:00:00 UTC
From: marty.tabnik@tsbbs.com
Message-ID: <4cg148$oj2@vixen.cso.uiuc.edu>
Source record: 27368

JO> johnross@halcyon.com (John Ross) writes:

JO> My earlier comments about the fundamental flaws in American
JO> broadcasting were based on a couple of basic premises:
JO> 1) The broadcast spectrum is a public resource.

That is a hangover from the planet's disastrous flirtation with
Socialism. It makes as much sense as saying
Land is a public resource.

Government is rarely a good steward.

Some of us still believe that every broadcaster should provide
"community service". Oddly -- or perhaps NOT so oddly -- this
seems to resolve into discussions of government affairs.

The very idea that a broadcaster might be serving the community
by broadcasting Frank Sinatra or Rush Limbaugh or Mario Cuomo
or The Beatles or <shudder!> rap music is not even considered.

Ironically, such PA shows wind up in the pre-dawn/post-dusk "Sunday
Ghetto". Even more so, stations that devote themselves to Public
Affairs, news, or religion are NOT expected to offer Mozart,
McCartney, (Dean) Martin, or Mike Reagan during those hours.

The philosophy of "public resource" is merely an elitist excuse for
a tiny minority to prescribe for the majority. Ironically, that
minority is usually better served by free competition.

Technology continues to obsolete such Command&Control philosophies as
those that deem the spectrum "a public resource". Whether it's the
Internet or Cable (to name just two developments in this generation),
regulation continues to deal with the issues of the previous decade.

Cable offers such services as CRN (Cable Radio Network) and DMX
(Direct Music eXpress -- with DOZENS of CD-quality commercial-free
music channels). The availability of radio (and TV) on the 'net
is just beginning.

Meanwhile, Cable MSOs (multiple system operators) continue to swap
systems in an effort to consolidate their way to a critical mass
that will enable them to effectively compete with LECs (local
exchange carriers -- your current local telco). IXC (IntereXchange
Carriers) prepare to compete with your LEC. And LECs are champing
at the bit to offer both cable and long distance services.

Not to mention the fledgling DBS (Direct Broadcast Satellite)
systems offering cable-competitive services today and who knows

what else tomorrow.

Command&Control by government has proven a dismal failure.
It's time to move on to the new world of freedom and competition.

From: robert573@dallas.email.net
Message-ID: <4cg14d$ojc@vixen.cso.uiuc.edu>
Source record: 27369

My thoughts: I don't think the practice of this has stopped. I think a lot of the top 40 stations especially, still do it...

Now, as for the comment about "correct" versions vs. radio edits. Most stations use radio edits. I have no problem with that, but what I DO have a problem with is that you can't buy the radio edits on the album! I have ALWAYS been very frustrated with buying a new CD only to hear that I have the "album" version with no "radio edit" version.

If the percentage of the rate of speed increase is not too drastic, most listeners probably won't know/care. Unless it starts to sound like Alvin and the Chipmunks, of course....

Just my $0.02 worth....

104. Low power continuous loop info stations

Newsgroup: rec.radio.broadcasting
Date: 1996-01-04 00:00:00 UTC
From: "D. Citron" <dcitron@univox.com>
Message-ID: <4cg14f$ojf@vixen.cso.uiuc.edu>
Source record: 27370

I'm not sure what the correct technical term for the above is, but I mean AM BCB stations continuously playing a loop of tape with info such as parking lot directions.

In south Florida, I believe that Miami and Fort Lauderdale-Holllywood international airports have such stations. (Or maybe it was just one of the airports!) There's also one at the Sawgrass Mills factory outlet mall, in Sunrise, west of Fort Lauderdale.

I'm wondering if there is a list of such stations, and what other types of businesses use them.

I am especially interested in ones relating to malls. If you know of one, please let me know.

Hey, it's Sparki again. You might think that with this vast amount of radio knowledge that I have placed on this website, I have a lot of time on my hands. Well, you're somewhat right. When I'm not bowling, or watching Tom Snyder, Stephanie Miller reruns, SportsCenter, News 10 in Philadelphia (seeing how John Bolaris's hair looks like Elvis's), or 28 Eyewitness News here in Wilkes-Barre (whenever I see an I-team report, I think I'm watching espn2!), my ears are fine-tuned to a radio.

Here's what we NEPA-folk can get on the AM band after dusk.

530 CIAO Toronto?? (send me more info, please!!!)
540 CJSB Ottawa Are they still on AM??
550 WGR Buffalo
590 WARM Scranton
610 WIP Philadelphia
620 WTMJ Milwaukee I've only received it once.
630 WEJL Scranton
650 WSM Nashville
660 WFAN New York
670 WMAQ Chicago
680 WRKO Boston rarely
690 .... can't really tell if Spanish or French
700 WLW Cincinnati
710 WOR NYC
720 WGN Chicago
730 .... either Spanish or French after WNAK signs off
740 CBC Canada
750 WSB Atlanta
760 WJR Detroit
770 WABC NYC
780 WBBM Chicago
800 CKLW Windsor
810 WGY Albany
820 CHAM Canada
830 WCCO Minneapolis rarely
840 WHAS Louisville
860 C... French
870 WWL New Orleans
880 WCBS NYC
890 WLS Chicago
900 CHML Hamilton
910 WGBI Scranton
930 WBEN Buffalo
940 C... Montreal, I know it's English-speaking
960 WFIR Roanoke got it once

980 WILK Wilkes-Barre
1000 WLUP Chicago
1010 CFRB Toronto
1010 WINS NYC
1020 KDKA Pittsburgh
1030 WBZ Boston
1040 WHO Iowa
1050 WEVD NYC rarely
1060 KYW Phila
1080 WTIC Hartford
1090 WBAL Baltimore
1100 WWWE Cleveland; since I can't get don&mike, long live jeff&flash
1110 WBT Charlotte
1120 KMOX St Louis
1130 WBBR NYC
1140 WRVA Richmond
1150 CKOC Canada
1170 WWVA Wheeling
1180 WHAM Rochester
1190 WOWO Ft Wayne (please keep it 50k watts)
1200 WAGE Washington/Leesburg VA also got that once
1210 WGMP Phila
1220 WKNR Cleveland
1240 WBAX Wilkes-Barre
1250 WTAE Pittsburgh (picked up outside of WB)
1280 WADO NYC
1280 WHTK Rochester (just barely)
1290 CKBK Canada
1300 WJFK Baltimore (just barely)
1350 WSVY Norfolk Yes, this comes in clear at times!
1370 WXXI Rochester came in once
1390 WFBL Syracuse
1470 CHOW Canada
1500 WTOP Washington
1510 WLAC Nashville (barely)
1520 WWKB Buffalo (RIP eventually)
1530 WSAI Cincinnati
1560 WQXR NYC
1590 WQQW Waterbury CT came in once
1600 WWRL NYC
1660 WDJM NJ Yes, I picked them up, too, day and night.

Next time, I'll dig up my market rundown for Norfolk/VA Beach.
Gotta go. American Bandstand is back!!! On VH1, of course. Groovy.
sparki
tcsparks@rs01.kings.edu

OH!!!!!!!!!! By the way, I have some e-mail addresses for you!

(trying this again, AOL garbled my first attempt to send a note)

You have a golden opportunity across the road from the studios; the resources of an entire university. Not only do students always need projects, professors like a nice assignment and chances to publish something, even locally.
Get the business, marketing, or media students to survey listeners as to their preferences. Do they want more city/national/campus PSA's or news? (not do they want any, but content)
What would they like more of? What do they like? It shouldn't take too much work to review what you're doing, consider fine-tuning it, and write up a mission statement or outline of operations.
Make that your guideline, educate announcers in that, and explain that they will follow the format. That not only justifies what you're doing, it properly trains the student jocks in what's expected of them and why. They deserve an explanation, and you have an outline to follow which will help them understand as well as providing continuity in station operations.
That aside, the other posters here have a point; whether they're working in food service, parking control or station announcing, college employees follow rules, they don't make them.

I collect lots of old spots to play on my show on WUSB, Stony Brook- The Drive In Show. They go well with the old R&B and Rock & Roll music that I play.

I especially love those screaming drag strip spots- the ones about fuel injected nitro burning funny cars and the like. I have a bunch of different ones from all over the country but the ones I am trying to track down were for Raceway Park in Englishtown, New Jersey. I heard these as a kid on WPLJ, New York and can't stop thinking about em.

They used "Rock & Roll" by the Runaways (Joan Jett's old band) as the music bed and always started out with a speeded up voice screaming "Ah Ha Ha Ha Ha- Raceway Park!!!"

If anyone was one or more of these spots on tape (check your airchecks of NY stations from the mid 70s) please let me know. I have all sorts of neat stuff to trade in exchange

While we're on the subject of bad commercial copy, I worked for WIBA-AM in Madison, WI from 1972-74--MOR, heavy on news and PBP, NBC affiliate then, ran NBC Monitor a good part of the weekend.

Had quite a few live spots to do, and one of them had to fit in a :30 window during UW hockey games. It was for a butcher, "Pulvermacher's Locker Plant in Martinsville."

That stupid phrase was in the copy at least four times--it sounded ridiculous enough the first time, but it was dropped in almost every other sentence, as in:

"And when you visit Pulvermacher's Locker Plant in Martinsville, you'll find the widest selction of USDA choice meats."

I usually wound up carting that one.

The other one that drove me nuts was the first spot in a 15-minute noontime newscast. It was for a monument company and when the copy talked about "Rock of Ages" granite with the money-back guarantee, I'd almost lose it. I had this image of someone coming back from the dead asking for his/her money back.

That was another "live" spot that I carted ahead of time.

116. Madison WI radio update

Message-ID: <4cg144$oiq@vixen.cso.uiuc.edu>
Source record: 27382

The change that was announced a couple weeks ago for WMXF 96.3 Sauk City-Madison WI occurred on schedule at the turn of the year. They initially carried continuous Christmas music. Then, after Christmas, they turned to an all-Beatles format. The new format, which debuted on January 1, is satellite soft AC as "Light 96.3." I presume that there will be a call-letter change, but so far they are still IDing as WMXF (for their old "Mix 96.3" 70s oldies), using calls only on the hour.

Well it's that time of the year again for the Producer's Workshop. It will be held again this February 3rd (Saturday) at the Radisson Empire Hotel in New York City. In my opinion, this is the most intense workshop in the industry, and is a great help for all producers (especially talk or talk based).

Speakers this year include:
Elizabeth Dribben, CBS
Larry Kahn, Westwood One
Lorna Gladstone, PD Extrordinaire
Mike Harrison, Talkers Publisher
David Bernstein, WOR PD
Denise McIntee, WABC OM
Turi Ryder and Jay Diamond, Hosts
.....and ME!!!!

Again, this is one of the best workshops I've ever gone to, and very well worth the effort. There are special hotel rates and lots of FREE stuff to make it easy.
I'd love to see you all there!

E-mail me for more details, or call Valerie Geller at 212-580-3385.

Hamilton news: Sean Healy <shealy@uoguelph.ca>

1) CHML is running a new talk show from 12am-3am weeknights. Jeff Waterfield, the overnight DJ, is producing the show. I'm sorry, but I don't know the name of the host nor recognize him. The show, however, is local. [I also caught CHML identifying themselves as "Hamilton's News and Information Station" --- they've identified as "Hometown Radio" for quite a few years but with the introduction of the RRN, I suppose the change is necessary.] (He also added that it doesn't start at 12midnight;it begins after infomercials which regularly run after the 12 midnight news.)

3) CKOC(1150,oldies;Oldies 1150)in Hamilton,has dropped their sports programming. They bought the rights from Telemedia a couple years ago to air Toronto Maple Leafs and Blue Jays games. Telemedia lost the Maple Leafs(to Westcom's CILQ,107.1,AOR;Q 107),and CKOC picked up the Toronto Raptors this season to replace them. However, ratings must be down --- PD Navin Grant said that on a new "station feedback line", the majority of callers said they wanted to hear oldies and not sports. Thus, all sports programming(including sports updates) has been suspended effective immediately. (Also gone is Telemedia's Sportsline show which aired weekdays at 6pm; still heard on CJCL/The Fan 590 in Toronto.)(Thoughts:why would anyone want to hear them,when you can turn on CITY(ch.57)or CKVR(Barrie,ch.3;The New VR),which most cable systems in the area can get-or,where I am,the Empire Sports Network?. Sean also added that Grant's statement surprised him,because of the various contracts that would need to be gotten out of. In the Jays' case,it would have some leeway.)

*Back here:
-WMJQ(hot AC;Q 102),as noted in my year-end piece,has a new AM drive partner for Rob Lucas(who's also PD). Carol Williams segues from Metro Traffic to join Rob and newscaster Martin Biniaz. Rob had been going solo for the better part of a month,since Nancy Barrow jumped to crosstown AC WJYE(96.1).
-Re 97 Rock & the Bills ticket mess:Tony Violanti reported in Wednesday's Buffalo News that Larry Norton said on his morning show last Friday that the station wanted to do "anything we can do to make the game a sellout." Some thought that the station would buy up the remaining 10,000 tickets to last Saturday's playoff game with Miami(won by the Bills,FTR). Denny Lynch, the Bills' public/community relations director,said the lines at the team's ticket office slowed dramatically later that morning and afternoon-adding that the team got about 100 calls asking if it was sold out. Normally,that's where it would end. However,WKBW(ch.7)reporter Steve Boyd mentioned the incident,saying that "97 Rock said they were going to buy all the tickets-which did not please WGRF OM John Hager,who said that Boyd's statement "wasn't true. Boyd said we were trying to sabotage the

ticket sales." WKBW news director Chuck Samuels conceded that Boyd did use the word,but added "I find it hard to believe that 97 Rock has that much power,or that many listeners,to slow ticket sales."(Chuck,check the Arbitrons if you don't believe me.) Hager added that 97 "never said we were going to buy out the remaining tickets;it was a complete misunderstanding." (As noted,WIVB(ch.4)also reported the mess,though not in the manner Boyd did.)

*Another Buffalo TV station might be switching hands,as News religion reporter Dave Condren reported in the December 23 edition. Ft.Lauderdale,Fla. based Grant Television is seeking FCC OK to buy WNYB(ch.49;also translator W59BV in Rochester)and transfer its operation permit from its current owners, Tri-State Christian TV-who have owned the station since September,1989. WNYB GM Lou Fils said that if the FCC(which is still affected by the government shutdown)approves the transfer,the programming(mostly shows from the Trinity Broadcasting Network,with some local shows)will be switched to Ch.26 in Jamestown-which,according to an employee of Grant Television,has been bought by the company. Fils added that he wasn't aware of how wide an area could be served by the long-dormant station(here's a hint:not much). The buzz in the industry is that,if WNYB is sold to Grant,that it will go independent and affiliate with the WB(Warner Bros.)network.
Last year,all 4 major stations locally switched owners:WGRZ(ch.2;NBC 2) was sold by Tak Broadcasting to Argyle Broadcasting;WIVB(ch.4)from King World to LIN Broadcasting;WKBW(ch.7)from Queen City Broadcasting to Granite Broadcasting(which had a minority stake in the station to start with)and WUTV(ch.29;Fox/UPN)was dealt off by Act III Broadcasters.

Well, I just drove through there on Sunday (12/31), and all Eubanks said was "WGTZ Eaton/Springfield/Dayton". Oh well, that was a wasted trip (I'm kidding ...B94 Pittsburgh sounded good, Hot 101 Youngstown sounded excellent, Variety 96 was doing their top 61 of 1995 (with their 10-minute top-of-the-hour talk-up jingle in there), WNCI was great (but, with jock-talk between almost EVERY song!!!), and Jammin' 92 in Cleveland still has almost *no* processing (or, at least, no reverb or compression (actually, it's the *opposite* of compression that they don't have (quiet parts of songs *remain quiet*))))

Greetings once again from the land of Truman and great BBQ,

A couple of months ago (I'm really patient), I asked if anyone knew of someone that could transfer DATs to CD. I remember seeing someone talk about it, but I can't remember their name or email address.

The reason I want to know is that I have some good demos on DAT that I can't get to because I don't have access to a machine that plays them. If anyone can help me out it would be much appreciated.

Hello and happy new year folks,

I'm looking to get a satellite-delivered country music format for a station I'm about to become manager of, and would appreciate any input or suggestions, as well as possible contact info. I really like the format and sound of America's Best Country...can anyone else comment on other country format services, and what you like and dislike about them? (If I sound new to this, I am. Going from PD of a Christian station, which was all local, to mgr. of a country station at which I need at least overnights and weekends to be on the satellite.) Thanks a big bunch!

128. Elaine Viets fired at Post-Dispatch

Newsgroup: rec.radio.broadcasting
Date: 1996-01-06 00:00:00 UTC
From: ssimon9@ix.netcom.com
Message-ID: <4clc8k$db9@vixen.cso.uiuc.edu>
Source record: 27393

Long time St. Louis Post-Dispatch Everyday section columnist Elaine Viets was fired by the paper Tuesday after 23 years with the publication.

At one time in the 1980's, she had a radio syndicated travel feature.

Viets was fired when she didn't return to St. Louis after living in Washington D.C. since October, 1994, when she joined her husband Don after he was transferred to the nation's capital.

At that time, the paper allowed Viets to work out of Washington for a year, but said she must return to St. Louis in October of 1995.

Staffers at the paper tell me that her husband didn't want to move back from Washington. After missing the pre arranged deadline by four months, Post Dispatch Managing Editor Foster Davis took the decisive action, which was published on page 2A of the Jan. 3 edition.

Viets wrote her three time per week column on off-beat St. Louis features and people from the Post's Washington bureau, conducting her interviews on the phone.

While there will be no more daily columns, she will have features published in the "St. Louis" magazine insert each Sunday for the rest of the month, because they were written last month, and most of them have already been pre published.

She also hosted a few specials several years ago on KTVI, Channel 2.

No replacement has been named.

129. St Louis errors

Newsgroup: rec.radio.broadcasting
Date: 1996-01-06 00:00:00 UTC
From: Frank Absher <fabsher@siue.edu>
Message-ID: <4clc8k$dba@vixen.cso.uiuc.edu>
Source record: 27394

A recent piece on St. Louis radio contained a number of factual errors. It refered to KATZ-FM, which is still using the calls KNJZ. The AM station is KATZ. In a September format change, KNJZ took on the AM blues and soul format along with all its jocks. It is not running, as the article said, a satellite format. All music and jock patter is local.
The article also said something about the ratings of KATZ [AM]. The last book available in this market was compiled before the format switch. Hence, any available numbers would be for the AM's blues and soul format and not for its current talk format.

Oh, not an inane problem at all! Our solution at WINC (Winchester, VA) was to avoid putting the labels directly on the carts. A legnth of Scotch Tape (folded over at one end for easy future removal) went on the cart, with the label on the tape. When the cart turns over, the tape comes of much more cleanly! You can even put a piece of tape over the cart label to hold it on if it doesn't want to stick to the tape well.

Good luck!
Alan

I believe I've successfully used Ronsonol or other lighter fluid in the
past with good success. Be sure to dry the cart afterward so the
subsequent labels stick.

Some distributors, Crouse Kimzey come to mind, were selling a special
brand of label that has "just right" stickiness - holds firm until you
decide to pull it off, then peels off clean. You might call around to the
usual suspects (Bradley, Harris, Gen'l Store, BSW, etc.).

REGARDING THE ORBAN 8200 DIGITAL OPTIMOD
Without question, Orban broke the "loudness barrier" in FM processing with the 8000 first, and then the 8100. Bob Orban IMHO is still the best doctor of audio processing design on the planet. The 8200 was his first venture into digital processing. I would venture to say that even Bob and everybody else in this business who has worked with digital audio processing has discovered that we are still learning important lessons about manipulating ones and zeros.
Even with the various software updates released since the 8200 was first introduced, the box will not outperform the best analog concoctions available if your goal is to be the loudest thing on the dial and still be consistently listenable, IMHO. It will come close, but once you start "leaning on the loudness controls", it will fall apart with distortion byproducts faster than the analog. The reason for this in part is that digital clipping circuits have not been perfected to the point where they are as graceful and consistent as analog clipping. All of the digital processing designers are working on this......and probably in the near future there will be more precise algorythms developed that can handle the clipping functions more accurately and reliably. If you want that blowtorch sound at any cost, try either a Unity 2000 (yes it is an analog animal dressed in digital shorts and sneakers), or the venerable 8100 with Gentner analog prisms, a Cobalt Blue card 5, and some careful composite clipping. One interesting thing about today's digitally recorded music
(or music digitally RE-recorded for the new CD-cart machines
or hard drive record/play systems) is that it won't change pitch
even if the playback is speeded up.
So if you take any song, massage it through a Dyaxis or
some other form of editor to speed up the playback a few per-
cent, no one will notice---because the song is still on pitch.
The bits and bytes representing every musical note on a dig-
ital recording don't change...they just come at you faster
(or slower) if you change the playback rate. That MAY mean
we'll see MORE songs played back speeded up a little on the
air in the future, at faster tempo...because it's easy to do on
today's digital systems without sounding strange. More music
and more time for spot sets at the same time...a radio pro-
grammer's dream come true. (Makes me glad I work in talk
radio...)

I believe it is called "travellers information radio service". I
believe the rules require that they be just that...information for
travellers, they must not be recivable beyond a short distance from the
roadway (or parking area) they are supposed to cover. The rules I read
also indicated they cpuld not carry commercials etc, except for
information of interest to travellers. I believe the relevent rules
are in part 90.

Had quite a few live spots to do, and one of them had to fit in a :30
window
during UW hockey games. It was for a butcher, "Pulvermacher's Locker
Plant in
Martinsville."

That stupid phrase was in the copy at least four times--it sounded
ridiculous
enough the first time, but it was dropped in almost every other
sentence, as
in:

"And when you visit Pulvermacher's Locker Plant in Martinsville, you'll
find
the widest selction of USDA choice meats."

I usually wound up carting that one.
********** End of Forwarded Message **********

Try saying "Hobart Beach Post Veterans of Foreign Wars" late at

I enjoyed "Sparkie's" bandscan about radio at night in N.E. Pennsylvania.
Know I know why Channel 16 in that area uses the call WNEP-TV. I answer to
some of Sparkie's questions concerning some of the stations he listed.......

540 CJSB Ottawa, ON died in the fall of 1994, what a waste of a great signal.
690 CBF Montreal, QC is CBC-French net.
730 CKAC Montreal, QC French commercial station
740 CBL Toronto, ON CBC-English
860 CJBC Toronto, ON CBC-French (diplexes with CBL on same tower)
940 CBM Montreal, QC CBC-English (Flagship of the "Quebec Network" of the CBC1590 WQQW
Waterbury, CT died nearly 5 years ago and will NOT return. Was a
major rocker in the 1970's and was one of the HI-Fi
stations in the newly-expanded AM band of 1500-1600
in the 40's. Formerly, WTBY et. al. A great signal.
1660 WJDM Elizabeth, NJ (not WDJM....a station licensed to Framingham, MA on
91.3 from Framingham State College) A monster signal
here in Boston at night. Nice music in stereo.

Hope I was of help in answering Sparkie's questions on his bandscan. Now in
terms of American Bandstand..... AB was probably the LAST ABC show
to go color, according to Dick Clark in 1968. I'll betcha you din't know that !What a great
piece of Americana, color or black and white.

73's !

One of the things that amazes me is how often the subject of "Whatever happenned to..." comes up.

Both in the radio station...AND here in cyberspace!

Some jocks have made such an impression on us...And then they just disappear! ...And we find ourselves wondering if they 'retires', died, or selling real-estate.

Do you think they leave the business never looking back? Or do you think they really would love to be still in the biz???

Just a thought!

[Moderator's Note: There is a web page called 440 Satisfaction, that deals with 'where are they now' stuff. Dont have the URL handy, though. Bill]

35+Men????

I think you need to listen to WLLZ before saying that. This is not a male targeted format that they are playing.
True, they will be going after some of the WJZZ crowd, but I think they will tend to pull more female, from stations like WNIC.

No station, IMHO, can call themselves a Jazz station and then play Whitney Houston! Kinda like a heavy metal station playing CSN&Y!!

Yes, I work in the Detroit Broadcasting market, CE for WXYT. We had an FM a few years ago and tried the Wave format. Failed badly, as did another stations attempt at a sim format.
That type of formats listeners don't have time to waste on diaries. The WLLZ format as it is tends to be "wallpaper".

Cheers,
Neil

Hardly.

NAC (the core format that WLLZ is supposed to be) is one of the hottest niches going right now. Well programed NAC's are racking up numbers in most markets. KC is witnessing a station go from an 'also-ran' suburban country signal to the top-10 in money demo *in one book*.

Chicago's NAC has been in the top 10 consistently.

Now the point about WLLZ playing Whitney, that may be a little bit of an AC skew, but the station is new and will be fine tuning that music mix. Also realize that some NAC's play a lighter more accessible mix during the day and a more jazzy mix at night. WNUA in Chicago does this.

NAC is a very broad-based format. It attracts listeners across racial, age, and economic lines and scores very well with urban money-demo listeners. My half-sister is in her sixties and she swears by WNUA.

So while WLLZ may not sound all that appealing *yet*, give them some time and don't write off the NAC format. It is big and getting bigger.

Having worked with WMXV as the station's research company of record, I can
attest to their focus and hard efforts. PD Steve Weed and MD Linda Silver
in particular are outstanding at what they do and are responsible for the
dramatic improvement in Mix 105 over the past six months.

How about the continuous loop stations popping up on the FM band.
Apparantly, Avis has an "experimental" license to do this from the FCC.
Here in Boston they are on 88.5. A number of engineers in this market
are concerned about this type of activity especially in the educational
part of the band.

[Moderator's Note: Hertz can get an LPFM license but try to get 5
watts to serve a community and you will be told no such license is
available. If you do it anyway, you are a pirate. But if you are the
nation's largest car rental corporation, hey... no problem. What is
wrong with this picture? Bill]

Was told of a station that tweaked music and promoted "61 minutes of music every hour!"
Of course only other broadcasters would know what that actually meant.
Just like only the competition knows enough to sneer, when you promote "another hour of commercial -free music!!" that you're obviously not making any money in that daypart.

There is a terrific product I discovered when my wife came home from
surgery some time ago....it should be available at a medical supply
house....it is designed to allow you to get the "sticky" from bandages off
your skin and property. I can't exactly remember the name, but it's
orange liquid and it's called something like "Dehesive" or something like
that. I use it all the time when buying new CD's and wanting to get the
cruddy adhisive from stickers off the plastic. I have alsoi used it to
get adhesive off carts----it leaves the cart plastic like new and totally
clean.

Hi Roger,

When I get new (or old) carts , I put scotch tape around the front of the cart
(long enough to cover the length/date sticker) and then another piece of tape with
a little wing on the side (just fold it a couple of times).
This way, the cart label always sticks to the cart and when you have to take
the label off, you just peel the scotch tape and the label's gone.

Cheers,

Fred

155. More Beach erosion at KKBH, San Diego

Newsgroup: rec.radio.broadcasting
Date: 1996-01-06 00:00:00 UTC
From: San Diego Radio Watcher <sdradio@zNet.com>
Message-ID: <4clhie$gho@vixen.cso.uiuc.edu>
Source record: 27420

The following is YET ANOTHER exclusive from the San Diego Radio Watcher. This report, (c)1996, Christopher Carmichael. Any use by media, please credit!

A winter storm rolls into San Diego's Beach, KKBH, with more erosion. Big Ron O'Brien has been relieved of morning duties at the 70s format station. He came in and replaced morning personality, Brian Whitman who was let go two and a half weeks ago, along with PD Jack Silver.

Also terminated today was Gwen Roberts, Operations Manager of of the Gannett station. Current PD Jon St. John will assume wake-up duties until a permanent morning man is hired.

Speculation around town is that Shotgun Tom Kelly, currently at KCBQ-FM may be the man. But confirmation from Kelly says he isn't considering a move to that slot at the present time. [KCBQ is in the process of being sold to Par Broadcasting]

KKBH is slated to change it's musical direction tomorrow with an AC "feel" going head to head with KYXY. Jessie Bullet, currently PD at KCBQ is rumored to be landing at the station too.

Calls to the Gannett station were not returned.

+--+
(c)1996, Christopher Carmichael, Any use by media is granted, but PLEASE credit.

156. MORE CHANGES AT KMOX, ST. LOUIS

Newsgroup: rec.radio.broadcasting

FROHLICHSTEIN AND CURRY BOTH OUT AT KMOX

by Scott Simon

ST. LOUIS -- The final week of 1995 also was the final week on the air for long-time KMOX regulars Tripp Frohlichstein and Gordon Curry.

Curry, the affable Australian, had been the station's Hollywood gossip correspondent for at least 20 years, dating back to the heyday of the "Jack Carney Show."

With his accent and wry sense of british humor, he quickly became very popular with KMOX listeners. Even after Carney's death in 1984, Curry's developed a rapport with each subsequent on-air host.

Frohlichstein, owner of a St. Louis-based consulting firm, Media Masters, had been on KMOX since the late 1980's as a TV critic, usually twice a week.

His reporting of local St. Louis media developments were accurate, often times scooping their public relations and marketing departments, and his reviews of upcoming local and national shows were concise and informative.

Frohlichstein will continue to air TV feature interview for the next couple of Saturdays at 7:53 a.m., because they were already recorded.

It's not known if other per diem talent at KMOX will be axed, such as Dave Finklesteins' automotive tips, but insiders say the ax will continue to be swung as KMOX continues to soften their voice in St. Louis, this a play on their long-running promo standard.

Meanwhile, no new news from KSD-AM as to an afternoon talk show host. New program director Steve Moore continues to co-host it with morning traffic reporter Dan Strauss.

A couple of specialty shows have been added on the weekend, such as a outdoors and gardening show, and news of the week review.

159. SDRW: Top Stories of 1995

Newsgroup: rec.radio.broadcasting
Date: 1996-01-06 00:00:00 UTC
From: San Diego Radio Watcher <sdradio@zNet.com>
Message-ID: <4clhig$ghr@vixen.cso.uiuc.edu>
Source record: 27424

San Diego radio in review: 1995
by Chris Carmichael, sdradio@sd.znet.com

Top stories for 1995:

1. XETRA "Xtra Sports" 690 nabs CBS sports package from KFMB, San =0D
Diego; and Group W/CBS O&O KNX Los Angeles. With its 77.5kw signal, =0D
Xtra Sports Pigs will enjoy the complete package on one station in =0D
southern California. [Xtra does admit it is still fine-tuning the =0D
signal.] The station is the most listened to sports format of=20
any radio station.

2. After a three-year move that included some fancy station juggling =0D
in the U.S., and Mexico, TriCities Broadcasting moves its 95.9 signal =0D
to 95.7, and KUPR, Carlsbad, started to "change everything." The AAA =0D
format station exposes SD county to new bands, no schlock, and a =0D
personal feel. It will be a ratings winner in '96.

3. Compass Media sells KCBQ AM/FM plus other properties to Par =0D
Broadcasting. While being held up by the FCC closure, the sale is =0D
slated for completion soon. Compass will receive Par's 102.1 station =0D
in Oceanside with a non-compete clause. Par's hard-rocker will become =0D
Rock 105. Par owns KKLQ A/F, KOGO, and KIOZ, all in San Diego county.

4. San Diego listeners respond: KSDO's Roger Hedgecock on-air =0D
remarks kicked in more than $3,000 for local schools at an "illegal" =0D
car wash. In seperate events, KKLQ's morning team of Jeff and Jer =0D
raised over $100,000 for OKC; gathered more than 2,300 bicycles; and =0D
filled a restaurant parking lot in Santee for Cliff the I.H.O.P =0D
spokesman. KFMB raises more than 4 tons of food during a December =0D
food drive. There are other examples from radio too -- but the bottom =0D
line is that San Diego radio listeners have BIG HEARTS and give and =0D
give freely.

5. Format changes: KCLX dropped rock and rolled into a 70s format, =0D
and changed calls to KKBH. The station started with a 2.9 and =0D
finished at a 1.7. KJQI entered the year as an AC station, switched =0D
to "Rock Mix 103, KMKX." While not a format shift, "Hot Talk" KOGO =0D
started the year with three local live shows on the weekday, but ended =0D
the year with an all syndicated fare. [Peter Weissbach, former PD, is =0D
now a syndicated talk show host; and Jack Merker takes the PD duties.]

6. Radio weaves a webby world: More and more stations either have =0D
e.mail, or are crafting a web of their own. The complete list starts =0D
at: http://www.geopages.com/RodeoDrive/1102

7. KFMB creates a ten-hour local live period punch: Stacy Taylor =0D
starts the afternoon drive at noon, followed by Ch. 8 and Padres =0D
announcer, Ted Lietner from 3 - 5. San Diego's other famous duo, =0D
Berger and Prescott, start drive home at 5 p.m., followed by a highly =0D
talented sports show with Hank Bauer at 8 p.m. "It's All Good!"

8. Gone from the airwaves include: Hal Abrams, Brian Whitman and =0D
Jack Silver [KKBH]. The entire staff of KBNN, the 48-watt "powerhouse" =0D
from Julian -- after the station was sold and dumped local programming =0D
for a syndicated religious fare. =20

9. Howard moves into San Diego. Stern's deal for the San Diego =0D
market on 91x [XETRA-FM] is reportedly way over $200k per year . . . =0D
and quickly captured the
18+ male audience. But, number one morning show belongs to KKLQ's =0D
Jeff and Jer.

10. Jacor moves into El Cajon: Former KECR-FM is currently LMA'd to =0D
the Ohio-giant, and is relaying WDUV, Brandenton, Fla. After the FCC =0D
offices re-open, and formal ownership is in Jacor's hands, expect now =0D
KHTS to shake up the AC/CHR format in SD.

160. San Diego Radio Watcher: 1.5.96

Newsgroup: rec.radio.broadcasting
Date: 1996-01-06 00:00:00 UTC
From: San Diego Radio Watcher <sdradio@zNet.com>
Message-ID: <4clhii$ghs@vixen.cso.uiuc.edu>
Source record: 27425

Here's the latest in waves from San Diego 1.5.1996

Storm clouds gather at the Beach:
As indicated in Thursday's post, the San Diego Radio Watcher disclosed that a major shake-up in personnel and sound at KKBH, 102.9, "the Beach."

In private e.mails to me, I am told that "it's not over!" and more station staff and possibility of management could be shown the door as Gannett tries to re-fine the 70s station in San Diego.

Speculation was raised when Shotgun Tom Kelly name was being tossed as a possible addition to the station. I called Shotgun today at KCBQ and he "wouldn't say" about a move to SD Beach.

While Shotgun wouldn't not confirm, several insiders at KKBH told me that he has been tapped.

Jessie Bullet, formely at KCBQ-FM has started at the Beach.
+----------

Pirate Radio in San Diego:
As previously reported in this column, Mark Jaggar, former KCBQ-FM mid-day host, is now at KFMB-FM [Star 100.7] in San Diego. All weekday afternoon he teased the audience with a "Pirate Radio Invader" in taking over the shift.

Jaggar, under the Pirate Boy guise, finally said his name at about 3:30 p.m. on Friday. Apparently, he will hold down the spot that Dave Smiley once held. Smiley has landed the morning drive gig at Star 100.7.

Congratulations to Clark and Terry Novak on a very-welcomed addition to their family, Reed Warren Novak. Clark is the MD and mid-day host at 95.7 KUPR, Carlsbad.

Any good Oldies Music Store should have it.
Also, you could try Alt.Oldies.Rock-n-roll Newsgroup for a copy in your
area, should there be a lack of record stores in your area.

162. 92.3 K-Rock (NYC) changes format to Modern Rock.

Newsgroup: rec.radio.broadcasting
Date: 1996-01-06 00:00:00 UTC
From: mnydrc@aol.com
Message-ID: <4clhiu$gi9@vixen.cso.uiuc.edu>
Source record: 27427

As of today, WXRK (92.3 K-Rock) changes format to Modern Rock, from their classic rock format which they have had for about 8 years.

The format change was actually announced throughout the country on the Howard Stern show. After his show, K-Rock officially went to the new format of modern rock.

As it stands, there are 7 modern rock stations in the area. Classic rock fans no longer have a full-time outlet for their music. It's now Stone Temple Pilots instead of Rolling Stones.

I've been puzzling about this. How is it that the call-sign/handle "KHI"
was on 3 different stations in the course of 2 years?? I know, in June
'93, that 99.9(?) was CHR WKHI and 95.9 was country, I think. Then, the
two switched freqs in '94-ish. Then, when I was there this year, 95.9 had
the calls WOSC... and 106.5 had the KHI calls!

So, why was there so much movement? And, who owns what? Does Benchmark
own Froggy and the *former* WKHI, or the *present* WKHI??

>mail couldn't have gotten through. Even the Zip code was correct.

Sorry, of course they're on 1400, and not on 1450, that was just my typing error. Actually they seem to have moved to 55 Hawthorne St, Suite 900, San Francisco, CA 91405, according to the replies which I have received by e-mail. I'll try that address and see what happens.

It does take quite a lot of effort to catch these graveyard stations all the way in Finland. What I do is I travel 800 miles to Northern Finland - where reception conditions are better - for a "DXpedition", and put up huge antenna installations. Sometimes I have up to 8 beverage antennas, each 0.7 miles in length, directed to various parts of the world, mostly North America. Then I just listen 20 hours a day for at least a week... if conditions are good, quite a lot of North American AM stations are audible, including local channel stations. DXing at its best!

Around here, and probably more places, there is a thing called
silent radio, often seen in sports bars and places like that.

It displays on a scrolling LED display, so you have to read it instead
of listen to it. They have news, and related subjects, and advertizing.

Rumor is that it is broadcast on an SCA subcarrier, but I don't really
know. Does anyone know about this, and, if so, how it is broadcast?

thanks in advance...

"Gum-off" is an orange-oil based product, available at hardware stores.
You wipe some on the old label, leave it alone a few minutes, and wipe all
the dreck off.

You can also use other oil-based removers. Dalbani Electronics sells a
spray-on one by mail order.

HAPPY NEW YEAR!

It's pretty quiet up here in radio land of Halifax to start 1996 off, but there are two radio stories that are ticking....

...There is a great deal of uncertainty on the premises of of OLDIES/96CHNS these days as newly appointed Martime Broadcasting vice-president, Gerry Barker, contemplates wieling the knife. The station is going automated soon. The grapevine has it that owners, Merv Russell & Bob Pace are anxious for even more savings. CHNS already takes "Good Times Oldies" from Vancouver from 6 p.m until 6 am., and will go on satellite at 9 a.m., leaving Frank Cameron & Doug Saunders as the only local content.

...The automated radio craze has claimed another victim in the Metro Radio Market. CHFX/Country 101 music director Paul Kennedy will sign off the air for the last time to be replaced by a computer. Kennedy, a multiple-winner of the Canadian Country Music Association's Music Director Of The Year award, has been a country 101 mainstay for over 20 years, and he helped make it the top station in Metro. Thanks to ...technology...his services are longer required......

Source record: 27441

Almost one year after it was first announced, EZ Communications reports the completion of its $28 million purchase of dominant Kansas City country-music station KFKF(FM).

Last January, EZ announced an agreement with KFKF owner Sconnix Broadcasting for a one-year option to buy KFKF. At the same time, EZ announced it would also buy one of KFKF's country competitors, KBEQ-FM. The price for KBEQ-AM/FM was $7.65 million.

The $28 million price is, according to my records, the highest price ever paid for a Kansas City radio station.

In the announcement of the sale's completion today (Jan. 4), EZ president Alan Box said, "We now enter the Kansas City market with a strong country duopoly," with KFKF number-one 25-54 and KBEQ-FM number six 18-34 in the summer Arbitrons.

A subsequent Arbitrends survey gave "Young Country" KBEQ-FM the number-one slot in the 18-34 demographic group.

As is evident from the hefty price, Box noted in the announcement that KFKF is "the market's revenue leader."

EZ owns a duopoly on the other side of the state, with KSD-AM/FM and KYKY(FM) in St. Louis, as well as duopolies in Philadelphia, Seattle, Pittsburgh, Sacramento, Charlotte, and New Orleans.

The EZ purchase also forced the sale of KFKF's former LMA partner, KKCJ(FM). Heritage Media bought KKCJ, forming a duopoly with 70s-rock KCFX(FM). KKCJ flipped to "smooth jazz" in March and changed its call letters to KCIY the following month.

*****

One year ago this weekend, former contemporary-hit station KISF(FM) transitioned over to a "new rock" format. Since then, it's had five different morning shows. On Monday, it starts its sixth effort in AM drive. Evening DJ Jay Charles, the sidekick on one of "Kiss FM's" previous morning programs, will team up with present morning DJ Paige Turner.

While the KISF effort is unique in the market, the rimshotter suffers from signal problems in midtown Kansas City, Missouri, which is also where much of its target audience lives.

*****

The _M Street Journal_ reported last week the impending sale of KISF's AM partner, daytime sports-talker KCTE(AM), from a company controlled by Philadelphia group owner Ragan Henry to the "Metropolitan Radio Group," ownership unknown. (The purchase has not shown up in FCC public notices that were released before the latest government shutdown.)

KCTE has been leasing KISF for about two years, after former lessee Ardman Broadcasting allowed its lease on the station to run out.

Ardman leased the station at 107.3 MHz after *it* leased *its* station at 106.5 MHz to Sconnix. Sconnix made the move in an effort to keep a second country competitor out of the market.

KFKF's toughest competition, until KBEQ-FM came along, was "61 Country" WDAF(AM).
Sconnix replaced the contemporary-hit format of KXXR with a new-country format that never inched much above a 2 share in Arbitron surveys.
The KXXR calls and CHR format were transferred to the station at 107.3 MHz, which later became KISF.
KISF is owned by Ken Meyer of Springfield, Missouri, who also owns a duopoly in that city as well as AM-FM combos in small outstate markets.
Especially if Henry is planning on getting out of the Kansas City market, the middle of February will be a critical time: that's when all the other 107.3 leases have begun.
KISF has not been able to recreate the successes modern-rock stations have had in other markets, in part because of signal problems, in part because of competition from weak but influential modern-rocker KLZR(FM) from Lawrence, Kansas, and in part because Kansas City listeners, even younger listeners, tend to favor country music.
*****
A source involved in the Bott Broadcasting application for a translator in midtown Kansas City has informed me that Bott was not involved in the recent shutdown of a suburban translator on the same frequency.
However, this source also noted that Bott will be able to ask for more than the 140 watts it originally requested at 97.3 MHz, now that K247AB in Blue Springs is no longer in operation. It was rebroadcasting noncommercial gospel station KCVO(FM) from Camdenton, Missouri.
Bott is proposing to relay KCCV-FM, whose 8,300-watt transmitter in Olathe, Kansas, a suburb on the far southwestern edge of the metro area, doesn't penetrate well into central Kansas City, Missouri.
*****
In mid-Missouri, it's reported that KTGR(AM) and KCMQ(FM) have begun simulcasting duopoly partner KCLR(FM).
Curtis Bohl in Columbia reports that the simulcast started just after Christmas. KCMQ, which had been a "young country" station, is now relaying the KCLR country format.
Despite a signal that's almost far enough out from Columbia to be a rimshot, KCLR, "Clear 99", has led the market's ratings surveys since it came on the air as a country station three years ago.
However, KTGR and KCMQ have languished under the Zimmer Broadcasting duopoly. Still, Zimmer has invested in one power increase for KCMQ and has just gotten approved for an allocation change that will make another one possible.
Either Zimmer is trying to fortify itself against a challenge from Brill Media's new Jefferson City-based country FMer, KATI, or it's planning a gradual transition from KCLR's class-C2 signal to the 100,000-watt class-C1 signal for which KCMQ is now able to apply. Stay tuned: three signals broadcasting the same program in the same market does not seem to be the way to maximize revenues.

> represents TV's best interests.

When I first heard about Eureka-147 I thought it might mean the end of radio as we know it. After all, Eureka was designed to support a small number of regional and national networks, not thousands of stations carrying local programs. Because Eureka requires that multiple stations use the same transmitter, and because the FCC licenses transmitters, not program services, the adoption of Eureka would rob most broadcasters of their FCC licenses. They would presumably just be tenants on regional or metropolitan transmitters owned by God knows whom.

Not only that, but everyone's coverage areas would be different than they are now. And all the stations leasing channel space on the same transmitter would have the same coverage. That means if you set up a transmitter to serve Boston and put all the existing Boston broadcasters on it, WJIB which now has a 250-watt AM signal would have exactly the same coverage as WBZ, WBCN, or WCRB. How would you like that, Mr. Group-owner-who-just-paid-fifty-million-dollars-for-that-class-B-FM?

So I said no way, the NAB has got to be out of its collective mind to endorse such a thing. Kill it!

But now I have doubts. To begin with, I'm not at all sure that enough consumer demand can be created to make DAB a success. What can DAB do for me as a consumer that FM can't be made to do? Where is the clear advantage in convenience and ease of use that made the CD such a success against the LP? I just don't see it, all the hype about "CD quality" audio notwithstanding.

Secondly, I'm not convinced that IBOC or IBAC can be made to work well. The AT&T system I heard in New Orleans sounded great, but they told me the signal doesn't fit in 200 kHz and new spectrum would be needed to accomodate all 11,000-odd American stations if this system were made the standard. Likewise, USA Digital doesn't fit in 200 kHz either as far as I am aware. If the suppression of multipath is the goal, the wideband,

multichannel approach that Eureka uses may be inherently superior to any single-channel, narrow-band system.

If DAB is to succeed, it must offer clear advantages in convenience and ease of use over conventional FM and AM. If it does so, it will succeed with or without the participation of broadcasters. And because so many other countries seem to be on the verge of adopting Eureka it is likely to be Eureka that will become the world standard, and we in the broadcasting industry will have to come to terms with it.

Back when our station used carts, I found that typewriter cleaning fluid worked quite well at this. Discovery was purely by accident (there was a bottle of it around, and out of sheer frustration I tried it.) Have no idea what chemical(s) this bottle contained, but make sure you use it in a well-ventilated area! Got that goo right off, and didn't seem to hurt the carts at all.

Burlington - Plattsburgh Radio Watch

Congratulations to 95 Triple X (WXXX, CHR) for finally thowing the big switch
a couple of weeks ago on 12/20 at 9:00 a.m. that brought them up to 95.5 MHZ
(from 95.3) and 25 KW. They had been ready to go for quite a while but the biggest
delay came from the government shutdown(s) compunding FCC red tape. Triple X
was also heard playing all Christmas music this year around the holiday - a
first I beleive - and pretty well done.

Speaking of 95 Triple X...morning man Jon Brooks is leaving to go to Champ
101.3 (WCPV, CR-Imus) where he will be Production Director and evening
jock (they can use a digital DJ-type of system so he is really not *on*
nights). Mid day jock Mike Czarney moves to AM drive on the 'X.

More movement in the morning...several jocks are playing musical stations
over at Hall's WJOY / WOKO / WKOL. Rod Hill is doing mornings on KOOL 105
(oldies) over from highly rated WOKO (country). Cal Daniels goes from
KOOL 105 back to mornings on WJOY (1230, MOR-big band).

WIZN's (106.7, AOR) "Corm and the Coach get Wilder" newspaper ads that refer
to the mornign show adding Lana Wilder to the show have spawned a few
copycats. Champ 101.3's (WCPV, CR-Imus) ad shows three poeple who appear to
be Steve Cormier, Lana, and the Coach with paper bags over thier heads. The
copy makes reference to Champ's Imus being the show that *they* listen to.
Infact, I have heard them refer to Imus many times...nothing like a nice (if
unintentional) plug.

I have also heard that WKDR (1390, talk) is running an ad of a similar design
showing the morning line-up of Louie Manno, Jim Condon, and making reference
to how their station has a Johnson - that being Mark Johnson, midday talk
show host. The WIZN morning trio even has their *own* spoof running that is
sponsored by the American Dairy Association and shows them all sporting a
milk moustache.

For a list of staions in the area, please drop me an email

Happy New Year, Joe

Alan: I thought this disappeared a long time ago, too...I worked at a very popular top 40 (CHR hadn't been invented <g>)station in the 70s where both these practices were the norm..in fact, a reel of sped-up, edited new adds came in from the national PD every week! This was so we could play 12 or more songs an hour, PLUS squeeze in 16 minutes of spots (and the news!)

Back then, the core audience didn't realize we were speeding up the songs...quite the contrary, they thought the competition was slowing it down! I remember, though, that the music was never hyped dramatically...nobody confused Barry White with Barry Gibb <g>

The editing was a different story---even casual listeners noticed that...We did our own editing...often there was the LP version...the 45 version...and OUR version!

This worked back in the days where we could do anything we wanted to the music and it was ok, simply because "we said so"...I don't think I would use the same tactics today, especially if I were in any sort of competitive situation...this may have been cool 20 years ago, but those kinds of games with the music may just drive people to the competition--or DMX.

Best of luck to your friends...and thanks for the trip down memory lane <g?

Rick

: Is there an "industry standard" for cart labels and removal that we're not
: aware of?

: Any help would be appreciated.

Oh Lord, YES!

First, you should be ONLY using removeable labels, such as made by Avery for
"Special Purposes". They're just as cheap as permanent File Folder Labels.
I suggest getting white labels and color-coding (if you need it) with a
ruler and a washable-type marker. If you're using Fidelipac 300 or 350 carts
(the ones with the angled corners) put the label on and trim the excess with
a safety razor blade, it won;t harm the cart.

NOW... Getting that glue off (AND keeping it off):

Get thee hence to thine nearest hardware store and buyeth thee some
NAPHTHA!
Use the naphtha (in a well ventilated area) with a sturdy paper towel (like
the tan kind in public bathrooms) and wipe down the glue and paper residue.
Take a metal ruler and scrape the softened gunk off the cart.
Wipe and scape till clean, then use a little denatured alcohol to render any
naphtha on the cart face inert.
Naphtha dissolves glues and tars.
Denatured Alcohol dissolves lacquers.
DO NOT "SIT AND SOAK" CARTS IN NAPHTHA OR DENATURED ALCOHOL
This will discolour and weaken the plastic.
Believe me, my bosses did this while I was on a vacation.

If you can't find "Removeable Special Purpose" labels, look for "Removeable
Cassette" labels.

There is a slight trade-off though.
The removeable kind will eventually start to curl and pull away from the
cart, especially if you have a lot of dirty and greasy fingers pulling carts
out of the rack alot. They'll last near six months though before needing
changing.
Got my two-minute warning. We'll next discuss the evils of using scotch tape
on carts :)

For removing "Scotch" tape and masking tape residue, use 3M General Purpose Adhesive Cleaner part no. 08984. This is sold as an automotive product at auto parts places. It is a fairly strong solvent, so you need to be sure that it won't damage plastic or paint on your carts, but it does a good job with adhesive residues and is relatively less likely to attack things than alcohol or automotive lacquer thinner.

Automotive lacquer thinner will also remove a lot of these residues in a hurry, but it is strong stuff that will attack paints and plastics.

Both products are flammable, produce plenty of fumes, etc. Best used outdoors. I use both for cleaning off old calibration stickers and stick-on property tags on old (1960's) test equipment.

Roger:

My first job in radio (as a $2.90 an hour grunt at WLPL Baltimore back in '79) included scraping labels off Audiopak A-2's...and after a summer of that crap, I came up with an idea I've taken with me to every other radio station I've worked for.

Take a strip of Scotch tape (the kind that's in a dispenser--not the kind you record on), a little longer than the width of the back of your cart...and bend one side of it under onto itself (you following this?) to make a little "tab". Put the tape on the back of the cart *before* putting the cart label on. This way, when you wanna remove the label, all you do is grab the "tape tab" and whip the whole thing off.

This works especially well with brand new carts (keeps 'em perpetually clean and neat)...but will make labels adhere better to carts which already have the label gunk on 'em.

Scotch "magic" style invisible tape works best--although the glossy cellophane stuff will do in a pinch as well.

Good luck!

> Please respond here of e-mail me.

Which way do you propose that they extend it? TV Ch 6 is just below the FM band, and aircraft navigation is just above. And let's say thay they actually did expand it (say by getting rid of ch 6). Who would listen? Other than scanner owners, very few people have 82-88 MHz receivers.

Not that I'm against micro-broadcasters; I'm all for it. But with today's spectrum "management", selling frequencies to the highest bidder, it isn't going to happen. The recent "auctions" raised $9B. The upcoming auctions are expected to bring in $14B. In fact, I wonder how long before the ham 70cm band is carved up. Look at what they did to 220 MHz.

Fortunately, the new technologies seem to favor UHF/microwave. They consider lower frequencies to have annoying characteristics (like skip). Since the majority of land mobile users on VHF-Lo are moving to UHF and trunked systems, this should be freeing up a lot of spectrum in the 30-50 MHz area.

Take say a 5 MHz chunk of the spectrum. Use 50 kHz scannel spacing, mono-FM only. That should be sufficient for reasonable audio quality, That gives you 100 channels, equal to the present FM band. Set a reasonable power limit, say 10 to 25 W. Require new receivers to cover the band (a la UHF TV); converters could also be marketed. Within a very few years, you

would have a reasonable potential audience.

Some frequency coordination would be useful, but this brings up the spectre of an FCC type agency, which allows for political/corporate lobbying and control.

It should be possible to put a station on the air for less than $1,000, probably a lot less than that. Due to the reduced power and limited range, tens or even hundreds of thousands of stations could be put on the air.

Who would listen? Why choose the "local-FM" station? Stations on this band could target small audiences that don't appeal to the big stations. Ethnic groups, foreign languages, specialized music (how many big band or classical stations are left?), educational, etc.

Here's (IMHO) the most important requirement - local and individual ownership and control. Only one station may be owned by any one individual/corporation/group. We have to stop the present trend where stations are being gobbled up by mega-corporations.

Is it possible? Sure. Is it likely? No. The NAB and [present] broadcasters would fight it to the death. They view the listening market as a pie, any additional slices from the pie mean fewer slices left for them. You'd need to sell a few representatives/senators on the idea, and get them to ram the bill through Congress, attached to other legislation (they're good at that).

Chris

|: One interesting thing about today's digitally recorded music
|: (or music digitally RE-recorded for the new CD-cart machines
|: or hard drive record/play systems) is that it won't change pitch
|: even if the playback is speeded up.
|: So if you take any song, massage it through a Dyaxis or
|: some other form of editor to speed up the playback a few per-
|: cent, no one will notice---because the song is still on pitch.
|: The bits and bytes representing every musical note on a dig-
|: ital recording don't change...they just come at you faster
|: (or slower) if you change the playback rate.

This just isn't true. If you speed up the CD or file player, and the bits and bytes come at you faster, the pitch _will_ increase.

Most good workstations include a time compression function that applies a more-or-less transparent algorithm to throw away some of those bits and bytes, so the file can be sent faster while the individual waves still approximate their original speed. But most of these same workstations include a varispeed function, which works a lot faster because it doesn't throw away any bits, but does shift the pitch.

Try this at home, folks: if your DAT or CD has a varispeed control, speed it up. The pitch will change. If your computer has a sound card, change the playback sample rate slightly. The pitch will change.

If you want to keep the pitch constant while playing from a varispeeded cart or CD, you have to run it through a shifter like the Eventide H3000B or DSP4000. But it's hardly worth bothering. Most people don't have perfect pitch, and a shift of a few percent -- less than a whole musical tone -- won't be noticed.

187. PHOENIX '95 IN REVIEW

Newsgroup: rec.radio.broadcasting
Date: 1996-01-07 00:00:00 UTC
From: Michael Hagerty <Michael_Hagerty@azfamily.com>
Message-ID: <4co4ba$5oe@vixen.cso.uiuc.edu>
Source record: 27253

Between my vacation and Bill's, it's a few days late, but well worth reading...big changes in the 20th market...home to 50..count 'em...50 stations:

1st Quarter 1995:

Oldies KOOL-AM(960)kicks off the year of radio changes on January 2 as it resumes a totally live local format. For years, it had been the originating station for SMN's "KOOL Gold" format.
DANNY DAVIS(KRIZ,KFMB,KIMN,KHOW,KKSN), a victim of the Thanksgiving '94 massacre when oldies KPSN(96.9) flipped to 70's KCHT(K-Hits), lands morning drive at Oldies KOOL-FM(94.5), bringing KPSN overnight jock and morning producer TONY MC GRAW with him. The move bumps LEE "BABY" SIMMS(KRLA, KYA, KFOG)out of his 14 month AM drive tenure and into afternoon drive at KOOL-AM.
KOOL-AM PD BRIAN BEAZER exits. FM PD TOM PEAKE programs both stations.
PHIL ABBOTT, a weekender promoted into afternoon drive when KPSN fired STEVE GODDARD as part of the format change to 70's KCHT, is let go after only a few weeks. The station, owned by Mormon Church arm Bonneville International, cites bad taste in on-air comments made by Abbott(example: the sound the new Marilyn Monroe postage stamp makes when you lick it).
Bad taste also figures in a few weeks later when a Bonneville exec in Salt Lake City notices that KCHT spells K-Shit, not K-Hits, and orders a call letter change. New calls KHTC are rushed on the air the very second the FCC okays the change.
Classic Rock KSLX(100.7)fires evening jock CAROL SPRINGER after she admits fixing the "Thousand Dollar Song of the Day" contest. Springer lands almost immediately at her alma mater, AOR KDKB(93.3).
Within days, Arbitron announces it is re-formulating the Winter book because of several diaries with heavier than reasonable listening credited to KSLX. KSLX denies tampering. Springer refuses comment other than to admit fixing the contest.
Midday air talent CARLA FOXX quits her 8-year gig at AC KESZ(99.9) to join Heavy Metal KZRX as PD.
Talk KFYI(910) drops the syndicated TOM LEYKIS show after only 3 months. LEYKIS had been PD and afternoon host at KFYI in the mid-80's.
The last vestiges of its 6-year Adult Standards format vanish as KXAM(1310)completes its gradual transition to Talk, featuring former Congressman SAM STEIGER, G. GORDON LIDDY and KEN HAMBLIN.
HAMBLIN is stolen early on by more powerful and popular KFYI(910) to replace TOM LEYKIS...KXAM replaces HAMBLIN with MICHAEL REAGAN.
Christian KGCB(90.9) signs on from Wickenburg(60 miles

northwest of Phoenix), simulcasting KEAR, San Francisco.

2nd Quarter 1995:

KYOT(95.5) changes its positioning statement from "Smooth Rhythms" to "Smooth Jazz".
70's KHTC(96.9) hires SHAWN BURKE from Chicago for morning drive.
J. DAVID HOLMES and CURTISS JOHNSON are let go from their decade-long gigs at AOR KUPD(97.9). JOHNSON was PD...the move was tied to new owner Sandusky Broadcasting consolidating staff elements with its AOR KDKB(93.3) Veteran morning man DAVE PRATT makes public comments about KUPD becoming "just another radio station" as HOLMES and JOHNSON leave, prompting rumors that he'll be next out the door.
After a brief run, AC KESZ(99.9) dumps DR. LAURA SCHLESINGER'S talk show, which ran at night. It's picked up within weeks by Talk KFYI(910).
New PD CARLA FOXX changes the format and calls of Heavy Metal KZRX(100.3). The new station is "Hot Talk" KHOT. Lineup includes HOWARD STERN in mornings, FOXX in middays and TOM LEYKIS' syndicated show in afternoon drive. STERN is also simulcast on Sportstalk sister KGME(1360).
Satellite-delivered Classic Rock KAZR(103.9), Coolidge(50 miles southeast of Phoenix), moves studios to Scottsdale, transmitter to Apache Junction(50 miles east of Phoenix), and is re-born as KBZR("The Blaze")...PD ERNESTO GLADDEN calls the format "Hot Rock"...a blend of CHR, AOR and Alternative. Former KOOL-AM(960) PD BRIAN BEAZER joins as MD.
Morning Drive jock WILLOBEE exits Alternative KEDJ(106.3).
PD/PM Drive Jock EDISON moves to mornings.

3rd Quarter 1995:

NPR KJZZ(91.5) dumps Light Jazz/New Age from middays, replacing it with NPR talk programming. The only music programming is evenings and overnights, which switch to acoustic jazz.
MACHINE GUN KELLY(KHJ,KTNQ,KOST,KCBS-FM) bails out of afternoons at oldies KOOL-FM(94.5) to return to Los Angeles and re-start his acting career. LEE "BABY" SIMMS moves back to KOOL-FM from KOOL-AM to fill the GUNNER'S slot.
Speaking of legendary afternoon talent, CHUCK BUELL(KIMN, KFRC, WLS) does a one-shot weekend shift at 70's KHTC(96.9#...which is at the time still looking for a permanent PM drive jock. Rumors, but no gig.
Longtime AC KKLT(98.7) night jock RAY VARGAS moves to middays.
After less than 3 months, Resource Media fires Hot Talk KHOT(100.3)GM KATHY LAWRENCE, PD CARLA FOXX, and dumps the format. KHOT flips to a simulcast of Alternative sister KEDJ(106.3), with HOWARD STERN added to mornings on KEDJ and dropped from Sportstalk sister KGME(1360)
Classic Rock KSLX(100.7) fires morning team JOHN GEISE and

BILL ANDRES while PD JOHN SEBASTIAN is on vacation in Hawaii. AOR KUPD(97.9) refugee J. DAVID HOLMES takes over the morning show. Six weeks later, HOLMES is canned and midday vet TONY EVANS and MD JEANNE SEDELLO move into the morning hot seat.
AAA KZON(101.5) fires PD DAVE LOGAN and moves from its eclectic approach to an alternative-based AAA(similar to L.A.'s KSCA).
STEVE GODDARD lands afternoon drive at Country KNIX(102.5). It's been nine months since GODDARD was fired when Oldies KPSN(96.9) became 70's KHTC. First book out, GODDARD comes in number one in his time period.
MAC America Communications, which owns AC KESZ(99.9), buys MOR KTWC(103.5) from Newmountain II Broadcasters. MAC America had been providing engineering and sales staff, as well as studio space, since KTWC went on the air in May '94. Transfer is delayed by the late '95 government shutdown.
Hot AC KVRY(104.7)'s morning show, featuring KPNX-TV morning news anchors RON HOON and CONNIE COLLA, is dumped as COLLA bails for a TV gig in Philadelphia. A year long free-fall in the ratings prompts rumors of a return to CHR under the station's famous old calls, KZZP, but nothing happens during '95.
Country KMLE(107.9) evening jock GWEN FOSTER moves up to middays.
Children's Radio AAHS affiliate KIDR(740) adds live programming with local pre-teen jocks.
ED WALSH returns to Talk KFYI(910) from WOR, New York....as PD, ND and morning co-host with market legend BILL HEYWOOD.
Alternative KUKQ(1060)PD JOHNATHON L. ROSEN leaves for a non-radio gig in L.A.
Christian KHEP(1280) shifts focus to a Christian Country music format tagged "High Country".

4th Quarter 1995:

Oldies KOOL-AM(960)and FM(94.5) go to full simulcast. Within weeks, stations are sold as part of Par Broadcasting's acquisition of Compass stations.
GREG "3RD DEGREE" BURNS gets 70's KHTC(96.9) 8-month vacant afternoon drive slot. Weekender SCOTT FISHER, who'd been "filling in" all that time, gets BURNS' evening gig as a consolation prize.
KHTC hires CARLA FOXX(KESZ,KHOT)for weekends.
She'd been on the beach four months since Resource Media pulled the plug on KHOT. Six weeks in, Thanksgiving week, FOXX's car is involved in a hit-and run accident which killed pedestrian EDWARD A. SMITH, a visiting Kansas City attorney. FOXX was at the Hard Rock Cafe, two blocks from the accident scene, for three hours that afternoon and evening, but says she was sober and was reaching for her cellular phone, which had dropped to the floor of her Explorer. FOXX says she was looking down did not know she had hit anyone until the next day. Friends say FOXX's night and peripheral vision have been greatly reduced since undergoing RK(radial keratotomy) surgery to correct nearsightedness. FOXX is ordered to stand trial on felony

charges of leaving the scene of a fatal accident. She remains on suspension from KHTC until the matter is settled.
Despite his comments on the departure of J.DAVID HOLMES and CURTISS JOHNSON, and a one-shot fill-in as a Sportstalk host at News/Talk KTAR(620), DAVE PRATT signs a six -year extension of his contract to do mornings at AOR KUPD(97.9). Price tag for the 6 years: $3 million.
AC KESZ(99.9) PD Dave Winsor exits.
After six weeks as an Alternative based AAA, KZON(101.5) takes off the gloves and launches an all-out assault on Alternative KEDJ(106.3). In the course of the changes, the station's only "Big Name", market veteran MARY MC CANN, is bounced around from morning drive to evenings to middays. McCann's producer, M.DUNG(KFOG, WMMS), is let go.
Country KNIX(102.5) evening jock JOHN(SHOTGUN KELLY)GUTTING is arrested just before his shift at the station and charged with molesting a 16 year old boy.
GUTTING resigns from KNIX and is awaiting trial in '96.
News/Talk KTAR(620) early afternoon host PAT MURPHY is reassigned to commentary. The morning news is stretched to 10AM, and midday legend PAT MC MAHON stays on till 3...with an hour off for the news at noon. The idea...to have MC MAHON fill the Arbitron definition of the midday time period...ostensibly giving KTAR a better shot against RUSH LIMBAUGH on rival talker KFYI(910).
Sportstalk KGME(1360) offers longtime hosts Arnie Spanier and Amy Bombard lesser gigs as they return from vacation. Both choose to walk instead. The station, along with sisters KHOT(100.3) and KEDJ(106.3), change management when Resource Media merges with MICHAEL O'SHEA's CENTURY BROADCASTING of Seattle under the new name NEW CENTURY.
O'SHEA taps former KSLX GM REID REKER to run the three stations locally.
KOPA(1440) drops its two-year format of CNN Headline News audio to simulcast classic rock FM sister KSLX(100.7). Word is the calls will change to KSLX-AM, spelling an end to a 20 year plus run with the KOPA calls.

188. Albany radio classic rock question

Newsgroup: rec.radio.broadcasting
Date: 1996-01-07 00:00:00 UTC
From: trauth@paul.rutgers.edu
Message-ID: <4co4bc$5of@vixen.cso.uiuc.edu>
Source record: 27254

I attended RPI for four years (1990-94) and (along with hard rock station Z-rock, 102.3 FM) my big radio stations there were classic rockers PYX-106 (which had a WNEW-like format) and Q-104 (which had a K-rock-like format). I was wondering if those two stations still existed or if they had gone the way of their NYC counterparts and switched to alternative music formats.

Thanks!

* Tom

Well, being someone that has spent about 5 months trying to get
some local sports broadcasts going (with myself as the PBP and Producer),
I think I can offer you some advice...
1) This is not a profession for the faint of heart. If you are
looking for job security, dont come here.
2) The only way to get a "real" sportscasting job (aka: getting
paid for it ;) is to have experience. In my attempts, the only way to get
that starting experience is to create it yourself. I was lucky enough to
find a small station (1kw local place) and local HS league that was
willing to let me broadcast their games. Lord knows I have more than once
wanted to quit due to a whole slew of technicalities..but, if you cant
learn from mistakes, what can you learn from?
The problem with attending college (yes, there is one) for
broadcasting is that there are usually hundreds of others with you in
your classes. Each of you want to get a job in the profession, and there
are only a few open. As good as a college education is, it is usually not
the final straw in getting you a job. And working at a college station
(if you've read any posts here) is not exactly the same thing as working
at a commercial station. My suggestion: get as much experience as you
can, and make contacts. (FYI: a number of sportscasters run camps around
the country usually during the summer. I, for example, attended the Bill
Raftery/Bob Wolff camp in NJ. Taught me more (and got me invaluable
contacts) in that week than I could any other way.)
Most importantly, be willing to make jobs happen for you. If you
see something that would look good as a sports program or live broadcast,
dont be afraid to approach the team/league/local radio/cable stations. (I
suggest you stay away from TV for obvious reasons :)

Good luck!

Byte This, Triple M's computer, video game and internet radio show has
moved to a new (longer) time slot. You can now catch Byte This from 7-10pm
each Sunday on all Triple M stations around Australia.

You might also like to check out the Byte This Website:
http://www.aone.net.au/bytethis

Thanks,

Andrew Quested,
Byte This,
Australia's Computer, Internet & Video Game radio show.
7-10pm Each Sunday, on Triple M, Australia wide.

i believe diary research showed that the majority of diarykeepers write
down actual call letters...but most pd's (and folks like myself :-) seem
to believe that "handles" (k-rock, z-95, etc) are easier to remember.

ps...handles also work well for small networks...we used "z-95" for 3
central illinois stations: 95.3/wznf/champaign; 94.9/wwdz/danville;
95.1/wzzp/kankakee. all were AOR and operated out of champaign.

For those of you techinically inclined, it should be fairly easy to speed up a CD player to play back music a few % faster. There should be a crystal resonator inside the CD player (this gives the machine a timing reference so it knows how fast to play out the bits to be converted to analog audio). Once you've found this resonator, it should have a frequency spec written on it. Multiply this number by 1.02 to get a new frequency spec, and buy a replacement with this new frequency. (It will help a lot if you have the service doc's (schematic circuit diagram) of the CD player). The machine will "think" it's playing out the music at a correct speed, because it uses this crystal resonator frequency as its frequency reference standard. But in reality, the music will be 2% faster. The electronics and mechanism shouldn't have any problem handeling the 2% faster speed. Just save the old crystal resonator in case it doesn't work (Be sure to take all ESD precautions when you do this "surgery", ie, touch ground (chasis) before touching the circuitry to drain any charge.).

This assumes that the CD player is connected to the rest of the station via analog signal paths. Or uses an asynchornous data paths (maybe!). But analog will work.

When I arrived at WABC in 1972 I noticed that the records (remember them?)
sounded a little fast . I asked the PD and he knew nothing about it.
I got one of those strobe disks and checked the lone turntable that was used
to cart up all the music and sure enough it WAS running fast. It was
completely by accident. Wabc at the time was so huge that all the PDs' around
the country thought it was some kind of cleaver well thought out programming
trick but at WABC anyway it was just a faulty turntable. <G> By the way
the tone arm had 2 nickels taped on it to keep it from skipping.

The real gem that I remember popped up in the early sixties. I lived in Oregon at the time, and was flying an old Harvard airplane (Canadian AT-6) up into Washington State. I was using an ADF (automatic direction finder) on a broadcast station to keep me headed in the right direction, and decided to listen to what it was broadcasting for a few minutes.

Turned out to be a Christian station, and I got the end of a real windup and delivery on the mysteries of Daniel, all very emotional. At the end, the announcer came on to let me know:

"You have just heard another soul-stirring sermon from Cowboy Bob, your parachuting preacher from Puyallup Washington."

For those unfamiliar with Puyallup (it is south of Tacoma), it is pronounced "pew-AL-up"---the "a" as in "at." Turns out that for something like $35, said "Cowboy Bob" would hire an airplane to fly over your open air gathering, parachute down, and give your group the word.

} : Now the point about WLLZ playing Whitney, that may be a little bit of
} : an AC skew, but the station is new and will be fine tuning that music
} : mix. Also realize that some NAC's play a lighter more accessible mix
} : during the day and a more jazzy mix at night. WNUA in Chicago does
} : this.
}
} I don't know, Bill. I've worked NAC a couple of times, including a stint
} with one of the format's early pioneers-- KTWN, Twin Cities-- and The
} Breeze. I'll agree with the dayparting bit. But broadening the format
} to include core AC artists does nothing but confuse the AC listener (who
} expects to hear more of the same) and p.o. the NAC listener (who doesn't
} want to hear Whitney Houston, Michael Bolton, et al. singles).

[Great stuff edited for brevity]

I do not disagree with anything you have said. The point is, however,
that there really is no 'set of rules' for NAC, since it wasn't even a
format 10 years ago and is interpreted differently by every NAC PD out
there. Some are more urban, some are more AC leaning. The Jones
satellite format positions itself as "Smooth Jazz and Light Hits".

I agree that the format is not well served by too much extension of
the musical genre's, but since there are no time-tested standards to
go by, and since NAC is so new, there will be wide variances. Add
that to the fact that there are too few programmers in *any* format
that have any guts anymore, you will see all sorts of wild attempts to
capture too many demos and by doing so, lose a large number.

} A 'smooth jazz' clone that plays Houston, Carey and Bolton might
} consider dropping the 'jazz' moniker and, instead, compete head-to-head
} with their AC foes as an AC. It'd be closer to the truth.

But what does truth have to do with anything? There have been many on this group, and elsewhere, who have said that NAC should not even be using the word 'jazz' at all, because in their view (and I can agree to an extent) most NAC's are not really jazz stations, even in a post-modern sense of the word. But that argument will never be resolved because definitions are changing so fast we don't even know the difference between oldies, arro and classic rock anymore.

One reader said it best when he said.. "Whatever you call the format, is what the format is." Radio is an illusion business. We deal in slogans, positioners, sweepers and liner cards. If the consultant says that Whitney is jazz, then Whitney is jazz. We see our listeners as demographic groups, not people and as we all know today's radio is not in the business of selling programming to listeners, it is in the business of selling listeners to advertisers, so whatever we call the cheese in the trap is really beside the point. As long as we can get enough people to write that slogan in the book, who cares?

} It's almost like throwing in the towel. NAC used to take pride with it's
} long rotations, broad textures and diverse orgins. Nowadays, most of the
} instrumentals are so sound-alike, with sooooo many saxophone players
} being programmed, too, and (at least with KMJZ) 75% of the vocals can
} heard on other stations (and are not even remotely* jazz), the format no
} longer gives the listeners who are tired of sameness and mediocrity the
} refuge NAC once offered.

The same thing could be said about radio in general. It used to care about its listeners, its service, and its image. Now it is a mad rush to do whatever it takes to make an extra point in the ratings game. If that is Howard Stern or whale farts, it matters little. I understand your frustration. It is rapidly approaching a point (and I warned about this years ago amid claims that I was being paranoid) where the idea of honesty or integrity in media will be no more than a slogan if even that.

Nearly gone are the great programmers who created the trends that the rest of the industry follows like sheep. There is little call for true creativity in the radio of today and even less will be needed tomorrow. With duopoly becoming a legally sanctioned *monopoly* (again I warned of this years ago and few believed it would happen), with people becoming conditioned to expect less diversity and more same-o-same-o, with smaller markets disappearing from the reach of upcoming programmers and talent, with the rise of digital automation and satellite-delivered formats that try to pretend they are live and local... what will tomorrow radio really be like?

} As a side note, I programmed an AC/NAC hybrid for a time overseas. The
} reason I added the instrumental selections I did was to differentiate the
} station from its nearest competitor (we were the new kid on the block),
} and to add an aura of 'class' to the station's sound (the station was called
} Class 95 FM). But at no time did we ever pretend we were a jazz station. We
} never promoted ourselves as being anything but adult contemporary. We
} didn't even do the obvious and program a Sunday evening jazz show for the

} small, but interested, number of jazz fans out there who knew anything about
} the pop-fusion that was being broadcast.
}
} And within eight weeks, we were the #1 adult radio station in Singapore,
} a 3-million person market.

Apparently you have something that is both lacking, and *I* believe
unwelcome in radio today. You have guts and an intuition as to what
will work in the market you are in. More importantly, what people
really wanted. And it paid off.

I truly believe that creativity and vision are not only 'not nurtured'
but on a subtle level are not even welcome anymore. Radio wants more
of the same If they hire people at all, they want ones who read the
liner cards and touch the right icon on the automation screen.
Even at the PD level, they want people who can make the station sound
more *like* the other guys than to make them different. It is better
to battle it out with three *other* hot country outlets than to try
something that might make you unique.

Frankly I am surprised to see NAC be as successful as it has been. I
am surprised that there was enough people with vision and the cash to
back it up, to make it more than an ancillary or specialized format.
I truly believe that there are many more killer formats brewing in
people's minds that will never see the light of day because there is
little opportunity to test an untried product. And this resistance to
change will (IMHO) insure the continued stagnation of the greatest
mass-media there is radio.

Dear radio folks:
I am a communication student at the University of South Florida, and the other day, I received some rather frustrating news from my department. Radio is the field that I would really like to pursue, and I realize that without experience, it is virtually impossible to get into. When I inquired about the possibility of getting an internship, I was told that I was pretty much on my own, that the school couldn't help me. I would really like to get out there and start learning about the business, but I just don't know where to start. Since we don't have a college radio station, and because I am particularly interested in the news/talk format, I am considering just going down to a local newsradio station and volunteering my services. I thought this forum was probably the best place to ask for advice on this subject, so I have just a few questions that I hope some of you won't mind answering:

A. Is my "volunteer" approach a good idea?

B. If so, who do I need to talk to?

C. What do I need to say to him/her?

D. What is the best time to drop by (I don't want to interrupt people when they are busy)?

Thanks in advance for everyone's help!! I look forward to getting started in radio, and I will be sure to let you all know what happens!!

Actually, here in Westchester County (just north of NYC) the NY Thruway has a series of TIS stations on 530 kHz. They run them along the NY Thruway and I-287 from Spring Valley to Rye, NY. So one could conceivably drive about 30 miles and listen to Thruway Radio. They have recently put up some new signs here, so it looks like they are trying to upgrade their coverage a bit. There are some real bad dead areas in Westchester County, and over in Rockland County (especially at night). I have had instances in Rockland County NY where the NYS Thruway TIS signal is overpowered by WABC's signal coming out of Lodi, NJ.

: Not only that, but everyone's coverage areas would be different than they
: are now. And all the stations leasing channel space on the same
: transmitter would have the same coverage. That means if you set up a
: transmitter to serve Boston and put all the existing Boston broadcasters
: on it, WJIB which now has a 250-watt AM signal would have exactly the same
: coverage as WBZ, WBCN, or WCRB. How would you like that, Mr.
: Group-owner-who-just-paid-fifty-million-dollars-
: for-that-class-B-FM?

These and other issues have obviously come up here and have been
considered by the CRTC. The CBC have a fairly extensive archive of
information on digital radio in this country. I don't know the exact
URL, but it is on their site at: http://www.cbc.ca under radio. (I have
it linked from a couple of my pages. Check out
http://audiolab.uwaterloo.ca/~jeffb/places/
)

: What can DAB do for
: me as a consumer that FM can't be made to do? Where is the clear
: advantage in convenience and ease of use that made the CD such a success
: against the LP? I just don't see it, all the hype about "CD quality"
: audio notwithstanding.

Well, there are several advantages but they have little to do
with the actual sound quality. The big one is "datacasting". For
example, weather and traffic information could be sent out by the station
and would appear on a display on your radio. Stations could transmit a
"program i.d. code" so that as you are driving great distances you could
have your radio only play jazz stations, for example. For nation
networks like the CBC, you would only need to tell it to play CBC and it
would a CBC station wherever you were in Canada.

The sharing of transmitters is actually a cheaper way of doing
it. Instead of having six towers, six stations would share the costs of
running one tower. As you say, though, there are still issues to be
cocnsidered with coverage areas. It was my understanding that during the
transition stage the coverage would be limited to the area of the
smallest station. There are still issues to be worked out here as this
means small stations would be out-of-luck as the larger ones wouldn't
want them bringing down their area. I've linked in some comments from
the CRTC about this from page (see above).

: If DAB is to succeed, it must offer clear advantages in convenience and
: ease of use over conventional FM and AM. If it does so, it will succeed
: with or without the participation of broadcasters. And because so many
: other countries seem to be on the verge of adopting Eureka it is likely to
: be Eureka that will become the world standard, and we in the broadcasting
: industry will have to come to terms with it.

It certainly is here, and all current stations qualify for a spot
on the L-Band. No new stations are being licensed at this time. For the
most part, the new band will simply be a simulcast of the existing
stations. Eventually the goal is to move all stations to the L-band and
discontinue AM & FM. This will obviously take several years.

Jeff

Pretty close, but not exactly: In 1919 the US government made it clear
that patents to radio devices would be better held under control of
American companies, rather than British Marconi. Perhaps due to
nationalistic fervor following WW1, I dunno. Marconi wised up & sold out
to GE, which formed RCA, with 80% of its stock owned by Americans. AT&T
and Westinghouse bought in, but the former departed in '23. RCA became
independent in 1932. Sarnoff soon became President of RCA (he'd been
there since the Marconi days) and completed the task of growing the
company up from the collection of radiotelegraph firms it had been.

The January 1996 issue of Texas Highways has an article "Tune Into Old-Time Radio," a casual glance back at radio in Texas through the years. Also a complete listeing of people who restore old sets in the state. Article was penned by Gene Fowler, co-author of "Border Radio" which I mentioned in an earlier post on this subject. There's now a paperback issue of the book, available from Limelight Editions, 118 East 30th Street, New York, New York, 10016, 212-532-5525. Cost is $16.70 post paid.

217. Classic rock STILL alive in New York!

Newsgroup: rec.radio.broadcasting
Date: 1996-01-07 00:00:00 UTC
From: sfk@ix.netcom.com
Message-ID: <4co4bl$5p0@vixen.cso.uiuc.edu>
Source record: 27283

Contrary to popular belief, classic rock still has a home on three NYC area stations:

[1] WPLJ 95.5 - sure they play Whitney and Mariah,. but they also play a hell of a lot of classic rock. And I don't mind that 70's disco too much either But I think they will start gearing more towards a classic rock sound and start shying away from the dancish stuff. Maybe Shannon should bring his Pirate radio format to NYC...it'd be like a breath of fresh air.

[2] WDHA 105.5 - it's in NJ but they have a decent signal. They are what WPLJ, WNEW and WAPP used to be...a station that mixes old and new without being too stale.

[3] WMXV 105.1 - yes it's adult contemp, but they (like WPLJ) have added A LOT of classic rock lately as well as new stuff from Foreigner and Def Leppard.

So far, the new KROCK isn't that bad. They are playing better music than the other three. Z-100 still plays the same friggin songs over and over, now it's just Nirvana instead of Madonna. WNEW is clueless. And Q-104 is just Z-100 for an older audience.

218. Massive changes at WXRK-FM (K-Rock) NYC - Vin Scelsa at hazard.

Newsgroup: rec.radio.broadcasting
Date: 1996-01-07 00:00:00 UTC
From: tbetz@panix.com
Message-ID: <4co4bm$5p1@vixen.cso.uiuc.edu>
Source record: 27284

Thursday night there was a surprise mandatory meeting of the entire
K-Rock (WXRK-FM, 92.3) staff, at which it was announced that effective
at 6 AM Fri, Jan 5, the station would change its format to "Modern Rock".

By Modern Rock, they do NOT mean the "new" WNEW-FM type of modern, but the
really hard stuff, Nine Inch Nails, etc.

Also effective immediately, the entire air staff, except for Howard Stern,
is on indefinate sabbatical. They have not been fired, nor does management
claim to know what will happen with its "personalities". They will be
running nothing but music and self-promotional announcements for "at least"
the next two weeks.

It is reported that GM Tom Chiasano told FM legend Vin Scelsa he "doesn't
know" what the future holds for Scelsa's Sunday night free-form program,
Idiot's Delight. It's possible that it's not necessarily the end, as Scelsa
has been identified with new music all along, and the station may want to keep
his presence for that reason. On the other hand, this may be your typical
radio format change housecleaning, and we may have heard the last of Idiot's
Delight on K-Rock, not to mention such NY radio veterans as Pete Fornatale,
Dave Herman, Jimmy Fink, and the others.

The program change is the last result of a series of changes that Infinity-
owned stations have been going through for several years. K-Rock is the last
of the "classic rock" stations left in the Infinity chain... the others have
mostly gone the modern rock route also, with generally impressive rating
results. The management of the other Infinity stations are the ones consulting
on the K-Rock program change.

The irony of all this is that it was 14 years ago that Scelsa took a stand
against changes at WNEW, and left as a result. And the fact is that WNEW may
be the ones who will inherit the more moderate of the classic rock listeners
who have been orphaned by the change.

Listeners interested in a (perhaps futile) effort to influence the outcome in
this matter may wish to write to:

219. Bi-Costal K-Rock

Newsgroup: rec.radio.broadcasting
Date: 1996-01-07 00:00:00 UTC
From: ggoldwyn@netcom.com
Message-ID: <4co4bn$5p2@vixen.cso.uiuc.edu>
Source record: 27285

Now, The World Famous K-Rock is bi-costal. Infinity seemed to hone the current K-Rock sound at LA's KROQ and San Jose's KOME. 92.3 WXRK is the latest K-Rock and under the helm of LA's Ex-PD Kevin Weatherly, it will undoubtedly sound just like 106.7 KROQ.

I predict Howard Stern will eventually become the morning show on KROQ, even though Kevin & Bean have a great show. It only seems logical to make the LA and NYC K-Rock outlets simbiotic. And if Howard hates his association with LA's Real (Bad) Radio 97.1 KLSX, as much as he says he does on the air, then I'll double down.

With Howard's high numbers to start the day, KROQ Los Angeles could be the number one station overall.

Hi!
I caught Howard ushering in the format change to alternative. (WYSP in Phila was simulcasting the whole thing).

Howard's airname became Douche Baggy Bag, and Robin was "Super Snatch" as they actually segued cuts from Bush, Nine Inch nails, etc.

In between they took calls from record reps. They put Harvey Leeds from Sony on the air, and said they'd play his "requests" because he had been good to Howard, even while the station was classic rock. Howard was about to list which reps would have to put hundred-dollar bills into the CD's to get airplay when Leeds cut him off with a list of five requests.

Howard agreed to play them for a weekend at NY's Four Seasons hotel.

It was a rip!

By the way, Howard is staying. There's no word on the fate of the airstaff. Radio and Records <http://www.rronline.com/> is reporting the airstaff stays in place, but for the first ten days or so there will be no jocks on air. There's no word whether the Greaseman stays, but considering his numbers, and Howard's endless on air rants to put Grease out of his misery, it would seem likely Sgt Fury is fading away.

With a Friday format change, you have to figure the other "alternative" pd's and md's are having a nailbiter weekend trying to figure out whether to counterprogram this thing.

One more interesting item about K-ROCK.... PUNK JINGLE SWEEPERS!!!! They actually have these :07 jingles that sound like they might have been cut by the Ramones. They're awful. The calls don't stand out. They might be a goof, or it might be an imaging thing I don't get. In any event, I've never heard anything like 'em. JAMS did not cut these!

Good reception...

Jeff Caplan

: Friday, Jan. 5th.

: K-rock (WXRK, 92.3 FM), which truly became "NY's only classic
: rock station" when WNEW became "NY's rock alternative" on July
: 7th, joined WNEW today as one of NY's *FIVE* alternative stations
: (along with Z-100, X-107, and WDRE)!

When there are five stations in the market with an "alternative" format,
one does question the use of the word "alternative" to describe it!

This is probably why the industry has settled on the terms "modern rock"
and "new rock" because, especially in the past couple of years, it seems
it's not so much of an alternative after all.

Maybe it should be called "postmodern rock".....

>
>" Does anyone know the postal address for Radio KVTO in Berkeley, CA? They
>" operate on AM 1450.
>
>They operate on 1400 with 1kw. It's amazing you could pick up a station
>on 1400, a crowded local channel with hundreds of stations on it.

KVTO uses a 450 ft. tower in a salt marsh next to San Francisco bay, which provides an excellent ground system. The tower is 5/8 wavelength at 1400 so there's a lot of low elevation signal, as well as the 5/8 wavelength skywave lobe. KFRC 610 KHz also runs 5000 watts day and night into the tower, which is a quarter wavelength at 610 KHz.

KVTO has a co-channel station in Ukiah, CA about 100 miles to the north. If you drive Highway 101 from the bay area towards Ukiah, KVTO comes in without significant co-channel interference as far as Healdsburg, 60 miles from the KVTO tower. The groundwave path up to Healdsburg is a combination of the salt water bay and the 15+ ground conductivity of the Santa Rosa plain. Ukiah is in a small valley surrounded by iron bearing mountains. The mountain range causes a big break in ground conductivity, dropping to 0.5 or less. The Ukiah station disappears within 20 miles of the tower in almost any direction.

I worked for KVTO back when it was KRE-AM. One day I got a very irate call from the chief engineer of the Ukiah station. He was paged while out having lunch, saying the station was off the air. When he got to his car he heard music on 1400, decided it must be a monitoring problem at the station, and elected to finish his hamburger. Then the song ended and he heard the KRE ID. He said we sounded like a local station up there, so we must be operating illegally. I told him he was welcome to stop by and see what we were doing, just look for the 450 ft. tower in the salt marsh next to the bay. There was a long pause, then he hung up.

One more tip for this discussion. I learned about this from an old
Production Director I succeeded in the early 80s here in Detroit at
WCXI (he started it at WDEE) and I've seen it used at WJR and WHYT
and I've used it for almost 7 years now at WKQI...white paper tape!
It's made by 3M/Scotch and American Tape and is usually available
from industrial supply outlets. It reminds you of construction tape
but it's stronger, thicker, the perfect width to go under cart labels
and peels off easily, taking the label with it in one easy move.
I swear by it! It's a great preventive measure to sticky label build
up!

It also can be taped over old adhesive and if you rub down on it and
peel it back off, it will take the old adhesive with it!

I suppose this has been asked before many times in many ways, but I'm looking for some feedback to the following situation. Say you're trying to impress a PD at an AC-style Rock and Roll Classics station that's looking to hire a morning news anchor/co-host, and he wants some ideas that will "break the mold" ...things that have never been done before. I have many ideas, but anything you can add that might inspire me to a better presentation would really be appreciated...I might mention that I've got great production skills, and this approach to breaking the mold would be both on and off the air, such as doing things differently on the air, and looking for street stuff that will garner attention and listeners.

If you've ever been in that situation and succeeded, what did it take? Any ideas?

Thanks a million!

Starting a convo on radio promotions is a great idea...I'm always
looking for a new one (that actually works!).

Here's one:
Casino Night: $5 cover gives patron 500 "dollars" in chips.
Blackjack, roulette, ect. going on at tables all over the club. Grand
prize goes to the person with the most chips at the end of the night.
Note: cover charge is donated to charity to get around
local/state/federal gambling laws. Check your area laws just in case.

Anybody else?

231. Re: Orban 8200 (digital optimod)

WHRB, a Cambridge, MA station on whose board of trustees I sit, has used an 8200 (two-band version) for about two years now. Its performance is not unlike that of the analog 8100. What makes the 8200 particularly good for WHRB is the ease with which the box can be made to change settings automatically for different dayparts. WHRB plays jazz in the morning, classical in the afternoon and early evening and rock at night, and the 8200 is set to change settings with the music.

The people at WHRB aren't trying to be the loudest thing on the dial. They want the music to sound as natural as possible, yet be loud enough to be audible on the radio. The 8200 does a very good job for them.

232. Why no TV/radio in New Hampshire?

Newsgroup: rec.radio.broadcasting
Date: 1996-01-07 00:00:00 UTC
From: jgallagh@interserv.com
Message-ID: <4co4c0$5pg@vixen.cso.uiuc.edu>
Source record: 27298

I was on a ski trip to Waterville Valley in upper (northern)
New Hampshire last weekend.

Despite a great directional antenna on my buddy's mountaintop
home, we could only get channel 9 out of Manchester and a
virtually unwatchable picture on the 3 Boston commercial VHF's.

Are there no other channels, V or U assigned to New Hampshire
or did someone decide it's not economically feasible? I think
there's a pbs station somewhere around Concord but I couldn't
find its signal.

Why can't the Boston stations use a "repeater" or some such
other device to get their signal into Northern New England.

As you might expect satellite dishes are everywhere, but what did
people do a few years ago? Unfortunately for my buddy, his
house is surrounded by 100 foot trees which makes satellite
reception impossible for either the 10 foot c-band or the
18" dbs dishes which need clear southwest exposure.

I set my car radio on scan on the AM band and it flew up and down
without finding a decent signal. It finally stopped at 1030 am on
WBZ, some 150 miles away !

I guess I feel a little sympathy for people in true rural areas when
it comes to broadcast reception.

I don't know, Bill. I've worked NAC a couple of times, including a stint with one of the format's early pioneers-- KTWN, Twin Cities-- and The Breeze. I'll agree with the dayparting bit. But broadening the format to include core AC artists does nothing but confuse the AC listener (who expects to hear more of the same) and p.o. the NAC listener (who doesn't want to hear Whitney Houston, Michael Bolton, et al. singles).

KMJZ signed on here in the Twin Cities playing a blend that I would define as 90's NAC (no Windham Hill, Narada, folk). But as they've 'fine-tuned' the station, they've continued to add core AC artists in an obvious attempt to draw listeners away from WLTE. The moment I heard Smooth Jazz 104.1 play Mariah Carey's 'Dreamlover' a couple of times, I knew they (and probably Broadcast Associates?) don't know what they heck they were doing anymore. Non-single, album tracks-- maybe. Hit singles that are already overplayed-- think again.

It's almost like throwing in the towel. NAC used to take pride with it's long rotations, broad textures and diverse orgins. Nowadays, most of the instrumentals are so sound-alike, with sooooo many saxophone players being programmed, too, and (at least with KMJZ) 75% of the vocals can heard on other stations (and are not even remotely* jazz), the format no longer gives the listeners who are tired of sameness and mediocrity the refuge NAC once offered.

As a side note, I programmed an AC/NAC hybrid for a time overseas. The reason I added the instrumental selections I did was to differentiate the station from its nearest competitor (we were the new kid on the block), and to add an aura of 'class' to the station's sound (the station was called Class 95 FM). But at no time did we ever pretend we were a jazz station. We never promoted ourselves as being anything but adult contemporary. We didn't even do the obvious and program a Sunday evening jazz show for the small, but interested, number of jazz fans out there who knew anything about

the pop-fusion that was being broadcast.

And within eight weeks, we were the #1 adult radio station in Singapore, a 3-million person market.

A 'smooth jazz' clone that plays Houston, Carey and Bolton might consider dropping the 'jazz' moniker and, instead, compete head-to-head with their AC foes as an AC. It'd be closer to the truth.

Great points!

Plus, as my friend Tom Sleeker of KMJZ/Mpls.-St. Paul points out, it's *N*
A *C*...*NEW* *ADULT* *CONTEMPORARY*. Jazz is an element of it, but not
all of it.

And, besides, it wasn't all that long ago hard rockers threw in the
occasional CSNY cut, like "Woodstock" !

I think stations sound real bad when they speed up the music.

Here in New York, WPLJ's been doing it for years, until in 1989, they finally stopped. We also had WAPP and, yes, even Z-100 doing it for a time.

But no other market in the country I've ever visited has as many FAST radio stations as Cincinnati, Ohio. It seems that every other station speeds up the music there.

Thank you. That was worth $.03

" Hi everyone I need some information. I am very interested in going
" into radio broadcasting. I am most interested in becoming a
" sportscaster.

I went to school with Jon Miller, the voice of the Baltimore Orioles and ESPN. He took announcing and other radio/TV courses at College of San Mateo, a community college with radio and TV stations, and then went to Oakland A's and Giants games with a tape recorder and did play-by-play announcing into the recorder during actual games. After a particularly good tape he was hired by Charlie Finley, then owner of the A's, and the rest is history.

Sal -

I can't vouch for anything at WAPP...but I can tell you that while I was the person carting music at Z-100 (mid 1980's) absolutely NOTHING was sped up--because my objection to the practice was strenuous. (As I remember, the way I phrased it was "If you want this music sped up, you better find someone else to do it, 'cause I ain't gonna!" My objection is rooted in two facts: #1, I have perfect pitch and hearing things wrong annoys the living daylights out of me, and #2, I think that messing with the sound interferes with the artist's objective even more than a radio edit, which, if done with any degree of sensitivity, gets across the artist's intention, just a bit more quickly.)

Larry Berger did tell me sometime in 1987 or 1988 that music at WPLJ had been sped up by 2% across the board, all the way from its "Rock in Stereo" days through the Power 95 days.

Anita Bonita

This debate raged in BILLBOARD in the mid-70s. I was at a Top-40 station that DID speed up the music. I always looked at it the same way a magazine looks at cropping a picture for the most advantageous presentation. I don't know what the final RPMs were... I just goosed the turntable till the strobe dots were "walking" but it wasn't as bad as KLIF/Dallas at that time or WTIX/New Orleans. I heard "Thank God I'm A Country Boy" in N>O> and I couldn't hear any resemblence to John Denver.

Joe Frank v4.3
Frequently Asked Questions 1/96

------------------------------------------------------------------------

Welcome to the Joe Frank FAQ, posted sporadically to alt.radio.networks.npr,
rec.radio.broadcasting, rec.radio.noncomm, rec.answers and news.answers.
It was created by Richard Looney with assistance from many Joe Frank fans
who are net.citizens.

Additional information is welcome - please send to rlooney@csc.com.

------------------------------------------------------------------------

Contents:

1. Who is Joe Frank? -> Biography

2. What has he done? -> Chronological Listing of Radio Programs

3. How about video and writing? -> Listing of his non-radio work

4. Is he still on the radio?

5. Are tapes of the radio programs available?

------------------------------------------------------------------------

1. Who is Joe Frank?

Joe Frank is *not* the host of a long-running New York talk show, and a
different Joe Frank (Carollo) was responsible for those top-40 hits from
the early 1970s. Joe Frank is best known for the weekly radio show
called "Work In Progress" he created in the studios of KCRW, Santa Monica
between 1986 and 1992. His program was picked up by some of the more
progressive public radio stations, since KCRW made it available 'on the
satellite' via SASS.

The following biography from KCRW was dated April 1990:
------------------------------------------------------------------------
Joe Frank was born in Strasbourg, France of a Viennese mother and a
Polish father. His family immigrated to New York City where Frank was raised
and educated. Frank, who received a B.A. from Hofstra University, attended
```

the Iowa Writers Workshop and subsequently taught at the Dalton School in Manhattan.

In the mid 70's Frank joined WBAI, the New York Pacifica station, as a volunteer. By 1977 he was the host of "In The Dark," a late night entertainment program that featured Frank's monologues, improvised sketches, and live music. In 1978 Frank moved to Washington D.C., to anchor the weekend edition of "All Things Considered" on National Public Radio (NPR). From 1979 to 1985 he wrote, performed in, and produced 18 dramas for NPR Playhouse, garnering many broadcasting honors, including the 1982 Broadcast Media Award, the 1983 Radio Program Award from the Corporation For Public Broadcasting, two consecutive Gold Awards at the International Radio Festival of New York (1983 & 1984), the American Nomination to the 1984 Prix Italia and a Special Commendation from the Berlin Prix Futura (1985).

In 1986, at the invitation of Ruth Hirschman, general manager of KCRW, Frank moved to Los Angeles where he created his own weekly one-hour program, "Joe Frank: Work In Progress" at the Santa Monica-based NPR station. In 1988 Frank won both the prestigious Major Armstrong Award and the Corporation For Public Broadcasting Program Award for his three-part series "Rent A Family."

In February 1989 "Rent A Family" was adapted and directed by Paul Verdier at Stages Trilingual Theater. In March of 1989 Frank gave his first one-man show ("Joe Frank: In Performance") at the Museum Of Contemporary Art's Ahmanson Theater.

Frank has published two plays, "The Decline Of Spengler" (New Directions 48, New York) and "A Tour Of The City" (Tanim Press, New York). A volume of fiction, "The Queen Of Puerto Rico And Other Stories" will be published by William Morrow (New York) next winter.

Montreal's Theater Anima will present Frank's award-winning "A Tour Of The City" at Hangar Number 9 of the Old Port of Montreal in June 1990. This drama, featuring a cast including performers from Cirque du Soleil, will be under the direction of Jordan Dietcher.

Michael Mann, creator of the television series "Miami Vice" and "Crime Story," has purchased the rights to Frank's radio monologue, "Night" and plans to adapt it for a feature film.

Starting in 1993, Joe changed the title of his show to "In The Dark". In early 1995 it was announced that Joe Frank would be 'taking a break' from "In The Dark", and it was removed from the KCRW schedule. Repeats of old shows are still broadcast from a few stations. Joe Frank will begin a new show called "Somewhere Out There" on KCRW in January 1996.

2. What has he done? Chronological List of Joe Frank's radio programs

This listing began as the Work In Progress Program List received from KCRW in 1987. That list was then augmented by the author of this FAQ as new shows were broadcast. The productions were originally listed by

KCRW as either monologues (M), dramas (D), or both (MD). This FAQ continues
that tradition, but simplifies it such that programs with a single vocalist
are listed as monologues (performed by Joe Frank unless noted otherwise)
and programs featuring multiple performers are marked as dramas.

Additional information augments this listing:

(cast members of the dramas are enclosed in parentheses)
... based upon the credits announced at the conclusion of each
program - note that there may be misspellings! The following key
identifies those performers who appear more than twice:

AH Avery Hart AJ Annalee Jeffries
AM Arthur Miller BD Beth Dixon
BM Bernie Mantell BS Barbara Sommers
DR David Rapkin DSJ David St. James
ES Eric Sears FMA F. Murray Abraham
FZ Farley Ziegler GZ Grace Zabriskie
HP Harvey Per HW Helen Wilson
IW Irene Wagner JP Joseph Palmieri
LB Larry Block LE Laura Esterman
LM Larry Massett LN Lester Navscer
MH Mark Hammer NA Nick Aulette
PM Paul Mantell RC Ryan Cutrona
RF Rosemary Foley TJ Tim Jerome

[musical artist and title is noted between square brackets]
Some sources of background music used in selected programs are identified.

{ Comments are enclosed in curly brackets }
The author of this FAQ has annotated the listing with a few comments.

drama - one hour
(Angel, Shawn, Dinah, Chantell, LN, LM, Scott Carrier & Joe)

Talking About Love
drama - one hour
(Dennis, Doug, Danny, Bobby & Craig)

Another Country (parts 1, 2, and 3)
monologue - three hours
[Philip Glass, "Facades", from "Glassworks"]
[Eno/Byrne, "Qu'ran" from "My Life in the Bush of Ghosts"]

A Landing Strip in the Jungle
monologue - one hour

No Show
monologue - one hour

Let Me Not Dream
monologue - one hour
[Brian Eno, from "Thursday Afternoon"]

Case Studies
drama - one hour
(AM, NA, TJ & Joe)

Cocktails Before Dinner
monologue - one hour
[Jon Hassell, "Power Spot" and "Wing Melodies" from "Power Spot"]

Dreamland
monologue - one hour

An American Flower
monologue - one hour
[Ry Cooder, from the soundtrack of "Paris, Texas"]
{ also broadcast as: Rose }

Why I Don't Love You Anymore
monologue - one hour

Tell Me What To Do
monologue - one hour

Highways West
monologue - one hour
[Fred Simon, "Time and the River" from "Usually/Always"]
[Brian Eno, "Always Returning", from "Apollo"]

Night Ride
drama - one hour
(TJ, MH, JP, Alan Hunter, LN, AJ, FMA, AM & Joe)
[Steve Reich, from "Six Marimbas"]
[Gavin Bryars, from the original "Sinking of the Titanic"]

[Harold Budd, "Flowered Knife Shadows" from "Lovely Thunder"]
{ continuation of A Tour of the City }

1987

Rent A Family (parts 1, 2, and 3)
drama - three hours
(BS, MH, AM, TJ, NA, Carolyn Swift, LB, Lynn, Sarah, Carmen, Thomas, Timo, Sharon, & Christa)
[Harold Budd, "Gypsy Violin", from "Lovely Thunder"]

In the Middle of Nowhere (parts 1, 2, and 3)
drama - three hours
(TJ, LB, AM, LE & RC)
[Andreas Vollenwieder, "The Stone" from "White Winds"]

The Policemens' Ball
drama - one hour
(TJ, AM, NA, LB, BS, Steve Friedman, Denny Partridge & Joe)
[Rossini's "William Tell Overture" performed by the Portsmouth Sinfonia]

He Hesitated
monologue - one hour
[Frank Sinatra, "All My Tomorrows", from the soundtrack of "A Hole in the Head"]

At The Border
monologue - one hour

Thank You, You're Beautiful
drama - one hour
(LE & Joe)
[Harvey Sachs, "What the World Needs Now"]
[Popol Vuh, "Brothers of Darkness - Sons of Light" from the soundtrack of Herzog's "Nosferatu"]

To The Bar Life
monologue - one hour

1988

The Emergency Room
drama - one hour
(AM, TJ, LB, PM, LN & Joe)

Stories For Nothing
monologue - one hour

Building A Church
drama - one hour
(TJ, Tess, AM, Richard Eisner & Joe)

[Bill Nelson, "West Deep" and "The Spirit Cannot Fail" from "Chance Encounters in the Garden of Lights"]

The Street
drama - one hour
{ vocalists unidentified }

Lines
monologue - one hour

Words
monologue - one hour

Five Part Dissonance
drama - one hour
(ES, AM, AH, PM, FMA, AJ & Joe)

Emerald Isle
drama - one hour
(Fionualla Flannigan, LB & Joe)

Home
monologue by GZ - one hour

Islands
monologue - one hour

Sleep
monologue - one hour

1989

Performer
drama - one hour
(LN, Julie Renick & Joe)
[Enya, "Watermark" and "River", from "Watermark"]

The More I Know You
drama - one hour
(A. Lorey, Antony Becker & GZ)

Road To Hell
monologue - one hour

Nausea
monologue - one hour
[Yello, "The Race" from "Flag"]

Bad
drama - one hour
(TJ, Tess Steincolk, AM, LB, PM & Joe)
{ essentially the same as Building A Church }

Great Lives
drama - one hour
(AM, RC, TJ, Julie Renick & Joe)

Night (parts 1 and 2)
monologue - two hours
[Meredith Monk, "Turtle Dreams (Waltz)", from "Turtle Dreams"]

1990

The Truth About Women (parts 1 and 2)
drama - two hours

I'm Not Crazy
monologue - one hour
[Andreas Vollenwieder, "Flight Feet & Root Hands" from "White Winds"]

Iceland (parts 1, 2, and 3)
monologue - three hours
[Eno, Moebius & Roedelius, "Tzima N'arki" from "After The Heat"]

1991

The Dictator (parts 1, 2, and 3)
monologue - three hours
[Enigma, "Principle of Lust", from "MCMXC"]
[David Van Tieghem, "They Drive By Night", from "Strange Cargo"]

On The Edge
monologue - one hour

1992

Redneck Rounder
monologue by J. B. Allison - one hour

El Cholo (The Beginning)
monologue - one hour
{ vocalist unidentifed }

The Best
monologue - one hour

In The Dark (parts 1 and 2)
monologue - two hours
{ with Theo Mondel & Debbie Devine }
[Thomas Newman, from the soundtrack of "The Player"]
[Kurt Neumann, from the soundtrack of "The Bonfire of the Vanities"]

Two Babes
drama - two hours
(Nancy Condy & Mimi Calpestory)

>>> In The Dark <<<

1993

God
drama - half hour
(Joe, GZ, RC, HP & HW)

Problems
drama - half hour
(Joe, GZ, RC, Phil Procter & Alan Arbus)

Pilgrim (parts 1 and 2)
drama - one hour
(Joe, AM, GZ, HW, Florina Federescou & Douglas Johnson)

Smile
drama - half hour
(Joe, FZ, LB, AM, GZ, Bob Gordon, Naomi Schwarz & Mike Mallone)
[Mark Isham's Sextet , from the soundtrack of "Little Man Tate"]

Green Cadillac
monologue - half hour

When I'm Calling You
monologue - half hour

The Loved One
drama - half hour
(Joe, GZ, AM, LE, LN, FZ, Heidi Nordberg & HP)

Coma
drama - half hour
(Joe, GZ, Patrick Buche & LB)
[Harold Budd/Brian Eno, "The Silver Ball", from "The Pearl"]

Just A Closer Walk With Thee
monologue - half hour

A Special Family
monologue - half hour
[Brian Eno, "Thursday Afternoon"]

1994

Tomorrow
monologue - half hour

The Cruise
monologue - half hour

Hit Man
monologue - half hour

A Natural Disaster
drama - half hour
(Joe, AM, RC & LB)

Joe Frank's America
drama - half hour

That Night
drama - half hour
(Joe, GZ, RC, HP, Carol Katz, HW, Donna Hardy, Mark Henning & Douglas Johnson)

Just Hold Me
monologue - half hour
[William Orbit, "Water From A Vine Leaf" from "Strange Cargo 3"]

Hawaii
monologue by Tim Jerome - half hour
{ also broadcast as: A Trip to Hawaii }

Soul Mate
monologue by Laura Esterman - half hour

Either/Or (parts 1 and 2)
drama - one hour
(AM, Maude Davis & Joe)

Anthology of Love (parts 1 and 2)
drama - one hour
(TJ, BD and TJ, AM)

Jerry's World (parts 1, 2 and 3)
drama - 90 minutes
(HP)

Loner

The Last Run
drama - half hour
(David Cross, RC & Joe)
{ OJ }

Prayer
drama - half hour
(GZ)

Haiti
drama - half hour
(Rick Overton, Paul & Sonya Verdiya, Tucker Smallwood, Irving Gelman, DR & Joe)

A Hearing
drama - half hour
(David Cross, Bob Odenkirk, Marty Castor & Joe)
{ OJ }

1995

Raymond

Insomnia
monologue by Dana Gold - half hour

Third World Country

Hotline
drama - half hour
(Davis Black)

In A Lonely Place
monologue by Julia Sweeney - half hour

Lila and the Professor
monologue - half hour
{ excerpts from Iceland }

3. How about video and writing? Listing of his non-radio work

Joe Frank on screen:

A short video was presented at the Santa Monica Public Library
in 1988. It showed Joe speaking in the KCRW studio, a woman driving up to a
pay phone and making the calls heard in "Thank You, You're Beautiful",
and material from "Pretender", including the scene of Joe with the
pillows stuffed up his shirt.

Jerry Summers, one of Joe Frank's cohorts in the studio, says that "... Joe
did a short for CBS for a late-night summer-replacement show called 'The
Midnight Hour'. The piece was 'Memories', a re-working of a WIP story.
It aired (as I recall) late August or early September 1990, on the final
night of 'Midnight Hour'."

A short film has been aired as filler on the Los Angeles PBS station,
KCET, showing a montage of urban images (among which is Joe at the
microphone) accompanying the first segment from "Islands".

Three shorts are available on Playboy's "Inside Out" anthology series,
released on videotape in 1992:

Volume 2 contains "The Hitchhiker"
(which dramatizes the first segment of "Nausea")

Volume 3 contains "The Perfect Woman"
(which is similar to part of "Sleep", and also dramatizes part of "The End")

Volume 4 contains "Jilted Lover"

Joe Frank stars in these features.

... and the 1995 Zima commercial

Joe Frank in print:

An article about Joe called "Radio Noir", by Jamie Diamond, can be found in the Los Angeles Times Magazine of Sunday, November 22, 1987. The Wall Street Journal profiled him in an article in their March 15, 1988 edition. Another article, by Dick Lochte, called "Frankly, Joe's Branching Out", appeared in the March 1989 issue of Los Angeles Magazine. Much more verbiage (generally quite favorable) appeared in the wake of the release of his book of short stories, _The Queen of Puerto Rico_, which was published in 1993 by William Morrow and Company of New York.

Contents of _The Queen of Puerto Rico_ :

Tell Me What To Do
Fat Man
Night
Green Cadillac
Date
The Queen of Puerto Rico
Winter
The Decline of Spengler

{ Fat Man contains material from "Dreams of the River", and Winter has similarities to "When She's Asleep, She Looks like an Angel" }

Joe Frank on disk - commercial recordings:

"Strange Cargo Hinterland" is a William Orbit production released in 1995. It's an import CD on the N-Gram label - will allegedly by released domestically on Discovery Records. The track "Montok Point" contains some brief monologues by Joe Frank.

4. Is he still on the radio?

The following stations play Somewhere Out There:

KCRW 89.9 Santa Monica, California
Sundays at 11AM

The following stations play repeats of Work In Progress or In The Dark:

KDVS 90.3 Davis, California
Saturdays at 11PM, and Mondays at 11PM
[Monday slot may move to Wednesday, soon]

KPFA 94.1 Berkeley, California
Thursdays at 11PM

KUOW 94.9 Seattle, Washington http://www.kuow.washington.edu/kuow.html
Weeknights at 10:30PM

WFMU 91.1 East Orange, New Jersey http://wfmu.org
Mondays at 6PM

5. Are tapes of the radio programs available?

Episodes of Work In Progress and In The Dark are
available on tape from KCRW. Write to them for more information at:

KCRW 1900 Pico Blvd, Santa Monica, CA 90405

This is a living document. If you have any corrections or updates, especially
concerning the schedule on your local station, please email rlooney@csc.com.
Entire contents copyright 1995 by Richard Looney.
Noncommercial redistribution permitted.

244. Re: Classic rock STILL alive in New York!

Newsgroup: rec.radio.broadcasting
Date: 1996-01-08 00:00:00 UTC
From: trauth@paul.rutgers.edu
Message-ID: <4cr5pl$did@vixen.cso.uiuc.edu>

sfk@ix.netcom.com writes:

:Contrary to popular belief, classic rock still has a home on three NYC
:area stations:

:[1] WPLJ 95.5 - sure they play Whitney and Mariah,. but they also play
:a hell of a lot of classic rock. And I don't mind that 70's disco too

Only at night. Their daytime format is mostly AC stuff and talk.

:much either But I think they will start gearing more towards a classic
:rock sound and start shying away from the dancish stuff. Maybe Shannon
^^^^^^^
Just what NYC needs, especially after Z-100 dropped popular eurodance
in July. Even LESS dance music on the radio. No way in hell!!

:should bring his Pirate radio format to NYC...it'd be like a breath of
:fresh air.

Since WPLJ has done very well with their current format, I don't think
it is likely that they will classic rockify it. But who knows. After
WNEW gave K-rock a monopoly on the NYC classic rock market, I didn't
think K-rock would ever change -- and look what happened.

:[2] WDHA 105.5 - it's in NJ but they have a decent signal. They are
:what WPLJ, WNEW and WAPP used to be...a station that mixes old and new
:without being too stale.

WDHA is indeed a good classic rock station. But only for those who
live in northwest and north central Jersey. Outside of those areas
their signal is hard to pick up.

:[3] WMXV 105.1 - yes it's adult contemp, but they (like WPLJ) have
:added A LOT of classic rock lately as well as new stuff from Foreigner
:and Def Leppard.

Though this mix station does indeed play some classic rock (most mix
stations do) I think most classic rock listeners would find it too
slow for extended listening. One has to hear a hard, fast song like
"Rock Steady" or "Whole Lotta Love" here and there to keep one from
falling asleep.

Sorry, but those three stations, while better than nothing, are no
substitute for a dedicated NYC classic rock station.

:So far, the new KROCK isn't that bad. They are playing better music
:than the other three. Z-100 still plays the same friggin songs over
:and over, now it's just Nirvana instead of Madonna. WNEW is clueless.
:And Q-104 is just Z-100 for an older audience.

I'll agree with you on Z-100 and WNEW. But (for classic rock fans
at least) I'd have to say that Q-104.3 is better than the new K-rock.
True, they play too much noisy stuff. True, they are an "adult Z-100"
in many ways (such as in their repetitiveness). But they DO play a lot
of classic rock songs (in fact, they play more classic rock than two
of the three stations you mentioned above): Led Zeppelin, Pink Floyd,
Queen, etc. Their classic rock playlist is narrow of course since
they only play the hardest classic rock groups, but it beats the hell
out of the non-existent classic rock playlists of Z-100 and K-rock,
and the nearly non-existent one of WNEW.

Just my humble opinions...

* Tom
*
* A depressed and snowed-in NYC classic rock fan

: |: One interesting thing about today's digitally recorded music
: |: (or music digitally RE-recorded for the new CD-cart machines
: |: or hard drive record/play systems) is that it won't change pitch
: |: even if the playback is speeded up.
: |: So if you take any song, massage it through a Dyaxis or
(snip)
: This just isn't true. If you speed up the CD or file player, and the bits
: and bytes come at you faster, the pitch _will_ increase.

No, what he said *IS* true.

: Most good workstations include a time compression function that applies a
: more-or-less transparent algorithm to throw away some of those bits and
: bytes, so the file can be sent faster while the individual waves still
: approximate their original speed. But most of these same workstations
: include a varispeed function, which works a lot faster because it doesn't
: throw away any bits, but does shift the pitch.

Then it's a lousy system and you should upgrade.

: Try this at home, folks: if your DAT or CD has a varispeed control, speed
: it up. The pitch will change. If your computer has a sound card, change
: the playback sample rate slightly. The pitch will change.

: If you want to keep the pitch constant while playing from a varispeeded
: cart or CD, you have to run it through a shifter like the Eventide H3000B
: or DSP4000. But it's hardly worth bothering. Most people don't have
: perfect pitch, and a shift of a few percent -- less than a whole musical
: tone -- won't be noticed.

I do this at home all the time.
You should try a program called CoolEdit. You can Shift the pitch, change
the time of the cut and it's all independant of each other.
You can do one, or the other or both. It really does work.

Also, you can use an Eventide Harmonizer to squash that 34 second commercial
to 30 seconds and THAT doesn't change the pitch either, although it does
dump the spaces and the end of S's in the audio. Sounds faster, yes, but the
pitch is still there.

Look around for CoolEdit. It's shareware, and very pricey to register (as shareware goes) but it's a great program.

KLLY Bakersfield (95.3 FM, a/c) mid-day personality Tammy Brown has joined KUZZ-FM/KCWR (107.9 FM, 550 AM, country) as afternoon news anchor/reporter, effective January 9.

The move returns Tammy to the newsroom where she began her career with an internship. She replaces Melece Casey, who resigned for personal reasons just two weeks after being hired in December to replace 5-year KUZZ veteran Brent Rush. Rush left broadcasting to work in his father's Dallas-based construction business

Also joining the KUZZ/KCWR news department is free-lance newspaper and magazine writer Stef Donev, as a part-time anchor/reporter.

Pete Fornatel (sp?), who has hosted a Sunday morning acoustic/ folk show on NY FM stations for twelve years, (1st on WNEW-FM - "Mixed Bag"), (Recently on WXRK-FM "Sunday Show"), seems to be missing. It appears that WXRK, formerly "Howard Stern all morning, Classic Rock all day", now appears to be the 'new" WXRK, sans Pete. I'll be listening to see whether Vin Scelsa, who has hosted a Sunday evening show called "Idiot's Ddelight", has also been axed.
Can anyone shed some light on their whereabouts, or where, if anywhere, they have landed?

btw: I've always found it curious how radio stations change format and personalities in the middle of the night, with no warning, and no acknowledgement -- kind of reminds me of RC annulments -- "You know that spouse you thought I had these past several years, well they never existed."

>Classics station that's looking to hire a morning news
>anchor/co-host, and he wants some ideas that will "break the
>mold" ...things that have never been done before.

Hi Tim

This has always just been a "when I win the lottery and buy my own station" thing, but I'll share it for what it's worth. Maybe it -has-been done, don't know. My best friend is in radio, I once was for a brief period. I always said if the above were to happen (yeahright), we'd be the morning show, and it'd be called something to the effect of "Raging Hormones." I've never heard a two-woman team, but then, this is the midwest. We both thought it'd be a scream, but of course it's all relative... Hope you come up with something!

I was Sklar's assistant PD and Production Director at WABC 1968-71.
During those years the TT used to cart the songs ran on speed.

The way I remember it the notion of speeding up the songs was
pioneered by Buzz Bennett at KCBQ in San Diego circa 1971 and the
standard was about 47 rpm.

Johnny is quite right about the coins taped to the tone arm. The
fabled "WABC music EQ" was nothing more than the frequency response
of a GE VRII mono phono cartidge with a little extra weight on the
tone arm. Although the result sounded just a tad thin in the studio,
the effect after going through the audio processing, echo,
transmitter and antenna was excellent.

I know of two, off the bat. Jose Feliciano recently was a drive-time jock
entertainer on morning radio in Stamford, Connecticut. Kenny Myer (Myers,
Mayer?) sporadically appears on Boston radio as an announcer and producer.
He was at WEEI in Boston for the longest time.

Both are blind.

(Yes, Feliciano is the same Feliciano who recorded several hits.)

Don't know if these guys are still working in radio or not.

There was also a physically challenged TV reporter on WWOR tv in recent
years.

And of course, many aren't aware of it, but the legendary late TV personality
Bill Cullen was seriously crippled by polio as a youth and had extreme
difficulty walking. Didn't hamper his rise in the world of radio and TV (on
the Price is Right in the 1950s-60s - he was always shown standing still. On
"I've Got a Secret" he was always seated. On "$20,000 Pyramid" he was
finally shown walking, with great difficulty. The fact that he was shown was
a breakthrough for the physically challenged, I would think.)

For Sale:

ELECTRO-VOICE #664 Variable-D* Dynamic Cardioid Microphone, Variable Impedance Wired HI-Z, with original box. Has boom mount attachment (permanent) and includes adjustable boom (Appears to have been made from an adj. desk lamp base). Appears to be in VG-EX cond. Cable also included.

I don't know the value of this mic and would appreciate your input or offer.

Thanks for your consideration,

255. Re: FM BAND EXTENDED?

Newsgroup: rec.radio.broadcasting
Date: 1996-01-08 00:00:00 UTC
From: dk@crl.com
Message-ID: <4cr5pq$dik@vixen.cso.uiuc.edu>
Source record: 27310

References: <4co4bh$5op@vixen.cso.uiuc.edu>

Chris Smolinski wrote the quoted material below:

" Which way do you propose that they extend it? TV Ch 6 is just below the FM
" band, and aircraft navigation is just above. And let's say thay they
" actually did expand it (say by getting rid of ch 6). Who would listen?
" Other than scanner owners, very few people have 82-88 MHz receivers.

I think extending the FM band downward is a laudable goal. Today there
is no need to waste lower-spectrum on TV when current low-bank VHF TV
(channels 2-6) could be dropped into the UHF band where there appears to
be plenty of space even in the most crowded TV markets.

In fact, in the late 1940s the FCC was going to drop the low-band TV
channels -- this is why ABC opted to build all their stations on channel 7
-- it would have been the first number on the TV dial.

Wolfman Jack talks all about his ol buddy Rev. Ike in his book. He contacted him when they were putting the bok together and the kind Rev. supposedly asked, "What's in it for Rev. Ike?" I stil see Ike on the TV up here in NY from time to time.

Wolfman said that the Rev. would pay for his time on XERB (The big X over Los Angeles) in cash for the whole year in one lump of bills!

Two quick addendums to Friday's flip from classic rock --

1) KROQ, L.A. Kevin Weatherly will NOT be the PD in Noo Yawk. Previous WXRK programmer Andre Gardner may be held incommunicado somewhere in an unlisted loft address in Chinatown....but I think he's still in the picture there, as part of what GM Tom Chiusano called a "consortium" of programming minds.

2) Strictly radio geek stuff: Z100 programmer Steve Kingston found out that Weatherly was in town, and used the info for some quick mind games. To wit, Z100 jocks on Thursday afternoon were giving Z100 forecasts as made by "Kevin Weatherly."

The switch by WXRK/NYC over the weekend to "New Rock" from "Classic Rock" is one of the stupidest format switches I have witnessed in NYC in some time.

First of all, K-Rock's loss of audience after Stern was due to their poor execution of the Classic Rock format. Anytime your format depends on attracting listeners because of their familiarity with the music (as is the case with any oldies or classic rock station) make sure you are playing music that people know. STOP trying to "broaden the format" by including lesser known music. Listeners tune those stations in to hear the same music over and over again. Yes, I know that they will tell you in survey's that they don't want that, but, in reality, they do. WCBS-FM in NYC has built a consistant and solid audience by playing the same music over and over and over again. Its murder on the jocks, because they have to listen to 20-30 hours a week of the same music, but the point is to get listeners, not make the jocks happy.

Second... NYC does not need another station playing "new" rock as has already been indicated here. WAXQ, WHTZ, WNEW-FM (sort of), is certainly enough. They must be popping the champaign corks at WPLJ, CBS-FM, WMXV etc. Without K-Rock, they have on less competition going for that 25+ demographic.

WYNY needs a new format? Here's a suggestion. Do Classic Rock the way CBS-FM does oldies. Don't do what WXRK and WNEW-FM did. Play the same stuff over and over again, and make sure it came from the albums everyone remembers from 1965-1978. Make you jocks hate the music because they are so sick of it. When the ratings come in, they'll thank you.

WOW! A NEW FORMAT FOR 92/3 K-ROCK!

How dumb! (no offense intended toward anyone - just my opinion)

The New York radio dial is now just like Philadelphia, perhaps worse!

In Philly, playing there own spin of the Modern/Alternative Rock format is WYSP 94.1FM, WPST 97.5FM (Trenton, NJ), Y100 WPLY 100.3FM, and "WDRE"-WIBF 103.9FM. WMMR 93.3FM continues to play more of a straight-forward AOR format (but there is something really missinghere, I'm not sure what - I just don't like their music mix), Q102 WIOQ 102.1FM is playing an intesive dance oriented CHR, B101.1 is your tipical BORING A/C station, and Magic 102.9 added some 60s and 70s to their still quite good sounding "Classic Hits of The 70s" format. Holes in the market - Straight top 40, Hot Talk (WWDB is too serious and Dull as is NJ-101.5), and Classic Rock, although Magic is covering more of the format since WYSP dropped it. There are just too many stations splitting the alternative rock/modern rock audience.

NOW, New York is very similar wih 92/3K-Rock WXRK-FM, 92.7 WDRE-FM (Garden City, Long Island), Z100 WHTZ 100.3FM, 102.7 WNEW-FM, and Q104.3 WAQX-FM all playing different variations of the alternative/ modern rock format. BTW,, Kudos to Q104.3 whose representatives said that this was the format of the future just over a year ago, when they switched from the classical music format. Holes in the NY market now include, classic rock, hot talk (no Liddy, Leykis, Don & Mike, etc in NY - But Stern, Imus, & Greaseman are here), 70s/classic hits, and dance.

Does anybody believe in the AOR format anymore? What's wrong with playing Pearl Jam and the Beatles back-to-back. How about Nirvana, Better Than Ezra, Boston, Nine Inch Nails, Busch, The Who, etc. I think Howard Stern actually was on the right track by mixing Prince's "Let's Go Crazy" into his mix while kicking off K-Rock's new format. Let's keep the listeners guessing and keep it fresh and less repetitous. This is possible without playing the purely obscure tunes.

: Starting a convo on radio promotions is a great idea...I'm always
: looking for a new one (that actually works!).

: Here's one:
: Casino Night: $5 cover gives patron 500 "dollars" in chips.
: Blackjack, roulette, ect. going on at tables all over the club. Grand
: prize goes to the person with the most chips at the end of the night.
: Note: cover charge is donated to charity to get around
: local/state/federal gambling laws. Check your area laws just in case.

: Anybody else?

It's an idea, but It's illegal.
What you have there is a lottery.
You have the three elements: Consideration, Chance and Prize.

Now, eliminate one of those and you're okay, but with all three, it's against
the broadcast rules. At the very least, you could lose your NAB affiliation.

Sure, depending on your state, since it's for a charity, you could run it,
but I don't believe you can advertise or promote it.

As far as I know, the only exemption to this is for State-run Lotteries.
I haven't looked at the rules in a few months, so perhaps they changed it?

When you get right down to it, what is so "new" about NAC? IMHO, it's just an updated version of old-style Beautiful Music. We have Kenny G and Earl Klugh instrumentals in place of the Anonymous String Quartet doing a violin arrangement of "In-A-Gadda-Da-Vida" (actually heard that once), and more contemporary vocalists like Sade, Phil Collins and the like instead of Johnny Mathis and Perry Como, but the result is the same. Audio wallpaper. Now that Boomers are middle-aged, it turns out we're not all that different from our parents' generation. Yeah, it's found an audience....the same people who listened to BM 25 yrs ago! How many truly new ideas are there in this business, anyway?

Steve

Well it's that time of the year again for the Producer's Workshop. It will be held again this February 3rd (Saturday) at the Radisson Empire Hotel in New York City. In my opinion, this is the most intense workshop in the industry, and is a great help for all producers (especially talk or talk based).

Speakers this year include: Elizabeth Dribben, CBS
Larry Kahn, Westwood One
Lorna Gladstone, PD Extrordinaire
Mike Harrison, Talkers Publisher
David Bernstein, WOR PD
Denise McIntee, WABC OM
Turi Ryder and Jay Diamond, Hosts
.....and ME!!!!

Again, this is one of the best workshops I've ever gone to, and well worth the effort. Special hotel rates and lots of FREE stuff to make it easy! I'd love to see you all there!

E-mail me for more details, or call Valerie Geller at 212-580-3385.

The idea that speeding up a song (usually a MAXIMUM of 2%) will
somehow save time is absolute nonsense. If I remember the math, this
is about 1.2 seconds per minute. So for an hour it would be 1.2
minutes. Not even the length of one song! In the past the reason for
speeding up the music was to make the station sound "brighter." I
seriously doubt that it's even noticiable. It is an old concept who's
time has long passed. I'm sure some "programming genius" came up with
the idea. ("Programming genius" is my term for consultant assholes
that flush stations down the toilet with their "brilliant" ideas! -
Like "Hot Hits" Radio. Remember that one?). (FYI: The "programming
genius" is usually, but not always, the guy who either sounds like
shit on the air, or has spent very little, if any, time on the air, or

both)!

As for playing "edits," that one's a little more slippery.
There are so many "edits" and "re-mix's" made available by the record companies these days, that it is very common to have different versions of a song playing on different radio stations in a market, depending on format. My personal opinion is that it is always best to play the version that the listener will find on the album, or CD. Unless, of course, it is prohibitively long, or simply does not fit the format - in which case it probably shouldn't be played at all! But then, I'm not a "programming genius!"

Ken Thomas

Belated Christmas gift.....

Alternative rocker WKQX-FM gave Chicago a belated Christmas gift when they made their sixth change in the last 3 1/2 years in the morning drive slot. Lance Tawzer and Doug Stoll (Lance and Stolli) from the rock group "The Lupins" were moved from the morning slot to the 10:00 pm to midnight slot. Lance and Stolli polluted the airwaves of Chicago for the past six months with a unique brand of annoying, lame radio. The two produced the weakest ratings at the station so it wasn't a real big surprise that Chicago was put out of the misery imposed by the duo. Upon their appointment to the morning drive, the "over/under" line was set at 8 months. Turns out the "under" was the winning bet.

The station also shuffled the rest of its lineup: Brooke Hunter, who had been handling the news for the morning program is now the primary morning host. James van Osdol takes over the news duties from Brooke. Brian "Whipping Boy" Paruch moves from
evenings to the 9 to noon shift. In another move of compassion, Samantha James gets demoted from her middday shift and now only handles the "retro-flashback" lunch hour. Steve Fisher shifts his hours from afternoons to 1-6 pm. Lisa Rush takes over from 6-10 in front of Lance and Stolli.

The station also changed their habit of only playing two songs in the morning before going to lame banter or news/traffic or commercials. Music has been returned to front and center. Amen.

Extensions, departures and shifts.....

Shannon Dell is out after 6 1/2 years at urban contemporary WGCI-FM. Irene Mojica moves from nights to middays while Raymond Anthony takes over nights at Chicago's top rated music station.

John Howell, afternoons on country WUSN-FM, will be around for at least two more years at Chicago's senior country music outlet.

Perhaps as part of the restructuring surrounding the purchase of CBS by Westinghouse, top 40 WBBM-FM has dropped their deejay middays. The station will simply feature music during the 10am to 2pm shift. Coco Cortez moves to nights to accomodate the change. The station also changed their music selection during the 10-2 slot. Club mixes and dance flashbacks will be the primary focus until further notice.

Message-ID: <4cr5pf$di4@vixen.cso.uiuc.edu>
Source record: 27325

Headlines: K-Rock rolls format; Hot 97 heats the fall Arbitron, while KISS cools off; and the Yanks have new FANs in '97

First off, as has been reported in previous issues, K-Rock/WXRK, coming off it's best book in a long time, blew out it's Classic Rock format and moved into the Modern Rock battle. Station stronghold Howard Stern kicked off the new format, staying on after his shift to premiere the new format. The station also blew out all of it's personalities except for Stern--it will run jockless for the next 7 to 10 days.
K-Rock, who's battle with WNEW-FM forced them to switch to Modern/Alternative Rock in July of 1995, had been the only outlet for Classic Rock in the NYC area. This move mirrors the move of sister station in Philly, WYSP's switch during 1995.
Station spokesman say the ratings are a result of Stern's huge morning numbers and a gradual decline thruout the day. No word on whether longtime NYC personalities Dave Herman, Pete Fornatale & Vin Scelsa will survive the house cleaning, but it looks like the Greaseman's stint on K-Rock is over, according to rumors.
GM Tom Chiusano says the station "should have been more successful than it has been, and we saw a gaping hole in the market we felt we could fill"
Analysis - Why would K-Rock go into an area with 4 other competitors, including WNEW-FM, the station they knocked out of the box???
The NY Daily News had a page 3 story on the switch, including a quote from Steve Kingston of Z-100-- "Just what this market needs, a fifth station playing Pearl Jam. I think they're two years too late."

So, our first format switch of the year, and it's not WYNY???

Moving on to the Fall numbers - Hot 97 and Howard Stern were the leaders in the latest ARB spinal tap. WSKQ/Super Q and WABC were also winners in the new numbers. Here's the top 20:

Hot 97/WQHT 6.1 Hip Hop/CHR
Super Q/WSKQ 5.5 Spanish
WCBS-FM 4.9 Oldies
Kiss-FM/WRKS 4.9 Soul/R & B
Lite-FM/WLTW 4.6 Light A/C
WABC 4.5 Talk
WPLJ 4.1 Hot A/C
Z-100/WHTZ 3.8 Modern Rock/CHR
WCBS-AM 3.7 News
K-Rock/WXRK 3.6 Stern/Changed to Modern Rock 1/5/96
WINS 3.5 News
CD 101.9/WQCD 3.1 NAC
Mix 105/WMXV 3.0 Hot A/C

Power 107.5/WBLS 2.9 Urban A/C
WFAN 2.9 Imus/Sports
WOR 2.8 Gambling/Talk
WQXR 2.6 Classical
WADO 2.3 Spanish
WPAT 2.3 Lite A/C
WQEW 2.0 Pop Standards
Q-104/WAXQ 1.9 Heavy Metal
WYNY 1.9 Country
WNEW 1.7 Modern Rock

Thoughts - Hot 97 still runs strong, but it's sister station Kiss-FM takes a big hit from 6.1 to 4.9. The loss of AM Driver Ken Webb to WBLS certainly didn't help.
WSKQ hit #1 in the 25-54 ratings, the best ever for the Spanish station, which will get WPAT as a duopoly partner in 1996. WABC rose from 3.6 in the summer to 4.5. Rush moved back to 3rd middays, and Bob Grant to 2nd in PM Drive.

AM Drive - Howard's back up, fueled by the hype surrounding his book 'Miss America' from 7.0 to 8.5. The rest of the AM Drive top 10: WINS--6.3, WSKQ--5.7, WCBS-AM--5.5, Hot 97 (Dr. Dre/Ed Lover)--4.9, WCBS-FM (H. Harrison)--4.4, WPLJ (Shannon/Pettengill)--4.3, WABC (Lionel) & Kiss-FM (Jeff Foxx)--4.1, WOR (Gambling)--4.0, WADO & WFAN (Imus)--3.5

PM Drive - Hot 97--7.4, WABC (Grant)--6.0, WPLJ (Rocky Allen)--5.3, Kiss-FM--5.2, Super Q & Lite-FM--5.0, WCBS-FM (Bob Shannon)--4.9, Z-100--4.1, Mix 105 (Dan Taylor)--3.6, WFAN (Mike & the Mad Dog) & CD 101.9--3.2

Last, but not least--it's been reported the Yankees will leave WABC at the end of this season and Infinity will take over the radio rights. The games would air on K-Rock in 1997, then move to WFAN in 1998. The Bronx Bombers have been with WABC since 1981. The move to K-Rock is the result of the remaining year on the Mets/WFAN contact. FAN management has been at odds with the Mets at various times in the past and WABC has said they have been losing money during the latest rights contact with the Yankees. One point - K-Rock has been broadcasting the Jets games in August and September for the last 3 seasons due to conflicts with the Mets on WFAN, and also has run Rangers games when there's a conflict also.

Under the ice and snow, till next time--

Tripp Rogers

Speeding up music? Depends on the format. Makes sense on a "hot" format like CHR or New Country...but ALTERNATIVE??

WEDJ/95.1 ("The Edge") adds about 4-5%, and it sounds awful! Can't imagine that the Alternative crowd finds it very "hip' either that these folks are messing with their music like this. Hopefully, Evergreen will drop the pitch back down now that they've got the keys to the place.

Perhaps they could do better as an Adult Comtemporary hits station that plays hits from the 60s thru today, not just the one decade of the 70s, not just the 80s and 90s, not just the mellow songs, and a livelier mix similar to KBIG 104.3 up in L.A., therefore, giving us adults an alternative to the sleepy sounding KYXY. Maybe some 50's too couldn't hurt.

There would be no rap, no heavy metal, no bubblegum, no techno, no sleepy elevator music, and no overplaying of the oldies.

There's nothing like it in Southern California. If 102.9's powers that be were smart, they would try this kind of music. I grew up listening to a current hit station and an oldies station simultaneously, flipping between KDEO and KCBQ and now I flip between KBEST and XHRM and KUPR and Q106.

About 1000 of the best and compatable rock/pop/soul oldies of the past would be mixed in with the best adult rock/pop/soul songs of today.

sincerely

d.t.

273. Re: Speeding up music?

At one country station I worked at, the PD insisted on speeding up the slowest song ever recorded, Merle Haggard's "The Rose". By hooking up an Eventide UltraHarmonizer up to an Otari MX-5050, I was able to speed that sucker up 8% (!) without altering the pitch or inducing "bubbling" to the audio. The GM was too cheap to actually buy the equipment involved, so we only had the one cart "sweetened" like that.

At WDAI-FM, "Feel Good Radio" in Chicago in 1971, we were all good and sick of Iron Butterfly's joint-in-the-stairwell classic, "In A Gadda Da Vida". By editing the organ intro figure into the final six notes of the epic, we were able to bring it down to a manageable :11. Thank you.

By the reverse token, when "Hey Jude" was released, a little creative looping of the "na-na-na..." coda extended the song to a spacious twelve minutes for the lucky upstate Michigan listeners who had the station I worked at as their only option.

} >or so. Fade it early, who's gonna miss it? Hot AC/CHR is supposed to

This is an example of the outright arrogance of radio people these days. h
They think that THEY know best how long a song should be, where to edit,
when to fade in/fade out a song, and how fast a song should play.

If I were the industry, Iwould do things much different than most
radio people currently in power today.

* Don't walk over intros and exits of songs - EVER!
* Don't prematurely fade out a song - EVER!
* ALWAYS play the album version of a song IN ITS ENTIRITY!

It's easy to let some consultant program your station for you. It's
easy to assume that if they don't complain, they don't give a damn
about it.

I wish that the attitude that existed during the early 70's prevailed
today. Experimentation, long songs, quieter jocks that don't shout out
to you, and the like are what drew me away from AM and toward FM. Now
the climate in FM seems to be homogenization, pre-packaged formats
concocted by faceless consultants, and what they consider to be the best
decision for the dollar. I'm not stupid; I know stations need to
profit. However, I believe one can make a profit by doing what's
RIGHT, instead of appealing to the least common denominator in all of
us. Why do you Because they have more desirable choices available to
them at home, whereas the car radio is practically the only game to play in the
car, and then people end up being button-pushers because the content on
the various stations is so weak.

Bottom line: Don't mess with the music.

I too am a college student in need of some career advice. I'm a
sophomore in school and I'm in my second year working part-time at the
local radio station (about 10 hours a week). I'm most interested in
sports, particularily play-by-play, and I've done several high school
games for the station. I'm also the regular announcer for the basketball
team on student radio for the second straight year.
Unfortunately, the school I'm at (Minnesota-Morris) doesn't have
a journalism program, so to get it, I would have to skip town. Is it
wiser for me to continue to get experience (We're working on a sports
talk show as well), or get a journalism degree? Thanks.

I am student at BCIT, British Columbia Institute of Technology. I am studying radio broadcasting. It is a two year program. The majority of the students volunteer at radio stations, but after graduation none of them are willing to give out jobs to these students. If you are serious about it try a school. There are some good schools in Canada.

The Scotch tape trick is great. But When I started working at Magic in Charlotte, They were using that heavy masking tape that bands use for labelling their board at gigs. It does the same thing as scotch, but stays on the carts over quite a few uses. Since I'm the production guy, I just tape up all the carts. The jocks won't take that extra measure. BTW, it's availible at your local music store...the one that ALL the musicians go to.

There is a low-power "loop programming" station in northern Florida (and perhaps southern Georgia, along I-75) called "Disney Radio." Although it contains "some" generic traveller information, it's basically a commerical for Disney. And as I recall, they have a pretty nice FM frequency (somewhere around 100 or 101).

[Moderator's Note: In Baraboo Wisconsin, neat tourist attraction Wisconsin Dells is a 530khz TIS owned by the Circus Museum, a tourist attraction. It even has an official 'state' sign on the Interstate saying "Circus MuseumInformation AM-530" The signal is quite strong and is nothing but a continuous tape loop advertising the Circus Museum. I can recall their ads in many a World-Radio TV Handbook. Of course, the X stations weren't their only market. Outside of North America, medium wave superpower stations are the norm and they had (at that time, don't know about today) a tremendous market for their transmitters.

Looking at their ad in the 1975 WRTH (a listing of radio and TV stations worldwide) they show pictures of medium wave - AM - transmitters of 50,000 watts up to 1,000,000 watts and also boast of a 2,000,000 watt AM medium wave transmitter that they were building for Radio Belgrade.

They also show a photo of a 2,000,000 watt shortwave transmitter that "Continental's single tube amplifier, built for EIMAC ..., develops 1,300,000 watters of carier power....". At that time they claimed to have installed eight 1,000,000 watt broadcast transmitters. Overall, they had 300 transmitters installed world-wide with a total carrier power of 25 million watts!

Watch the electric meter go round and round..

>buried the legal ID in the _:40_ stopset, playing it around :42-:43!!

curious...what is the current legal standard for the legal id? i seem to
remember that not too long ago (as i was getting started in broadcasting)
that the legal id *had* to be placed within 2 minutes of the top of the
hour. mebbe that was just a station policy.

now the latest i've heard is that the legal id can be "anywhere
convenient", preferably near the top of the hour. hence the popular
practice of burying the id in the last stopset of the hour.

anyone have the official word? 'spose i could just phone up the fcc :)

Yes, most diary keepers write down call letters. And most listeners, when asked what stations they listen to, use dial position first, "handles" second....

They are still required to do a 'legal' at the top of every hour. They must
recite the call letters and city of license.

Here in the Boston area where there are a lot of satellite cities -- cities
outside of the Greater Boston area with their own licensed radio stations,
like Lowell, Lawrence, Framingham, Newton, Waltham, Medford -- a lot of
stations operate as "rimshots". A station might repeatedly call itself a
Boston station, but at the top of the hour it MUST give its ID and its city
of license. Although, many will say something like "WXKS-FM Medford, Boston"
which keeps them inside the law.

And, a great many little AM stations "accidentally on purpose" occasionally
fail to identify properly.

I haven't "DX"ed since I was a kid 30 years ago but I recentlly put up a new FM ant and have been tuning around to see how far I could hear. The problem is many stations seem to have forgotten what FCC assigned call letters are. The only ID I hear is something like "Rock 101" or "Gold-98" or "Zeta-94". Now how is this suppose to tell me anything? Has the FCC thrown out the old rule about call letters and location every 30 mins?

Worse yet...

With all of the duopolies going on, station call letters are being moved
around the band and switched, especially on the AM band. Old call letters
now occupy the frequency of former competitors, etc. If someone were to
have gone to sleep just a few years ago like Rip Van Winkle and wake up,
they would really be confused.

Yesterday (Saturday) on WCBS-FM both Dan Ingram and Ray Rossi (substituting for Norm N. Nite) used the term classic rock a few times. I have always interpreted classic rock radio as playing album cuts while oldies radio plays only 45 RPM from the late 1950s through early 1970s. Cut WCBS-FM try to lure former K-Rock listeners by playing some album cuts? Are there any hybrid oldies-classic rock stations in other markets? With both WYSP in Philadelphia and WXRK in New York drooping classic rock, is this format on the way out?

I don't know about your GM but most Program Directors HATE IT when the
production director calls himself PD. Those royal initials are reserved
for the person who calls the programming shots.

There's a cute article about this, by the way, in the current Radio &
Production. If you don't already get it, subscribe: it's the most valuable
$100 a Prod Dir can spend.

I think it is called RBDS (Radio Broadcasting Data Service), it is on a
subcarrier of the radio staion. They can send news, traffic reports, names of
songs, etc. You can get decoders for them, and I think you can pipe the data
into a computer if you wanted to. -Duane

new idea???? Sure!

I started in radio in 1960 and we were doing it then. All records dubbed to cart were speeded up on a Rek-O-Cut variable speed turntable. It was continuously variable from 0-100 rpm and was also used for 78 rpm sound effects disks to vary the speed of cars, planes, rain etc.

On music we would speed it up till the pitch shift started to be noticable and back off a bit...listen for any wow...and make your cart. Instrumentals and do-wopp type vocals worked the best. The tenors shorts just seemed a bit tight <g>.

From: Marc LoPonte <71762.2034@CompuServe.COM>
Message-ID: <4d8ab9$28m@vixen.cso.uiuc.edu>
Source record: 27101

References: <4co4bl$5p0@vixen.cso.uiuc.edu>

You can add to your list WBAB 102.3 on Long Island. It has a
pretty good signal and remains a true AOR station.

Also WEFX, The Fox 95.9 in Norwalk CT--which actually bills itself
as Classic Rock.

BTW....K-Rock's classic rock format had one of it's best books in a
long time in the Fall 95 survey... Go Figure

to impress him. Well,
I'm not in AC but I am in country so maybe I have a few answer. I'm the morning news slug on KSCS-FM, Dallas/Ft. Worth and news is only part of what I do. My major strength is finding things, usually local things but not always, to bring to the table two to three times an hour that are relatable to the listeners. These usually have some humor to them because that's the way our show is slanted but sometimes we get serious. I try to find local things going on and stick in every crack and crevice of the show I can. The USA Today stuff is ok after I've got through the two local papers to find something around here. On Friday mornings, twice a morning, I do "around town, ten to 13 items of country artists appearing, boat shows, major interest stuff. I also do a think called "Country Music Minute" twice a week, each one run's six times throughout the day. That's my niche. Frankly, there are lots of people better at straight news. I feel like massaging a newspaper is my strength. Hope this helps.

>
>Go ahead, give us your tricks, even if they're a little strange.
>SOME OF MY FAVORITES:

1. "The first lady to show me something furry."
2. GREAT AMERICAN HUNCH-OFF...
Ask for volunteers who will each be given a pair of pantyhose and
2 lemons (sounds kinky, huh). Each volunteer should drop one lemon
down the leg of the pantyhose and tie the other leg around the
waist. The other lemon should be placed on the floor between the
legs. The volunteers will then have swing thier hips in order to
hit the floor lemon with the pantyhose lemon. THE RACE IS ON! It
is a very funny bit, ALWAYS gets lots of laughs! Be sure to
demonstrate proper HUNCHING TECHNIQE before the race. Turn the
pantyhose leg to the back... Doggy Style!

GOOD LUCK

From: jcrose@dplay.com
Message-ID: <4d8abu$29o@vixen.cso.uiuc.edu>
Source record: 27112

References: <4cr5q7$dj6@vixen.cso.uiuc.edu>

In article <4cr5q7$dj6@vixen.cso.uiuc.edu>, byrdman@ripco.com (Mark Byrd) wrote:

[quoting me about pitch vs sample rate]
|: : This just isn't true. If you speed up the CD or file player, and the bits
|: : and bytes come at you faster, the pitch _will_ increase.
[and answering]
|: No, what he said *IS* true.

I just walked over to a Marantz CD player and raised the speed. The Pitch
went up.
I then turned on an Otari DAT with varispeed... same thing. Gee... even my
keyboard sampler works that way.

What in heaven's name can you be talking about?

If you record 44,100 two-byte words in a second, and play them back in
9/10th second, the pitch will go up. Period. It's a question of physics,
and you can prove it to yourself on a piece of graph paper if you don't
want to try it in the real world.

[I then said]
|: : Most good workstations include a time compression function that applies a
|: : more-or-less transparent algorithm to throw away some of those bits and
|: : bytes, so the file can be sent faster while the individual waves still
|: : approximate their original speed....
[and you replied]
|: Then it's a lousy system and you should upgrade.

It's a lousy system because it's got a more-or-less transparent algorithm?

My DSE7000 has about the best time compression going: I can squeeze things
25% faster, almost transparently (and absolutely transparent with less
compression). I'm not going to upgrade it. You couldn't pry it out from
under my dead fingers.

But every system, even the DSE, _has_ to throw bits away to keep the pitch
constant. That's been true since the earliest Lexicon time compressors 20
years ago. There's an excellent discussion of Richard Factor's
circular-buffer implementation in the first Eventide Harmonizer manual. It
should be recommended reading for anybody who purports to understand
digital audio.

|: You should try a program called CoolEdit. You can Shift the pitch, change
|: the time of the cut and it's all independant of each other.
|: You can do one, or the other or both. It really does work.

Also SoundEffects on the Mac, and SoundHack (which can also use resynthesis for some time compression -- which throws _all_ the bits away and starts from scratch). Great shareware.

But even though the interface has pitch and speed controls that are independent of each other, the computer is STILL doing the work as I described it.

Actually, that sounds like it would be pleasant to listen to. It's
been years since I've heard Top 40 FM with any dynamic range.
BTW, what's going on with Jammin' 92? The ratings I've seen for them
are mediocre, and their positioning is bizarre. "Hot Jams" on a station
that plays Hootie and the Blowfish? The station name and positioning
sounds like an urban oriented station, but their playlist in R&R shows a
fair amount of pop alternative mixed in. I'd think it would confuse the
listeners.

Tom Desmond, remembering back a year or two when I switched my car radio
to KNIN Wichita Falls (then "Power 92.9") at the end of a commercial
break,getting a loud, hyped liner for "More stopless hits from POWER
92.9", only to have it seque straight into "Ride My See-Saw" by the Moody
Blues.

Source record: 27117

Numbers courtesy of columnist Bill Mann in today's SF Examiner. These are 6am to Midnight 12+ AQH shares:

1 KGO 8.0 News/Talk
2 KCBS 5.3 All News
3 KMEL 4.1 Urban
4 KOIT 4.0 Easy Listening
5 KNBR 3.9 Sports
6 KYLD 3.6 Urban
7 KIOI 3.5 AC
8 KDFC 2.9 Classical
9 KITS 2.8 Modern Rock
10 KKSF 2.8 uhhh...smooth jazz, easy listening, uh...?

Of particular note is the KKSF/KDFC combination. They have about the same demographics. In tandem they could provide an advertiser with the 2nd-largest audience (2.9 + 2.8 = 5.7) in this part of the Bay Area.

KPIX-FM is #23 and KPIX(AM) is #35 without OJ coverage.

KGO now has been #1 for 70 consecutive Arbitron books.

The South Florida Radio Pages
New Market Mall Home Page (for Married With Children fans)

Pompano Beach, FL ... In a world in which computers have become the fastest-growing form of electronic entertainment, it was only natural that the Internet would become a resource to enhance audience enjoyment of the old standbys, TV and radio.

Although Usenet and the World Wide Web feature hundreds -- maybe thousands -- of sites worldwide for fans of just about every TV and radio show imaginable, several recent additions right here in south Florida are worthy of mention.

The South Florida Radio Pages features links to all south Florida radio stations with a presence on the web. Also featured are web pages and information about for several locally-originating radio programs, including Craig Crossman's Computer America. There are links to radio newsgroups, a radio nostalgia mailing list, a FCC database, ham and hobbyist info, and much more. New links are added weekly. Two new radio stations are expected to be online in January. Point your browser to http://www.univox.com/radio/ for a look at what south Florida radio has to offer.

On the TV side, Married With Children fans can look to The New Market Mall Home Page. (New Market Mall is where Married With Children character Al Bundy works, at Gary's Shoes.) The mall page includes links to other Married With Children web sites around the world which include sound clips, episode synopses, a fanzine, and the Usenet newsgroup for Married With Children fans. Check out http://www.univox.com/mall/newmarket/ -- but be warned, it IS for fans only!

Both pages are maintained by tech writer David H. Citron, author of the syndicated CyberCurmudgeon Column.

315. Non-com "ratings"

Newsgroup: rec.radio.broadcasting
Date: 1996-01-13 00:00:00 UTC
From: dmdanhau@newstand.syr.edu
Message-ID: <4d8abi$295@vixen.cso.uiuc.edu>
Source record: 27120

Something I don't understand ... non-commercial stations are not included in regular Arbitron ratings that are publicized. But Arbitron does make the "ratings" of these stations available to them. So when a student-run station says it was ranked 6 in the market, does that mean among all stations? And does that mean some commercial station can also claim to be number 6? Obviously this doesn't affect shares, but I just wondered how this worked ...

Thanks,

Dan

316. Old time radio TV show debuts

Newsgroup: rec.radio.broadcasting
Date: 1996-01-13 00:00:00 UTC
From: buch@exis.net
Message-ID: <4d8abl$29a@vixen.cso.uiuc.edu>

The cable network AMC (American Movie Classics) will premier a new show called "WENN" on Saturday, Jan 13 at 9 PM EST. Teasers, run by the network on Jan 11, showed several beautiful radios from the 1930's. The show appears on the surface to be a 1940 version of WKRP. I did not see anything to compare with Lonnie Anderson, however, unless you think a big, black-dial Zenith console measures up. That of course is a matter of personal taste. It's probably worth a look.

Message-ID: <4d8abr$29j@vixen.cso.uiuc.edu>
Source record: 27123

Spanish language radio shares jump 21%
in Los Angeles and 19% in New York

by Julian H. Breen

January 10, 1995-- Arbitron Fall 1995 results in four of the five largest Hispanic radio markets show Spanish language radio shares surging sharply. Many attribute the increase to a change in Arbitron policy.

Beginning with the Fall 1995 survey, High Density Hispanic Area diary placement calls in the top fifteen Hispanic markets were made exclusively by bilingual interviewers for the first time. Speculation is the shift to entirely bilingual interviewers placing diaries in the largest HDHA's may have tilted the HDHA sample toward more Spanish language preference households.

In Los Angeles overall Total Persons 12+ shares for Spanish language radio jumped 21% over an average of the preceding four books (Fall 1994-Summer 1995). In New York the gain was 19% while San Francisco saw a 7% increase. Chicago, the fifth largest Hispanic market, was off 2%.

Arbitron introduces new population estimates annually at the beginning of the Fall survey. In Los Angeles, Hispanic persons 12+ gained 4%, New York was up 2%, San Francisco less than 1% and Chicago 3%. So, the surge in Spanish language radio shares cannot be attributed to population estimate changes alone.

The largest gains were at Men 18-34, up 30% in Los Angeles and 37% in New York.

The following table summarizes the percentage change in total week Spanish language radio share in Fall 1995 compared with the preceding four book average (Fall 1994-Summer 1995) for all stations making the Arbitron metro area Minimum Reporting Standard.

TP12+ A18-34 M18-34 W18-34 A25-54 M25-54 W25-54

Los Angeles +21% +27% +30% +27% +20% +26% +15%

New York +19% +32% +37% +31% +22% +16% +21%

San Francisco + 7% +25% +20% +22% + 5% - 2% + 7%

Chicago - 2% -10% + 3% -24% -14% - 9% -16%

Hispanic persons 12+ account for 36.7% of the total persons 12+ population in the Los Angeles metro survey area, 16.9% in New York, 15.7% in San Francisco and 11.4% in Chicago.

The third largest Hispanic market is Miami-Ft. Lauderdale-Hollywood with 38.1% total persons 12+ Hispanic population. Its Fall 1995 results are due on the Arbitrends computers Friday.

Date: 1996-01-13 00:00:00 UTC
From: rickac@ix.netcom.com
Message-ID: <4d8ac3$2a1@vixen.cso.uiuc.edu>
Source record: 27125

Can anyone help me with this?

I am looking for a list of radio stations in southern California that allow you to buy large chunks of time. In other words I would like to buy three hours of time on a station and be able to use them for my show. Anybody out there know of any stations??? Let me know. Either post or e-mail me at:

Rickac@ix.netcom.com

Thanx,
Rick

This is a "real" station (Class A), licensed to a small town in N.
Florida on 107.9. With a good radio, you can hear them as far away as
Gainesville (about 40 miles)

Hi there!
My name is David. I am 19 and doing afternoon drive at an Adult CHR 100,000 FM here, in Mississippi. I have often thought about trading airchecks with my European counterparts. If you would be interested in doing this, please EMail me your info. I would be more than happy to get a tape out to you. I could really use someone to critique me.

Thanks for the time,
David

Donna,

There has been a two-woman morning show. Right here in the Midwest. In uptight old Saint Louis to boot. On KPNT (105.7 The Point) an alternative station (or modern rock if you're one of the ones who says they've sold out). Their morning show featured two women...with the liner "...Because Mornings are a Bitch."

It was fairly successfull for the station, and the two have gone their seperate ways to bigger and better things.

I'd like to know how many stations (with news departments)
use pre-produced news features (AP, CNN, PR or government agency
feeds) in their newscasts?. What makes you want to run these
"outside" features...topic, production-quality, etc...? On that note,
what makes you avoid them like the plague?

-Lisa Wheeler

Duane Whittingham wrote the quoted material below:

" I think it is called RBDS (Radio Broadcasting Data Service), it is on a
" subcarrier of the radio staion. They can send news, traffic reports, names of
" songs, etc. You can get decoders for them, and I think you can pipe the data
" into a computer if you wanted to. -Duane

No, actually this is pre-RDBS. It's plain old SCA, but in data form. In
the SF Bay Area, Silent Radio is carried on KQED-FM. In other cities, who
knows? Often the stations carrying SCA are the ones you'd least expect:
non-commercial stations, religious, and non-English language stations.

327. El Dorado buying Dallas area radio stations

Newsgroup: rec.radio.broadcasting
Date: 1996-01-13 00:00:00 UTC
From: Tom Desmond <wsu@mimi.itg.ti.com>
Message-ID: <4d8a9u$22m@vixen.cso.uiuc.edu>
Source record: 27132

The January 12, 1996 edition of the Dallas Morning News reports that El Dorado Communications, a Los Angeles based group owner of Spanish language radio stations, is buying three radio stations owned or under contract by Radio Plano Inc.
The three stations are KRVA-AM (1600) licensed to Cockrell Hill, KRVA-FM (106.9) a class A FM licensed to McKinney that doesn't get a listenable signal into Dallas most of the time), and KXEB-AM (910), licensed to Sherman, TX. All three currently broadcast Spanish language programming. KXEB is owned by Pesa Broadcasting, but was being purchased by Radio Plano. The article indicates that terms of the sale were not available. El Dorado will run the stations under an LMA pending FCC approval of the transaction.
No mention was made of the status of KTCY-FM (104.9), which has been previously reported as being under contract to Radio Plano (or a related entity) for $700,000. As a C2, it offers potential for substantially better market coverage than the current KRVA-FM can ever hope for.

Tom Desmond

328. PHOENIX: KUKQ QUITS

Newsgroup: rec.radio.broadcasting
Date: 1996-01-13 00:00:00 UTC
From: Michael Hagerty <Michael_Hagerty@azfamily.com>
Message-ID: <4d8aa0$22q@vixen.cso.uiuc.edu>
Source record: 27133

Alternative weekly newspaper "New Times" reports this week that Alternative AM station KUKQ(1060) will change format and call letters Monday (1/15)...becoming a separately programmed clone of its FM AOR sister KUPD(97.9). The paper says the calls will be KUPD-AM and the station will be referred to as "KUPD II".

KUKQ went alternative in 1989, and was the only station in the format for several years. It bailed from the format in early 1993, after then-newcomer KEDJ(106.3) switched to the format and beat KQ in one book. The switch was to a KUPD simulcast for a few months, followed by a 90-day flirtation with talk, which ended on day one of new owner

Sandusky Broadcasting's reign. The station flipped back to a KUPD simulcast for about six weeks, then re-launched as an alternative. Best book since has been about a 0.4, while KEDJ tends to get low 2's.

The recent switch to alternative by KZON(101.5)made the field very crowded, although KUKQ PD LARRY MAC told New Times that Sandusky had made the decision last spring....about the time founding PD JOHNATHON L. ROSEN bailed. MAC says he was informed just before Christmas.

According to the New Times, MAC is staying on as PD of KUPD II, while MD ALISON STRONG is talking with an Alternative station in the Northwest. Sandusky is parking the KUKQ calls for possible later use.

329. Billy Dale to be on Adam's World

Billy Dale to Discuss TravelGate on WWNN's Adam's World

BILLY DALE, former head of the White House travel office, will be Adam Clatsoff's guest on the ADAM'S WORLD radio program, Monday morning January 15th, from 7:15 to 8 AM.

ADAM'S WORLD is a local business/politics/health talk show heard weekdays from 6 until 9 AM on WWNN, 980 kHz AM in Pompano Beach, Florida.

In February 1994, Adam broke the Paula Jones story in the local media when an Arkansas state trooper was his guest on the show.

If you have questions for Billy Dale, you can e-mail them (in advance, please) to admswrld@sefl.satelnet.org. Or just call during the show! (The phone number is announced on the air.)

For CyberGate subscribers, Adam's World even has its own newsgroup. It is cybergate.adamsworld.

Today I heard a new CBS jingle specfically referring to them as "New
York's only source for classic rock!" I haven't noted an iota of actual
format change though. My guess is they've simply decided to stretch the
definition of "classic rock".

Source record: 27136

Since WSUN dropped the Entertaining Talk format in favor of being the third all sports station (except for Ron&Ron in the morning) I was wondering if anyone knows if Bob Lasiters Sidekick, Sharon Taylor, stayed with Cox Enterprizes in some other capacity or at some other station. I heard one of the other news women at another Cox Station (the Coast) in Tampa today and was hoping Sharon maintained employment. I know Bob is probably fed up and gone for good...but he is unpredictable and may still be back elsewhere...WFLA maybe?

Chuck,

They only operate until 10:00pm Eastern time. Are you listening early enough? I posted a message a number of weeks ago where I mention having called John Sullivan at the station and he had told me that one of the reports they had gotten was from Oregon.

They are licensed for 10,000 watts daytime and 1,000 watts nightime, although I have heard them switching back and forth between the power levels, perhaps testing. I guess they wouldn't bother anyone at the higher power at this time.

>less than a whole musical tone -- won't be noticed.

The operative word here is "most." Problem is, MANY people do have perfect pitch, and when you mess with the music, it drives them right up the nearest wall.

Great stories here about the WABC turntable, with the cheap phono cartridge with nickels taped to it. Now I know why WABC always sounded like tinny crap on my radio, compared to AM stations with good audio back then, such as CKLW, WLS, WCFL, WIBG, and WKBW. I know that some people loved the WABC reverb. To me, those great jocks sounded like they were talking into one of those big metal trash barrels.

In article <4co4c5$5po@vixen.cso.uiuc.edu> Johnny Donovan WABC-NY <ru@i-2000.com> writes:

>When I arrived at WABC in 1972 I noticed that the records (remember
>them?)
>sounded a little fast . I asked the PD and he knew nothing about it.
>I got one of those strobe disks and checked the lone turntable that was
>used
>to cart up all the music and sure enough it WAS running fast. It was
>completely by accident.

Are you sure it was by accident? I remember John Landecker saying WLS (also
owned by ABC) speeded up its records at that time. He said he was interviewing
Todd Rundgren (producer of Grand Funk) and played "We're An American Band"
speeded-up and Todd didn't even notice.

By 1974 WCFL was getting raked by the local press for speeding up its records,
but then they were noticeably fast-- Ringo Starr sounded like the Chipmunks.

338. Re: Drag Strip Spots

As far as the old drag strip spots, I was listening to an old aircheck of Art Robert's on WLS (1966), and they were running those drag strip spots and I miss em. There are still a few around but mostly, the land was worth more as a shopping center and insurance rates were probably through the roof.

339. San Diego Radio Watcher: 1.12.95

Newsgroup: rec.radio.broadcasting
Date: 1996-01-13 00:00:00 UTC
From: San Diego Radio Watcher <sdradio@zNet.com>
Message-ID: <4d8aa1$22r@vixen.cso.uiuc.edu>
Source record: 27162

Here is the latest happening in San Diego Radio: January 12, 1996.

Not Not: The Late Late Radio Show with Tom Synder won't won't be playing on KFMB. As posted from Toledo, Ohio [home of the Mud Hens!], Xtra Sports 690 Steve Mason has the anchor duties of the World Wide Pants-produced program. KFMB radio dropped the popular night show -- not wanting to promote cross-town [nation?] Mason He has morning duties at XETRA-AM [690 77.5kw DAII]. Besides, KFMB lost the CBS sports package to Xtra Sports. [The change starts with this month's super-dooper bowl in Tempe.][KFMB 760 5/50kw DAN][Perhaps Xtra Sports could pick up the show to help their late-night programming, which they admit, needs some tweaking.]

Call Blocking: John and Ken of KFI's number one rated afternoon show in LA, have taken a stand against the video from that "guy" proclaiming his innocence. During the week, they gave out tips on how to tie up the lines with questions to the operators of the selling service, while stopping potential buyers with busy signals. "We don't want to interfere with a business enterprise," said John Kobylt in an AP story, "We are just telling people questions they could ask." John and Ken also called for a boycott of stations or cable service that air the commercials. Cox is the parent company of KFI and my local cable service . . . [So what am I to do?] Ron Goldman's father has appeared on KFI often since the trail. Bill Press, the Sunday afternoon host, has raised a large amount of money for the Goldman Defense Fund. [KFI 640 50kw/50kw ND][Moving story, more info coming]

Ranting about ratings: Arbitron released the latest SD ratings for the fall period, and KSON A/F [country], is back on top of the radio heap with a 7.9. That compares to 2nd place KyXy's [AC] strong 6.8. Other notes of interest include: KUPR's first full book: 1.2. Small numbers to those outside the market, but big numbers for those at the station. As KKOS, the AAA format station was big in north county San Diego, but was limited in reception to the south county. Now, at the 95.7 spot, and a great stick location on Mount Soledad, the station covers most San Diego county.

Other rating notes: KUPR [AAA] ties with LA's KNX [news] at 1.2. KFI's [talk] numbers increased to 2.5, while mostly syndicated KOGO [talk] checks in with a 2.4 -- it's best yet. KSDO [talk/news] drops .3 to 4.2; as KFMB's [FS] drop of .6 to 3.5. KMKX [Rock Mix] on-TV promotion and NOT playing the same classic song, over, and over, and over, and over, raises the station to 2.2. KKBH [70s] "The Beach" washes up at 1.7.

Sports Shorts: Xtra Sports VP Howard Freedman was quoted in the Friday North County Times about the drop in listeners to the station. He noted that it's "just a dip," not a dive. The station is the most listened to sports station in North America. [XETRA 77.5kw DAN]

The Sands of Time: Shotgun Tom Kelly! The San Diego legend is presently at KCBQ-FM, but I've been flooded with e.mail this week that he's packed his bags and

is beach bound. Here is the scoop: Shotgun is on a well-deserved vacation, and will return to the KCBQ 105.3 microphone Monday. As for his jumping to the Beach, Shotgun told me that he "couldn't say." Still, with this posting to the San Diego radio news group, I'm still receiving information that tells me he's moving. Hmmm. [Noted that Par's acquisition of KCBQ and Compass Media should happen soon -- that is, if the FCC stays open.][KCBQ-FM 105.3; KKBH, 102.9]

Radio Notes: Word comes out that KBAX [Fallbrook, 107.1], part of the KMAX trio of stations, will drop the sports-fare in March [new owners]. Rumors are floating -- still -- that KIIS-AM in Los Angeles will pick up sports and Don Imus. Former Xtra sports relay station in Simi Valley at 670, KWNK, is reportedly for sale. Nobel had an "LMA,"and did not buy the station with the option.

Newsgroups: I've noted these discussion lists available on the net:

Maybe this isn't as unusual as you think. I was in a preacher's office one weekend discussing an LMA. He had his son go into another room from which he retrieved several brown plastic garbage bags which, as it turned out, were filled with cash. They counted out almost $10,000 for me as good faith money.

Is there anyone in Chicago or Milwaukee markets who is willing to do some taping of certain local radio stations/shows. I prefer a "Hi-Fi" VHS recording on SLP because of superior sound, cost per hour, and ease of recording for *you* (you can program it).

Of course I will happily receive the recordings on standard cassette.

I would reimburse you (of course) for your costs and offer my services if there is anything you ever want me to record.

Write to the following address *only* if you are willing to do a little off-air taping for me, write me with the your *general* area (so I can pick the right stations) and what kind of recording you can make (cassette/VHS).

Write to ... chicago@airwaves.com

This will allow me to use a separate mailbox for these replies.

I appreciate any assistance you can offer...

I just wanted to add some information about Carl Gorney's recent report on the sale of Buffalo television station, Channel 49. Carl and others have been crediting the Buffalo News for breaking the story on December 23rd. In fact, it was WBFO News, and reporter Bill Raffel, which broke the story two days earlier. Bill sent it along to the Associated Press. Perhaps that's where the News picked it up. In all fairness though, I must credit News reporter Dave Condren for being able to confirm Ch. 49 could become a WB affiliate. We tried to get someone to go on record with that but the people we talked with refused comment.

345. Buffalo/Toronto Radio Watch(1/12)

Happenings in the #40 market:

*KB gets "Real" with country;Babe jumps to WGR...

WWKB(1520)switched format on Monday from hot talk(Howard Stern
being the top dog with that format)to country-or,more specifically,ABC/SMN's
"Real Country" format,which has Buck Owens on board in some capacity.(It's
now known as Real Country Gold KB 1520 AM...quite a mouthful to say,isn't it?)
WXRL(1300,Lancaster/Buffalo;country),which had a gold base of about 25%,
immediately boosted its gold content to 60%-already,air talent Scott
Cleveland has left on-air duties to concentrate on off-air ones. (One tipster
told me that the audio processing,in spots,is worse that the N.Y.Thruway's
travelers' station,WPAN997(1610 AM).) And,Joel Denver's AllAccess is reporting
that the GM is making the AM drive jock do the time,temp and a liner after
every record.(For what purpose,do you think...to get banality on both ends
of the dial? :>) The Stern homepage isn't taking the news well...here's how
they referred to it:"Well now,let's all put on our country boots,stick our
thumbs in our belts and go country line dancing!!! Wheee doggie!!! (WWKB)'s
new format is technically described by radio industry analysts as music to
have sex with your parents by." 2 shows have moved to Saturday:Prospering in
America(geared to union issues)now airs at 8am(instead of Sundays at 10am) &
the Dollar Doctor show(with investing advice)follows it at 9(moving back from
11am).
However,one show has survived the format change. The Fabulous Sports
Babe moved over to WGR(NewsRadio 55)on Monday from 10am-2pm;on KB,it came on
after Stern finished. The Babe replaces Ron Dobson,who now moves to 2-5am
overnights. PD Jim Pastrick was quoted in the Buffalo News as saying that
Dobson's show was doing well,ratings-wise,but that the Babe would be a better
programming fit;also,Dobson has a contract that runs into the summer. Dobson
replaces Talk America's Stan Major in that slot.
(BTW,samples of the format were committed to tape. E-mail for details.)

*The Toronto Raptors have a new home in Hamilton. Sean Healy reports
that CHML(900,full service)has picked up the local radio rights to the rest
of the Raptors' season. The games had been on CKOC(1150;Oldies 1150)until a
new policy wiping out all sports programming was put in place recently.

*CHUM(1050,Toronto,oldies;1050chum)has joined the Web at this address:
-http://www.1050chum.com/

*Moving across the state(most items from AllAccess):
-WEQX(102.7,Manchester,VT./Albany;AAA)welcomes Ian Harrison as its PD
and Marc Alginhi as its APD/MD.
-Musical chairs galor at WSKS(Kiss 102)in Utica. Shannon Steele,who was
its MD and in running for the PD post,passed on that job and is moving to
WBHT(Hot 97)in Wilkes-Barre,Penn.to co-host AM drive with Kid Kelly. Back at

Kiss:Joel Murphy joins as the new MD(arriving from WVNC in Canton,NY),J.D. Redman steps into Steele's PM drive gig(his last stop was WNTQ(93 Q)in Syracuse),and promotions director Becky Myers was named acting PD.
-Radio & Records reports that WNCQ-AM/WCIZ-FM in Watertown,NY were sold to Forever Broadcasting from Watertown Radio Partners for $2.8 million.

*The Rochester Democrat & Chronicle had 2 radio stories in its Sunday edition. One-the cover story of the inside section-detailed the inner workings of the Nerve(WNVE,95.1/95.5;modern rock). The other had to do with a new FM station going on the air. Bennett Loudon reported(in a story that appeared on p.3B)that WRCD(107.3)is expected to be on the air by Monday(1/15). The 6 kW transmitter was installed last Thursday(1/4)below a 200' tower in East Bloomfield,in Ontario County. Testing was scheduled to start yesterday.
The station will go with a NAC format(which WJZR/North Coast 105.9 uses), but will be local/satellite;local DJ's,satellite-fed format.(Format guess: SW Networks' Smooth FM.) It'll use the same facilities as WCGR and WLKA-on Townline Road in Canadaigua. (WLKA used the same format,but thanks to its 3 kW power,couldn't get enough listeners to make it profitable.)
Owner George Kimble(who owns WCGR/1550 & WLKA/102.3(AC)in Canadaigua, Geneva's WGVA/1240 & WNYR/98.5 and Auburn's WALL/93.7(classic rock))was quoted as saying it took several hundred thousands of dollars,over 5 years of legal battles(mostly with Anthony & Karin Vinci,but also with town officials who tussled over tower height,its location and the how much land he needed to own. The Vincis won their suit,but Kimble sold them 5 acres next to the tower property-one of the highest points on Rts.5 & 20 between Buffalo & Syracuse.) Kimble said that people in Rochester & Auburn can hear it thanks to where the tower is,but not those in Honeoye.
Also on the docket:plans to move WCGR to 1310 AM and expand hours of operation to 24 hours.(It currently shares time w/a Canadian station and must be off the air oin the evening.) Kimble will have to install 3 new towers and boost power from 250 w to 1 kW.

*On a sad note:local broadcasting veteran Edward Tucholka died on January 4 in N.Tonawanda after a brief illness. He was 80.
The Buffalo native was an announcer for the long-deceased Sattler's department store at 998 Broadway(where the Broadway Market is,BTW),developing his broadcast persona. He started in radio back in 1926 as part of the boys choir on WGR. From 1928-1937,he worked at WKBW,WMAK(which,as WXXI's Bob Smith noted nearly a year ago,may very well have been the forerunner to WBEN)and WEBR,where he ultimately became staff announcer and stayed in that post until 1957. He also did other duties at 'EBR:hosting the Noon Day Revue during World War 2-which tracked area servicemen during the conflict-and hosting a children's show from 1948-53. He then moved to WHLD,where in the late 50's he did AM drive and produced 44 hours/week of classical music. He also was PD at WBEN-FM(now WMJQ/Q 102),and taught a brocasting course at the Buffalo YMCA for over a decade. Bert Gambini,now at WBFO,noted that Tucholka was always willing to help others;when he landed at WHLD,Gambini said Tucholka wouldn't go "until he knew I was comfortable with the coming shift. He was always there to help when I had a question",and even said often to call him at home if there were any problems.
He was buried on Monday(1/8).

In article: <4cdemv$1h7@vixen.cso.uiuc.edu> ab415@lafn.org (charles hobbs) writes:

> Now, let's consider the BBC. (This is information I'm getting from the
> 1993 World Radio TV Handbook. UK readers please jump in if you feel the
> need).

OK... :->

> BBC domestic radio currently operates five nationwide networks, three
> regional networks, and several local stations. (There are commercial
> stations and networks in Britain as well, these are growing in number and
> importance)

Indeed. In the last audience figures total listening to commercial radio topped the BBC for the first time.

> Radio 1 (now called 1FM) plays mostly rock music. Radio 2 plays a softer
> style of pop. Radio 3 is for classical music, Radio 4 for news and
> spoken word programs, and Radio 5 carries mostly sports, with some
> educational programs thrown in.

Just to clarify slightly:

Radio 1 (seems they've just abandoned 1FM again) plays a very wide range of "pop" music, some commercial, some distinctly not. It also has programmes of dance music (house, rap, soul etc.) "world" music and other current but non-mainstream styles. There are also segments of speech and audio art and documentaries on "lifestyle" topics affecting its (mainly young) audience. It is perhaps one of the most eclectic stations to be found anywhere at the moment.

Radio 1 recently re-jigged itself with the sacking of many of it's older presenters and took a huge drop in audience figures. This ratings drop is now turning around and the station has hired some hot young but experienced talent. In my opinion they are sounding better than they have done for a very long time. (And bear in mind that they are a direct competitor to the statio I work for, in fact they hired away several of our presenters).

Radio 2 is, in effect, the same type of programming for the next generation up. It plays a mixture of softer current music mixed with older records and also includes easy listening, big bands and other styles that appeal to a slightly older audience. Presentation style is relaxed and mature with quite a lot of speech.

Radio 3 is a full-on, no-compromise, intellectual classical music, drama and arts station. They play quite a lot of "difficult" music, including modern works that are disliked by many "classical" fans. They play almost everything in its entirety, not single movements of a symphony for example. Quite a lot of the output is recorded specifically for the BBC which directly employs a number of orchestras and at least one choir.

Percieved by many to be elitist, Radio 3 probably epitomises the "public service" nature of the BBC better than anything else on radio (TV is a different matter, but we'll leave that one for now). Depite this they have approx 1 million listeners weekly. (ballpark figure, sorry I can't be mdirectly employs a number of orchestras and at least one choir.

Percieved by many to be elitist, Radio 3 probably epitomises the "public service" nature of the BBC better than anything else on radio (TV is a different matter, but we'll leave that one for now). Depite this they have approx 1 million listeners weekly. (ballpark figure, sorry I can't be more exact, I don't have any research figures to hand).

There is a comercial classical music station - Classic FM - which is closer in style to the types of classic stations I've heard in the US, playing mainly the more accessible parts of the repetoire and entirely avoiding difficult avant-garde pieces.

Radio 4 is, as you rightly say, a speech based network. In addition to three major news programmes they broadcast a wide range of magazine programmes, significant amounts of drama, book serialisations (currently 3 per day) light entertainment and programme-length features.

Radio 5, which started life a a hybrid childrens/educational/general music and features mixture has reinvented itself as primarily a news and sport channel with some more general programming (including a weekly programme on net topics) I don't generally listen to this so I can't really offer much detail - sorry.

> The three local networks are located in Scotland, Wales and Northern
> Ireland.

And there are a number of local stations run by the BBC, mostly covering a major metropolitan area or a county, these have a commitment to at least 50% speech programming almost entirely of a local nature.

> OK, so out of 5 local networks, two play rock and pop, as a US station
> would.

I don't think any commercial station, US or otherwise, would play quite the range or styles that Radio 1 manages,

Radio 2 is closer to the type of formats that are used by commercial stations, but with a much broader remit.

> One plays classical and cultural stuff. Most major US cities have at least
> one such station.

Again it is not an exact comparison, I hope my brief description of Radio 3 carries that point.

> Also, not only British mores, but radio and other laws would probably
> prevent anything really shocking, except in limited circumstances. Note
> that this differs from the US. The Brits might put up with a risque
> Benny Hill, for example, but any defamation of the Queen, etc. is
> Right Out! (Just ask the Sex Pistols!)

The BBC is actually much less tightly regulated than commercial stations in this country. And they can certainly play the Sex Pistols now.

About a year ago they aired a programme consisting entirely of records that had been "banned" by the BBC. Actually records don't get banned, they are put on a list of records which need authorisation from someone higher in the food chain than the programme's producer before they can be played. The point of the programme was to demonstrate how ridiculous the former regime of banning actually was. I can't imagine the BBC banning a hip-hop record with explicit lyrics for example. They wouldn't play it at peak time but it would certainly find a home in one of Radio 1's rap programmes.

> It could be argued that a supercilious, artsy attitude toward the listener,
> as if certain programs were "bitter medicine to be swallowed", is as
> disrepectful to the listener as the "soul-selling" US broadcaster.

Not really, the ethos of the BBC is generally to provide the best programming possible in each of the strands they produce. Some of this will not appeal to a mass audience, that doesn't mean people have to swallow the "bitter medicine", just that some folks will like it and others won't.

> (Although, the BBC is probably more responsive to its listeners than
> we seem to be giving them credit for in this thread).

They are quite responsive, but even more important, they don't have to respond to 1-point changes in their ratings, they can continue to explore and experiment and produce some of the most innovative programming to be found anywhere in the world.

> Well, barring radical solutions such as asking people to work for free,
> this is where we are. My suggestion is, rather than engaging in the
> usual grass-is-greener envy, typical of certain US citizens in discussions
> of Europe, that we try to work within the system as it stands in order to
> at least incrementally, increase the creativity level in US radio broadcasting.

Absolutely, there is no chance of the typical US citizen agreeing to fund any broadcaster from taxation. Maybe college radio is the place to look for creativity.

347. Looking for KQV Airchecks, 1969-72

Newsgroup: rec.radio.broadcasting
Date: 1996-01-13 00:00:00 UTC
From: clarkepxy@aol.com
Message-ID: <4d8aa3$22v@vixen.cso.uiuc.edu>
Source record: 27170

Every so often, with our moderator's kind indulgence, I'd like to make this request on this newsgroup in case someone can help.

KQV in Pittsburgh was the Top 40 station I grew up listening to. I am constantly looking for airchecks from the 1969-1972 period when I listened the most. This is something of a Holy Grail, as not many tapes of KQV seem to have been made. Over the years, I've found a few, but not nearly enough to satisfy my appetite for reliving my adolescence <grin>

I already have all the KQV stuff available from the commercial aircheck services (Aircheck Factory, Man From Mars, etc.) What I'm looking for is probably in someone's private collection, or came from one. I have a wall full of airchecks to trade in return for any KQV you might have.

I'd also like to know if anyone knows the whereabouts of former KQV PD Mike McCormack (a/k/a Jim Hankins), who later went to WLS. Several people tell me that he probably has a basement full of tapes. Last I heard he was in Austin (or somewhere in Texas) working for Signature Broadcasting in some capacity, but he seems to have disappeared.

Please E-mail me directly if you can be of any assistance at: clarkepxy@aol.com. And many thanks in advance!

Clarke

I agree. CDs and cassettes took over from vinyl less because of sound quality than for convenience and portability. Is the Great Unwashed going to go out and buy new, probably expensive radios just to see if there's anything on this new band worth listening to? How many station owners are gonna invest $$$ in a whole new air chain to reach the few who went out and bought new receivers. Witness the ho-hum attitude towards RBDS.

Depends on the area -- since L-band coverage is limited by obstructions that don't affect VHF nearly as much, it will often be necessary to use multiple transmitter sites (not unlike cellular telephone systems) to get full coverage of a city. As I understand it the BBC's DAB service, which is now on the air in London, is using four transmitter sites -- their FM tower in Wrotham, their TV tower at Crystal Palace, the original BBC TV tower at Alexandra Palace (built in 1936) and one other -- to cover only part of the area served by Wrotham's FM signals. This is on the old high VHF TV band -- known in Europe as Band III, FM being Band II -- rather than L-band.

Since the transmitters will be low-powered, it may well be possible to put them on cellular towers in some places.

Cliff...

Here in the Washington, D.C. area, Ed Walker continues to work in the radio/tv business. For years, Ed worked with his partner and long-time friend, , Willard Scott (yes, the "Today" show weatherman) as half of the team of "Walker and Scott"
on WRC-AM (980), in the good old days when NBC owned the station. After WRC went rock, "Walker & Scott" ended up over at WWDC-AM (1260) in afternoons. Eddie went on to solo host big-band/MOR middays on WAMU-FM (88.5), where I had the privilege of being his newsman for about a year or so in the 80s. Ed's also hosted a morning talk show on WJLA-TV here in Washington, and now hosts a similarly formatted talk program for cable's "NewsChannel 8" here in D.C. This, along with a raft of voice-over gigs in and around the market.

Oh, and did I mention Eddie is blind? And runs a "tighter" board than a lot of sighted top-40 jocks I've worked with? <g>

If you want to contact Ed, Cliff, I recommend you find him at News Channel 8 in Springfield, Va. (sorry, I don't have the phone # with me at the moment). He's a class act, and I'm certain he'd be happy to talk to you.

As nice of a proposal as this might be, realistically, do you think it will ever happen? In fairness to ALL VHF TV stations, if you move the stations currently operating on channels 2 through 6, you'll have to move the ones on 7 through 13. As I see it, this might not be a bad idea. Broadcasters currently operating on the UHF channels currently have a tougher time competing with VHF stations in most markets. Putting ALL TV stations on UHF might create for more fairer competition amongst TV stations, and open up a chunk of frequencies for FM expansion at the same time. Considering the number of TV sets currently operational in the US and the money of CBS, NBC, and ABC, my idea probably would not happen.

When I was in Japan last year, I bought a Sony AM/FM "transistor" (small
portable) radio that the FM band tunes from 76MHz to 108MHz. Thier FM
band goes from 76 to 90MHz, and they have TV channels in 90 to 108MHz.
Looks like this particular radio was designed to be usable in Japan as well
as to be taken along on trips to the USA or Europe.

So, it wouldn't take much to tool up to make extended FM band radios.
Though the FCC might use such extended bandwidth for digital broadcasts...

In article <4cr5pq$dik@vixen.cso.uiuc.edu>, dk@crl.com says...
>I think extending the FM band downward is a laudable goal. Today there is
>no need to waste lower-spectrum on TV when current low-bank VHF TV (channels
>2-6) could be dropped into the UHF band where there appears to be plenty of
space even in the most crowded TV markets.

There only *appears* to be plenty of space. The FCC requires full-power UHF
TV stations in a given city to be spaced at least six channels apart, but
never seven, fourteen or fifteen, to avoid problems that used to be common in
UHF TV tuners and still crop up on occasion. LPTV stations are allowed to
operate in in-between spots (especially ones that might be subject to
interference *from* full-power stations) since that is considered a secondary
service.

The FCC apparently plans to move TV out of the entire VHF TV band after
digital transmission replaces NTSC some time early in the next century.
Personally, I'd like to see FM extended down to 82 MHz as you suggest and
land mobile radio extended up to 216 MHz (shared with wireless microphones on
some frequencies), but I suspect the FCC and/or Congress will dictate that
the spectrum be auctioned for new services instead.

358. FOX 101.9 Melbourne UPDATE

Newsgroup: rec.radio.broadcasting

I have found some more info on that aircheck I have. It's the afternoon drivetime show with Martin and Molloy. The website someone mentioned about FOX 101.9 is accurate. The URL is:

http://www.fox.com.au

I've sent out two copies of the aircheck so far, and will try to satisfy all requests that I've received so far by week's end. Till then...

359. Garrett out at KERN-FM

Newsgroup: rec.radio.broadcasting
Date: 1996-01-13 00:00:00 UTC
From: kuzz1@aol.com
Message-ID: <4d8ab5$28g@vixen.cso.uiuc.edu>
Source record: 27182

KERN-FM ("Kool 94.1") Bakersfield operations manager and morning host Pat Garrett was fired Friday. His time slot was filled Monday with the syndicated "Zippo in the Morning" program hosted by Jim Zippo. Garrett's firing leaves the oldies station with only the 4-9 PM shift as a live, local broadcast. The station is mostly automated with voice tracks from sister station KGFM's air staff.

Well, here I am again... First of all, I would just like to thank ALL of you who responded to my post!! Unfortunately, I somehow lost the first 4 or 5 responses I got, so I didn't get to respond to some of you personally--(sorry!). I really hadn't expected so many people to offer their help and advice! It is really great to see how willing people in the radio industry are to help new people get into the business! I took all of your suggestions into consideration when I went internship-hunting the other day, and I am VERY pleased to announce that it paid off!! Here's the story:

Most of you told me that I needed to call the station and speak with the Program Director, so that's what I did. Since I really like talk radio, I decided to try Tampa's Newsradio 970 WFLA first. I spoke with the PD, and she told me that although WFLA had no intern program, their FM station, 93.3 WFLZ, Tampa's most popular top 40 station, did. She told me to come by the station and fill out an application. WFLZ actually has quite an in-depth intern program in which they teach you about all facets of the radio business--programming, production, promotion, news, traffic, etc., but allow you to choose which areas in which you would most like to concentrate. On the application, I wrote that news/talk was the area that interested me most, but that I would help out any way I could and do ANYTHING that needed to be done. I also added that I would be more than happy to help out not only with WFLZ, but also with WFLA if they needed help as well. Although I have a part time job at a pizza joint, I left my schedule open, reasoning that I should arrange my schedule around the station (and school), as my long term career will be radio and not pizza (hopefully!). I can always get another part time job, but radio jobs are not as easy to come by.

When I got back from work yesterday, there was a message on my answering machine from one of the people in charge of the intern program asking me to call him. It was 6:00 PM, so I decided to wait until today to return the call. Needless to say, the first thing I did when I got up this morning was call the station. We went over my application over the phone, he explained the program to me, and wants me to start on Monday at 10:00!! So there you have it. It wasn't nearly as hard as I thought it would be, and it was a lot easier with all of your help! Thanks again to everyone, and I'll be posting periodic reports and any questions I have along the way!

Also, as a little sidebar to all of this, I may have also secured another internship for the summer! The other night, I was playing with my GE Super Radio, and was able to pick up WTKS Real Radio 104.1 out of Orlando. Being from the Orlando area, I used to listen to the station constantly (and still do when I go back for vacation). As a matter of fact, this station is basically the reason I decided to pursue radio. So I called up the show (which was being hosted by Drew Garabo, one of my favorite WTKS personalities) to let him know that I was listening from Tampa, and to shoot the breeze a little. Somewhere in there I mentioned my plans, and kind of jokingly mentioned that I would be hitting up HIS station for an internship when I came home for the

summer. He told me to get in touch with him when I got into town, because HE could probably use an intern over the summer-- right there on the air! Life is good.

Steve Hill--
USF student, Sigma Chi, and future radio personality

It was in the late '60's or early 70's at KBZY in Salem, Oregon, when we
had to read a live spot
for "Scott's Schwinn Cycle Sales on Commercial Street Southeast in Salem"
at least twice per
shift. Anyone who had their radio tuned slightly off-frequency probably
got an earful of hiss.
Then one day, the owner, after a day of bike-riding with his family, drove
his car into his garage
without first removing the four family bicycles from the roof-mounted
bicycle rack.......

For the next couple of weeks we sold "Scott's Schwinn Cycle Sales...." at
least once every hour!
And after all that practice, to this day I have no problem with "She sells
seashells by the
seashore."

Long time WLW morning personality Jim Scott has resigned. His last show was Dec. 22. He will begin working for another station in Cincinnati Feb. 1. Speculation is that he will go to WWNK-FM 94.1, "Wink 94.1". Scott had the highest-rated show on the market's highest-rated station. Scott began at WLW in 1984, after working at WSAI-AM 1360 and the now-defunct WLLT-FM 94.9. WLW program director Bill Wills has named himself as host of the morning show. Wills had been hosting the weekday 9am-10am slot. The weekday lineup at WLW now looks like this:

5:30am-10:00am Bill Wills
10:00am- 2:00pm Mike McConnell
2:00pm- 3:00pm Bill Cunningham
3:00pm- 6:00pm Gary Burbank
6:00pm- 9:00pm Cris Collinsworth and Andy Furman (Sports Talk)
9:00pm-12:00am Bill Cunningham
12:00am- 5:30am "The Truckin' Bozo"

Regarding 1660 WJDM/Elizabeth, NJ-

>They must have a pretty deep null towards Oregon; I haven't heard
>a peep out of them, not even a carrier detectable on narrow CW.
>Or are they off the air now?

They must have a pretty deep null toward Princeton, NJ, about 45 miles away, at the most. I've been reading the comments here, and have attempted - on numerous occasions - to hear the station. Not a peep here in Central, NJ, either. My receivers (I've tried every one in the house) include a GE Superadio III, a Carver receiver, and a Harmon/Kardon receiver (Which picked up WEWN/Birmingham, AL, broadcasting on 5825khz, according to them, around 1630 on the analog tuner ?!?). So what am I doing wrong? Am I just in the wrong spot? Geez, when the wind blows the right way, you can SMELL Elizabeth from here.

Any tips?

[Moderator's Note: You are trying them via ground wave, all the reports of great distances are from skywave. At 1660 the groundwave is not going to be great. Rich Wood of WORnet says that the signal is not grat even in NYC. Bill]

Source record: 27188

(Belated) Happy New Year, Airwavers! Greetings from the snow-bound, Nation's Capital, where the snow is deep (drifts up to my waist!), and more is expected Friday! Herewith, the latest radio biz news:

Item First: You Can Come Home Again -- Tuesday's (Jan 9, 1996) Washington Post "On the Dial" (radio) column reports that Robin Breeden, a very popular personality with WPGC-FM (95.5) until 1992, is returning to the station, this time to host morning's on sister station WPGC-AM (1580). She returns to the D.C. area from KBXX/Houston, where she's been hosting mornings since her 1992 departure from WPGC-FM. The AM (which was home to a legacy Top 40 Format in the late-50s, 60s and early 70s), now sports the "Flava 1580" format, a hybrid of hip hop/rap introduced last year when Infinity dropped an all-business news format heard on the station for the last few years.

Item Second: Movin' On Up the Road -- The Post also reports that T. Alan Hay, GM of
alternative rocker WHFS-FM (99.1) in Annapolis for the past 7 years, is moving on to Baltimore to be VP/GM of oldies formatted WQSR-FM (105.7) and religious formatted sister station WBMD-AM (750). Hay's move comes on the heels of SFX Broadcasting's purchase of 19 stations belonging to Liberty Broadcasting, including WHFS-FM and 70's formatted "Xtra 104" (WXTR/WXVR). WXTR GM Bob Rich will be 'HFS' acting GM.

Item Third: One More Reason *Not* to Listen -- CBS-owned Seventies-outlet WARW-FM ("Arrow 94.7") dropped the airborne traffic reports of Walt Starling on December 21st, in an effort to 'control expenses'. Starling, who had been one of the last remaining traffic reporters working exclusively for one station from a plane, has been replaced by the ubiquitous and generic Metro Traffic control. He's told the Washington Post he's talking to a few stations in the market. Could the pressure from the Westinghouse buyout already be trickling down to the owned stations? (Author's note: This is the *same* station that brought in the former morning man from a competing station to teach "Arrow" jocks about presentation.
This station is a continual no-show in the ratings; could this station become the prototype for the first CBS all-news FM radio station? Stay tuned.).

Item Fourth: Headlines from the Snowbanks -- As you might expect, the Blizzard of '96 has had its effect on some radio station operations here in the Capital. At country-formatted WMZQ AM-FM (1390/98.7), the morning team of Gary Murphy and Jessica Cash were stuck in Memphis, prepping for the St. Jude's Children's Hospital fundraiser next month. The Post reports Murphy and Cash phoned in reports from their hotel, and their boss, GM Charlie Ochs, went back on the air for the first time in years to host the morning show with a couple of part-timers.
Over at hot-AC formatted WRQX-FM ("Mix 107.3"), morning man Jack Diamond, a

former TV weather guy, took to heart the early predictions of a monster storm, and bought himself a Chevy Blazer last Friday. That's the good news. The bad news is that he parked it in a place next to his house where the snow drifts totally covered his new car! Result: no Jack. His partner, Bert Weiss, has also been snowed in, so intrepid news anchor Barbara Britt has been hosting the morning show solo, along with handling snow closing info updates in the afternoons and evenings.

Item Fourth: The Year In Review Headlines -

FORMAT CHANGES:
- WXTR-FM drops 50s-60s oldies for pop-oriented 70s rock.
- The Washington Redskins did not renew with sports-talk WTEM-AM (570), and are now heard on WJFK FM/AM (106.7 / 1300). WTEM begins jetisoning hosts, but picks up the Washington Capitals (NHL) and Washington Bullets (NBA). WTEM also picks up Ken Beatrice, who's popular sports-talk show was dropped by ABC o&o talker WMAL-AM (630).
- Viacom drops CNN "Headline News" simulcast on WCPT-AM (730), switches to simulcast of Bloomberg Business Radio from NY, and becomes WBZS.
- Greater Media, in one of the strangest format "changes" in this market, took easy AC-formatted WGAY-FM (99.5), and switched to...well, AC "Star 99.5". After an expensive ad campaign that ran for a month, "Star 98.3" in Southern Maryland took exception to the pre-emption of its promotional slogan, and convinced a judge that they were right. So, Greater Media said a loud "duhhh", and the station was reborn as "Bright 99.5". (And, like the plethora of "alternative" rockers in NY and Philly, D.C. had yet *another* AC station. Brilliant!).

BIG DEAL OF THE YEAR: That would have to be the $34million dollar purchase of Albimar's WKYS-FM (93.3) by Kathy Hughes' Radio One (already the owner of soul-oldies-AC WMMJ-FM [Magic 102.3] and talk-formatted WOL-AM [1450], along with stations in Baltimore and Atlanta). Hughes proceeded to move WMMJ and WOL from H St. in Northeast Washington to the more plush (and safer) environs of the WKYS studios at the NBC complex in tony Northwest D.C. Hughes also proceeded to clean house at WKYS, re-directing the Urban Contemp station toward a younger audience with more hip-hop music and a new ad campaign. Speculation continues that Radio One will swap frequencies with WMMJ and WKYS in an effort to broaden the appeal (and the suburban reach) of the more mainstream WMMJ, and target WKYS with a more city-oriented urban format.

NOTED IN PASSING: The legendry Wolfman Jack, who's career had just begun to rebound at WXTR-FM (and the other great stations that had begun to pick up his satellite-distributed Friday night show from Planet Hollywood in D.C.), passed away on July 1st, collapsing upon arriving home after a grueling book promotion tour for his autobiography. The outpouring of emotion for Wolfman here in "Airwaves"/rec.radio/broadcasting was, to say the least, unprecedented.
In August, WGAY-FM's Bob Chandler, who wrote most of the book on programming the now almost-extinct Beautiful Music format, died on his 61st birthday. In October, long-time newsman Jamie Bragg from WTOP-AM (1500) died after a long battle with prostate cancer.

And so it goes... more next week!

366. Chicago Radio Watch:Fall ratings

Newsgroup: rec.radio.broadcasting
Date: 1996-01-13 00:00:00 UTC
From: JJB92@aol.com
Message-ID: <4d8a9s$22k@vixen.cso.uiuc.edu>
Source record: 27189

The happy numbers are in for the Fall quarter which runs from September 21 through December 13. Summer results are included for comparison purposes:

WGCI-FM (Urban contemporary) 6.1 6.7
WGN-AM (Information) 6.0 6.2
WUSN-FM (Country) 4.7 4.2
WLIT-FM (Soft rock) 4.2 3.7
WBBM-FM (Top 40/dance 4.0 4.5
WBBM-AM (News) 3.9 3.7
WVAZ-FM (Urban contemporary) 3.9 4.1
WNUA-FM (Smooth jazz) 3.6 3.9
WJMK-FM (Oldies) 3.4 3.4
WRCX-FM (Rock) 3.3 3.8
WAIT-AM (Big band) 3.1 2.5
WKQX-FM (Alternative rock) 3.1 3.4
WOJO-FM (Spanish) 3.0 3.4
WMAQ-AM (News) 2.9 3.1
WLUP-FM (Entertaining talk) 2.8 2.2
WXRT-FM (Progressive rock) 2.7 2.9
WLS-AM (Talk) 2.6 2.8
WTMX-FM (Soft rock) 2.4 2.4
WSCR-AM (Sports talk) 2.3 1.1
WCKG-FM (Classic rock) 2.0 2.5
WGCI-AM (Oldies) 1.9 1.4
WEJM-FM (Rap) 1.9 2.4
WPNT-FM (Soft rock) 1.8 2.2
WYSY-FM (70's) 1.8 1.9
WNIB-FM (Classical) 1.6 1.6
WLS-FM (Talk) 1.4 1.1
WJJD-AM (Talk) 1.2 1.0
WMVP-AM (Sports talk) 1.2 0.9
WFMT-FM (Classical) 1.2 1.3
WYCA-FM (Gospel) 1.0 0.8

Personalities and stations we love and hate......

Bob Collins continues to rule the morning drive on WGN-AM with a 9.9 share. Bob continues his winning streak which started in 1986. His next closest competitor was all-news WBBM-AM which posted a 6.1 share, up from the summer book performance of 5.6.

Mancow Muller, mornings on rocker WRCX-FM continued his streak of increasing ratings. Mancow scored a 4.7 share, up from a 4.4 share in the last book. Mancow has steadily built his audience, increasing it in every rating period, since his arrival into Chicago.

Johnathon Brandmeier's return to the morning drive was a big success on WLUP-FM. Johnny, who had risen to second in the morning drive during his previous morning tenure, jump started the morning ratings from a 2.4 to a 3.6 share. His rating was good for a tie for 7th in the market.

Howard Stern, who switched from classic rock WCKG-FM to talker WJJD-AM just before this rating period delivered a 1.8 share to his new station. This compared to his previous book of 3.4. WCKG saw its morning show decline to a 1.4 share. Oops.

Doug Banks, formerly afternoons on WGCI-FM continues to lead the afternoon drive slot with a 6.4 share. However, Chicago will have a new king in the PM drive. Doug is now syndicated by ABC radio, but won't return to the airwaves in Chicago until July. Doug will reappear on WEJM-FM/AM.

Country station WUSN-FM celebrated its last book without competition by posting solid results in the morning (J.D. Spangler and Ray Stevens) and the PM drive (John Howell).

Appears that Chicago really likes news in the morning: WMAQ's morning team of Pat Cassidy and Jay Cogdon delivered a 4.2 share, up from 3.8 in the previous book.

Daytime only, big band station WAIT-AM jumped to a 3.1 share, good enough to tie for 11th place overall.

Fiesty sports talker WSCR-AM saw its ratings jump to a 2.3 from a 1.1 share.

WBBM-FM returned to the top ten after the departure of "Terry and Wild Bill" in favor of George McFly and Hollywood Rodriguez. George and Hollywood scored a 3.4 share.

Steve Dahl and Bruce Wolf finished tied for 16th place in the overall ratings in the morning drive on sports talker WMVP. Ratings for their target demo were not available.

Danny Bonaduce and Kevin Matthews both did well in their new time slots. Kevin finished 7th middays with a 3.6 share while Danny placed 9th in the PM drive with a 3.5 share. Both showed increases over their previous books.

Station versus Station combat.....

Rock stations: WRCX continues to lead the pack with a 3.3 share. The performance was down slightly from a 3.8 share. WKQX was also down slightly, from a 3.4 to a 3.1 share. WLUP, which features entertaining talk saw its ratings rebound from a 2.2 share to a 2.8 share. Progressive rocker WXRT dipped slightly from a 2.9 to a 2.7 share. WTMX delivered a 2.4 share which was consistent with the previous book. Repetitious rockers WCKG (can't get enough of The Who) and WYSY (love those Village People) brought up the rear with a 2.0 and 1.8 share respectively.

News radio: WBBM continued its lead over rival (and now sister station) WMAQ. BBM delivered a 3.9 share to MAQ's 2.9 share. MAQ must miss OJ. The station delivered a 4 share while broadcasting the OJ Simpson trial earlier this year.

Sports talk: As noted above, WSCR saw a dramatic increase in results moving from a 1.1 to a 2.3 share. Rival WMVP enjoyed an increase from a 0.9 to a 1.2.

Classical music: WNIB continues to lead rival WFMT, this time 1.6 to 1.2

Very soft rock: Soft rocker WPNT continues to wallow in the ratings. The station delivered a 1.8 share. It's main competiotor, WLIT ran circles around PNT delivering a 4.2 share.

Spanish language stations: WOJO is far ahead of rival WIND. OJO delivered a 3.0 share compared to an 0.9 share for WIND.

Talk stations: WLS-AM continues to hold a comfortable lead over mostly syndicated talker WJJD-AM. LS delivered a 2.6 share which included a top ten finish in the morning (some things just can't be explained) and evening (at least I can see that) slots. WJJD delivered a 1.2 share. Memo to WJJD: think Bob Lassiter.

Interestingly, Chicago yawns at syndicated windbag Rush Limbaugh who failed to place in the top ten during the midday slot.

Chicago, I am proud of you.

Ratings published in both the Chicago Tribune and Sun-Times; comments were my own.

Joe Bonk

367. Re: What Happen to Call Letters?

Newsgroup: rec.radio.broadcasting
Date: 1996-01-13 00:00:00 UTC
From: talk1370@aol.com
Message-ID: <4d8aab$23c@vixen.cso.uiuc.edu>
Source record: 27190

"Has the FCC repealed the old rule (re: call letters)?
Actually, it has, in several stages. The bottom-of-the-hour ID was dropped about 1971-72, and at the time stations were just required to do a legal ID (callsign, then city of license) at the top of the hour plus or minus two minutes. Later on in the 80s, they loosened up the rule still further, letting the station do its single legal ID at the "closest natural break in programming" to the top of the hour, with the understanding that it should be between :55 and :05. Most stations do ID within 5 minutes of the hour, and most news-talk or full service stations with top-of-the-hour updates hit the ID within seconds of the hour...but music stations have a very liberal interpretation of the rule. I've heard some legal IDs as early as :48 or :50 (you never seem to get one AFTER the top of the hour on music stations) and 3 to 5 minutes ahead of the hour seems almost to be the norm.
One other thing...the definition of a legal ID has changed somewhat. It used to be very strict---just callsign and the one city of license (even if the actual target city was a bigger one nearby). Now, you can start with the callsign, then dial position, then main city of license and however many other cities you want to tack on. And they don't even have to be nearby as long as someone there can hear you. I've heard big-signal Buffalo FM stations throw in Rochester and Toronto, just to cite one example. And I believe there's at least one AM-FM combo that can dual ID Washington and Baltimore. (The AM is licensed to Baltimore, the FM to Washington, both stations claim coverage in both cities.) I don't know if they're currently doing it (haven't heard them in a while).
We aren't yet as loose as the Canadians, who permit the use of the normal station positioning slogan as the top of the hour ID and only require a full legal ID of callsign and city of license a few times a day. (Go up to Toronto and you'll hear only ONE station, CFRB, regularly giving what would be a legal ID in the US.) But we're getting there.
Bob Smith, middays WXXI-AM 1370 Rochester NY

368. Mid-America Radio Watch (9-Jan-1996)

Newsgroup: rec.radio.broadcasting

The three-station country simulcast in mid-Missouri didn't last long with KCMQ's return to a rock-oriented format after nearly three years as a "young country" station.

A ticking clock and a countdown on New Year's Eve marked the Q's move to a current-oriented album-rock format, giving heritage rocker KFMZ(FM) the first commercial competition it's had in the format, if you don't count Jefferson City station KTXY(FM)'s brief flirtation with album rock a couple of years ago.

KCMQ owner Zimmer Broadcasting has hired a new program director, Debbie Wylde from Paducah, Kentucky, and, it's rumored, will soon simulcast the "Steve and D.C." morning show from co-owned WKBQ(FM) in St. Louis.

Zimmer's committment to non-country formats has, in the past, been called into question by some observers in the St. Louis market. For instance, Zimmer flipped contemporary-hit WKBQ from a full-power facility at 106.5 MHz to a station at 104.1 MHz with less than half the power. Still, WKBQ continues to hold and even improve audience share in some books, while WKKX at 106.5 struggles in head-on competition against St. Louis country leader WIL-FM.

Zimmer acquired KCMQ and simulcaster KTGR(AM) three years ago while the stations were in receivership, the outcome of a former would-be owner's decision to pay $6 million for the stations in the late 1980s, just before revenues collapsed.

(Yes, you read that right: $6 million for a 250-watt daytimer and a Class A FM with half the maximum tower height.)

Still, it wasn't the first time a country station had appeared at 96.7 MHz: stereo KTGC replaced monaural Top-40 KTGR-FM in 1976 and lasted a couple of years before new owners swapped the AM and FM formats in August 1978, beginning a long run for "Q-97" as a contemporary-hit station.

History repeats itself, but with a twist that should give KFMZ, facing license revocation hearings, even more to worry about. KFMZ is, except for gospel broadcaster KMFC(FM), the last standalone operation remaining in mid-Missouri, with a heritage AOR format that's beginning to show its age after a spurt in 1987 that kept it going for several years.

****

Changes are also reported at Kansas City CHR KMXV(FM), with the promotion of new general manager Mike Payne.

According to a report in the Kansas City _Star_, Payne, sales manager at KMXV since 1987 (and at co-owned KUDL(FM) since 1993), replaced Fred Murr, who moves on to manage two other stations owned by Regent Communications in Las Vegas.

The _Star_ report noted the dismissal of program director Steve Wall, the elimination of rap from the playlist, fewer R&B tunes, and the addition of modern-rock crossovers.

The newspaper quoted Payne, "Our perception was that the Mix was

delivering a teen and early 20s listener. We want to get that to a 20- to 45-year-old."

****

In Saturday's feature section, the _Star_ showcased local rock radio stations, in a well written and researched article by Brian McTavish, who also serves as the newspaper's radio columnist.

Some notable quotes about individual stations:

KCMO-FM, an oldies station: "The stylish sonic package works for both oldies fanatics and casual listeners lured in by the old-timey, jingle-laded fun."

KQRC(FM): "An adventurous hard rocker and the leading album oriented station playing new songs."

KCFX(FM): "Classic rock of the 1970s is the soundtrack to this expert marketing vehicle for the Kansas City Chiefs." [Obviously this was written before a certain Sunday event!]

KYYS(FM): "Would like new listeners but hestitates to spin enough new music to see what sticks and reluctant to alienate longtime listener base."

KLZR(FM), based in nearby Lawrence, Kansas: "The most openly alternative rock station in the market that almost isn't in the market."

KISF(FM): "A contemporary-hit, heavy-rotation approach to alternative rock radio...."

Of special interest was McTavish's estimate of Kansas City market revenues at $60 million per year, with $12 to $15 million of that split among the rock-and-rollers in the field.

As noted in my report on the completion of EZ Communications' purchase of country powerhouse KFKF(FM), EZ's new acquisition is the market's revenue leader.

For anyone who might be interested.

Jeff

Title 47 Code of Federal Regulations
CHAPTER I
SUBCHAPTER C
PART 73
Subpart H

Sec. 73.1201 Station identification.

(a) When regularly required. Broadcast station identification announcements shall be made: (1) At the beginning and ending of each time of operation, and (2) hourly, as close to the hour as feasible, at a natural break in program offerings. Television broadcast stations may make these announcements visually or aurally.
(b) Content. (1) Official station identification shall consist of the station's call letters immediately followed by the community or communities specified in its license as the station's location: Provided, That the name of the licensee or the station's frequency or channel number, or both, as stated on the station's license may be inserted between the call letters and station location. No other insertion is permissible.
(2) A station may include in its official station identification the name of any additional community or communities, but the community to which the station is licensed must be named first.
(c) Channel - (1) General. Except as otherwise provided in this paragraph, in making the identification announcement the call letters shall be given only on the channel identified thereby.
(2) Simultaneous AM-FM broadcasts. If the same licensee operates an FM broadcast station and a AM broadcast station and simultaneously broadcasts the same programs over the facilities of both such stations, station identification announcements may be made jointly for both stations for periods of such simultaneous operation. If the call letters of the FM station do not clearly reveal that it is an FM station, the joint announcement shall so identify it.
(3) Satellite operation. When programming of a broadcast station is rebroadcast simultaneously over the facilities of a satellite station, the originating station may make identification announcements for the satellite station for periods of such

simultaneous operation.
(i) In the case of a television broadcast station, such announcements, in addition to the information required by paragraph (b)(1) of this section, shall include the number of the channel on which each station is operating.
(ii) In the case of aural broadcast stations, such announcements, in addition to the information required by paragraph (b)(1) of this section, shall include the frequency on which each station is operating.
(d) Subscription television stations (STV). The requirements for official station identification applicable to TV stations will apply to Subscription TV stations except, during STV-encoded programming such station identification is not required. However, a station identification announcement will be made immediately prior to and following the encoded Subscription TV program period.
(34 FR 19762, Dec. 17, 1969, as amended at 37 FR 23726, Nov. 8, 1972; 39 FR 6707, Feb. 22, 1974; 39 FR 9442, Mar. 11, 1974; 41 FR 29394, July 16, 1976; 47 FR 3791, Jan. 27, 1982; 48 FR 51308, Nov. 8, 1983)

371. TIS program restrictions? (was: Re: Low power continuous loop..)

Newsgroup: rec.radio.broadcasting
Date: 1996-01-13 00:00:00 UTC
From: U40241@UICVM.CC.UIC.EDU
Message-ID: <4d8ac5$2a4@vixen.cso.uiuc.edu>
Source record: 27194

References: <4cr5qg$djl@vixen.cso.uiuc.edu>

On this subject, I am interested in knowing if there are any special program content restrictions on carrier current systems as described in the Code of Federal Regulations 47, part 15.221: 'Carrier current systems and transmitters employing a leaky coaxial cable as the radiating antenna may operate in the band 525-1705 kHz provided the field strength levels of the radiated emissions do not exceed 15uv/meter, as measured at a distance of 47,715/(frequency in kHz) meters (~Lambda/2Pi) from the electric power line or coaxial cable, respectively.... '
I do not see any basis for restricting programming content in the regulation but I don't know about linkage to other clauses in CFR 47. One broadcast engineer thought that the FCC might be picky about what program material could be transmitted in this fashion, but if it's not in the book and if advertising is O.K., then what not? Is it permissible to extend the range of a college station, beyond campus, using this technology? Any feedback is appreciated. Thank you. Jim Limber, University of Illinois, Chicago.

Larry Glick did a talk show on WMEX, WBZ, and WHDH in Boston from 1964 to 1992. He usually talked about lighter subjects, rarely dealing with serious issues. Callers often would give Larry leads on interesting guests to have on the show. Sometimes Larry would call these people and interview them. If the interview was successful, the original caller would get a "Glick University T-Shirt".

Hold on, let me check,

Q104 is a far cry from a classic rock. It seems that every time I turn it on, the only classics I hear are anything from Van Halen 1, Judas Priest - Another Thing Coming, Led Zep, anything from Floyd's Wall or Wish You Were Here and Ratt - Round and Round. Other than that, they are nothing more than z-100 in different clothing.

377. WNEW-FM needles K-ROCK

Newsgroup: rec.radio.broadcasting
Date: 1996-01-13 00:00:00 UTC
From: schuster@panix.com
Message-ID: <4d8aba$28n@vixen.cso.uiuc.edu>
Source record: 27200

On Wednesday's WNEW-FM morning show, there was an interruption featuring an on-the-air phone call from someone called "Pete", who was looking for work as a disc jockey. The voice sounded like a poor imitation of Pete Fornatele, and Pat St. John played it up to the hilt - "Can you send us a demo tape?" "You have tons of my tapes already there" ... etc. You get the idea.

Considering their ratings under the new "scrambled rock" format, I don't think WNEW is in any position to be throwing stones....

Donna:

Not too long ago, there were a couple of women holding down the fort
at WKXW in Trenton, NJ; in fact, briefly (I believe), their show was
syndicated nationally.

Even more briefly, in 1987, I filled in for Ted Brown with Nola Roeper
on WNEW-AM's morning show, putting a very short-lived two-woman team
on the air in NYC. (I think Nola and I are the only two people who
might remember this!)

380. Mixing board sought

Newsgroup: rec.radio.broadcasting
Date: 1996-01-13 00:00:00 UTC
From: kechak@Simba.AGN.NET
Message-ID: <4d8aa6$233@vixen.cso.uiuc.edu>
Source record: 27203

I am looking for a small mixing board which can do the following

1> Should have inputs for 2 mics
2> Should have an input for a telephone line with the ability to take the phone "off hook"
3> Should have a delay mechanism for a 3 or 7 second delay
4> Should have an input for cassette player (not preamp output, the earphone output from a standard stereo cassette player).
5> The output should be the type that can be fed into a SoundBlaster card.

Anyone have the name of any equipment mfgrs who sell this kind of stuff, new or used?

Thanks
Stan

Quite possibly true, but you run one big risk if you don't use call letters. If there is any conflict in a diary entry, Arbitron goes by the call letters, not the handle. So you have to make sure there's no confusion, and with the proliferation of stations out there, that's almost impossible.

I've heard too many stories about stations that don't get credit for listening because listeners mix up call letters and handles, or connect one station's call letters and another station's programming. My preference has always been to hammer the actual call letters into their brains as often and as clearly as humanly possible.

Well, according to the FCC manual (at least the last time I checked),
the policy was something like as close to the top of the hour as
conveniently possible. It seems the old two minute rule has
disappeared.

This has made life considerable easy for us as a classical station.

It's in big ratings trouble in a lot of places. The problem with it is that it becomes very boring to hear the same few hundred cuts over and over again. The format comes on strong, then burns out. Listeners say they want more variety, but if you try to give it to them, they're gone instantly. So it's a no-win format. The bulk of its target audience winds up on oldies and country stations, both of which tend to offer music, personality and service elements that more closely resemble the Top 40 radio they grew up on as high school kids, rather than the AOR they thought was cool when they were in college.

I think the format's troubles are summed up in a cut I seem to hear every time I punch up our local satellite classic-rocker. It hit me the other day that "Nobody to Run With" by the Allman Brothers Band seems to lyrically capture what's happening to classic rock on the radio. And that's a depressing song.

384. KB Radio

Newsgroup: rec.radio.broadcasting
Date: 1996-01-13 00:00:00 UTC
From: bfomarks@ubvms.cc.buffalo.edu
Message-ID: <4d8a9u$22n@vixen.cso.uiuc.edu>
Source record: 27207

I just want to add my $.02 to the recent thread about this once great radio station. I'm news director of a public radio station in Buffalo (WBFO), and I doubt I would be in this business today if it weren't for KB. The Top 40 format of the late '60s and early '70s appealed to me so much that I eventually chose radio as my career. The talent was outstanding, my personal favorite being Jack Armstrong (the 7pm-12mid) personality. As my colleague Mark Wozniak noted in a recent posting, Armstrong once said that all the other stations should just turn off their power because they were just wasting electricity. Everyone was listening to KB. We'll never see its likes again.

I usually do not like to criticize other radio stations in this market given my current employment at WBFO. But I must go on record as saying that if the current management at KB thinks "real country" is going to work, they're crazy. There are already two FM country stations in Buffalo, including the top rated WYRK. The format, which started today (1/8), has two things going against it: 1) it's syndicated, meaning there is virtually no local presence; and 2) it's on AM. Granted, the "real" country flavor may appeal to hard-core fans of the music. But I doubt WYRK will be threatened.

I feel so strongly that this will fail that I have printed out this posting, and just like Bob Curran (Buffalo News columnist) does with his annual Bills prediction, I will eat it if the country format somehow works. In fact, I will eat my posting if KB gets a 2.5 overall rating (12+) by next year at this time -- a rating that most commercials stations do not consider adequate.

Perhaps KB should take Armstrong's advice. Shut off the station! You're wasting 50,000 watts of power.

>
> perhaps a portable DAT recorder...but if memory serves they were a little
> more expensive than MD recorders...anyone have any recent price quotes?

Here's a few random thoughts for you...

All of these are reasonable choices, R-DAT is the best sound quality (though as you pointed out, by the time it's been through the FM programme chain you'd not know the difference) and also has the most chance of blank media being available in the longer term.

Minidisc and DCC are both formats that have yet to make it into the big time. Some companies here in the UK have just started promoting DCC as a mastering recorder for home studio users. DCC hasn't take off at all well here, even less than MD, and future availability of tapes could be a problem.

If you go for any of these formats be sure not to buy anything with 3.5mm jack sockets on it. These usually surface mount jobs are unreliable to the max. We had several Sony portable R-DAT machines here and all of them needed (expensive) repairs to the jack sockets, (because of the construction this isn't a user-repairable item). One was written off when the pcb broke where the jack was mounted and the cost of repair was 80% of the new cost.

Another alternative you might like to consider is a PC based editing system. There are p[lenty of well featured editors around these days and some relatively inexpensive cards. I've used Turtle Beach cards before and was impressed with the sound quality, but there are several other manufacturers too.

And boy is it cool when you turn up to do a location recording with just a laptop!

This might cost a little more initially, and if you want to distribute your work then you'll
still need to worry about compatibility with your clients equipment. On the other hand, once you've used a digital editor regularly you'll never want to hold a blade again! Not only does it simplify editing but it also allows many things that would be impossible on tape.

In terms of compatibility with the largest number of people then R-DAT may be your best bet, I'm not sure how things are in the US but in Europe R-DAT is the de facto standard in pretty much any studio, be it recording, production, dubbing, radio or tv.

Just my opinions of course, hope they help.

386. Louisville Public Radio Changes

Newsgroup: rec.radio.broadcasting
Date: 1996-01-13 00:00:00 UTC
From: edellers@shivasys.com
Message-ID: <4d8a9v$22p@vixen.cso.uiuc.edu>
Source record: 27209

The three major public radio stations in Louisville -- WFPL (89.3), WFPK (91.9) and WUOL (90.5) - have shuffled their formats around rather drastically starting yesterday morning, in preparation for an eventual merger. WFPL and WFPK are operated by the Louisville Free Public Library and WUOL by the University of Louisville, but at some future date they will be operated by the Public Radio Partnership.

The biggest change is the shift of WFPK -- which has basically been a "classical" station since its founding in the 1950s -- to a jazz and alternative music format. All the classical music programming has been moved to WUOL (which, since its founding in 1976, has itself carried mostly classical music with varying levels of news coverage), and WFPK has in turn taken over all the jazz programming that has been heard on WFPL for many years. Now WFPL is all news and talk (with one notable exception), WUOL is all classical, and WFPK is all jazz/alternative.

All three stations are carrying satellite formats overnight on at least some nights. WUOL is carrying the Beethoven Network from WFMT from 11 pm to 6 am (8 am Saturday and Sunday); WFPK will be picking up the KJAZ feed on weeknights from 1-6 am, and WFPL is carrying the BBC World Service from 11 pm (11:30 on Sunday) to 5 am (7 am on Sunday). This is the one exception to WFPL's no-music format, since World Service does have some music programming.

WFPL and WFPK are running 100 kW ERP from a 316-foot tower on the grounds of the main library in downtown Louisville, while WUOL -- with "only" 35 kW ERP -- has a much better transmitter site with a 749-foot tower in Floyds Knobs, Indiana, where most of the Louisville TV transmitters and several commercial FM sites are also located. Hopefully WFPL and WFPK will be moved to that tower as well, which would ease the intermodulation problems on FM in the downtown area.

387. This week's Supreme Ct. "indecent" decision

Newsgroup: rec.radio.broadcasting
Date: 1996-01-13 00:00:00 UTC
From: croth@omnifest.uwm.edu
Message-ID: <4d8ab0$286@vixen.cso.uiuc.edu>
Source record: 27210

I have in front of me several newspaper reports on the
Supreme Court's 1-8-96 ruling on broadcast "indecency" and the
length of the "safe harbor" time window.
There is a lot of vagueness in each of the stories
insofar as one dimension: when the safe harbor begins.
Given the snow-in affecting DC-based gov't and media,
I can understand that errors can surface, especially
in such a complex and arcane area of law. I'm also
reluctant to report, as fact, when the safe harbor
begins, until I receive confirmation from more than one
source.

Today, on 1-9-96,I phoned
the biggest NBC TV affiliate in my state, and the regs-watcher told me
that at the moment the safe harbor begins at 10. Then he
corrected himself after I pointed out what's in this AM's
NY Times.

I wonder if anyone on this forum has received anything from
the National Association of Broadcasters, the ACLU, or
The ACLU Arts Censorship Project, or the National Coalition
Against Censorship. Or perhaps a FAX from Broadcasting/Cable mag.
Here's my three questions:

What is the safe harbor period?

Is is standardized for commercial, noncommercial,
24-hour, and less-than-24 hour stations?

What was the safe harbor period just before Jan. 8?

Direct response appreciated if you have an authoritative
answer. Send to: first@omnifest.uwm.edu

[Moderator's Note: Actually, I would expect that the answers to
Chris's questions might be of interest to the group. So I ask that
they be posted *as well as* emailed to Chris (if you don't mind).
Thanks... Bill]

Well, if they want to hear the same thing over and over, why have the classic rock station in San Francisco done so poorly? KRQR has floundered so much they have added 90s tunes to their playlist, and KUFX, a very predictable and "safe" classic rock station, has done next to nothing in the book. Latest Arbitron shows them something like 20th in the San Jose market (their signal originates in the South Bay).

KOME, meanwhile, is doing very well with the same format K-ROCK just adopted, with a 4.7 in 12+, and number one or two in very key demos.

Maybe because I've been in radio so long, my opinion is too jaded, but I'd rather hear a classic station being LESS predictable and repetitive; the ones (at least out here) just tend to sound tired and boring....

391. Boston Radio Watch 01-10-96

Newsgroup: rec.radio.broadcasting
Date: 1996-01-13 00:00:00 UTC
From: Mark Shneyder 2-4219 <nhmas@gauss.med.harvard.edu>
Message-ID: <4d8a9p$22f@vixen.cso.uiuc.edu>
Source record: 27214

Well, this is the first Boston Radio Watch update of 1996
and things are looking pretty interesting already....

* Fall 1995 Ratings roll in :

Top 10 in the 12+ :

Fall '95 Su '95 One Year Ago Format
[Fall '94]
1. WBZ AM 1030 8.1 7.3 7.9 News/Talk/Sports/Bruins
2. WJMN 94.5FM 6.9 5.9 5.5 CHurban/Dance 'Jamn 94-5'
3. WRKO AM 680 6.3 6.6 7.4 All-Talk/Rush/Celtics
4. WXKS 107.9FM 5.3 6.1 6.0 CHR - "KISS 108"
5. WMJX 106.7FM 5.0 4.5 4.2 AC -'Magic 106.7'
6. WBCN 104.1FM 4.7 5.7 5.4 Modern Rock/Stern/Patriots
7. WCRB 102.5FM 4.6 4.2 3.5 Classical
WODS 103.3FM 4.6 4.7 4.7 All-Oldies - 'Oldies 103'
9. WBMX 98.5FM 4.2 3.8 4.6 Hot AC - 'Mix 98.5'
10.WZLX 100.7FM 4.1 4.3 4.2 CR -'Boston's Classic Rock'

Mini Overview : As Evergreen gets ready to take over Pyramid's
WJMN 94.5FM and WXKS 107.9FM, it finds itself in a very interesting
situation : Jamn 94-5, which Pyramid bought for some $22 million back
in June 1993, now outrates once one of the most dominant CHR
stations in the country -- Kiss 108 and it appears to be eating
away at Kiss' audience as well...From here it looks like all-sports
WEEI AM 850's big schedule reshuffle in early September somewhat
backfired. The station dropped a full point from the summer book.
But then again, Boston's pro sports scene has been one huge nightmare
this fall/winter. No wonder WEEI introduced a 'Whiner Line' where
Boston sports fan can pick a phone and vent their frustrations...:-)
All-Classical WCRB's steady growth over the past year cant be
ignored. While struggling stations in town are trying to hit the
jackpot with trendy formats, maybe their program directors should
take a second look at classical music. Hey, if it's done the right
way, it could be the format of the future!...As Country+Western
WKLB 105.7FM gets ready to celebrate its 3 years with its present
format next month(Feb. 12), it can also toast to winning
the latest battle in its on-going country war with crosstown rival
WBCS 96.9. Score 2.7(up from 2.2) for WKLB and give 1.9(down from
2.1) to WBCS....

* WKOX's power boost is coming to the radio near you :

In early March, Fairbanks-owned WKOX AM 1200 plans
to increase its power from its present daytime 10,000(1,000 at night)

to 50,000 watts. FCC gave its final approval to WKOX's plans to build 3 transmitting towers, each less 200 feet, near station's studios on Mount Wayte Ave. in Framingham. Currently, WKOX uses 2 400-foot towers. WKOX has already invested nearly $700,000 in new equipment which would enable the station to become a major player on the AM dial in Boston...

The only major hurdle in 'KOX's plans so far appears to be the town of Framingham which will hold a special public hearing on Monday, January 29th at 7:30pm.

Recently, a small number of Framingham's residents have asked town's Board of Selectmen to resolve an on-going telephone interference issues before town's board of selectmen goes ahead and grants WKOX its final construction approval. Some residents claim that they can hear WKOX on their telephone lines. The station is willing to provide radio interference filters to those residents who can show that they clearly have a problem.

Meantime, in an interesting move this week, WKOX management took mid-day(10a-2p) Gene Burns Show off the air until March replacing its first 2 hours with nationally syndicated Mike Walker Show which originates from Palm Beach, Florida.[That's right -- the hometown of National Enquirer where Walker works as a writer.] and the last 2 hours with another syndicated show by one-time Boston media person Judy Jarvis...

Burns was doing the 'Boston' the show from San Francisco using ISDN lines since October 2nd. He's meant to return when 'KOX boosts its power to 50,000 watt in early spring.

Current WKOX line-up :

AM-drive newsblock anchored by Len Malloux from Fairbanks' studios in Prudential Center 6am-10a. Walker's gossip show is on from 10a-12p. Judy Jarvis from 12p-2pm. Syndicated Dr. Laura Schlesinger show is next from 2p to 5pm. Some syndiacted talk stuff from 5p-6p['KOX's long running 5-6pm news/info PM-drive hour is now history]. Two-hour sports show called SmorgasSports hosted by former WZLX-FM morning sports guy Greg Madden is on 6, usually preceding a Bruins game or some other sports action. Gil Gross's shows airs at 8pm...

But then again, WKOX's programming and format could all be very, very different in a few months. Apparently, WBZ-AM owners(CBS) are talking to Fairbanks about a potential WKOX sale provided the station is able to upgrade its signal and start operating at 50,000 watts... Rumor has it that if WBZ acquires WKOX, the Bruins and its all of it weekend sports line-up would move up the dial to 1200. [That would enable WBZ to fill its weekends with more talk as well as breaking news coverage which sometimes is more important than sports scores during an upcoming blizzard...;-)]

* Programming Notes :

- As of this week, WBZ AM 1030's Ed Goldman GM is the new
Vice President of CBS AM stations. Currently, there are 18 AM signals
in the CBS/Group W operation. Goldman will remain Boston-based.
The search for the new WBZ AM 1030 general manager is underway...
Goldman also served as WBZ-TV's station manager. That position will
remain vacant...In other WBZ news, WBZ-AM/TV Web page construction is
in full swing at http://www.wbz.com. It should be on-line shortly...
In addition, WBZ has begun using AM/TV partnership to full extent --
both Channel 4 and AM 1030 crosspromote each other whenever they can...

- Bev Tilden, Boston's radio marketing guru, whose most recent
stint was with American Radio's all-sports WEEI AM 850 was
named Evergreen's corporate marketing director last week.
Any day now, Dallas-based Evergreen will assume control
of Pyramid's stations in Bostons -- CHR WXKS 107.9FM(Kiss108).
CH/Urban WJMN 94.5(Jamn 94-5) and BB WXKS AM 1430. Tilden spent
7 years at WXKS-FM. In a way its a homecoming for an 18-year Boston vet.

- All sports WBPS AM 890 which runs Texas-based Prime Sports Radio
for the most part of its broadcast day was sold McMullen Group
recently. John McMullen owns NHL's New Jersey Devils.

WBPS, which is yet to be found on any ratings charts has now
something to smile about in its attempt to bring in some listeners
from American Radio's all-sports WEEI AM 850.
It cant beat 'EEI on the airwaves but in cyberspace it's #1...:-)
WBPS' homepage is now up and running, thanks to The Internet Access
Company, at http://www.wbps.com

- Granum's brand new WOAZ 99.5FM, The Oasis[Not to be confused with
WERS 88.9FM's 4-hour mid-day 'Jazz Oasis'], which replaced WSSH 99.5FM
'Wish 99.5' last month, will add a very familiar Boston area
jazz jock to its weeknight line-up starting on Monday 1/15 -- Jesse
Sandidge will host 8pm-1am show. Sandidge was on the old 'Smooth
Jazz' WCDJ 96.9FM from 1989 to 1993. The station has begun
a very aggressive media blitz by buying ad time on almost local
TV stations...

- Blizzard '96 highlights : On Monday,1/8, all-talk WRKO-AM's transmitter
lost power around 10am. The station engineers tried to use the back-up
generator to keep the transmitter going but generator's water pump
died almost immediately...The station was off the air for almost two
and a half hours wiping the entire 2-hour Jerry Williams Show("the
shortest program in radio" as he calls it)...

Also, WBZ's morning newsanchor Gary LaPierre was stranded in Tampa,
Florida where he was vacationing last week. LaPierre was expected
to make it back to town today(Wed.1/10) but guess what...more
snow is coming down as I write this...:-)

- AP WFNX 101.7FM has brought in a new mid-day man to replace
Nik Carter who left Lynn rocker back in December. The new guy

in town is British-sounding 'Adrian'. Very good addition, IMO.
[He sounds very familiar to the guy I've heard of bunch times
on one of Hartford's rock stations while on my way to/from the
Big Apple. Maybe it's the same guy...:-]

- Howard Stern's flagship station in New York City -- WXRK 92.3FM 'K-rock'
was rocked by a format change last weekend. K-rock's 8-year
classic rock format was dumped in favor of more trendier 'modern rock'.
Infinity's recent move to make all of its rock stations in the country
more hip and somewhat musically up-to-date doesnt really
have any major impact on Classic Rock WZLX 100.7FM here in Boston which
consistently delivers good numbers.

'ZLX's sister station, the new 'Rock of Boston' WBCN 104.1FM already
underwent its remodeling last year when it completely abandoned
AC/DC and Clapton and jumped onto Pearl Jam, Green Day and Toadies
among others...'BCN's transformation was much smoother, quieter,
and very low-key compared to what happened in NYC over the weekend.
In addition, Boston is one of the few markets in the country where
classic rock/oldies scene is doing reasonably well. Infinity's
CR WZLX, CBS' all-oldies WODS 103.3FM and American Radio's all-70s
WEGQ 93.7FM have all carved out their own nice niche in the market.

-Mark

GROUP W SET TO ARRIVE FRIDAY AT KMOX;
AGE DISRIMINATION SUITS FILED AGAINST KMOX;
BANDITS HIT KIX-106 REMOTE VAN

by Scott Simon

ST. LOUIS -- Last Friday, Jerry Berger revealed in his St. Louis Post-Dispatch column that three former KMOX employees had filed age discrimination suits against the CBS owned-and-operated station.

The article did not reveal who filed the suits. VP/GM Rod Zimmerman declined to comment.

Group W executives will converge Thursday and Friday at KMOX, the first time they have visited the station after acquiring CBS last month.
If there are any significant developments, you'll see them first here in AIRWAVES.

If you are a regular reader of Don Fitzpatrick's SHOPTALK, the television industry internet newsleter, there have been many stories in recent months about the theft of cameras from photographer's trucks and vans across the country.
A St. Louis radio station remote van is the latest victim.
On Jan. 3 or 4, thieves broke into the KIX-106 remote van, parked in the garage at Westport Plaza in suburban St. Louis, where the station is located.
Taken was remote transmitting equipment. KIX-106 placed an ad in the Personal section of the St. Louis Post-Dispatch classified, asking for the return of the equipment, with no questions asked.
In the message, they stated the equipment was useless without the proper receivers.
Did you take it? If so, call 314-878-1040.

Some stations find it's easier for listeners to remember
them by a slogan like those mentioned above. Call letter
recall is not great with listeners unless it's a really
dominant-long time station. Arbitron asks stations to list
their slogans and will give the stations credit if a dairy
keeper just lists the slogan --- no calls needed. Here in
Pittsburgh WSHH radio calls itself WISH and even used WISH
in print ads. The REAL WISH is in Phila. but it doesn't
matter so long as diary keepers remember WISH. That's the
key --- listener recall --- calls don't mater except near
the top of the hour where the FCC says a legal ID is a
MUST!

One of the worst examples of this has happened in Erie, Pennsylvania. In the early 1980s, WLKK was on 1260, WRIE on 1330, WJET on 1400 and WEYZ on 1450. By the time the decade ended, 1260 was WRIE, 1330 was WEYZ (now WFLP), 1400 was WLKK, and WJET had moved to 102.3 on the FM band. Now, a daytimer on 1530 has picked up the WEYZ call letters. How confusing. I'm IN the radio industry, and even I can't keep all this straight!

A similar situation has evolved in the Allentown/Bethlehem/Easton PA market, where for MANY years, 1230 was WEEX, 1320 was WKAP, and 1470 was WXKW. Through various station sales and LMAs, 1230 is now WIPI, 1320 has become WTKZ, and 1470 has picked up the WKAP call letters. I wonder how well the listeners keep up with this constant shape-shifting.

--
Bruce...

About 9 years ago, Cliff Blake, the then-PD at WMXJ/Magic 102 here in Ft. Lauderdale tried the mix of AOR cuts mixed in with Oldies. Considering that WSHE was the ONLY AOR in the market at the time, Blake's format was interesting to listen to. After Blake left, Magic went to be your typical Oldies station. About a year later, WZTA came on (the former WINZ-FM and became the Classic rocker for this area. I will confess that was where I kept my dial. To be honest, today that format would not work, as Oldies stations have that "image" as being the Top 40 of the 50s and 60s (and early 70s) alive and well today, music and jingle wise. Led Zeppelin and Lee Dorsey somehow can't seem compatible. The most extreme you can do is to play the LP version of the Doors' "Light My Fire," or any Beatles cut.

Sad to say, I think the amoebic life forms that pass for consultants have decided that listeners like you and I are to be ignored and the future is Alternative. Interesting that the late Ric Carroll was saying that 15 or so years ago with his pioneer KROQ format, but in NY, 5 stations playing the same music is ludicrous. Hearing that WNEW has turned it's back on it's heritage is sickening, as is WBCN in Boston, where I first cut my teeth in the biz. Even here in South Florida. WZTA (Zeta) has dropped Classic Rock in favor of a 60-30 mix with 60% being new, the 30 being Classic, but no more obscure Uriah Heep or Mountain tracks. WSHE has totally gone 180 degrees, with one of their IDs saying: "103 (zzzzzP)5 SHE....No Music By Dead Guys." In fact, after SHE's switch, their GM was quoted in the paper as saying "we want a new audience, we don't care a s**t about our long-time listeners." The only saving grace is that WKGR in WPB remains a Classic Rock outlet, and obviously they will gain a

point or so in the ARBs for this region. In the WPB book, they have always done well.

Nice to see that consultants feel that us Woodstock Era people don't exist anymore.

success
: against the LP? I just don't see it, all the hype about "CD
quality"
: audio notwithstanding.

Well, there are several advantages but they have little to do
with the actual sound quality. The big one is "datacasting". For
example, weather and traffic information could be sent out by the
station
and would appear on a display on your radio. Stations could transmit
a
"program i.d. code" so that as you are driving great distances you
could
have your radio only play jazz stations, for example. For nation
networks like the CBC, you would only need to tell it to play CBC and
it
would a CBC station wherever you were in Canada.

..this is all so fine and good to me, but having been a part of the
great AM stereo rush I am a little more cautious. Yes, they say the
world is going that way (and HDTV is coming soon too). What I would
like someone to tell me is; in what system and how interested are
Japanese in DAB?

I know it was probably in BE but, I haven't seen it in a while.

Opinions expressed are mine and not those of my employer or any
associations or groups I am currently envolved with.

Jim ...

<<Are there no other channels, V or U assigned to New Hampshire
or did someone decide it's not economically feasible? I think
there's a pbs station somewhere around Concord but I couldn't
find its signal.>>

You are correct. The PBS station is WENH Channel 11, licensed to
Durham with it's transmitter a few miles east of Concord.
While up north in Waterville Valley you should have been able to pick
up some Maine stations, particularly Channel 8 whose antenna is atop Mount
Washington. Channels 6 and 13 out of Portland should also come in,
depending on which side of the mountain you're on. And if they don't come
in, there's a chance that Channel 3 out of Burlington, VT might.
I believe there are also a couple of UHF stations licensed to NH.
There's one in Derry, one in Lebanon?, and there was one in Concord
although I don't recall if it is still on the air.
Having grown up in Manchester I can tell you that down in the
southern part of the state (the populated part) the Boston channels all
come in rather well, making it something of an economic crap-shoot to try
to run a local TV station.

Does your buddy have a rotor on his antenna?

How about a pre-amp? since he is far away from Tv stations it would be a good idea to have a rotor and a 20db amplifier which Radio Shack sells and that may help you a lot. I have a rotor ant with the 20 db amp, but I libe 12 miles from Milwaukee and with the antenna beamed to Chicago which is 100 miles away I get the Chicago stations in almost snow free...I even sometimes pick up Chicago's LPTV on ch. 23.

But with my set up I get local TV overloading...especially worse if the antenna is beamed at Milwaukee. But since you have no stations around for miles you won't have a problem. Besides in New Hampshire there are lots of hills and mountains compared to what I have.

John L.

[Moderator's Note: CHicago's LPTV channel 23 is on top of the Sears building, about 1600 feet in the air, with 1000 watts beamed out in all directons except east. It is a killer LPTV signal. Bill]

While I'm sure poor execution is part of the problem, IMHO another reason for the audience fall-off after Stern could be the incompatability of audiences. Stern's strength seems to be in the under 30 crowd, hardly prime demo for classic rock. The people who listen to Stern don't wanna hear Led Zep et al, and those who do are turned off by Stern. While it seems unwise on the surface to leave such a gaping hole in the market, at least they seem to be a little more focused. Besides, modern rock is this year's bandwagon format.. it'll be a couple more years before things shake themselves out.

The longest running show on CBC Radio is the "Fisheries Broadcast",
originally known as the "Fisherman's Broadcast". The first broadcast was
in 1951. It is broadcast regionally in Newfoundland and Labrador.
If you're looking for the longest running NATIONAL show on CBC Radio then
the answer would probably be "Gilmour's Albums", but the 'Fish/cast' wins
hands down if you're looking for Regional or National.

> album versions contain a lot of self-indulgent fluff on the part of the artist.

One person's fluff is another person's groove. Billy Joel's "The Entertainer" (a song that many of you probably edited) has a lyric that sums up the opinion of most artists toward the practice of radio screwing with their music... "It was a beautiful song but it ran too long, if you're gonna have a hit you gotta make it fit, so they cut it down to 3:05."

During my 17 years on the air, and three years in the Trade Mag biz, I've had the opportunity to meet many artists. I've always been curious as to what they thought about the changes that radio makes to their music, via editing, speed changes, eq changes, compression, etc. By and large, they hate it. They resent the fact that radio refers to their art as "product." But most are reluctant to complain, especially new artists who are getting a lot of airplay. Why bite the hand that feeds you?

I worked at a station in the '70s that sped up the music. I hated it. Elton John sounded like a friggin' chipmunk. Please be careful out there, and keep in mind that in the course of manipulating music to make your station sound spunky, you could be screwing with a piece of art that someone poured their heart, soul, and talent into.

I imagine this is not a problem that is anywhere near exclusive to radio. Radio, however, is my chosen field and "it" is suddenly my problem. the "it" is my total lack of time.

For the past three years I have served as the Promotions & Marketing Director at KUAD in Fort Collins, Co. Great gig, fun station...I enjoyed my work...and it generally took 10 - 12 hours a day to complete. Two months ago our PD left us for a job in the real world. I was offered his position IN ADDITION to mine. Not wanting to bypass a great opportunity, I accepted the newly created Director of Programming & Promotions position.

Now I am simply overwhelmed. I am handling the responsibilities of my old job (the one that took 10 - 12 hours a day) as well as programming responsibilities AND a four hour airshift, something I was not doing before. Fortunately, our former PD is a sharp guy and the station was/is on target. Therefore, there are not many formatic adjustments that need to be made.

I read about these big shots in the trades all the time. These guys that do mornings in a top 10 market, are Vice President of programming for the group that they work for and STILL have time to write articles for the trades. How do they do it?

To make a long story longer, any time management tips would be appreciated! Share your secrets with a young, upstart PD...would ya, gus?!

Thanks,
Scott James, KUAD/K99 FM

Just curious; are these low-power information broadcasts on the same channels and authorization as drive-in movies, now that they offer the audio thru your car radio instead of those lousy speakers?
Have seen real estate agents offering them too; drive by this house and a teeny box (attached to the mailbox, often) will give you a low-power ad for the property.

There were two such stations here in the UK, called Airport Information Radio. One was located at Heathrow Airport (west of London), the other at Gatwick Airport (south of London). Both used the same channel (I beleive it was 1512kHz, but may be wrong) with a few watts. Programmes consisted of about five minutes of pre-recorded info (car parking, access roads, terminal details etc), interspersed with live traffic news, exchange rates, etc. They were commercial stations, but the only advertising I ever heard were occasional ones from publishers trying to sell novels to holidaymakers. Both stations were owned by the same company and operated for about 18 months before closing due to lack of financial success.

As far as I'm aware, they operated on their own, ie the airport authorities didn't help cover any of the operating costs, despite the fact that they were a service to their customers.

I've been involved with NAC since 1988, and had the good fortune to have the first NAC station to hit number 1 25-54 adults (KQPT in 1988). One of the ways we did it was through the use of vocals from established formats. I also helped sign 13 NAC's on through my consultancy.

As the format has evolved since then, it has developed more focus and consistency, and the numbers have increased. The challenge faced in the early years is that the format was so unfamiliar it couldn't establish a broad enough cume. The numbers would be wildly up in one book, when the diaries fell in the right areas, and then down radically the next, as they didn't.

The move to adding more AC vocals to the mix is based on what the listeners are asking for. If the listeners are asking for it, and it causes the ratings to go up, I find it kind hard to argue with. They key is to maintain a "mass appeal balance" between broadening the cume with AC vocals and causing TSL to decline because of AC vocals.

The comments throughout this thread remind me a lot of what people were saying about the development of AOR radio in the early 70's. After three or four years of poor to mediocre ratings, tightening up the format and focusing it more created dominant AOR's across the nation. You're seeing the same thing happen again, with NAC. Nothing succeeds like success.

>which was a daytimer at that time. The sign-off went: "KWUN may be
>signing off for the evening, but the night is just beginning at John
>Jawad's Pioneer Inn in Clayton..." Yes, the owner sold the sign-off.

Reminds me of my first radio station. It was KYES, a daytimer in
Roseburg,
Oregon, circa 1964. They sold signoff every afternoon:
"The follwing 13-1/2 hours of silence is brought to you by Carstens
Furniture, in
the hope that part of this time will be spent on a Beautyrest Mattress."

About the same time, we started getting reports of near riots at the local
jail
every hour, on the hour. Our top-of-the-hour ID at the time was, "Now,
your're
locked in for another hour of music! ...on KYES, Roseburg." We didn't
know if
the inmates' reaction was a statement about their condidtion or about our
format!

: letters are. The only ID I hear is something like "Rock 101" or "Gold-98"
: or "Zeta-94". Now how is this suppose to tell me anything? Has the FCC
: thrown out the old rule about call letters and location every 30 mins?

You could say that.
It's down to ONE legal ID per hour now.
It used to be that you had to do one at the hour and then at the half-hour,
between :58 and :02 & then between :28 and :32, respectively, or it wasn't a
legal ID. I doubt you have to do it within the old four minute window now.
It may be a ten minute window, as someone told me, to accommodate the Talk
Stations that get lost in the conversation.
I was reading another thread in this base (Worst Station IDs?) and someone
allegedly had theirs buried at :53 after the hour.

From: schuster@panix.com
Message-ID: <4d8aag$25o@vixen.cso.uiuc.edu>
Source record: 27244

On Wednesday's WNEW-FM morning show, there was an interruption featuring an on-the-air phone call from someone called "Pete", who was looking for work as a disc jockey. The voice sounded like a poor imitation of Pete Fornatele, and Pat St. John played it up to the hilt - "Can you send us a demo tape?" "You have tons of my tapes already there" ... etc. You get the idea.

Considering their ratings under the new "scrambled rock" format, I don't think WNEW is in any position to be throwing stones....

Growing up in Milwaukee, I used to listen to then-top 40 WOKY-920, and often heard the spots for "GREAT LAKES DRAGWAY, UNION GROVE, WISCONSIN!!!! VVVVVRRRRROOOOOOOOM!" They crammed a lot of excitement into those 30-second spots.

I can also remember hearing a parody of those spots, either on National Lampoon's Radio Hour or by the Firesign Theatre, called "U.S. Amphetamine Speedway" which was hilarious. They kept yelling out "Sunday! Sunday! Sunday!" If anyone else knows who did that sketch and where I could find a copy of it I'd be very interested.

Just for the record: "duopoly," etc., are all misnomers, even though everyone in the radio industry uses these terms. Strictly speaking, "duopoly" is a situation where two manufacturers/sellers dominate a market. It does _not_ mean two entities with a common owner; this would more properly be called simply co-owned stations.

Where there are many stations with many owners, as here in the SF Bay Area, there's actually vigorous competition--not a monopoly, a duopoly, or anything like it.

>>It does take quite a lot of effort to catch these graveyard stations all the way in Finland. What I do is I travel 800 miles to Northern Finland - where reception conditions are better - for a "DXpedition", and put up huge antenna installations. Sometimes I have up to 8 beverage antennas, each 0.7 miles in length, directed to various parts of the world, mostly North America. Then I just listen 20 hours a day for at least a week... if conditions are good, quite a lot of North American AM stations are audible, including local channel stations. DXing at its best!

Could this be the guy who sent a cassette to us at WWTC/1280 Minneapolis in 1982 or so? It took me say, 10 listens before I could make any sense of - through all of the noise - my midnight ID. Yeesh! I'd heard back then about some nutty Fins who did exactly what Mika in Finland described...eeek! And friends think I'm a techy geek because I have a SupeRadio.

>1) it's syndicated, meaning there is virtually no local presence; and 2) it's
>on AM. Granted, the "real" country flavor may appeal to hard-core fans of the
>music. But I doubt WYRK will be threatened.

I don't even think WYRK is even going to blink,in re a new kid doing
country. WNUC is sounding more local(although I'm unsure if they still use
the Unistar Hot Country format or not). But(according to one of my tipsters)
WXRL(1300;Lancaster)_is_ threatened enough to boost their gold output to
60%(it was 25%). As Scott Fybush noted on the board,"Brilliant. I'm sure
WYRK is quaking in its boots."

>I feel so strongly that this will fail that I have printed out this posting,

I would like to address all of the News/Talk professionals that read this newsgroup to ask all of you for some advice. I have read other messages and find a lot of the information very useful and interesting.

I am a news anchor/reporter for a small station outside of NYC. I have been in the business for 5 years now in both news and talk. I have been producing and hosting a talk program on a non-commercial station and found the experience very rewarding and know that this is something I would like to pursue, if not now then in the future. I want to move onto a bigger station or a network, somewhere where I can make enough to live on. I would like to explore new possibilities in news...especially national or foriegn correspondant work. Foriegn work is not new to me...I traveled to Africa 2 years ago to work on a news documentary for a public television station. I loved it! I am always willing to travel or relocate.

What do you look for in a new candidate? How should I create my resume and tape? Where should I start appyling first? Are there certain regions or companies that are better to apply to?

Thanks in advance to everyone who answers. If you need someone like me...e-mail right away! THANKS AGAIN!

Rich

Nightclub tricks...yea we've done the lemon bit many times. We had a morning show appearance the other night and had them play twister...two guys and two gals...lots of fun...or get three couples...boy and girl about 15 feet apart...girl has a toliet paper between her legs...guy has pool cue between his legs and is blindfolded...he tries to get the pool cue in the toliet paper hole first. Or...and this is my favorite....get several couples who are intimate...the idea is the girl...who is blindfolded, has to run a golfball inside her man's pants, up to his crotch, then down the other pantleg. The girl is blindfolded and at the last minute, we switch guys on them. Hope this helps.

I can't say about this specific case, because I'm not in the New York market, but I've heard (and in some cases even airchecked) more changes of formats the moment they happened over the past two decades than I possibly could have if what you said was usually true. From my experience, many format changes _are_ announced, but (1) not usually on the air, at least not until the day and maybe the hour it's gonna happen, and (2) thus you have to be on the lookout in other media all the time (most typically the newspaper with the best radio coverage in town, which of course you have to evaluate all the local newspapers for a while to figure out which one[s] that may be) for any and all radio-related stories (or quick mentions in a "quick takes" kind of column in the entertainment section of the newspaper). In fact, here in Los Angeles I found out about the format switch a day after it had happened (even tho the station isn't carried here!), which seems to be before you were aware of it.

You have to understand that when a station announces a format change all its competitors swarm around like sharks, trying to figure out what advantage they can gain from the situation (sometimes trying to switch to the _same_ format first as a pre-emptive strike!), so stations have learned it's not in the their best interest usually to give _lots_ of advance notice.

You have to go further back than that to, to the mid 60's, when WIP-FM was on (now WMMR). Both stations were owned by Metromedia then (and for many years after), and WIP (AM's) extremely successful MOR (remember that format?) jocks pulled shifts on the FM, playing basically the same music (though I believe they recorded everything for FM). This was before (if memory serves) WIFI/WXTU's debut. Down the dial, WFIL-FM (now WIOQ) was, I believe, doing some sort of easy listening. (We're talking 25+ years ago, so I'm a little foggy on this). It was the co-owned FM of the very successful top-40 WFIL AM.

This reminds me of the problems Bryan Adams was having with one of his early songs, "Let Me Take You Dancing." A version of this song was sped up and played as a disco record on some disco stations. (I don't remember if it was actually sped up by the producers or if radio stations sped it up.) Anyway, when he found out about it he was very upset.

Scott--

The easiest solution: get yourself a bright, young assistant - who can
put in the kind of hours you need - and gradually transfer things
which don't require ultimate authority to him or her.

Scott Shannon is a genius at this. (I should know...I was the first
"bright young assistant" at Z-100 in 1983.) It is impossible for you
to have your hands on everything, and still stay sane (or a reasonable

facsimile thereof).

If the airshift takes away from the rest of what you have to do, find someone else to take it. Conversely, if you're one of the people who finds going on the air to be your breather, hand off some of your other responsibilities to other people you can count on, and just oversee their completion.

Congratulations on the promotion, and good luck.

Anita Bonita

>appreciated! Share your secrets with a young, upstart PD...would ya,
>gus?!

Congratulations (um, sort of). I'd have to imagine that the big shots
you're referring to have few "day to day" responsibilities, they
really to their show (with a staff of 3-5) and are more responsible
for the "vision" thing and unquantifiable long-term stuff. This
probably isn't like what your day is all about, so don't feel badly
about being overwhelmed.

Here are some time management tips that've helped me over the years:

1) telephone calls are the single greatest culprit in ruining your
schedule, don't take calls from record reps outside of a few hours a
week (say Mondays from 12-2 or something like that). Reserve yourself
at least 2 hours a day with no calls, either send them to voice mail
or don't have the receptionist forward your calls in.

2) paper, I like the TRAF system with everything that comes in (I said
I like it, not that I can make myself use it every day :-) Toss,
Refer, Act, File. Don't handle the same piece of paper more than once
(you've probably heard this before).

3) don't be a perfectionist, you may spend a lot of time on a project
that doesn't mean a lot to the big picture (ratings or revenue) to get

it perfect. Settle for "really good", unless it counts!

Good luck and have fun.

Pat Ryan

438. WZJM processing & programming

Newsgroup: rec.radio.broadcasting
Date: 1996-01-14 00:00:00 UTC
From: Darius Filon <ST92J2GL%DUVM.BitNet@pucc.PRINCETON.EDU>
Message-ID: <4daiui$t98@vixen.cso.uiuc.edu>
Source record: 27061

I'd previously commented that, on my New Year's wknd. trip through part of the Mid-West, I'd noticed Jammin' 92 in Cleveland and their "lack of processing", to which Tom Desmond <wsu@mimi.itg.ti.com> responded along the lines of how this would be more pleasant to listen to. Wellllll, most people here know that I personally love the "suck you in" sound of hit music stations. I always used FM97 WLAN in Lancaster/Harrisburg PA as my example of *perfect* processing - bass that bottoms ALL THE WAY out, and treble that tops out so high & sharp that it feels like razor blades slicing your eardrums apart. Granted, WLAN has suffered some significant ratings decline, and therefore made part of their change to cut out that processing -- and, when I heard that on my trip, I didn't know if I was listening to the right station - I found that I *was* listening to the right station... but I felt like I'd lost an old friend. Obviously, they cut it because it was irritating to the listeners (180-200% modulation, maybe? OK, maybe not quite that high :))

Tom also mentioned that Jammin' 92's playlist seemed to be mostly pop/rock, however when I drove through there, I distinctly remember them playing at least 4 or 5 urban records back to back! Interestingly enough, I've seen their most recent playlist, which shows artists like the Goo Goo Dolls and Hootie & The Blowfish in pretty heavy rotation. Well, nonetheless, they seem pretty geared to the 12-24 crowd.

And of course we can't forget John Hockenberry of ABC and NPR, who's
been doing radio (and now TV) from a wheelchair for almost 20 years.
I just recently finished his book, "Moving Violations," and can
recommend it wholeheartedly.

Dave Marthouse, who does overnights at WCTC in New Brunswick NJ
and co-hosts the SPECTRUM radio show (heard Saturday nights
on WWCR shortwave and satellite) is blind, though he rarely
mentions it on the air. I worked with him by phone for a year,
and never knew until I finally had a chance to meet him face
to face in NJ. Dave runs his own board at WCTC, again with
the help of Braille-labelled equipment.

There's also a blind board op with whom I worked at WXXI Reach Out
Radio in Rochester NY. Maybe Bob Smith can help me remember his
name...I remember being amazed at his ability to turn on the
Weatheradio a couple of minutes before a break, listen to the
forecast, then rattle it off again verbatim, and smooth as silk,
during the break...

Aaron, I hope you're right that CBS-FM is just stretching the definition for classic rock. I suspect they are. But I also think that just by using the term "classic rock", they are going to turn off a large segment of their core audience (us adults 25-54). You know the old saying, "if it ain't broke, don't fix it". Apparently, CBS-FM has never heard it, because they are trying to fix something that was never broke in the first place. The station's numbers over the past five years especially will bear me out on that point.

I hate to say this, because I support all types of music.

But it seems like classic rock is at a crossroads right now. A lot of fans of that style of music are getting older. The generation of Woodstock '69, Dead, Black Sabbath, Jethro Tull, etc is now starting to take the place of the generation that listened to the big band era. And I suppose when artists such as Frank Sinatra, Mel Torme, Tony Bennett, etc pass away, that form of music will go as well. Guess that is why you don't hear radio playing music from the teens and twenties anymore. And unfortunately, classic rock is falling there. In another 20 years classic rock will definitely be a format similar to big band....and don't be surprised to hear disco thrown in.....(I know...DISCO...the sin of the rock world).

I cannot say the music is dead......but it is a generation thing....and soon enough, the music we are hearing today will get there as well.

WWSW-AM/FM in Pittsburgh, an Oldies simulcast, still does this today.
It's a holdover from the brief tenure of Ted Atkins as GM, who came over
from WTAE crosstown, where he was doing the same thing. It seems to be
his one lasting legacy to the radio station!

I've often wondered why a classic rock station has never been
particularly successful in San Francisco... which is, after all, the
city where album rock on radio began.

When I programmed KYA (then a teenybop top 40 station) in the early
70's. KSAN (Jive 95) was at the height of its popularity with Tom
Donahue at the helm and other stalwarts like Bob McClay on the air.
KSAN's street buzz was always stronger than its numbers in Arbitron,
but it was a significant force in the market.

Perhaps the massive in-migration to the Bay Area since then has
attenuated the collective media memory to the point no one even
remembers KSAN as a rock station. It has been country for a long
time.

455. Digital radio on cable

Newsgroup: rec.radio.broadcasting
Date: 1996-01-14 00:00:00 UTC
From: mjames@earth.execpc.com
Message-ID: <4daitt$t80@vixen.cso.uiuc.edu>
Source record: 27148

Recently I subscribed to a digital radio service on cable-tv for $6 a month including equipment. 33 channels with many tastes covered. Rock, country, classical, jazz, BBC, VOA etc. The sound quality is unbelievable (cd-like) with no commercial interruptions. The radio market I reside in doesnt have much to choose from. (Fresh country, contemporary country, classic country, country hits) Because of the local offerings, I am always listening to the digital radio offered on cable at home. When I am not home, I listen to tapes/Cd's.

This should be a wake up call for broadcasters in smaller markets who rotate a 40-song play-list day after day, year after year. (yes, there is a station playing the same songs year after year. Still have the same PD now that was there in the 80's) With a little competition, things should get better.

>heard him sub for Charles Osgood who is another favorite of mine. I
>believe Dave Ross is only on once a day in L.A. is that true? Are there
>other times I can hear him?

Dave Ross (who views the world through Ross-colored glasses), is the mid-
day talkshow host at KIRO, Seattle. He often peppers his shows with
musical parodies, some of which you've heard on his daily 90-seconds on
CBS. CBS feeds it at 12:25 PM (PST) weekdays. Affiliates may tape it
and
run it elsewhere, if they choose. Other than that daily 1.5 minutes of
fame,
he is only heard on the net when he subs for Osgood, or for Gil Gross on
his
evening CBS talkshow. (Ross has done The Gil Gross Show for one
vacation week-- at my suggestion to Gross' producer-- He deserves to do
more.)

IMO, Ross is a rare comodity. A politically moderate (well, kinda
liberal) talk
host who is successful-- because he's entertaining! If I had my career
to
do over again, I'd wanna grow up to be Dave Ross.

From: da5006@rncb.ac.uk
Message-ID: <4dg2ps$pfr@vixen.cso.uiuc.edu>
Source record: 27006

Hello there,

As part of my Media Studies institutes essay I have decided to write an essay on the institute of talk radio (not just the station). As a result, I was wondering does anybody out there actually know where (and if at all possible) when the first listener particapation radio programme took place. In other words does anybody know when the first phone in show took place. Please note I am not talking about a person phoning up a radio station and requesting a song, I am talking about a listener phoning up and presenting their opinion (scripted or not) over the radio.

Also if you have any information about anything relating to the origins of the institution of talk radio in the UK or USA would be greatfullyy appriciated.

Thanks in advanced

Many readers from this group have already visited the radio amateur pages below:

http://www.innotts.co.uk/~asperges/

and left about 250 messages for me since December '95. Thanks. I have replied to all of them individually.

I'm thinking about making a new page for SWLs, who don't seem to be catered for quite so well elsewhere, but I should like some feedback before doing so: should there be FAQs? links? Should there be pointers to schedules etc etc. Should the style be same or different from the other pages?

If you have some ideas for SWLs, please e-mail me from the pages.

I am still collecting links for the "Friends on the net" for other amateurs with home pages they would like networked.

I recall WCBS/Newsradio 88 in New York always gave the "EXACT" time on
the hour and half-hour with 4 tones, the last tone denoted the exact time.
"Set your time to WCBS. Four tones will follow. The final, loudest tone
will denote the exact time..... boing.....boing.....boing.....BOING !"

This was a very unusual station back in the 70's. I recall as a kid of 14,
I always found CBS' to be rather friendly in the morning with Garry Moore
and Rita Sands belting out the news. What I found to be weird was to hear
ads for "WTFM-Where the Music IS !!! THAT's T-FM 103.5 in stereo". Was it
standard to put advertisements from competing stations at that time..taking
into account that CBS already had an FM in the market going after the same
demographics....though not the same music ?

In a previous issue, Mr. Hoeffel Writes:
> hoeffel@aol.com (Hoeffel)
> Most people don't have perfect pitch, and a shift of a few percent --
>less than a whole musical tone -- won't be noticed.
>Great stories here about the WABC turntable, with the cheap phono
>cartridge with nickels taped to it. Now I know why WABC always sounded
>like tinny crap on my radio, compared to AM stations with good audio back
>then, such as CKLW, WLS, WCFL, WIBG, and WKBW. I know that some people
>loved the WABC reverb. To me, those great jocks sounded like they were
>talking into one of those big metal trash barrels.

You probably have a point, technically. But, as a kid growing up in the NY metro area, WABC-AM was the radio station that introduced me to music, the Beatles, Rock 'N Roll, life as a pre-teen, teen. I knew nothing of technical excellence nor the lack of it...as I suspect the majority of radio listeners then OR now. People listen to the radio because we:

1. play the songs they like 2. say the things they like 3. provide the information they need.

I would suggest most of them don't sit around griping about lack of low-end bass, too much reverb or any number of things we professional broadcasters labor over. I'm not suggesting we shouldn't strive for technical excellence....but I believe most of it goes unnoticed. To those of us in radio, it is way more important than to those who listen. (Of course, the exception would be the small percentage of astute audiophiles who listen to FM specifically for music with systems that allow them to truly perceive the differences.) Most folks listen to radio on alarm clocks, cruddy car radios, and lousy boom boxes. Certainly, as I think back now on the booming, hollow sound of WABC-AM in it's glory days.....I realize it could stand improvement compared to today's listening standards. But, it served it's purpose for me and I have no regrets for all the hours I allowed it to accompany me during those years of my life.

Rick Gillette is out as PD at alternative WHYT Detroit (The Planet 96.3). He had been PD for 9 years. Alex Tear will take over the PD duties until a permanent replacement is found.

I've heard from many of my friends in the industry here in Detroit that WHYT will be changing back to their rhythmic/chr format very soon. I just wanted to hear from some other people about the possible change (whether in the Detroit area or not).

>From Canada's Ocean Playground, Here's some latest information....

*C100 and 920/ News Talk Radio were pleased to annouced the appointments of three account executives, Brian Bulley, Jackie Norrie, and David Walker.

Mr. Bulley returns to radio where he began a 16 year career in sales and marketing with CJCH/C100. Most recently, Mr. Bulley was manager, Atlantic Region Of Paul Mulvihill Ltd., a national media represention firm. He has volunteered as President of the Metro Media Club, worked as Sponsorship Chairman for the Canadian Association Of Broadcasters Convention and served as P.R Chairman for Junior Achievement.

Ms. Norrie's six year experience in marketing, promotions and public relations make her a welcome addition to the sales/marketing team. Ms. Norrie is best known for her role as Marketing Director for Ski Wentworth for the past three years. A Truro, Nova Scotia native, Ms. Norrie specialized in marketing at Dalhousie and Acadia University and looks forward to her newesy challenge in Halifax.

Mr. walker returns to radio where he held a postition as Account Executive with CJCH/C100 radio. Mr. Walker was involved in the food and beverage industry for a number of years where he received many awards for his contributions to the local tourist industry. He has been an active volunteer and fund raiser for Adsum House and the Board Of Trade and has been the recipient of awards for community service.

*The Metro Radio Group (Q104- The Home Of Rock & Roll, 96.5/SUN FM- Yesterday's Favorites & Today's Hits, & 780/KIXX Country- Hot Country Favorites) congratulate Lorna Pike-Harris and Ted Hyland for achieving Consulants of the month awards for December.

Lorna recieves this honour for her consistent hard work and focused marketing knowledge. In addition to other outstanding performance Lorna finished the highest percentage over quota for December with the 3 station combination.
Some of Lorna's clients benefiting from her strong promotional and customer service include Thruway Muffler, The Tower, Vogue Optical, Kelly's Luggage, Professor's Pet Supplies and David's of Park Lane Mall.

Ted Hyland recieves this honour for finishing December at 240% of his quota on 96.5/ SUN FM and coming in 2nd overall for highest percentage over quota with all 3 stations.
Needs/ Green Gables, Penny on the Park, Scotia Tire, TNE Canada,

Hershey Canada, Colwell Brothers, Moosehead Cold Beer Store and Wild Hearts Saloon are some of his clients benefiting from his superior customer service and dedication.

IT'S OFFICIAL;
JOE BUCK OUT
AT KMOX

by Scott Simon

ST. LOUIS --- After seven years, Joe Buck is off the payroll at KMOX Radio.

As first reported in the January 15th edition of AIRWAVES JOURNAL and AIRWAVES SELECT, Buck was rumored to be cut by KMOX when he and agent Jim Steiner could not reach an agreement with KMOX general manager Rod Zimmerman.

Buck will continue to work for the St. Louis Cardinals radio network and FOX TV, where it's expected to be announced in the next month that he will be part of that network's fledgling baseball broadcasts, which will begin this summer.

Strange, but true: In one of Joe's last appearances on KMOX Sports Open Line on New Year's night, while reading the scores of bowl games that day, Joe wouldn't give the third quarter score of the Rose Bowl game between Northwestern and USC.

All he would say is that Northwestern was catching up to USC (the score at the time was 32-31, in favor or USC), and that it was a good game.

He continued by saying if he did give the score, people would turn off the radio and turn on the television.

Well, several people told me that they WERE listening to Joe on KMOX, but turned on the game on ABC-TV when he prompted them that it was a good game.

With a coach (Gary Barnett) and six players from St. Louis as part of the Northwestern team, Joe should have just given the score of the game so interested St. Louisans and Wildcat fans wouldn't have to go somewhere else to find out what the score was in the game.

KMOX now has its Web page up and running. It can be seen at http://www.kmox.basic.net.

The page was well designed by BASIC NET of St. Louis, with a number of links that aren't burdensome. However, the page needs a list of e-mail addresses for all KMOX staff members.

It's sports page claims it has the largest sports staff in the market. Not true -- KFNS has more staffers than KMOX.

In terms of quality, KMOX beats KFNS by a long shot. But in number of staff people, KFNS has more than KMOX.

DO AS I SAY, NOT AS I SAY IT: Kevin Slaten on KSD-AM, January 15th, at 4:45, criticizing the grammatical skills of Michael Irvin and Deion Sanders on FOX-TV after their win on Sunday over Green Bay:

"DON'T LET 'EM ON THE AIR IF THEY'RE GOING TO TALK LIKE THAT! DON'T LET KIDS LISTEN TO THEM SO THEY CAN UNLEARN WHAT THEY LEARNED IN SCHOOL."

Unlearn? Slaten should try to use the word "forget" the next time he is criticizing someone else's grammar.

This from a sports talk show host who self proclaims himself as "The King". Obviously, the "kings" english isn't one of his strong suits.

Other KSD-AM notes: St. Louis Post-Dispatch staffers Tom Wheatley and Jeff Gordon sign on for Sunday sports talk programs.

Wheatley will host a hockey show from 10 a.m. to noon, while Gordon signs on in the evening from 6-9 p.m.

Finally, the St. Louis Post-Dispatch has a Web site. Access it at http://www.stlnet.com/postnet.
Cost to subscribe to their services will cost $6.95 for three hours or less, and $19.95 for unlimited time access.

Greets,

Our station uses a digital production system called 'DS-1'. Our GM has
asked me to look into some new software. I am hoping to develop a
program that can use the 'DS-1' audio format. The format it uses is
called ADPCM1 (file extensions are .AUD). Is anyone familiar with this
format? If so, I'd really appreciate information on the file structure,
or
information on a program to convert this format to .WAV or .VOC, etc..
Thanks for any help you can provide..

Steve / KWKQ FM 107.1

Here in toronto the all news stations on AM (CFRB;1010;News/talk) and (680NEWS;all news) have top and
bottom of the hour beeps tied to (highly accurate) master control clocks. CFRB's FM sister station MIX99.9 (Hot AC)
also has a beep at the top of the hour I believe...

Another station which still uses beeps to mark the hours
is WBEN (AM) in Buffalo, NY. They've had a beep tone synchro-
nized with the National Bureau of Standards as long as I
can remember...one beep for the top of the hour, and a double
beep sounding at half past the hour, 24 hours a day. Although
they are a CBS affiliate, it is NOT the CBS network tone. (We
had it as an NBC affiliate as well.) The actual tone generator
is built and hard-wired into the audio chain and overrides
anything else that's being fed over the STL to the transmitter
for that split second at :00 and :30. People still use it as a time
check to set their watches in the Western NY region. (And it
imposes a certain amount of discipline on station staff to get
into and out of program elements on time as well...from pers-
onal experience, you HAD to be ready to roll with your news-
cast when the beep tone sounded and the ID rolled at the top
of the hour.)
I'm an ex-WBEN news staffer myself, but as current
station staff will tell you, in the 15 years since I left, the
time tone is one of those things that hasn't changed.

From: talk1370@aol.com
Message-ID: <4dg2pb$peu@vixen.cso.uiuc.edu>
Source record: 27018

A couple of observations...
It's interesting to see the bump in WBEN's ratings in this book, and how it coincides with an unexpectedly strong on-field performance by the Bills...back in the late 70s (when we first got the Bills back from 'KB) we noticed that a lot of younger male listeners moved over to us for weekends (when game coverage was on) and often tuned in for additional coverage/discussion during the morning and afternoon drive slots. My guess is that 'BEN got its traditional Bills bump, which always amounted to about one share point give or take a fraction, and always helped us most in drive times and early evening (when sports talk has always been the rule). The interesting thing will be, what happens now that the playoffs are over for the Bills?
Another interesting thing will be, how successful WGR's transition to almost all sports talk (at least from 10 in the morning to 11 at night, plus a lot of sports content in the morning drive) will work. Obviously the clock ran out for issue talk in middays...hence Ron Dobson's exit after less than a year, to be replaced by the Sports Babe from ESPN Radio. But I suspect that's more a function of WGR's choices of hosts, slant and topics than it is a reflection of how much Buffalo is interested in talking about things other than sports. There is clearly a niche for a strong, personality-driven talker with a real variety of hosts and viewpoints...up to now, no one has tapped that market in recent times. It used to be good for a 7 or 8 share when 'GR was more effectively programmed six or seven years ago.
Also...everyone seems to be convinced that 'KB is committed to satellite country for the long term, and I'm not. What they may be doing, is programming on the cheap with time filler, just enough to maintain some revenue stream and keeping the signal from becoming a dead loss. They may at the same time, have wanted to blow off the Howard Stern fanatics who comprised the core of their old audience, so they could make a fresh start with a very different kind of talk. And I've heard indirectly that the results of their national search for a local morning host or hosts this fall, was disappointing-not that the applicants were bad, some of them were excellent talk hosts, just not what they were looking for in a MORNING show. Going to country for a season or two

gives them a chance to clean out the Stern fans, keep SOME money coming in to pay the power bill on the 50 kW transmitter, and buy time to assemble a staff for a personality talk station that'll be lighter in tone and less hard-news than WBEN (and less likely to cannibalize its sister station's audience) but more mature and upscale than Stern gets you. In other words, what WGR was doing six or seven years ago when it was consistently in the top 5 or 6 in the market.

One other reason I think this may be what's really happening...if I'm not mistaken, several popular Buffalo personalities who would perform well in such a format are getting close to the end of their contracts with their current stations, could be free agents around the middle of the year, and might be willing to move if the money is right and the situation looks like it will be stable. If it were me programming the place, I'd buy time, mark time and wait for people who I knew gave me a fighting chance for success to become available, rather than rolling out my final format with a staff of stopgaps and second choices and risk a more expensive failure.

In short, the talent search for a new KB morning show was for real. If they'd found someone special, they'd have launched local talk this month. They didn't. Maybe some of the applicants might work out in other dayparts, and who knows, some of them might even show up on the final schedule in middays or nights. The people they probably figure WILL make it work in the key drive time slots may not be available until late spring or summer...and if they DO become available and decide to move, that still gives Keymarket/River City time to launch a local talk format on 'KB in plenty of time for the fall election action. Will it happen for sure? Who knows? But it MIGHT happen...and it makes 'GR's abandonment of issue talk for wall to wall sports talk that much more understandable, if THEY think KB's embrace of country is just a temporary thing.

476. What's wrong with Classic Rock?

Newsgroup: rec.radio.broadcasting

Source record: 27019

KUZZ1 (kuzz1@aol.com) wrote on the subject of classic rock:

> It's in big ratings trouble in a lot of places. The problem with it is
> that it becomes very boring to hear the same few hundred cuts over and
> over again. The format comes on strong, then burns out.

As long as we're all "piling on" the corpse of the classic rock radio format, I thought I'd add my two centavos to the discussion, strictly for what its worth.

I agree with the assessment that the music is a real burnout. The success of the 50s-60s flavor of "oldies" lies in the incredibly deep library potentially available to the oldies programmer. Not only do you have nearly 2 decades worth of music to pick from...you also have sub-categories as "girl groups" "Elvis" "r&b", "soul" "Motown", etc. from which to "blend" a station sound. By comparison, the "classic rock" programmer is limited to one decade, in which the music pretty much sounds the same ("Layla", while one of my favorite songs of the decade, is to me "typical" tune that defines "classic rock", your definition may vary <g>).

Another reason, in my humble opinion, for the demise of "classic rock" is that they failed to capitalize on the successful elements of its direct predecessor, "album oriented rock". AOR had personalities who knew the music and the musicians, were given freedom to experiment with thematic sets of music, and were generally allowed to exhibit <<<shudder>>> creativity! It was easier for the listener to develop loyalty over a longer period of time. "Classic rock", on the other hand, more often than not, employed young announcers who knew nothing about the music that rotated too quickly, and the format struggled to find successful "formatics" like jingles, liners, etc. to spice up the presentation (one of those "fun" things that still characterizes successful oldies outlets like WCBS-FM, etc.)

For me, the last gasp of "classic rock" was when they tried to re-invent it into the "Arrow" format of a few years ago. Remember how this heavily male-intensive targeted format was widely embraced, and gave some new life to dying classic rockers? Here in D.C., CBS took a reasonably successful AC station (WLTT-FM, "W-Lite 94.7") that had lots of community presence, but whose ratings had sagged from neglect, and turned it into "Arrow"...and the station hasn't been seen or heard from since. Overly-repetitious playlist, tired liners, and talent that sounds like they'd rather be selling used cars.

CBS would have been smarter using its expertise in programming WCBS-FM in creating what is now known as "70s" oldies. These stations (D.C.'s "Xtra-104" as an example) take the sound of the top-40 "legacy" stations of the 70s era, and play a wide range of pop music, *including* some tunes that could fall into the narrow definitions of classic rock. Its the *variety* of music, and easy-on-the-ears presentation that will, in my opinion, help the 70s stations

endure where classic rock faded away.

Like "top-40" that returned as CHR ("Contemporary Hit Radio"), and has yet to make its third come-back (unless you count the current "alternative/modern rock" as the "new top-40"), "classic rock" will be back as a format one day, count on it. It will become a "niche" format , much like the MOR formats have become today. Some enterprising satellite radio distributor will resurrect a couple of the better practitioners, and the signal will light-up at least one station in most of the top 100 markets for a while before it burns out again...

And so it goes...

I have read that a station in Seattle (AM 1250) debuted a format called KidStar in 1993. They planned to offer it to stations in other U.S. markets. Does anyone know if the format is still on the air in Seattle or in other areas? Is children's radio successful in attracting audiences and revenues? Is it exclusively heard on AM or are there any FM stations offering the format. Any information about these questions or simply some impressions about what the format sounds like would be appreciated.

Thanks!

While not many people would consider leaving a radio market of some one-million people for one of twenty-two hundred, that's what I did just recently, and this unlimited ownership stuff was a big reason. In Toledo the group owners seem to be taking over. Here in remote middle of nowhere Alaska, radio is a whole lot different. And I like it. :)

If I wanted to move up (from my former position as PD at one of the smaller stations in Toledo) in that market, I would have had to work for one of the big station groups, and I didn't want that.

Unlimited station ownership MIGHT not be as bad *IF* the FCC would allow Low-power unlicensed broadcasting. Otherwise, I see it as monopolistic capitalism gone amuck, which has the power to destroy the industry and hold unnerving sway over public opinion. Not to mention put out of business the smaller commercial stations. This is why I think low-power unlicensed radio would be such a plus. I think that big-bucks mega-power radio, niche-targeted low-power radio and other services can co-exist, if given the opportunity to do so.

Unlimited station ownership and control seems to me to be everything BUT in the public-interest.

Just my opinion, for what it's worth. :)

Is there a requirement that the ID be in English? I recently heard a
Spanish-language station do its hourly ID in Spanish only, and beyond
inferring that it was their ID (because it was the only spoken bit
between two music pieces at the top of the hour), I couldn't tell what
their call or their city was.

The real estate transmitters are 100 MW or less Part 15 unlicensed
operation--not Travelers Information Service. The drive-in movie systems
use carrier current transmission through wiring in the park and only
transmit a few feet from these lines. This type of system used to be used
a lot in college dormitories.

>: of listen to it. They have news, and related subjects, and advertizing.

Some time ago, I wrote an article about Silent Radio. The inventor and founder of the company was a friend of mine. Below is the article:

Sssh! I'm Watching SilentRadio

We all know what television is, we all know what radio is. Television is for watching and radio is for listening to. Radio gives us music, news and advertising. Television provides us with Sit-Coms, news, advertising and re-runs. Television also gave us "Sound-bites", little quickie bits of information - audio headlines.

The origin of the sound-bite can probably be traced to the old streaming news announcement billboards on Times Square, New York and Picadilly Circus, London. Before television, satellites and cellular phones, there were big billboards covered in thousands of light bulbs. The bulbs illuminated messages, news and advertising -just quickie headlines such as "War is Over". If you wanted to know more, you bought a paper or huddled over the RCA Console.

One thing about the Times Square signs was they certainly helped pass the time. If you were waiting for something to happen, you could watch the news headlines scroll by. But the signs with all the lightbulbs were big bulky and expensive. Behind the sign was a man sitting at a Teletype machine, most of the time he ran punched tape, but he had to cut the tape and keep things whirring. Because of the unwieldyness, these machines were limited to the centers of major cities.

Then came the LED (Light Emitting Diode) and the microprocessor. Using these two wonders of the seventies the "Times Square" scrolling display could be made, small, cheap, portable and low power. Sitting in Los Angeles garage in the mid seventies was a young man who had already made his mark as the

designer of the system that took a TV picture and printed it on a T-shirt. The young man was Mike Levin who put together hundreds of LED,s and controlled the whole thing with a microprocessor using one Kilobyte of RAM. The text was loaded in locally with a detachable keyboard. It was a simple device by today's standards. The first units which were sold in 1979 had a one line display. By sitting at the keyboard the owner could type in "Eat at Joe's" or "Try our pastrami on rye".

The drawback to the first units built my Mike was that the owner of the display had to be a writer and a typist. So his next enhancement was to add a computer modem to the display and download news and ads from a remote location. This was the beginning of the bright idea. Other manufacturers had scrolling displays, some were progammable in the field and some were shipped with canned messages. Mike Levin, who was calling himself Cybernetic Data Products, now had the only unit that could change the message and besides changing the message could offer the latest news in headline form. These first units were installed around Los Angeles in Supermarkets, cinema lobbies, liquor stores and banks - any location where customers would be standing around waiting.

One day Mike was driving down the freeway listening to his car radio when he heard that the FCC was allowing TV stations to experiment with Teletext. Teletext is a way of sending text and data over the unused lines of a TV picture. The unused lines are often referred to as the Vertical Blanking Interval (VBI). The Closed Caption system used for the hearing impaired and for language translation uses the same system. This, Mike realized, would be the best way to address thousands of display units without going broke paying phone bills. So SilentRadio was born.

Mike, who learn't his video technology when designing the TV picture on a T-shirt equipment, had no trouble coming up with a way of sending text via TV signals. He contacted the local Public Television station KCET and offered to pay to put data on one of their unused picture lines. No one else wanted to use this wasted bandwidth and KCET, like most PBS stations, was always looking for a new way to pay the bills. A partnership was born and Silentradio could address every unit at once to provide the latest news updates and sports results, even the winning lottery numbers. Also, besides sending news to every unit, SilentRadio was designed so each invidual unit could be addressed. This meant that each SilentRadio unit could carry a special ad or message such as "Thanks for eating at Joe's - free Tums with every monster sandwich" or "Happy birthday Tom at table three". The telephone modems didn't all go away, but from hundreds of modems, one at each SilentRadio site, they went to one leased phone line to the TV station. The SilentRadio units each had a custom receiver and TV antenna attached to them.

The first units, built in 1982, were a big hit in Los Angeles and were soon improved and updated to two line models. Advertisers could buy time on SilentRadio or businesses could have a SilentRadio unit with only their own ads on it, and all the local and national news and sports.

In 1984 SilentRadio went international. Units was installed in Paris, France. The French are fascinated by text processing, they have computerized phone books. Some phone subscribers do not get phone books anymore, they get a computer terminal from the phone company. Obviously something like SilentRadio was a natural. Pierre could sit in the cafe and watch the horse racing results come through.

After the French connection SilentRadio started spreading across the major cities of the U.S. The news and ads were shipped out from Los Angeles to the distant cities' TV stations via leased data links. This also meant that when The phones went down, so did SilentRadio. At the SilentRadio headquarters in Los Angeles is a newsroom with wireservice feeds. Sitting in the newsrooms are editors and technicians putting the headlines together and feeding the ads to all the thousands of SilentRadio display units across the U.S. The whole operation is controlled by a large Pyramid computer. In the early days when money was short the silent radio staff built their own monster computer by tying 20 Apple II computers together. The old monster Apple is still sitting in the computer room.

With thirty cities on SilentRadio, the cost and problems of maintaining thirty 56 Kb leased data lines running was getting to be too much. The answer was to get a satellite channel. SilentRadio now leases a 56 Kb data channel on K2. At each host TV station they have a downlink dish. The system has been on satellite since fall 1988 and besides a small station-keeping accident in late 1988 when a control operator sent the satellite about 1,000 miles off course for a few hours, there have been no problems.

So next time you are waiting in line at the bank and you see a scrolling message that not only tells you the interest rate, but the baseball scores, you will be looking at SilentRadio.

END

Well, now, that brings up another interesting subject. Speaking of
"reverb" (which, by the way, is a practice still being exploited by
CBS-FM), why is it that some stations sound worse than others (i.e., in
Gotham, WPLJ, WQHT and WHTZ sound distorted, in my opinion, compared to
the other "clearer" sounding stations)? Are they, to use a term I
learned in my college radio days, "overmodulating?", because that's
what it sounds like. Do they sound this way on purpose? Can they
control this? What's the scoop?

Oh, Anita! We have so much in common! I thought only I was a maniac
about these things, but even from back in the days when I used to
listen to 45s and LPs on a "BSR" turntable that went too fast and you
couldn't adjust the pitch, I've always been such a nut about speed. In
fact, I've even gotten to the point of buying a portable stereo tape
player with speed control, because I insist that most walkman tape
players go too fast!

I'm sure what I was referring to wasn't in your day, but around
late-'83, Z100 sped-up a FEW songs such as "That's All" or "Owner of a
Lonely Heart". I don't specifically remember, but I believe those were
2 of them. 'APP was speeding up music about the same time. They were
fine up until about late-'83, when they must have moved to new studios.
However, no one did it as consistently as PLJ.

Last I heard, KYW Philadelphia still runs one. They don't even run a network newscast at the top of the hour!

My dad, who lives in Philly once told me he'd be lost w/o that BEEP. Every morning he has on KYW. Some days he's really listening, somedays it's just on in the background, but once that BEEP happens at 8am, he knows that he has to leave in the next minute or two to catch his train, or he'll miss it!

In Louisville WHAS(AM) does this. Unfortunately they don't time their
newscasts all that well, so the beep often comes either during the news
sounder or during the first few words of the newscast. Personally I'd prefer
to have the beep right after the legal ID and before the news intro.

Message-ID: <4dg2pl$pff@vixen.cso.uiuc.edu>
Source record: 27077

Hello,

I'm not sure where to post this question, but How does one go about getting an FCC License?

Could you also tell me what an FCC license really allows me to do, how long it takes to get one and how I get one.

The reason I'm asking is because I am looking in the paper for a job in the communications/broadcasting field and I keep seeing ads that say, "FCC license preferred."

My background consists of audio engineering/production for broadcast.

Thanks for any help,

-Steve

For the second year I have made arrangemnets to broadcast live from the
second floor balcony of world famous Cris Owens' Club 643 Bourbon Street.
We are offering market exclusive LIVE feeds from 06:00 Tuesday Feb 20
until 13:00 the same day.
THIS IS THE HAPPENING SPOT IN THE WHOLE WORLD OF MARDI GRAS!
This year we are adding, in addition to our standrad 3 minute report,
"live mikes" on the street to let more of the City of New Orleans "expose"
itself to your audience.
Image liners with revelers can be arranged.
We have limited avails and have already signed up NBC Radio News, and
America in the Morning.

503. New York City Radio Changes ?!

Newsgroup: rec.radio.broadcasting
Date: 1996-01-16 00:00:00 UTC

Source record: 27079

Hello all. As you have already heard, 92.3 WXRK is now "New Rock" dropping it's "Classic Rock" format. This is the last thing I would have expected in NYC radio. We now have four stations that you can hear about the same music on. The stations overlap slightly but it's the same old thing.

92.3 WXRK, 100.3 WHTZ (Z-100), 102.7 WNEW , and 104.3 WAXQ (Q-104.3)

How can four stations that play the same stuff all have high arbs and be successful? The answer is that it can't.

The plight of 93.1 WPAT is still up in the air. We know it's been bought by a Spanish company but we haven't heard the format change. They better try something else. A 2.3 rating is not great. (Remember when WPAT was #1 in arbs a few years ago with the EZ-93 format? They did it with little advertising and little if any contest promos!) (It was great doctor/dentist office music!)

My last point is with WYNY 103.5. Their latest arb was a 1.9 and I hear that a format change is in the works for them. Rythmic CHR would be great cause you just don't get it in NYC anymore. I strive to get Q-102 in Philadelphia where I live to listen to what real Top 40/Dance still is. A Top 40/Dance station in NYC couldn't hurt with 4 rockers in town.

Yes friends, NYC radio is buzzing like bees. Keep your radios scanning cause you never know what you're gonna hear next.

Steve W (an avid radio listener)

RR> Frankly, I am really surprised that there is not more concern among
RR> radio people, especially non-owners and small-signal owners. What
RR> does this consolidation mean to you?

Zero.
Nada.
Nothin'.

Why?

Because
If the CONTENT is good, then
Who cares who OWNS the station?
If the content is garbage, then
Who cares who owns the station?

RR> Whatever side (or sides) that you identify with, this unlimited
RR> ownership legislation is going to totally alter the industry as
RR> we know it.

Other than the names on the license
I doubt that any such 'opoly will be noticeable.

Would an 'Opoly Operator [or "OO" <tm>] change ALL (or even
most) of their stations to the same format? I doubt that
they would be dumb enough to self-cannibalize. And if they
were, then two quarters of bad Arbitrons should set them
straight. (And if it doesn't, then that's THEIR problem.)

Remember, broadcasting is a highly competitive business.
If an OO gets fat&lazy, then there are PLENTY of other
broadcasters who would jump at the chance to steal their
audience.

I'm more concerned about the sparsely populated areas that
can only support a few stations. THOSE listeners get far
less variety (and, usually, lower quality -- unless they
are programming syndie stuff) than, say, Chicago.

OOs DO have a few advantages:
- Shared support services (marketing, engineering, etc.)
- "Bulk" buying power.
In both cases, lower operating costs [e.g., fewer engineers
to maintain more stations, network news services bought at a
discount] are the result. Will SOME of those savings flow to
the owners? OF COURSE! Might SOME of those savings be used
for experimentation? Probably. And, with, say, 5 or 6 stations

an OO can afford to risk an entirely new [could there be such a thing???] format...on its weakest station.

Broadcasting is going thru the same process that hit local local food stores in the 30s and is now entering a new phase in the 90s. [See the current FORBES for an article on Wal-Mart's and K-Mart's entry into food sales.] Similarly, both consolidation and technology are dragging banking into a new age. Why should broadcasting, once at the world's technological bleeding edge, remain a "mom&pop" op? Sure, I miss stations like LA's KFAC (and hate EverMean not for cRap music but for lying about their intentions). However, KKGO switched from jazz to classical to fill the gap (along with KUSC), while KLON now fills KKGO's void.

Some folx are furious that, to move from Mike to Ike, Baywatch pulls far higher ratings than Masterpiece Theater. (Heck, I'm ticked that BW outdraws Babylon5!)

That's life in a democratic free market. And as Sir Winston Churchill said/wrote [paraphrased] Democracy is a very bad form of government Except that all the rest are worse.

Now, unless you folx wanna appoint MOI as Your Benevolent Dictator, I suggest that if you want a particular format write/call/visit sponsors and tell THEM.

(I didn't plan to go on for so long, but Bill inspired me. <g>)

> which was a daytimer at that time. The sign-off went: "KWUN may be
> signing off for the evening, but the night is just beginning at John
> Jawad's Pioneer Inn in Clayton..." Yes, the owner sold the sign-off.

I distinctly remember hearing a sign off in the late Sixties or early
Seventies on WIOO in Carlisle PA (a daytimer at 1000 on the dial) that
said something like, "Stay tuned for more music from WCFL, Chicago"!

WCFL also was at 1000 on the dial, and the clear-channel station in the
East on that frequency. In point of fact, by the time WIOO signed off,
WCFL was coming in just fine much of the time <grin>

Are you sure it was by accident? I remember John Landecker saying WLS (also
owned by ABC) speeded up its records at that time. He said he was interviewing
Todd Rundgren (producer of Grand Funk) and played "We're An American Band"
speeded-up and Todd didn't even notice.

I am not totally sure about anything <G> but when they finally put in
a new production turn table the speed went back to normal.

I once mentioned to the PD that the audio sounded like Sh*T but he
said I was one of the few who would notice. The reverb WAS very
hot. so hot in fact that the xmiter engineer used to get up close to
the reverb unit. (A huge thing about the size of a pool table turned
on its side) and scream "encouragement" to the jocks and you could
just make it out in the phones <G> Plus there was a lot of clipping
going on to get the positive peaks up high...

I have grown to believe that except for the obvious difference between
AM and FM that most people don't notice how a station sounds from an
acoustic point of view. I don't think the idea even occurs to most
people that stations can sound different. The do however notice how
big a station sounds. They hear it as being closer and therefore more
local when it is big and loud. As much as it hurts my ears I would
play the odds and go for loud if I were a programmer.

509. Time tones

Much like what many shortwave stations do...I believe HCJB does this
(correct, Ken?) A number of the larger worldwide stations use time tones
at the top of each hour, some pause for them, others don't (though I can't
recall exactly who does what)...

I have been thinking of maybe putting in a chime generator here at KRUP,
actually...

in the longer
> term.

Here in the States the term R-DAT has been dropped in favor of DAT. The R was at one time necessary to differentiate the rotary head system (R-DAT) from the stationary head system (S-DAT) which never was produced. The DAT we have today is of course rotary head, but there's no longer a need to differentiate. The DCC (Digital Compact Cassette) uses a stationary head, but since it's called DCC, there's still no need to differentiate.

> Minidisc and DCC are both formats that have yet to make it into the big
time. Some
> companies here in the UK have just started promoting DCC as a mastering

> home studio users. DCC hasn't take off at all well here, even less than
MD, and future
> availability of tapes could be a problem.

In the U.S., DCC didn't make it at all, and is considered a dead format by most. MD, on the other hand, is making slight inroads in broadcasting, pushed along by Sony's MD "Cart" idea. But the supporting consumer market is very small, and it remains to be seen if the pro-broadcast market will support the format enough to keep it around. Sony ususally does committ to supporing its products with service and media for at least 10 years.

I do not agree that a bit-rate reduced recording system such as DCC or MD would not be audible once passed through an FM broadcast chain. The idea is just to general. It would depend upon the specific chain. It would be audible in some, not in others. The real concern is that if you use any other bit-rate reduced systems in the chain such as a digital STL, or eventually digital broadcast system (what is that called now? DAB? DAR? DRB? DEAD?) which would further reduce the data based upon a dissimilar set of masking criteria. The resulting multi-generations of bit-rate reduction would be very objectionable.

The general idea should be that data storage is fairly cheap. Data transmission is fairly expensive. So, store without bit-rate reduction and

transmit with as few generations as possible of bit-rate reduction. This would point you to DAT or hard disk based recording.

I use the term 'bit-rate reduction' rather than 'compression' because it accurately describes the process. Data compression is lossless (i.e. the file compression utilities we all use in file transfer on the net, or compression to disk) but bit-rate reduction is the process of selectively throwing out data that was determined to be unnecessary, never to be recovered. Bit-rate reduction is heavily used in MD, DCC, and digital broadcasting. The criteria and amount of data thrown out has an impact on the audibility of the system.

FALL RATINGS STILL HAVE KMOX #1
JOE BUCK MAY BE OUT AT KMOX

by Scott Simon

ST. LOUIS -- CBS owned and operated KMOX Radio remains the most listened to station in the St. Louis market after the Fall Arbitron survey was released late last week.

For all listeners 12 years of age and older, KMOX had a 14.7 percent share, 5.4 percent above country-format WIL-FM, with a solid 9.3.

Broadcast of the St. Louis Rams had an impact on KSD AM and FM, which simulcast the games and talk shows. The EZ Communications combo posted a 4.8, good for 7th place overall.

A breakdown of the top ten stations in various categories:

MONDAY THROUGH SUNDAY 6AM-MIDNIGHT 12+

Fall 95 Summer 95

KMOX-AM (Full Service) 14.7 14.2
WIL-FM (Country) 9.3 8.8
KMJM-FM (Urban) 7.5 7.1
KEZK-FM (Soft A/C) 7.0 7.0
KSHE-FM (Rock) 6.4 6.3
KYKY-FM (Hot A/C) 5.3 5.6
KSD-AM/FM (Talk/Classic Rock/Rams) 4.8 * ---
KPNT-FM (New Rock) 4.8 4.8
WKKX-FM (Country) 4.2 3.6
WKBQ-FM (CHR) 4.1 4.6

(* AM and FM audience combined, to reflect co-programming of St. Louis Rams football play by play and related talk shows)

Adults 25-54 6-10AM

Fall 95 Summer 95

KMOX-AM 12.6 12.0
WIL-FM 9.7 7.9
KYKY-FM 7.5 8.3
KSHE-FM 6.4 6.3
KEZK-FM 6.2 7.0
KSD AM/FM 6.2 ---
KMJM-FM 5.9 5.7

WKBQ-FM 5.3 6.7
KSD-FM 5.3 5.1
KLOU-FM (Oldies) 4.8 4.3

Rumors surfaced this weekend that Joe Buck will be dropped from KMOX Sports Open Line, as early as this week.

Station staffers tell me that he and KMOX general manager Rod Zimmerman could not reach an agreement on a new contract.

Buck will continue on St. Louis Cardinals baseball broadcasts, aired on KMOX, but produced by Bud Sports, a division of Anheuser-Busch, the main broadcast sponsor.

And it is expected to be announced in the next month that he will be one of the main broadcasters of major league baseball on FOX, which begins this summer.

In article <4d8aab$23c@vixen.cso.uiuc.edu>, talk1370@aol.com says...
>We aren't yet as loose as the Canadians, who permit the use of the normal
>station positioning slogan as the top of the hour ID and only require a full
>legal ID of callsign and city of license a few times a day. (Go up to
>Toronto and you'll hear only ONE station, CFRB, regularly giving what would
>be a legal ID in the US.) But we're getting there.

I suspect the CRTC did that to accomodate the CBC, which has long preferred
(in the European tradition) to identify its networks rather than the
individual stations. Not only are their English-language radio networks
known as CBC Radio and CBC Stereo respectively -- with no identification as
CBL, CBM, etc., except as you describe -- but their terrestrial TV networks
are called CBC Television and Radio-Canada Television. However, oddly enough
they do identify their major stations by frequency (or TV channel), so
CBL(AM) is called CBC Radio 740 and CBM(AM) is called CBC Radio 940.

I wonder about this myself. In Detroit, WNZK is an ethnic station that has programming of varying languages throughout the day, and it seems about the only thing I ever heard in English on that station was the ID.

Which brings up another question, since I mention WNZK. They are assigned to 680 kHz days, 690 nights (or maybe vice versa). Are there any other stations with such a bizarre arrangement? That is a curiosity I have had for a lil' while...

> Can you help me please ? I want to find this or one like this.

The cheepest way to record output 24hrs a day is to use long-play video
recorders and 5hr tapes (ie 10hrs) then all you need is lots of videos
cassettes, depending on how long you want to keep them (and the patience
to label them all).

Or more expesively Sonifex produce a DAT logger which uses _3_ DAT tapes
to record 42 days of continuous programming and can play back simultaneously
If you wantany info I can find them out if you mail me.

Here in Columbus, Ohio 610 WTVN plays a tone close to the top of the hour. But the tone is built into their ID and news open and has no correlation with the actual time - if they are late so is the top of the hour tone!

Somone I know who had been involved in radio for many years now has only ten percent of vision left and would like to know how people who are blind are able to do the work of a radio announcer i.e. work the controls and do the reading on the air that is required.

Thank you in advance for your responses.

Erwin Frazer

Yes (assuming a station in the US, licensed by the FCC). The English-language
pronounciation of the alphabet must be used.

Of course, a heavy accent might throw one off :-). Do you remember
at least what frequency this station was on?

One is never too old. I have begun to do some interning at a small
town radio station at age 50 so that in the event I decide in several
years to retire I can do something I did and enjoyed as a teenager and
you start the same way even at 50. Demo tape and i asked to learn the
control panel and they put me on the air for two hours every Friday
night instead of going to satellite at that time (they just go two
hours later)

I provide engineering services for Bob Greenberg in Chicago who provides sports highlights to a number of stations. He's blind, and has his own studio at home with a dozen satellite receivers, 3 dishes, 3 R-R recorders, 4 cassettes, and the usual cart machines, consoles, mics etc. We put in a cross-point switcher for him this year to 'make things easier'. He's amazing to watch!

>From Portland Oreon WWV's 2.5 MHz signal peaks 10-15 db over S9.
Using 500 Hz CW selectivity I can easily detect the presence
of a signal at least 50 db weaker than WWV. WWV is 10 KW in Colorado,
so a 1 KW station in New Jersey would be 10db weaker from power and
10-12 db weaker from the extra distance.

It is more difficult to guess the propagation difference between 2.5
and 1.7 mHz. I'v worked a New Zealand station on 1.8 MHz using a
100 foot random wire, much more distant than Elizabeth NJ. In 1961
our high school station's 5 watt 1620 signal reached 20-30 miles to the
St. Louis FCC office. I certainly had no trouble hearing the 1660 test
signal from the last NAB convention in Las Vegas.

Has anyone west of the Great Lakes heard anything on 1660 from NJ?

Well, Denny is signed at WVKS for a guaranteed 3 yr cntract. From what I know WLS was interested in Denny Schaffer and WVKS News Director, Tricia Courtney but because both Denny and Tricia are loyal to Toledo they would not leave. The contract thing was in the way also.

Greets,
I assume you are referring to the FCC Restricted Radiotelephone Operator Permit. I work at a radio station that still signs on at 6:00am and signs off at Midnight. Therefore, being an evening deejay I am required to sign the station off. The FCC licence is (if I understand it correctly) required for anyone who will be operating the transmitter switch, and also (maybe) for anyone who will be taking the meter readings every three hours (as in my case). For this class of licence, there is no test required. You simply fill out a form and mail it to the FCC with a payment. I am not sure what the payment is. $30, I think. My station took care of it when I went to work there. I heard that you can get the form at any post office. You might try there; Otherwise, you ought to be able to get the form at some stations.

For a story for Radio World, the radio industry newspaper, I would like to hear from DX-ers who have favorite stories of listening to those far away signals. This story isn't confined to any specific time frame - I'm interested in hearing from you if you were DX-ing in the sixties or if you're DX-ing today.

There's something magical about DX-ing. That's the essence of this story - I want to know what turns on DX-ers. What's the attraction of listening to far away signals? I'd love to hear stories that put the spotlight on the romance of radio - driving to a mountain top or some remote area with your sweetheart and listening to some far away station, or sitting in a room in your house, late at night, pulling in new signals from out of the sky.

Please either post your messages to the group or to me at zoogang@ix.netcom.com by Monday or Tuesday, January 23. Thanks.

> offering the format. Any information about these questions or simply
> some impressions about what the format sounds like would be appreciated.
>
> Thanks!
>

KKDZ ("Kidstar") is still on the air and seems to be going strong. I do not listen often (not a kid!) but have been impressed by the programming, especially news about and for kids that does not talk down to them. They play popular music and novelty stuff. Last I heard the plans for a network were on track; I think some of those involved read this newsgroup and would be better equipped to comment on that.

>>#8: Enya ANYWHERE IS

Interesting list but...
Is this your own top 15 favorites? Yes or no, you ought to
state where the list is coming from

Is there any station IN AMERICA that plays all 15 of these songs?
(he asked expecting the answer 'No')

Paul, who hasn't put compiled his own top 15 favorites since
Enya's Caribbean Blue was out.

Re: processing

At some stations it's important to be "the loudest thing
on the dial". You'd think that some stations have more pieces
of equipment in their audio engineering rack than music reproducing
equipment in their on-air studio. Some stations former engineers
even go into the audio processing equipment manufacturing business.

Much like what many shortwave stations do...I believe HCJB does this
(correct, Ken?) A number of the larger worldwide stations use time
tones
at the top of each hour, some pause for them, others don't (though I
can't
recall exactly who does what)...

I have been thinking of maybe putting in a chime generator here at
KRUP,
actually...

Ron Schoedel
KRUP-FM, Dillingham, Alaska

********** End of Forwarded Message **********

Ron is right, here at HCJB we don't hear it in the earphones unless we
are live and listening to the off-the-air line (which is our case is
not really off of the air, but IS the line which we feed from our
studios to the transmitter site). That's why you will hear us program
around it on Morning in the Mountains, but not on other programs.
(Morning in the Mountains is live, most of our other programs other
than the news are taped). However, I swear that it seeps out of the
walls, there are times when walking across the HCJB compound that I
have heard the "pitada" as it is called here and I am no where near a
speaker. Weird!
By the way Ron, what are you doing in Alaska? The last time I

heard from you was from Toledo. --Ken MacHarg

K-Rock fallout; Evergreen's changin' & the New Zoomeister.

People are still talking about the K-Rock format switch. Still no word on the fate of the on-air staff, but there's tons 'o' speculation that some of the staff may move back to WNEW. PD Ted Richards did nothing to squelch the rumors, but did say WNEW wouldn't move to fill the format void left by K-Rock. Two things are certain - Howard's staying, and the Greaseman's gone.

Could the sudden K-Rock move to Modern Rock have upset Evergreen's plans for WYNY???? No one's saying--and Country's still king at 103.5. But.....
Also in the ch-ch-ch-changes department--the sighting of the 'Salsa 93' poster is in keeping with SBS' previously announced plans to air a Spanish flavored A/C format there when the sale becomes final in February.

Steve Cochran takes over the Z-100 Morning Zoo from John Lander. He debuted last Thursday.

Interesting note I gathered from C-Serve's BP forum - Ferrell on the Bench has been bounced from KNBR in San Fran, the station he came from. While this is said to be because of a few of his comments towards station management, does it bode well for the Ferrell show if they dump him from a market where he's been successful????

Take care---

Tripp Rogers

>air time this way.

Yep, KIEV (licensed to AND located in Glendale) sells time surrounding the George Putnam and Ray Briem shows. I believe KMAX 107.1 (licensed on three co-channel signals- Arcadia, Fallbrook, and Ventura) has been brokering some weekend time, although the new owners may change that. There are probably other possibilities if what you have in mind is religion or Spanish.

554. Re: classic rock

Newsgroup: rec.radio.broadcasting
Date: 1996-01-17 00:00:00 UTC
From: trapper <trapper@talon.net>
Message-ID: <4dj2ie$r8p@vixen.cso.uiuc.edu>
Source record: 26980

I am a midday air talent/production director at WRFY in Reading, Pennsylvania.

In recent issues of Airwaves, and throughout our trade magazines, we keep getting hit with the "fact" that "Classic Rock Radio" is dead, or at least taking it's last breath. I'd like to suggest to everyone that it's not the music that's making listeners turn off...it's the programming of that music. Short playlists and a lack of attention to new rockers has created this stagnation.

Many "professionals"have the belief that a playlist of only 200-500 songs is allowed. Wrong. If all you're going to play is a few hundred songs, your TSL will hit the toilet, and your listeners won't come back eventually because they always hear 'the same old thing'.

In Reading, PA...WRFY-FM is currently working a "Rock Hits" format, basically a 60/40 split of classic to new rock. We've just received our fall ratings...one of our highest fall books ever. Since we began with this format (which lists currently over 1200 songs on our REGULAR playlist) three years ago, we've seen several record high ratings periods, which is quite a feat since our biggest competition is Philadelphia radio.

Regardless of what all those so-called professionals say...it is not necessary to tighten your playlist. On the contrary...expansion is the key to success.

Kevin (Trapper) Browne trapper@talon.net

555. Modern AOR Format

Newsgroup: rec.radio.broadcasting
Date: 1996-01-17 00:00:00 UTC
From: KFXZ10A@prodigy.com
Message-ID: <4dj2if$r8u@vixen.cso.uiuc.edu>
Source record: 26981

I have been following the interesting discussion of the classic rock format, but I was wondering what people thought of the direction that the AOR format seems to be taking. Many AOR stations seem to dropping most of their classic rock playlist in favor of more "modern rock". Only a few older artists (Led Zeppelin, Jimi Hendrix, the Doors, etc.) remain on the playlist, while the bulk of '70s and '80s rock is totally ignored. This, at least, is what is going on in southwest Ohio. Is this trend taking place elsewhere?

Personally, I find this new "modern AOR" format hard to listen to. While I enjoy hearing a lot of new music, I find it quite irritating that I can only hear a limited number of "classic" artists, artists whose works are greatly overplayed, IMHO. Also, to my ears, the format just doesn't flow very well. You may have several new and recent songs played in a row, and then all of a sudden, a song that is nearly 30 years old and has been played over and over is played. IMHO, I would find a format that combines modern rock with the '70s and '80s rock (Journey, Genesis, Foreigner, etc.) that was dropped much more interesting to listen to.

Anyway, those are my observations and opinions. I would be interested in reading what others have to say about this topic.

In article <4dg2pd$pf0@vixen.cso.uiuc.edu>,
Ed Ellers <edellers@shivasys.com> wrote:

>I suspect the CRTC did that to accomodate the CBC, which has long preferred
>(in the European tradition) to identify its networks rather than the
>individual stations. Not only are their English-language radio networks
>known as CBC Radio and CBC Stereo respectively -- with no identification as
>CBL, CBM, etc., except as you describe -- but their terrestrial TV networks
>are called CBC Television and Radio-Canada Television. However, oddly enough
>they do identify their major stations by frequency (or TV channel), so
>CBL(AM) is called CBC Radio 740 and CBM(AM) is called CBC Radio 940.

And just to confuse the situation even more, the /French/ mono network
does identify in the standard form, at least some of the time, as
evidenced by <http://radio.lcs.mit.edu/radio/sounds/cjbc.au> and
<http://radio.lcs.mit.edu/radio/sounds/cbj.au>. And, of course, CBO
and CBOT in Ottawa have /always/ used their callsigns (to the extent
that the last I heard their mono radio morning show, it was called
``CBO Morning''). This is a relatively recent phenomenon; in the
1950s and 60s, all the stations used their callsigns. (Probably
Ottawa hasn't changed because it doesn't have seventy gazillion
satellites like most of the others.)

Some of the commercial stations manage to at least /mention/ their
callsign and city of license in the same sentence, if not always in
the standard order, as evidenced by:
<http://radio.lcs.mit.edu/radio/sounds/chom.au>
<http://radio.lcs.mit.edu/radio/sounds/cfqr.au>
<http://radio.lcs.mit.edu/radio/sounds/ciez.au>
I have also heard, but not recorded, American-style legal IDs on the
late CJSB, CKOI, and CJAD just to name a few.

Richard Frith (au385@freenet.carleton.ca) wrote:
: I have read that a station in Seattle (AM 1250) debuted a format called
: KidStar in 1993. They planned to offer it to stations in other U.S.
: markets. Does anyone know if the format is still on the air in Seattle or
: in other areas?

It is currently on our AM (1220) in Palo Alto.

: Is children's radio successful in attracting audiences and revenues?

Good question. It just started in November. We hear a couple of ads
but they mainly push their IVR system. I belive they sell data and
sponsorships with the IVR.

The other problem that they run into is selling over the air ads when
most of the buyers look at 12+ or more like 25-54 numbers. Arbitron
doesn't count a lot of their audience. The IVR is a way to track
listenership via PINs assigned to callers (kids).

: Is it exclusively heard on AM or are there any FM stations
: offering the format.

Just AM right now. I don't see why it couldn't be FM too. They are
looking to LMA licenses. AM is not as profitable right now, so the
properties are more likely to be up for this sort of arrangment.

: Any information about these questions or simply
: some impressions about what the format sounds like would be appreciated.

It is a really hip format. I was thinking it would be a bit too
"Disney", but they put some amazing music on (Rock Lobster by the
B-52s... wink wink...)

Source record: 26985

Happenings in the #40 market:

*First,a bunch of corrections:
-On the Edward Tucholka obit:Sattler's was at 999 Broadway,_not_ 998.
-On WQBK/WQBJ:'QBJ is at 103.5,while WQBK is at 103.9.
-As for WXRL/WWKB:The time/temp thing is being done at 'XRL,not 'KB.
(The observation,however,stands.) Also,it's gone to 2 records & liner in middays,the strongest daypart. Scott Cleveland voluntary left that part to head to night duty,which is where all the canned programming is done(including a live simulcast of WGRZ(ch.2)'s 6pm news).
-Re WRCD:Scott Fybush wrote that he hoped that George Kimble was referring to the town on Honeoye in Ontario County,and not the village of Honeoye Falls-'RCD's city of license. Also,whatever format they're using (satellite NAC w/ live assists),it's not SW Net.'s Smooth FM. And,the CP for WCGR has been pending for a number of years-back to 1990,at least. Technically,they don't share time w/CBE in Windsor,but they do have to be off the air at sunset to protect CBE's night pattern. Finally,Auburn's WALL is legally WLLW(and he suspected they're ducking the calls)-WALL is licensed to a station in Middletown.
The only response I can give is that of Dr.Ninestein of the animated Terrahawks:"Flaming thunderballs!"

*Dave May,who had been handling traffic duties at WBEN(NewsTalk 930)for a number of years-either in the air or on the ground-was relieved of his duties on Thursday in what can be best described as a cost-cutting move. The 58-year-old May,who was at 'BEN since 1976,didn't know he'd lost his job until after he finished up work on Tuesday. WBEN officals confirmed yesterday that May was no longer employed there,but had no comment. May did a number of jobs in his 2 decades at 'BEN:engineer,traffic reporter(which he started in its copter in 1978 and ended in 1993),executive producer of the Bills broadcasts,hosting a mid-morning talk show for a year,and commentaries for Newsday at Noon. Insofar as cost cutting,May said he took a 22% cut in his pay last year to stay there.(The story,by Alan Pergament & Tony Violanti in today's Buffalo News,said that he was "the best-known traffic reporter in local radio history." Have they forgotten Jack Sharpe,who scanned the skies for many years at WEBR before getting into local politics?) May added that he'd still like to work in the area.
Also going:Barry Lillis,weekend weathercaster for WGRZ(ch.2). He resigned Sunday amid speculation that the Argyle-owned station is planning to emphasize weather and add a meterologist to its staff. In a staff memo,GM Eric Land said that Lillis was pursuing other interests,"including his pastoral work."(He became a minister for a non-denominational church 2 years ago,and visits hospitals & prisons-as well as doing weddings. Lillis said he's planning on building an all-faith church in Niagara Falls in the near future.) Land added that Lillis wanted no fanfare in his departure. This was

Lillis' 2nd tour of duty at ch.2:he worked as its weathercaster from the late 70's until the early 80's,then returned a few years later in a variety of roles(reporter,weathercaster,and host of the late-night movie/comedy show The Cat's Pajamas).

*Speaking of WQBK:it's debuted a Web site. Point your URL to:

http://www.wqbk.com/

WMJQ(Q 102)had a test Web page at a health expo this week,but it is not as yet up & running officially.

*WCMF(990,Rochester,sports;SportsRadio 990)will be one of 12 stations airing the AHL All-Star Game tonight(1/16),with Hershey Bears play-by-play voice Dave Mishkin handling the call. The skills competition will have Mishkin teaming up with Amerks voice Don Stevens,which aired last night on SportsChannel N.Y.

*Rogers Broadcasting,owners of Toronto's CFTR(680 News),may be looking to put another all-news station in Canada. A tipster north of the border tells me that 680's news director is heading out to Vancouver tomorrow for a month to oversee a format change at CKWX(1310;country). The new format is expected to be all-news,and based in large part on what 680 News does.

*Staying north of the border:CITY-TV(ch.57;ind.)-part of the ChumCity group-filed 3 applications for cable licenses from the CRTC over the weekend. These are among a number of application filed at the CRTC before the Friday deadline. CITY filed for:

-Pulse24:a round the clock news channel covering southern Ontario (much like New York 1,News 12 Long Island,and Rochester's R News,among others)
-MuchmoreMusic:an adult-geared music video channel(think VH-1)
-MusicMax:same as above,but in French.

This would give the group a near-monopoly on music channels in Canada, were it not for NCN(a country-music network). They already own MuchMusic and its French counterpart,MusiquePlus.

(c)1996. To fellow reporters: Feel free to use,but please cite Airwaves/ r.r.b.as the source. It's a matter of courtesy,you see...

WSYW-FM DISMISSES TWO; TWO MORE LEAVE
Two employees of classical WSYW-FM received a pink slip as their Christmas gift as the station tightened its belt. Meanwhile, two other employees left for other opportunities. General Manager Linna Caldemone, Operations Manager Dan Jensen, an account executive, and a public relations representative, are no longer with the station. New General Manager Greg Lhamon, who works in the St. Louis offices of WSYW's owner, Continental Broadcast Group, says that no further staff cuts are planned.

WXTC-FM ENTERS INTO LMA; CHANGES FORMAT
Easy-listening WXTC-FM entered into an LMA last week with urban WTLC-FM and soul/oldies WTLC-AM. On Monday, WXTC changed its format, taking over the soul/oldies programming from WTLC-AM. WTLC-AM, meanwhile, is now programming "black gospel". Indianapolis is left with no easy-listening outlet. WTPI-FM, with its light-AC programming, may pick up some of WXTC's former listeners.

As promised, Steve Shannon and D.C. Chymes from WKBQ-FM are taking to the air in other markets from their St. Louis base.

Monday (Jan. 15), Steve and D.C.'s first affiliate, KCMQ(FM) in Columbia, Missouri, began broadcasting their morning show. KCMQ and WKBQ are both owned by Zimmer Broadcasting.

There is speculation that a Kansas City station may pick up the show soon. If that were to happen, it would be the first syndicated morning show to crack the cautious Kansas City market.

Most likely candidates are KISF, which just started yet another morning show, or KCFX, which has been known to pull off surprise moves from a position of strength. Last year, it was reported that KCFX was considering broadcasting the Bob and Tom show out of Indianapolis, but the 70s-rocker later denied the reports.

****

Meantime, KCMQ's surprise switchover to a youth-oriented rock format on New Year's Eve is giving other stations in the Mid-Missouri market something to ruminate about.

The move leaves Zimmer's co-owned KCLR(FM), with 26+ shares in Columbia's last Arbitron survey, as the only country station based in Columbia.

It's known that at least one Columbia broadcaster has been holding strategy
sessions with an eye toward a format change to country. The concern there is that Mexico's KWWR(FM), a longtime country station with a local-quality 100,000-watt signal covering most of Columbia's home county, might shift away from its rural base and go after Columbia listeners and advertising dollars.

As well, last year KATI(FM) upgraded to 50,000 watts, giving it a signal readily heard in Columbia, but "Kat Country" is based across the Missouri River in Jefferson City. While Columbia and Jefferson City comprise a combined television market; in radio, the markets (and listening habits) are still separate.

No moves are expected immediately; however, if album-alternative KBXR(FM) is still struggling for listener and advertising acceptance after this year's Arbitrons, it might be the most logical candidate for a switch later in the year.

Power FM in Southampton, UK, used to run beeps at the top of the hour - but since they were part of the "news out" jingle, coming off cart (started by the jock) they were

I haven't been down there for a few years, so I don't know if they still do it. (It was good fun though - start newsread at 58:30, finish at 59:40, do weather until 59:53 at which point the 7 second news out was punched. This left 7 seconds to throw those scripts away and on the dot of 00:00, start reading a more relaxed, 3 minute bulletin for the other three services coming from the same building. Happy memories...)

Cheers,

The Arbitron Company does not list non-commercial stations in its ratings reports. However, Accuratings does. In Boston the number one station among adults 25 to 54, according to Accuratings, is Boston University's non-commercial WBUR(FM). I find it quite ironic that this demo so coveted by the ad agencies should be dominated by a station that can't run commercials.

Donald D Forsling wrote the quoted material below:

" But if a regular
" public station claimed to be ranked, say, number six in the market in some
" Arbitron category, I would presume that they had taken their numbers for
" that category and plugged themselves into the book (in concept, not in fact)
" for the market at the appropriate slot.

While a non-commercial station can truly by #6 (or in the case of KQED-FM
in San Francisco, sometimes as high as #3) they can *not* rank themselves
alongside the commercial Arbitron numbers. Arbitron is designed for
commercial broadcasters who don't want to see non-commercial stations
included in the listings. So, when a non-commercial station can
rightfully claim to be #3 or #6, they are prevented from showing
underwriters the Arbitron book. They can only show their own numbers or
those of other non-commercial stations and hope the client also has
access to an Arbitron book.

A look at the advisory board on the inside of the back cover of the
Arbitron book shows why this is so -- it's all commercial stations, and
big ones, too. A ABC-owned KGO doesn't want clients to know that they
can get a better bargain at KQED.

The new morning guy at Eagle is Gary Craig from WKSS Hartford. Craig was at WTIC-FM Hartford for years. His numbers fell, the station let him go, Kiss picked-up him, and Craig picked-up the ratings. American Radio Systems, owner of WEGQ and WZMX (Hartford), hired Gary. He starts on 1/22. SPecu;ation is he will be simulcast on WTIC-FM when/if ARS takes over the station pending the outcome of the Telecommunications Bill. WZMX morning man Sebastian apparently was promised a simulcast on The Eagle. He called The Eagle live on-the-air on 1/9 only to be told by a salesperon that the Craig announcement was made minutes before his call. Sebastian spent the remainder of Tuesday's show and all of Wednesday's program trashing ARS management.

I would call expansion of ownership limits a disaster for the First Amendment. I got my start with channel 5 about 10 years ago. Today, the Regulatory Fee alone would have been a substantial barrier to entry. Now they will allow multiple TV station ownership. (De facto it is already allowed via LMAs).

As I told Senator Ted, I'd be happy to file for 40 new AM stations in Kodiak, and swamp all political thought with my ideas! Just let me own an unlimited number of staitons!

And a few days later, the conference report cam out that would prevent me from doing that.

HO>We are having severe problems with the theft of our
HO>books by station employees. We would appreciate
HO>input from anyone.

HO>Someone *please* tell us what we can do about this ASAP.

Kim,
There really isn't anything you can do about it. If a station has this problem, it's up to them to solve it. In a sense, it's a good thing as well as a bad thing. At least the staff reads. Most producers won't read - or couldn't possibly read - every book that crosses their desk. At WOR, we get so many books that our collection rivals the New York Public Library. Every quack with a new puffed air diet wants air time, so every personality gets a copy of the book. We have 19 shows. That's 19 of each book.

The most secure approach would be to send them to an interested producer at home. However, few will be willing to give their home address to a publicist. No one even wants to admit that they know PR people, let alone give them home access.

I guess the safest way is to let the producer know it's coming. If you send it unannounced, like most do, it'll get piled in a pile and sit. The longer it sits, the more vulnerable it'll be.

578. Puget Sounds

Newsgroup: rec.radio.broadcasting
Date: 1996-01-19 00:00:00 UTC
From: Barry Mishkind <barry@broadcast.net>
Message-ID: <4dp4m8$jqo@vixen.cso.uiuc.edu>
Source record: 26903

Those of you who have interest in history of broadcasting, especially in the Washington State area, will be quite interested to learn about "Puget Sounds," by David Richardson.

Written with an emphasis on the start of broadcasting in the NW, Puget Sounds contains a lot of information and pictures from the early days. Richardson is retired from KVOS, among other places, and interviewed a lot of folk with whom he worked.

One of the best parts of this is that the book is not expensive. Dave repurchased them after the publisher went bust, and is selling them out of his spare room for $14.95, plus $2 for shipping (It cost him $2.25 to ship mine).

If you have a library of books on radio history (Yes, TV is covered, too), or are starting one, this is a "must have" at only $16.95.

I can heartily recommend this one to you.

To get "Puget Sounds", send a check or money order for $16.95 to:

David Richardson
Rt 1 Box 81
Eastsound, WA 98245-0081

You might want to tell him I sent you. I spoke to him on the phone recently, and he is a very nice fellow indeed. And, if you do get it, let me know what you think ... I come across some good books on history from time to time, and would be happy to report on more, if anyone wants.

Eclectic Engineer Recommended.

Here are the following URLs for San Diego talk stations:

KSDO -- www.ksdoradio.com
"" -- www.rogerhedgecock.com
KFMB -- www.cts.com/browse/comptalk/kfmb.html
XTRA -- www..xtrasports.com

A little background:

KSDO is San Diego's number one rated news/talk station. Their strong points are Rush Limbaugh, local talker Roger Hedgecock and A.M. and P.M. drive news blocks.

KFMB is all talk, mostly local programming with the exception of Dr. Laura, tape delayed from the day before. Popular shows on KFMB are Dr. Laura, Hudson & Bauer and the Ted Leitner Radio Show.

XTRA is all sportstalk. Popular shows are "Hacksaw" Hamilton, Jim Rome and their morning show.

Other San Diego stations' URLs can be found at:
www.geopages.com/RodeoDrive/1102/

It may not be exactly what you're looking for but I hope it helps.

>
>Maybe it should be called "postmodern rock"...

Actually, the term "modern rock" predates "alternative." Most of what you hear today is referred to as "post-modern" since the modern stuff came out in the mid- to late '80s.

New Rock seems to be used an awful lot, but that's a little moronic. Anything new by a rock band is - by definition - new rock.

Thankfully, we seem to be getting back to plain ol' rock. Ask your listeners what kind of music they dig. They won't usually use many of the phrases we do in the industry. For the most part, they like rock music. Period. That's anything and everything from Hootie to Presidents, Nirvana to Journey.

I'd say that predicting burnout for Classic Rock may be a little premature.
As far as Boston is concerned, Classic Rock is very popular (consistently #1
or 2 in our target demos).

>And that's the problem. Repetition works in CHR, new rock, and country
>formats where new product is coming in. Well, in an oldies or classic rock
>format, by definition, no new product is coming in. Oldies stations get

>Shakey's Pizza kind of look. Classic rock stations don't have this option
>in most cases; besides, most have opted for a somnolent presentation
>reminiscent of the mainline Protestant church services of my childhood.

I agree that a certain amount of repetition is necessary in the Classic Rock
format but I also believe that one can creatively program interesting features
such as "Lost Classics" and "Yesterday and Today" segments with great success.
And while we don't have the same amount of product coming in from record
labels as an Alternative station would, we can still find fresh ways to
present Classic Rock artists -- especially with so many still producing and
touring today.

>So anyway. I have always wondered what would happen once people my age
>stopped buying CDs to replace the LPs they had bought in college. Maybe
>we're now finding out.
>--

Don't forget that an entire generation of young adults still purchase Classic
Rock CDs. I think you'll find that the Classic Rock format, if programmed
well, will survive the upheavals in the industry just fine, perhaps better
than many of the Alternative stations popping out of the woodwork today!

Hearing today of a sad news story about a ditched car, minus sriver, found in the sub-zero weather here in the midwest, I was reminded of a winter nearly 20 years ago, out in prairie territory. There had been so many storms, I packed a lunch for the signoff shift, and sure enough the studios (out of town at xmttr site) were snowed in within hours.
By the next day, the schools were closed, and roads were so bad, not only had plows been called off, but the state patrol warned that if you were fool enough to venture out, they couldn't even send snowmobiles to rescue you. The officials called us to tell of one traveler who hadn't arrived at his destination, and the marathon jock-a-thon the next couple days (I think the total staff on hand was three of us) included frequent pleas to stay with a snowbound vehicle rather than try to walk.
Later, the missing traveler stopped by the station to thank us (me, specifically, having been on the board most of the time) because he was ready to walk until hearing our warnings. After getting found and dug out the next day, he found there wasn't a heated building within miles of his location, and he surely would have frozen if he'd tried to walk from his truck.
I was home in bed, and missed his visit.
This is what radio is for.

MNYDRC@aol.com wrote:

In another 20 years
>classic rock will definitely be a format similar to big band...

Some professionals here on this board feel that music is much like fashion; styles go in and out of favor on a cyclical basis, if they ever come back to favor at all. The only reason that classic rock is dead/dying/out of favor is due to the fatal flaw in most of radio programming - SATURATION.

When you saturate a market with the same programming ad nauseum, people get burned out on it. I cringe when I hear a Boston song, due to the over-playing of their catalog on classic rock radio. But Boston puts out (sometimes) good product. Programmers are either looking for the next big thing, or are returning to the tried-and-true, only to kill off the golden goose by saturating the airwaves. If stations increased their playlists and became more creative (read: risk-taking), then they would find that people wouldn't complain about hearing something too often.

Good music is good music, period. It is always good; the times don't change the music. Exposure to music is what builds musical tastes in people, and the prevailing attitude towards exposure is to introduce a tune, put it into heavy rotation, then abandon it once the newness has worn off of the tune. If that method were used years ago, songs such as "Space Oddity" by David Bowie and "Nights in White Satin" by the Moody Blues would never have been hits, since it took at least three releases of each song before each one hit it big on the charts.

Why is it that on jazz stations the tunes are from all eras, not just the popular tunes of the day or the new releases? Because the music is GOOD. It has not been over-saturated due to the nature of the format (not a mass market by any means). The tunes haven't been worn out in the minds of the listeners, and the programming is generally fresh and exciting on many jazz stations, not because jazz stations are inherently innovative, but because the playlist (if one exists) is large enough to prevent over-saturation.

The big complaint with classic rock is that we've heard the tunes played too often for too long. You can't tell me that those tunes are the ONLY tunes worthy of being classified as classic rock and that there is nothing else to add to the playlists. My suggestion is to open up the vault (or wallet) and select something new for the audience. It can be done, because I play tunes at home that are every bit as good as what is

currently played, and the tunes are generally 20 years old or older. And nothing I play at home gets airplay on the classic rock station in my town (KZEP 104.5 FM, San Antonio). Not surprising, when the station admits to having a "whopping" 500 CDs in their library.

Variety is the spice of life. Spice up the airwaves!

Regarding your questions about the Vigilante processor, I might have some answers for you.

> Is it just me or is The Vigilante always producing lots of distortion
> even when its settings are in the most soft position?

Depending on the setting of the threshold level pots, and the amount of clipping that you are using, this device can be quite lean, or quite mean as to the audio output.

Also, the Vigilante existed in two flavors, one with an internal distortion controlling clipper/low pass filter, and another version that relied on the final limiting.clipping being provided by another unit. (Usually an Optimod 8100.) The adjustment of either the internal clipper, or the Optimod clipper, depending on unit version, will have affect on the quality/distortion tradeoff.

Another area that will affect the sound is the release time controls. This unit has a master release time pot, as well as individual time constants for the multibands. These need to be set accordingly.

So, there are a number of parameters that can make this device operate very slow and gentle, or fast and mean.

>What problems did you encounter with this processor? And what benefits
>did it have compared to its competition and the Unity 2000i also of
>Cutting Edge.

Well, as the designer of the Vigilante, I personally never encountered any problems. (humor intended!) But the differences between the Vigilante and the Unity 2000i and considerable. The Unity is a complete processing system consisting of multiband AGC, limiting, clipping, and stereo generator. Whereas the Vigilante is a multiband limiter only! It requires an agc in front of it, or it will sound inconsistent and "tight."

There were some of the Vigilante features that influenced the design of the Unity, but essentially they are two completely different products.

I truly hope that I've answered your questions, and for the rest of the group, please understand that I'm only trying to offer information here, not trying to solicit!

p.s. The Vigilante was developed on Z-100 NYC when I was Chief Engineer there!

As of 12/1/95, no FCC operator license is required to operate, install, or maintain any broadcast equipment. A General Radiotelephone license MAY be required to work on some nonbroadcast radio equipment a station may have (two way, etc.). At this point the FCC is not involved in determining the qualifications of those working in the broadcast industry, leaving that determination to station licensees. I suggest looking into certification by the Society of Broadcast Engineers. You can find out about it at http://www.sbe.org/

Harold

I have heard WJDM several times on 1660 from Champaign, Illinois
on several receivers. Signal strenth is not all that strong
(about S3 to S5 on a DX-440 and Sony 2010) but is still somewhat
listenable here when the noise level is low.
I have also read in Radio World that they have had reports as
far west as Oregon in DX'ing WJDM. They also report that the
1660 transmitter is diplexed into their 1530 110 foot self suporting
tower. I would expect that this is a compromise situation for
both stations. It will be interesting to see signal strenth and
skywave propigation from a station using a 5/8 wave antenna system.

33. KLVA(105.5)Christian 0.0--->0.3
(tie)KUKQ(1060)Alternative 0.0--->0.3

SUMMARY:

KTAR maintains its dominance...this book reflects the end of the
OJ trial, but the station has come miles in the last year and a half
in terms of on-air polish and in-market promotion.
A nice book for KKFR...possibly its best ever. Rumor has it there
will be big signal competition and soon.

This was also KFYI's best book in some time...look for that number
to improve on Limbaugh alone as the election campaigns heat up.
A crusher of a book for KNIX...country competitor KMLE lost
nearly half a point but managed to slide ahead of KNIX by 0.1 as 'NIX
drops nearly 2.
The other big loss is KUPD...very nearly a point and a half.
The big win of the book belongs to KYOT...more than a point and
a half jump.
AC remains a tight race...the arrival of new GM Paul Talbot has
intensified talk that KVRY will morph into something else...leaving
KKLT and KESZ, now only 0.3 apart to duke it out for those listeners.
KHTC seems to have flatlined at a 2.5 with its 70's format, but
word is Bonneville isn't about to pull the plug and will allow the
station to fix what's wrong.
The numbers show KEDJ dropping 0.3...but its simulcast debut
on KHOT took that station from zip to 0.5...so it's actually an 0.2
net gain for the Edge.
A good jump for MOR KTWC...mostly attributable to its
all-Christmas format from Thanksgiving till Dec. 26.
This may be the largest number of stations to get a
measurable rating in years....34 of the 50 signals in the market.

FORMAT RANKINGS: (based on 12+AQH as above)

1. News/Talk 14.8
2. Country 12.3
3. AC 9.2
4. AOR 8.3
5. CHR 7.0
6. Adult Std. 5.8
7. Alternative 5.7
8. Oldies 4.5
9. Jazz 4.1
10.Classic Rock 3.8
11.70's 2.5
12.Spanish 2.3
13.MOR 2.1
14.Urban 1.1
15.Sportstalk 0.8
16.Christian 0.7
17.EZ Listening 0.6

GROUP OWNERSHIP TOTALS(based on 12+AQH as above)

1. The Broadcast Group(KKFR/KFYI) 13.2
(tie)Sundance Broadcasting(KOY/KYOT/KZON/KISO) 13.2
3. Pulitzer(KTAR/KKLT) 11.5
4. Sandusky(KUPD/KDKB/KUKQ) 8.6
5. Buck Owens(KNIX/KCWW) 6.5
6. MAC America(KESZ/KTWC) 5.3
7. Compass(KOOL AM/FM) 4.5

8. Citicasters(KSLX/KOPA) 3.8
9. New Century(KEDJ/KGME/KHOT) 3.5
10.Bonneville(KHTC, KIDR) 2.5

Notes: MAC America is awaiting FCC approval for transfer of ownership of KTWC from Newmountain II to MAC America. MAC America is providing sales and engineering support to KTWC under a modified LMA.
Compass is awaiting FCC approval of its sale to PAR Broadcasting.
As said before, '96 could be the year of the duopoly in this market. Pulitzer is already looking for an extra AM to handle sports overflow from KTAR...but it needs a good signal. Two likely candidates: KOOL-AM and KCCF, which is expected to sign on at 1100 on the dial in March.
The Broadcast Group, Buck Owens, MAC America, Citicasters and Bonneville(to say nothing of new Chancellor acquisition KMLE, a stand-alone FM) all have room on their licenses and in their studios for new partners.

I'm pretty sure WGN in Chicago still does. I don't listen to the station all that much except for Cub games, but I know I always hear the tone during those. I don't know if it's the exact same tone they've used over the years, but I do know that when I hear it, I can remember very distinctly hearing the tone some 25 or 30 years ago -- again, during ballgames -- while riding in the back seat of my old man's Dodge station wagon as a very little kid. It's kind of a nice tradition, I think.

When I jocked at CHWK Chilliwack in 1975, our top-hour
tone was not automatic. We had to press a button on
our board that emitted a tone similar to one you
hear when testing equipment. Sometimes it would get
stuck, but generally the connection was dirty and
the tone would keep cutting out.

Management didn't think my jokes about our crappy
time-tone were very funny.

[Originally sent by me to Jim Grey]

Jim,

Thanks for mentioning the LMA with WXTZ not WXTC. The station never had more than a 2 share. It had a whopping .9 in 25-54 Fall95ARB. However, WXTZ did rank no. 4 35+ in Hamilton county. EZ formats are not varying well...these days.

The deal also involved a purchase agreement after the license renewal in March.

The story is that with WTLC AM and FM shares along with the proven solid gold soul format that was on the AM (2.4 Share)..the trombo will produce double digit shares.

Also it seems that Black sampling was very low the last 4 weeks of the Fall ARB...approximately (17 to 24% deficient). Explains drop in all of the urban outlets except WTLC AM. Hoosier.. now a 4.3 radio station and even more disastrous is that WGGR(The touch) after tv,newspaper, billboards had a .9 share.

All the best...

Paul C. Major

From: Airchecks@aol.com
Message-ID: <4drp4f$emi@vixen.cso.uiuc.edu>
Source record: 26855

WXRK-92.3 NYC's switch from classic rock to alternative could be
a positive, if they do things right. IMHO doing things right means that
they only air songs that fit the 'alternative' description, however broad
that has become.

Despite the number of stations doing some form of alternative, there
has never been a full powered NYC station true to the format. (In 1983
there were rumors that 106.7 would become WNUU and "new wave"
but that never happened).

Currently, in the New York market playing some alternative there's:

WNEW-102.7 with a mix of alternative currents, classic new wave, and
mainstream album rock currents and classics (Tom Petty, Pete Townshend, etc)

WHTZ-100.3 playing mostly current/recurrent alternative tracks, some classic
new wave, and an occasional HUGE top 40 hit, such as Coolio/Gangsta's
Paradise

WAXQ-104.3, playing some of the hot alternative bands (Bush, Pearl Jam,
Smash-
ing Pumpkins, Live, Toadies) but also some other hard rock currents (Ozzy
Osbourne
for example) as well as some classic rock (Def Leppard/Photograph for
example).

There's also WDRE-92.7/98.5 and WRGX-107.1, "class A" signals licensed to
towns near New York City that are full time in the format but have limited
coverage
and cannot be considered major contenders for the entire NY radio market; the
same can be said for WHTG-FM-106.3 Eatontown NJ whose signal does reach
parts of NYC (Brooklyn, Staten Island) but not the North suburbs.

Hopefully WXRK will play the entire spectrum of alternative, including the
ethereal sounds of bands like the Cocteau Twins, rather than just trying to
"out-Bush" the other players in the format.

If anyone's interested I have tape of the Howard Stern show from the day
that WXRK became alternative (1/5/96).

WEEI, back in the Good Ol' Days when it was on 590 AM and was an all-news
CBS Radio net affiliate, did the same thing. The fourth BONG! was the CBS
radio (and back then TV) network top-of-hour tone all stations on the net
used to broadcast. (That tone is still on the radio network. I've heard
it on CBS radio newscasts as recently as last december in San Francisco --
KCBS AM.)

In fact, I use a recording of the CBS chime as my top-of-the-hour chime on
my Macintosh. I also use the "Net Alert" chirp or click sound as my
system beep.

Perhaps it's living in the past, but I'm still fond of those tones...

In reading about stations that still have top of the hour beeps, I am reminded of my old alma mater, WASH-FM (97.1) in Washington. When Metromedia owned the station, and its studios/offices were in the basement of the WTTG-TV (5) building,
the station had a top of the hour "tone". Jocks were expected to hit the tone at the top of the hour for newscasts in drive and middays, and jock-read headlines overnights ("Metromedia Stereo, WASH Washington, its 9 o'clock." <BEEEP>)
The tone generator sat in Master Control, adjacent to the air and production studios...but interestingly enough, the tone was a source on one of the pots of the control boards, and the tone had to be potted up to be put on the air. Many of the late-nite and overnight jocks ignored the tone, simply doing the ID out of their last song at the top of the hour and reading the headlines from off the wires.

And so it goes...

I may have mentioned this before, but a small-market station at which
I worked a few years back (calls will be omitted to protect the
guilty :-) ran a top of the hour tone...that wasn't tied to any
stable time source, just a (very) cheap digital clock. Sometimes
the tone ran at 00:00...but just as often at 00:10, or 59:45, or
58:20!

At my present employer, WBZ, our tone is controlled by a WWV
receiver. It's heard every hour of every day, with one exception:
It's turned off for the 12 noon hour on the third Monday of April.
That's Patriots Day, and if we left the tone on, it would obliterate
the starting gun of the Boston Marathon. There are traditions,
and then there are TRADITIONS, you see.

Whoa! Chris...dude...drop a 'lude! And the attitude while you're at it! I guarantee that if you were in power today, you'd be out of it tomorrow with this philosophy. I WILL decide how each song - IF each song will fit on my radio station because that's my responsibility, and I'm charged with creating a saleable air product, not with selling records.

If the album version is worth playing in it's entirety, I'll play it. If it's excessive, I won't. I'll trim the fat and and deliver the prime cut everytime. That's why more people listen to my station than that "Classic Rock" album-version-only station across the street.

And also much the same way that WBZ 1030 AM in Boston puts the tone into the audio downstream of all the audio processing short of the line to the transmitter itself. Scott Fybush, WBZ's chief engineer, posted something to this group about that when I asked the question about time tones about a year ago.

What's entertaining is that, if they are "on schedule", the tone happens about 5 to 10 seconds into the top-of the hour sounder: "<Bah-dah-dah-dum> While you're driving your car, we're driving 50,000 watts of power. News all day, every day. Newsradio 1030, WBZ Boston <tone> <Ba-dah-ba-dummm>..." I guess this is so that the start of the news itself is very near the top of the hour, rather than 15 seconds into it. Slightly different than the CBS approach of starting at 00:00:01 after the top of the hour (enough for the BONG and its reverb to die out, I guess...)

: long it takes to get one and how I get one.

: The reason I'm asking is because I am looking in the paper for a job in
: the communications/broadcasting field and I keep seeing ads that say,
: "FCC license preferred."

: My background consists of audio engineering/production for broadcast.

: Thanks for any help,

: -Steve

It means that they want someone who has been tested by the FCC in matters of
Electronics knowledge.
I was under the assumption that the FCC stopped doing this, and that the
General Class License was discontinued... gone the way of the Third, Second
and First Classes.
If this is true, you'll need to apply for membership and take an SBE
Certification Course - Society of Broadcast Engineers.
The license USED to allowed you to work in transmitting equipment, but now,
anyone that the station owner says is okay, can do the work.

>From the Nashville Tennessean:

Country remains king in Nashville, though WSIX's Gerry House lost a couple of ratings points. He is still twice as high as closest competitors Karl and Cathy on WSM-FM. Who should be nervous? Y-107's Danny Wright and Brian Shook, who are up for contract renewal, dropped from 5.1 to 4.7 (eighth place). That's despite the station's gigantic promotion, giving listener's thousands in cash through a mock lottery. In the key 18-34 demographic, House dominated mornings while Big Dave and The Dook at 103 KDF's modern rock outlet held down the number two spot.

Rockin' Country 102.9, which has been using a cow mascot, has decided to change the station's name to Moo 102.

Oldies 96 (WRMX) morning jock Rhett Walker is searching for a sidekick. The ad says females are especially encouraged to apply.

The Nashville actors whose voices are heard on the Budweiser frog ads say they will return for a fourth commercial this Super Bowl. Bud (Tom Woodard), Weis (Ronnie Brooks) and Errrr (Brian Steckler) say this spot will have all three frogs with their tongues stuck to a frozen can of Bud after an unexpected blizzard hits the bayou.

628. Pop Music/top 15 for 1/17/96

Newsgroup: rec.radio.broadcasting
Date: 1996-01-20 00:00:00 UTC
From: itcmark@ubvms.cc.buffalo.edu
Message-ID: <4drp4n$en1@vixen.cso.uiuc.edu>
Source record: 26872

The great thing about the internet: anyone and everyone "can" use it.

I am a college student with a love of new pop, top 40, rnb, dance,
rap, rock, alternative music and I choose my favorite top 15
to post here in this forum where programmers will notice.

SO, for 1/17/96, here's Mark Weber's pop music-top 15

TW LW Artist Song Title
-- -- ------ ----------
1 1 Terry Ellis Where Ever You Are
2 4 Tina Turner Goldeneye
3 14 Selena I Could Fall In Love/Dreaming of You
4 - Presidents of USA Lump
5 - Hootie and B-Fish Time
6 2 Coolio Gangsta's Paradise
7 - Every..butthegirl Missing (I Miss You)
8 9 La Bouche Be My Lover
9 5 Blues Traveler Hook
10 10 Ace of Base Beautiful Life
11 - Paula Abdul Ain't Never Gonna Give You Up
12 3 Michael Jackson Earth Song
13 12 Fun Factory Celebration (By The Sea)
14 8 Enya Anywhere Is
15 - Shaggy Boombastic

5 new adds in the 2nd edition of the popmusictop15.

Terry Ellis holds at #1. Selena sounds like early Madonna
on her new hit "Dreaming of You," and the hauntingly
beautiful "I Could Fall in Love" strengthens her recurrent appeal.

What's Hot: Presidents "Lump" #4, Hootie "Time" #5, Everything
but the girl "Missing" #7, Paula Abdul "ANGGYU" #11

What's Not (Off the chart from last week):
Dave Matthews Band "Ants Marching"
Live "All Over You"
Real McCoy "Automatic Lover"
Beatles "Free As A Bird"
LL Cool J "Hey Lover"

You are probably wondering, where is Mariah Carey?? I love Mariah,
but "One Sweet Day," while it is #1 in Billboard, is overplayed
and played out.

Paula Abdul had some modest success with two singles off
"Head Over Heels," and now she teams with Color Me Badd
(remember when CMB and Boyz II Men were both "the" vocal
groups to be fans of, and now people say "Color Me WHO?")
so Ain't Never Gonna Give You Up is my pick of the week
for most interesting single to see if it will be a hit
or a miss!

Presidents of USA with "Lump" blast a lot of energy and
spark into this rocker with a great chorus.

Enya's "Anywhere Is," will work well at AC.

Shaggy's Boombastic is a hot recurrent- the rnb mix (like the
MTV video version) is better than the rock mix (as seen on
a tv commercial for dsih washing liquid?!) IMHO.

TWO DIVAS TO ADD TO YOUR PLAYLIST, whether you are AC, Urban, or top40:

Terry Ellis WHERE EVER YOU ARE
Tina Turner GOLDENEYE

Yes they were released a while ago, but let's remember, it took a year
before anyone paid attention to Sophie B Hawkins "As I Lay Me Down,"
and look how that did.

POP MUSIC- who can figure it out?

Thanks for reading.

[snip]

My first book came out last fall, and I've had problems with the books not even arrivng at their destinations! I'd suggest you place the book inside a separate envelope inside, seal the envelope, and write the producer's name on the outside. Make it look like the urgent, time-sensitive material it is.That may get the message across that the book is intended for someone specific at the station. At one station I was at years ago, if books came and weren't addressed specifically to a person, they had a tendency to either get tossed, or taken home by an interested party.

I suppose you can take the thefts as compliments - you must have a very good book! Still, I can understand the expense and frustration. Good luck!

The slogan thing should be used as a way to convey something about the content of your radio station. Clearly, listeners don't remember slogans any better than call letters. In fact, I believe most give dial position first. After all, that's how they find you.

Using a clever slogan can and should tell listeners what to expect on your station. Sunny 105 says very little. My competitor's Classic Rock Texas 102 says it all, if not sounding overly catchy. We use "Pure Rock 93 KBAT" and "97 Gold KQIP" in everything from the Legal ID to sweepers and liners. You hear it and you know who you're listening to, the dial position and what to expect when the music starts. (Okay...it is getting hard to determine what kind of rock you'll find anywhere, but at least they know it's rock of some variety.)

A couple of weeks ago a colleague gave me a hard copy of comments about WTIC-AM-FM-TV in Hartford prior to their sale by the Travelers Insurance Company (pre-1974.) I was epecially interested in their reminiscing, since I had worked there from 1963 until 1977 as a broadcast technician.

If any of those old-timers are still around, I'd be interested in communicating with them.

I was never aware of any specific requirement that the ID be spoken in English. The only language rules of which I was ever aware related to the keeping of logs. We had to keep them in English or in a language readily translatable into English.

I know of one station that used to keep the logs in braille for its blind announcers. The FCC was asked about this and responded that, since the braille was in English, there was no problem.

It doesn't seem improper for a station to identify in the language in which it is operating. And other-than-English IDs are apparently not uncommon during ethic programming. When I lived in New Orleans WNOE-FM broadcast Cajun for several hours on Sunday mornings. Everything was in french, including the IDs.

By using Arbitron's Maximiser software you can include all stations in rankers, etc. You can even do a reach and frequency run on a non comm if you are so inclined. I just pulled a run on the DC market this afternoon including the Public radio stations and WAMU, owned and operated by American University is ranked #1 in morni9ng drive among Men 35-54. This is during NPR's "Morning Edition". It is available on contrary to a prior post Arbitron has the raw data and does make it available to all subscribers to Maximiser.

Why should this surprise you, Rob? At least in the Boston area there is
WCRB holding down a respectable share in the commercial market. Who
knows where the station would be if it were not for the terms and
conditions of the ownership trust?

Here in Austin, the radio bands for many of us are 88.1 to 91.9, KMFA
(listener-supported classical), and KUT (local PBS) and KNCT (Killeen,
near DX for most of Austin), while the talkers and rockers fight over
the leavings.

There are still a few of us who would prefer to hear William Grant Still
over Hootie and the Blowfish. I have not lived in the Boston area for
several years, but don't ever recall hearing anything by Still on WCRB.

The question is not whether those of us who have tuned out from the
rock/country/talk stuff represent a market. It's whether anyone who is
selling anything really cares.

647. WPAT-FM to change 1/20/96

Newsgroup: rec.radio.broadcasting
Date: 1996-01-20 00:00:00 UTC
From: Airchecks@aol.com
Message-ID: <4drp52$eno@vixen.cso.uiuc.edu>
Source record: 26939

New York radio listeners are hearing another instance
of what I like to call a "vulture" spot
(like WRFM ran on WVNJ-FM right before the latter
became Z-100)

This heard in a stop set Thursday morning 1/18/96 on
WPAT-FM-93.1 (recently sold from Park to SBS, owners of
Spanish formatted WSKQ-FM-97.9):

"Hi This is Al Bernstein from 106.7 Lite FM.
WPAT will be changing format on Saturday January 20th.
This means that 93.1 FM will no longer feature soft
favorites. Now, the only place you'll be able to
hear soft favorites is on 106.7 Lite FM. The Best
Lite Music with no hard rock and few interruptions.
It sounds great all day long while you're working.
And, you can hear me right now, on 106.7 FM and
every weekday between 9 and noon.

To welcome you over to 106.7 Lite FM, we're gonna
give you a chance to win 500 bucks. Before noon today
on 106.7 FM, I'll play 'Stay' by Jackson Browne. When
you hear that song, call Lite FM at 1-800-222-1067.
If you're the 25th caller when the song ends,
you win five hundred dollars. It's that simple.
We wish our friends at WPAT a fond farewell, and we'd
like to welcome you as a listener to 106.7 Lite FM.
So turn us on, you're gonna love it."

In recent years WPAT-FM had evolved from easy listening
to a mix of EZL and soft AC to its present "soft hits
of the 80's and 90's" format.

A posting on the AOL Radio Board reports seeing a
"Suave 93.1" subway ad; my guess is, that's pronounced
"Suave noventa y tres".

This could mean that TWO NYC stations will have
changed format before the one most mentioned in
rumors: Evergreen's WYNY-103.5 and its country format.

648. WPAT Update

Newsgroup: rec.radio.broadcasting
Date: 1996-01-20 00:00:00 UTC
From: FFORTEJR@drew.edu
Message-ID: <4drp55$enr@vixen.cso.uiuc.edu>
Source record: 26940

As I was scanning the radio dial Friday, I heard an ad on 93.1FM (WPAT), and thought I had the wrong ststion for a minute. It seems that on the last day of WPAT's A/C format, lite-fm (106.7 WLTW, NYC) bought ad time on WPAT running a contest to invite listeners to try WLTW. When WLTW played Billy Joel's "Time to Remember," the 25th caller would wim $500.

About 1am Saturday when I checked, the station was in its Spanish format, playing softer music. They gave their ID in Spanish, and no call letters were said. Are they keeping WPAT, or are those changing also? They only

identified themselves as "Suave 93.1 FM" (in spanish).

In a message dated 96-01-19 17:01:49 EST, you write:

>The FCC licence is (if I understand it
>correctly) required for anyone who will be operating the transmitter
>switch, and also (maybe) for anyone who will be taking the meter readings
>every three hours (as in my case). For this class of licence, there is no
>test required. You simply fill out a form and mail it to the FCC with a
>payment. I am not sure what the payment is. $30, I think.

The old requirement that radio station "board operators" need an FCC third class restricted operators permit was abolished effective December 1, 1995. No longer do any station board ops who sign a transmitter log need any form of license. The old fee, BTW, was $45 before the rule was dropped. One other rule often misunderstood about operator licenses was the fact that if you were merely a board op who only did switching or announcing duties but did not sign the "operating log" (the transmitter log, not the program log), then you did not have to have any kind of license. The 3rd class permit was required only for operators who were in charge of the transmitter and signed that log. Tom McGinley CE WPGC AM/FM Wash. D.C. K7QA@aol.com

On Jan 19, 1996 22:07:01 in article <More NYC Radio changes>,
'ron@musicchoice.com, [Ron.Yurman]@wwa.com' wrote:

>WPAT-FM (93.1 FM) is promoting on the air that they will be flipping
format
>tonight at midnight, becoming Spanish formatted "Suave 93.1".

Well, it is a done deal. After the "Love Songs" segment, and its host
referring to WPAT as "one of America's great radio stations" all night,
WPAT operations manager Ken Mackenzie came on at 11:58PM and said a few
words thanking all of the on and off air talent. He then did a legal ID
and played the sweeper. The carrier and transmitter went dead for about 2
seconds. A female announcer then ID'd the station as WPAT-FM Paterson.
Then the el presidente of the Spanish Broadcasting System came on and gave
a speech in Spanish, then the "Suave" format began. All announcements are
made in Spanish, but they do play an English song every so often (Soft AC).
Sounds similar to WRMA-FM in Miami with their romantic Spanish format.

Does anyone know if the actual sale has been completed, or is this an LMA
pending the FCC approval?

WPAT (AM 930) is still playing the "Soft Favorites" format that was on the
FM with the same jocks. I guess they will still run music on the AM during
the day, with the syndicated talk and sports at night until that sale is
done.

>in most cases

I find your comments about repetition interesting. Our experience is that Oldies and Classic Rock stations that expand their playlists when they are already concerned about developing repition images actually end up exacerbating those images. It appears that listeners develop repetition images for stations not so much from when they play the same songs over and over, but when they play bad (translation: poor testing) songs over and over.

Hmmm. I always thought that the term "Clear Channel" meant that it was the
only station on that frequency. If this isn't the case, then what *does*
"Clear Channel" mean?

byrdman@ripco.com

[Moderator's Note: I'm sure that others will write volumes on this,
but the short answer is that Clear Channel is an anachronism. Theere
aren't any any more. The FCC started licensing secondary stations
(and even other primary stations) on the US clears some time ago.
Now-a-days Clear Channel refers to 50,000 watt stations that have
regional coverage. So now Clear Channels are regionals, regional
channels are locals and local channels are, basically, community
stations. I think it's sad. Others have differing opinions. Bill]

657. CNN on the radio

Newsgroup: rec.radio.broadcasting
Date: 1996-01-20 00:00:00 UTC
From: Lynn Gold <figmo@rahul.net>
Message-ID: <4drp3s$eld@vixen.cso.uiuc.edu>
Source record: 26949

In Digest #171, Lisa Wheeler asks:

> I'd like to know how many stations (with news departments)
>use pre-produced news features (AP, CNN, PR or government agency
>feeds) in their newscasts?. What makes you want to run these
>"outside" features...topic, production-quality, etc...? On that note,
>what makes you avoid them like the plague?

At KLIV, we simulcast CNN Headline News, inserting local traffic and weather four times an hour and local news (and sometimes sports) twice an hour.

Our clock looks something like this:

Weekdays:

:00-:13 CNN
:13-:14 Network Commercial
:14-:15 Local traffic & weather
:15-:19 CNN
:19-:21 Local news, traffic, weather
:21-:23 CNN sports
:23-:24 Local sports
:24-:30 Local news, traffic, weather, business, spots (2-3 mins)
:30-:43 CNN
:43-:44 Network Commercial
:44-:45 Local traffic & weather
:45-:49 CNN
:49-:51 Local news, traffic, weather
:51-:53 CNN sports
:53-:54 Local sports
:54-:00 Local news, traffic, weather, spots (2-3 mins)

Evenings and Weekends:

:00-:13 CNN
:13-:14 Network Commercial
:14-:15 Local traffic & weather
:15-:23 CNN
:23-:25 Local spots
:25-:30 Local news, traffic, weather, business
:30-:43 CNN
:43-:44 Network Commercial
:44-:45 Local traffic & weather
:45-:53 CNN
:53-:55 Local spots

:55-:00 Local news, traffic, weather

We try not to overlap stories with CNN. Thus, we rarely do sports on the weekend since CNN covers our local teams.

Hope that helps.

KE>I know JOX who don't listen to their own station because of short lists! An
KE>it doesn't matter what the format is, if you play the same off-the-rack song
KE>twice in a week, you're too short.

Keith,
We don't make our livings on Jocks listening to their own stations.
You're forgetting that a Jock is forced to listen much longer than a
normal listener will. My business is Talk Radio. If I listened only to
Talk, I'd have a very warped view of what the real world is like. I'd
be convinced that everyone hated everyone else and everyone was a rabid
right-wing superpatriot. Radio is entertainment, not a reflection of
the world. I'm forced to listen much longer and much closer than any
listener. I have to get away from it, periodically, to realize that
most people aren't like what we hear on the air.

Time spent listening, generally, is about 22 minutes. The
likelihood that I, as a listener, will hear the repetition in a format
is very slim. In fact, the opposite has often been true where listeners
complained that they didn't hear their favorites often enough because
their listening habits are sporadic. If I play something three times a
week, it's likely that a listener may not hear it even once. If it's
their favorite, they feel cheated.

I've done more than two decades of music radio. The hardest part
of a format to get a handle on is what the rotations should be. Just as
hard is realizing that we're not normal listeners.

Sean "Hollywood" Hamilton went from WHTZ-FM to KIIS-FM in Los Angeles in 1986 and stayed through 1992. After a hiatus, he went to KGGI-FM in Riverside (California) in late 1993 to do the morning drive. I heard that he recently quit KGGI and have no further information on his whereabouts. Hope that helps.

Jon...

First off, "The Fox That Rocks" was Diane Prior. ("Diane Chambers," I believe, was the character played by Shelley Long on "Cheers"!) Last I heard, when I ran into her a few years ago on the street of the small New Jersey town in which I live and her husband maintains his business, she was talking about doing some part time stuff on the air for a couple of stations.

As for Hollywood, he is currently a "pro on the loose," having left the employ of KGGI/Riverside not too long ago. His former sidekick, Dr. George Brothers, is still leading the morning show there along with newswoman Samantha Santiago.

Dr. Christopher Reed (a/k/a Dr. Chuck Crane, the station's first operations manager and mid-day DJ) has shown up in a number of places since leaving the Z. I think he returned to Tampa for a while (he'd come with Shannon and Hollywood from Q-105).

Y'know, sometimes it's hard to believe that I'm gone from there almost nine years m'self!

ZO>You'd think we would have learned by watching newspapers go through this,
ZO>wouldn't you? I guess it's true: radio people are gluttons for
ZO>punishment!

Bob,
In the next 10 years we'll have so many alternate (there's that
word again) sources for listening that anything that's homogenized will
not be a factor in the market. When AM radio was threatened, it came
back with Talk programming. I suspect it'll take a
near-ratings-death-followed-by-sales-losses experience to get the
beancounters to realize this is showbiz. Imagine trying to to do
low-budget in Las Vegas.

As a listener, my CD budget is the biggest threat to radio I can
present. I have DAT tape, so I can program exactly what I want, in
superb fidelity and no processing fatigue. I have a 100 CD disk changer
that allows me to program days of music at a time with no insipid, high
school dropout jocks boring me to death. Either a music station pleases
me, or I'm history as their listener. I owe no loyalty to a station
that doesn't serve me the way I want to be served.

I guess the watchword phrase we should frame on our walls is: "It's
the listener, stupid!"

Reminds me of listening to daytimer KAMX, 1520, Albuquerque back in, I believe 1979. It was getting late in the day..and I head the jock do a liner about the request line adding his own comments: "if you can still hear me over KOMA". They were getting pounded by the 50kw giant, right there in Albuquerque. When KAMX signed off at sundown, KOMA replaced them like a local. KAMX's Chief Engineer at the time, Steve Agnew, told me a few years later that he could walk into the KAMX air studio late at night..and the request line would still be ringing off the hook..people still tuned to the 1520 frequency. (KOMA was Top 40 then too!).

Greetings gang!

Is there any city that doesn't have a Kiss, a Zoo, a Magic or a Wish? Do radio stations everywhere give us "Traffic on the 1's"? (or the 2's, or whatever...) Where is the originality?

I can recall the differences between radio in Boston and in New York in 1972. I began listening to WPIX-FM in 1971. It's true, they weren't WABC, they didn't have Dan Ingram, or fancy jingles, but there was something about the station that I personally identified with. Maybe it was the "difference" or the courage to be different, and not fitting into a mold that appealed to me. For it was WPIX-FM who, in the seventies, came up with "The Newies Show", a show that featured the newest arrivals to the record library every week. (Don't get me wrong, I'm not knocking WABC -- Dan Ingram was a great air talent -- but they weren't the only station in town!)

When I came to Boston in 1972, I did what I always do when I have the (although rare) chance to find myself in a new city -- scan the radio dial. I began listening to WVBF. This station had a personality all its own. WVBF was one of the few AOR (if that is the correct term) stations to actually use JINGLES between Aerosmith and Moody Blues cuts. WOW!! And their DJ's were actually awake instead of having overdosed on Sominex. How many AOR stations (even in those days) had the testicular fortitude (to quote Gene Burns) to use a jingle with the words "Electronic Mama"?

I found a real difference in those days not only between the two cities, but within each city as well. Using the Boston dial as an example, WRKO was the WABC of Boston, with its slick air personalities (it was after all, programmed by Bill Drake) while the lesser-known WMEX had a personality of its own, with "The X-15 Air Force".

In those days, radio stations like WPIX and WMEX used to "break" records before the "big" stations like WABC or WRKO would play them. Those stations acted, I believe, on instinct. They didn't have to hire a consultant to tell them whether they should play a song or not. If it sounded good, they played it. And yes, sometimes they were wrong. I remember "Sad Sweet Dreamer" by the Sweet Sensations (anyone out there remember that song?) on WMEX in November of 1974. WRKO picked it up in about May of the following year. WMEX also "broke" several records that never became hits., but they weren't afraid to take a chance.

Several years ago, I talked to the music director of a Boston radio station (I forget the station) that was playing Soft-Rock at the time. I asked him why the station wasn't playing Tracy Chapman's "Fast Car". He told me the station's research indicated that it wouldn't fit into the

format. That is the problem with so many radio stations today: cowardice. The business is filled with rogram directors and music directors afraid to make a move without being backed by the proper research.

Another thing that I find annoying is the act of taking something original and duplicating it. In the seventies, Casey Kasem was an original. Now he has been copied ad nauseum, to the point where it will soon become necessary to have a countdown of the most popular countdown shows in the country!

Even oldies stations are suffering from this syndrome. I hear more and more oldies stations (with the EXCEPTION of WCBS-FM in New York, although they are doing other annoying things, but that's another story) being nothing more than a nineties Top-40 station with no-name cue-card DJ's, but with different music.

This has turned out to be quite a diatribe, hasn't it? Sorry about that. WALE "Renegade Radio" in Providence is beginning to sound better and better! I'm looking for non-conformist stations in the country -- are there any?

--Ed Nielson

[Moderator's Note: Ed, while you are likely to be flamed for your insight, I agree with you in principle, at least, that it is high time that radio started responding to its listeners more and its consultants less. Nothing wrong with consultants and research, but this medium was built on creative, gut-level decisions. Now-a-days the gut is no longer trusted and the result is damned few 'excellent' stations and more same-old-same-old. The expectations of the public are being lowered so that inferior product is considered acceptible. Sad, really, but I fear that we can expect more of the same in the current climate. As Rich Wood (of WORnet) said... "It's the listener, stupid!" Bill]

KG>Does anyone out there find that some talk-show hosts act unnecessarilty
KG>rude to their callers? Recently, I was listening to Jay Diamond on WABC
KG>in New York. The dialogue involved a caller who wanted to support Diamond
KG>in his effort to call Manhattan Borough President Ruth Messinger on an
KG>issue. The dialogue went something like this:

KG>[Paraphrased, as I don't recall the exact words]

KG>Diamond: ...and I want everyone to call Ruth Messinger on this.
KG>Caller: ...can you give me the number?
KG>Diamond: ...if you want it bad enough, go look it up in the phone book.
KG>[Hangs up on caller]

Ed,
This is nothing. It's tame. It's a snoozer. You caught Jay on a
slow night. My favorite was his suggestion that anyone on welfare
shouldn't be allowed to vote because they'll vote to spend more money
on welfare.

KG>Another incident I heard involved Bob Grant's syndicated show:

KG>[Again paraphrased]

KG>Caller: ...and I just wanted to say that I wanted to support the troops in
KG>Bosnia.
KG>Grant: ...just what we need, more banalities. [Hangs up]

Don't listen to the syndicated show. It's not the "real" Bob Grant.
It's tame. The real New York Bob Grant would have said: "Get off my
phone, you scumbag." Or made reference to an Arab taxi driver as a
"towelhead." Or, muttered some pejorative in Italian. He used to refer
to David Dinkins, a black former New York Mayor, as "a washroom
attendant."

KG>Yes, there ARE callers that deserve to be "terminated" but there are also
KG>some talk show hosts who hang up on any caller who does not sound "just
KG>so". Personally, I feel that Diamond is one of these.

Ed, you really need to get out more. If this is the stuff you
consider rude, you'd be horrified at what really qualifies as uncivil.
Hey, it's showbiz. It gets ratings. We don't have to be civil - we're
broadcasters with a ratings mission. Damn the torpedos. Damn the
listeners.

Source record: 26810

References: <4drp4t$enc@vixen.cso.uiuc.edu>

Years ago (and no, I'm not advocating for a return to the 'good old days'), talk radio was a form of discourse. There was an expert, and an exchange of ideas. Name-calling and insults were not usually acceptable, since the purpose was to express different points of view. In the present day, as ratings become even more important than ever and stations feel they must do whatever it takes to make themselves stand out above all the clutter (and all the other choices, like TV, VCR, video games, etc), the end seems to justify the means. Somebody in radio-land got the idea that 'shock-radio' and a barrage of insults is what works. As a result, there is little discourse. Callers are called names and made to feel dumb (which, yes in some cases they are, but so what? why make fun of listeners?), the host feels justified to be as irritating, as racist or sexist or right-wing or whatever as the situation demands. Maybe in a bad economy people feel better hearing other folks get put down and ripped apart by talk show hosts; maybe there's a strange sort of catharsis about it. But somehow, the fact that G. Gordon Liddy and his ilk feel free to say the president and his wife are traitors deserving of death, or assorted racist talk hosts can now use the "N" word with impunity or talk about the assorted conspiracy theories doesn't make me feel any better. I'm a radio consultant, and a former talk host too, and I realise you need a 'shtick' to succeed, but why has nastiness become that shtick in all too many markets? Whatever happened to heated but respectful conversation? About the only talk show I know that still has discourse is David Brudnoy on WBZ in Boston. He is VERY conservative, but he gives opposing points of view a hearing and he will debate with anyone, without resorting to an insult war. He gets great ratings too. I wish there were more discourse, not just on radio but on TV and in society as a whole. I see too many journalists and politicians looking for some villain to blame for all the problem, rather than working together towards some solutions. Maybe I'm naive, but hey-- radio still has power, and it can be used for a positive purpose or a negative one. With more and more consolidation of ownership and more syndication, I wonder what chance we have for a return to intelligent conversation on the air...

AI>WXRK-92.3 NYC's switch from classic rock to alternative could be
AI>a positive, if they do things right. IMHO doing things right means that
AI>they only air songs that fit the 'alternative' description, however broad
AI>that has become.

I've gotta tell ya, this is confusing. What's alternative? And ... if it becomes more mainstream, do stations have to stop playing it? If an alternative band uses a non-alternative style as part of its repertoire does it violate some sacred rule? If Pearl Jam goes platinum are they traitors to the genre?

Does an alternative band fear appearing on a chart with a bullet? Do they become sellouts if they appear in Radio & Records or Billboard? Must they be starving artists to be worthy (starving is relative here - let's say they can only afford a tiny mansion)?

I was with 91X (XTRA-FM) in the early 80's. We were "new wave" with shaved heads and blue, pointy hair. Our biggest fear was a level of success that would destroy the "alternative" feel of the station and attract people who wore ties. I hear so many "authoritative" descriptions of alternative that it's tough pinning it down enough so I can feel comfortable knowing when I'm being properly trendy. Lord knows, if I listen to the wrong one, I'll be seen with a cultural pocket protector. Oops, I'm told that's in, now.

A few things to remember when dealing with talk show hosts

a) they are human
b) they aren't always right
c) they get testy too

I guess that some talk show hosts have trouble controlling their emotions to the point that they are performing in a rude manner. My advice is if you don't like the show or the host, simply turn the dial to a show you will enjoy.

Ron Bailie, who operated the Ron Bailie School
of Broadcasting in Seattle, Spokane, San Francisco,
San Jose, Phoenix, and Denver, was sentenced to
three years in prison and ordered to pay a $450,000
fine and $259,619 in restitution for embezzling
student loan payments.

In addition, Bailie's wife Nada and daughter Terri
were each sentenced to two years and three months in
prison and ordered to pay a $25,000 fine and $221,892
and $263,862 respectively in restitution.

All three were convicted by a jury in September of
multiple counts of conspiracy, false statements, and
embezzlement of funds from federal student loans.

I think you're right. Here in Saint Louis, 70's stations won't play stuff that really fits their format like ABBA,or England Dan & John Ford Coley, moreless the Bee Gees. I think that there is a market for an all DISCO station(even though the thought is gutwrenching to most of us). My bet is that the ARRO stations will add this into their playlists to try to win back the listenership that they are losing,just as the Classic Rock stations are.

ZO>Funny, today I'm getting CD-Singles with as many as EIGHT different
ZO>versions of the song! And here I am thinking they're prostituting their
ZO>songs in order to get as much airplay as possible.

Bob,
This isn't new. There have always been "radio mixes." How many
times have listeners complained that the album they bought had a
different version of the song they heard on the radio? They should have
bought the single. The album cut was 40 minutes long and the single
"radio mix" was 2:34. It didn't have all that "artsy-fartsy" stuff. You
know, too many notes. Even with the reduced mix we ran fast tables to
play "more music, more often."

Source record: 26817

Hi All: Having lived in Jersey for 20years, I
had to make mention of some observations about time tones.
First of all, for quite some years WCBS AM used their own time tone on
the hour instead of the CBS RADIO NETWORK's. On an aircheck of ABC Radio's coverage of
Gemini 12, I have their unusual lo frequency tone.
WMCA used a chime which lead into news. Of course they used 3 or 4 chimes forbulletins.
WOR AM had around the same tone as NBC. Some one asked about WNEW? Well yes I think their
tone sounded almost like the EBS at 853-960HZ.
WQXR used a chime. The Mutual Network's sounded like the #4 touch tone.
I am sure after being away from that market for 18years, I forgot some time tones on other
stations.
Here in the LA area, KMPC was maybe the last to use their own time tone.

677. Smooth Jazz in Macon Ga

Newsgroup: rec.radio.broadcasting
Date: 1996-01-21 00:00:00 UTC
From: richwood@commspec.com
Message-ID: <4du8r1$6l1@vixen.cso.uiuc.edu>
Source record: 26819

EB>Macon Georgia now has an alternative. WALJ (J107) is playing smooth
EB>jazz 24 hrs a day, 7 days per week. Top 20 CDs are counted down on
EB>Saturday nights, Alternative Jazz. Great listening in the land of
EB>country music.

There's that word "alternative" again. Please define "Alternative
Jazz." Is it Elevator Jazz, or Yuppie Jazz, or ...

When stations we formerly called "Easy Listening" are playing Kenny G.,
Larry Carlton, Anita Baker, and others we never expected. And ...
"Smooth Jazz" stations are using words like "Easy," "Relax," "Escape."
It gets confusing. WQCD, New York, uses every "Easy Listening" formatic
there ever was. It reminds me of the old Schulke "Beautiful Music"
format with vocals. WLTW, New York bills itself as "Lite FM" and plays
many cuts WQCD does. Same (until a day or so ago) with WPAT-FM.

I get the feeling the target audience is a Yuppie investment banker
with 1.5 kids who would be horrified to hear Yusef Lateef on his "Jazz"
station. The "I love Jazz so long as it isn't intrusive" approach to
sophisticated listening.

I say that as the former PD of WPIX-FM (now WQCD) who started a
"smooth" jazz show on WQCD called City Nights (Holly Levis was the
jock) and lobbied very hard to change the format to Jazz. They told me
it would never work. They now have the best numbers they've had in
decades and it finally broke their old "format du jour" (copyright,
Rick Sklar) reputation. WQCD does a great job with the format and it's
one of the highest fidelity stations in the city. I'm glad I told them
to do it. :-)

In New York, the most "Alternative" format is Country, since there's
only one place to get it on radio.

I think we need a glossary that allows multiple definitions of
"alternative."

I don't listen to Diamond much but with BG I think his
rudenesss to caller may be just a schtick, something that his
listeners get a kick out of because he knows what many talk
hosts know that callers are not listeners. There are many more
listeners than callers. If he yells GET OFF MY PHONE YOU
SCUMBAG at a caller, the caller will probably never listen
again but all the many more listeners out there will get a big
kick and listen to him even more.

679. R.I.P., WPAT-FM, 93.1

Newsgroup: rec.radio.broadcasting
Date: 1996-01-21 00:00:00 UTC
From: "PETER Q. GEORGE, N1GGP" <PGEORGE@WELLESLEY.EDU>
Message-ID: <4du8r9$6lf@vixen.cso.uiuc.edu>
Source record: 26821

Call me a sentimental fool.....call me what you will. But the closing
of WPAT-FM (93.1) brings to an end one of New York's great radio institutions.
Admittedly, the writing was on the wall. The New York market simply could
not support a F
ULL-POWERED FM easy-listening station. The music and tastes
have changed dramatically over the last 5 years. We saw a similar switch
of format here in the Boston area when the ever-so-popular WJIB-FM (96.9)
began to add more vocals into the mix of light easy-listening music in 1990
and even added the now late-lamented "Nightscapes" soft jazz at night.
While WJIB-FM was still pulling remarkable numbers, the audience was getting
older (by industry standards) ;-). Finally in the fall of 1990, WJIB-FM
sailed away into the sunset and segued into WCDJ (CD-96.9) all "jazz". Now,
96.9 is "yeee-haw" with WBCS-FM with probably the loudest and overly-crunched
processing in the business. (That's just my opinion).
What happened to WPAT-FM is, sadly, what is happening everywhere. The
easy-listening (or beautiful music) format has gone full-circle. What was
the format of choice for most FM stations in the sixties and seventies, has
become a relic in the nineties. No doubt, easy-listening will still have a
place for lower-powered or lesser-known AM or FM stations. A couple of
stations still thrive on the format. One in particular is WJIB (740), not
related to the former WJIB-FM. This formerly "down-on-its'-knees" daytimer
has made a rather comfortable niche in the Boston market with its' un-
abashedly "Beautiful Music" format in STEREO, 24 hours a day. It may be
only 250 watts by day, 5 watts at night...but the Optimod processing gives
it a signal that rivals the best 5,000 watt regional. Another bright spot
I heard in the west was KFAM (700) in Salt Lake City, UT. This killer
signal hits Phoenix (where I was staying) at night with light-instrumental
music in STEREO with 50,000 watts day and 1,000 watts at night. Dont be
fooled by the low powered signal at night, THIS ONE REALLY GETS OUT !
Finally, I would like to offer WPAT-FM a hearty "bon-voyage" and thanking
them for a great job, well done. Salud WPAT-FM, Easy 93 FM ! Best wishes
for the new "Suave 93.1".

680. WPAT-FM to change 1/20/96

Newsgroup: rec.radio.broadcasting
Date: 1996-01-21 00:00:00 UTC
From: richwood@commspec.com
Message-ID: <4du8r9$6lg@vixen.cso.uiuc.edu>
Source record: 26822

AI>A posting on the AOL Radio Board reports seeing a
AI>"Suave 93.1" subway ad; my guess is, that's pronounced
AI>"Suave noventa y tres".

The bumper I heard called it "Soo-avay efe eme" (pardon the butchered pronunciation guide). It sounds quite good. It's sort of like the old WPAT-FM, but in Spanish or the Hispanic version of WXKS ("Kiss"). I'll bet we'll see some very good numbers in a few books.

The way things are going, ethnic formats in New York will be caucasian.

Rich

681. (wave file info)WPAT FM NY Todays 93.1 FM now Suave 93.1 FM.

682. Monmouth-Ocean Ratings Fall '95

Newsgroup: rec.radio.broadcasting
Date: 1996-01-21 00:00:00 UTC
From: TRRadio@aol.com
Message-ID: <4du8q1$6je@vixen.cso.uiuc.edu>
Source record: 26824

Quite a surprise in the results...

WABC 5.9 Talk
WPLJ 5.4 Hot A/C
WJLK/WQNJ 5.0 Soft Rock**
K-Rock 4.9 Stern/Classic Rock (Changed to Modern Rock 1/6/96)
WYNY 3.9 Country
WOR 3.8 Talk
WADB 3.7 Easy Listening**
NJ 101.5 3.7 Talk/Oldies**
WOBM 3.5 A/C**
WCBS-AM 3.3 News
Q-104 3.3 Hard Rock
WJRZ 3.3 Hot A/C**
WFAN 3.2 Sports
WCBS-FM 3.2 Oldies
WRDR 3.2 Nostalgia**

A very curious book - WJLK/WQNJ falls out of the top spot after being #1 for two books in a row. All the local market stations (identified with ***) took hits or stayed about the same except for WJRZ, which registered a gain of 1.2. Oldies 107 didn't crack the top 15 after their highest book in years in the Spring. Note the strong showings for K-Rock and WYNY--New formats for both by Spring book (K-Rock has changed, 'YNY continues to be rumored).

I grew up in Europe and most of the stations there aired (and still do) six short single-tone beeps every hour. (Except in France, where they use only four beeps). The tones are transmitted once per second, the last one being "on the hour". In some countries the last tone is lengthed, in others it is a higher pitch. I think they're tied to some sort of time standard, but I'm not sure.

From: ggoldwyn@netcom.com
Message-ID: <4du8qi$6k9@vixen.cso.uiuc.edu>
Source record: 26830

So I was just surfing the Net, as I usually do too often, and I noticed
that iRock is not the only "Internet Only" music radio station any more.
There is now a "ZRock Type" hard metal station called HardRadio.Com using
StreamWorks as the method of Internet audio streaming.

HardRadio.Com is different than iRock as it intends to charge the listeners
a membership fee to listen. Humm, will metal netheads pay to hear Ozzy
and Lita coming out of their SoundBlaster speakers?

iRock on the other hand is and intends to stay free to the listener.
Come on over to www.iRock.Com and hear a blast from the past in Show #27,
as I include a bit of one of my 1090-XEPRS shows from 1976. It's really
strange to hear the top of the hour XEPRS ID/jingle in RealAudio 2.0 and
IWave. Oh, we don't have any metal at iRock, and classic rock isn't
dead yet either. It just has many loose movements.

G. J. Goldwyn

689. KFI antenna

Newsgroup: rec.radio.broadcasting
Date: 1996-01-21 00:00:00 UTC
From: jcr2@cornell.edu
Message-ID: <4du8qj$6ka@vixen.cso.uiuc.edu>
Source record: 26831

On my way south from LA recently, I stopped to see KFI's antenna, right next to the San Diego freeway at Beach Blvd. I thought anything I could hear (sometimes) from upstate New York is worth a look, especially since it's nondirectional. Anyone know the height of the tower? - since I'm not good at judging such things, but it looked taller than most AM installations I've seen. Couldn't be half-wave, could it?

It also looked built to last, somewhat wider than most guy-wire-supported towers. The grounding points of all the guy wires are surrounded by concrete walls and razor wire - is this because vandals took down the KNX antenna, or did KFI have problems themselves, or is it because the antenna is right next to the freeway?

The transmitter building needs paint, but the doorway is framed with tile in a geometric pattern, with the letters KFI at the top. Nice touch. There's a sign near the street, though, advertising a forthcoming huge shopping center. Is the station:
a) going out of business, so the site will be available?
b) moving its transmitter?
or does the sign refer to the neigboring property, even though it doesn't seem to?

ON>I asked somebody what they were going to put on their
ON>1kw AM station and they said "motivational format" .
ON>Anybody define this ? is it brokered blocks ?

Some of it is brokered. Mostly, it's the kind of thing you see in infomercials with guys who have cassette "courses" that help you buy real estate with no money down, or help change your personality so you can make more money, or religious stuff where a specific belief will make you a millionaire, or how to be a better salesman -- that sort of thing.

Zig Zigler comes to mind, with a religious approach to success. There's another guy who improves your sex life (buying the course does it). It could also include Leo Buscaglia (sp?) and Brazelton to add legitimacy. I look at it as a non-financial version of Sonny Bloch or Jimmy Swaggart. In most cases, they're infomercials.

VA>selling anything really cares.

Hank,
Like the "silent majority" it's difficult to know you actually exist and what would appeal to you. At least with Talk we know it's a sure rating success to bash the President and the First Lady and say "damn them liberals" a lot. Why take a risk with anything that's "silent" when a little partisan hate on the radio is like shooting fish in a barrel?

Since you're not listening, you'd have no way of knowing if we actually did anything different. We'd have to do a lot of expensive advertising and promotion just to get you to sample us. Why bother when the bank willingly cashes our checks?

How about the earlier days of KROQ-FM in southern California when
the signal was weak and hard to find on the crowded L.A. dial. Since
there was a Spanish language station on the next frequency up, for awhile
the deejays would say, "KROQ, 106.7 FM, Pasadena/Los Angeles, just left
of that Mexican station on your dial!" Needless to say, they got
complaints and had to stop ... (but we laughed hard until they did). :)

17 WYSL 1030 (Avon/News/Talk) NS 0.6
17 WYRK 106.5 (Buffalo/Country) 0.5 0.6
18 WBTA 1490 (Batavia/FS) NS 0.5
18 WWWG 1460 Christian NS 0.5
19 WCMF 990 Sports 0.6 0.3

In other news...

WLKA-FM, Canandaugia (102.3) is no more. Auburn Cablevision, owners of Irondequoit/Rochester's WMAX-FM have LMA'ed the property and begun simulcasting WMAX's AAA format over the 102.3 frequency. WMAX GM Alan Bishop also announced plans to offer advertisers the chioce of running their commercials on the simulcast, or on either individual frequency. No word on a possible call letter change for the former "Lake Air".

WRCD-FM, Honeoye Falls/Rochester (107.3) "CD 107.3" hit the air full time Friday (1/19). Format is the satellitte "Smooth FM". So far, all I've heard is the bird, with lots of technical snafus. Signal is ok...some multipathing in the city, but pretty clear at my home in Greece on the Lake Ontario shore, it'll even stop my seek & scan about 80% of the time.

As far as I understand it, George Kimball is the owner, but the WMAX crowd is doing the programming. Don't know if it's another LMA or pending purchase or what.

That's all for now...until next report!

696. Re: Help! Materials sent to producers being stolen

Newsgroup: rec.radio.broadcasting
Date: 1996-01-21 00:00:00 UTC
From: richwood@commspec.com
Message-ID: <4du8q5$6jl@vixen.cso.uiuc.edu>
Source record: 26875

BA>My first book came out last fall, and I've had problems with the books
BA>not even arrivng at their destinations! I'd suggest you place the book
BA>inside a separate envelope inside, seal the envelope, and write the
BA>producer's name on the outside. Make it look like the urgent,
BA>time-sensitive material it is.That may get the message across that the
BA>book is intended for someone specific at the station. At one station I
BA>was at years ago, if books came and weren't addressed specifically to
BA>a person, they had a tendency to either get tossed, or taken home by
BA>an interested party.

Julie,
By its nature, a book isn't "time sensitive." If it's time sensitive, it's sent FedEx or FAX'ed. Most books are mailed using something lower than first class rates. Anything sent to me less than first class tells me I can wait before bothering with it, since the sender used a slower service and didn't feel any urgency. If something arrives third class, I often just dump it before opening it. It's probably junk mail.

BA>I suppose you can take the thefts as compliments - you must have a
BA>very good book! Still, I can understand the expense and frustration.

Don't forget that there's a booming business in remainders and promotional books. I've seen many books in bookstores that were obviously promotional copies. Lots more profit in a book that cost nothing - pretty close to 100%.

My time is valuable and my desktop space is limited. In New York, some folks pay $500 per month per square foot for it. It had better look awfully important to command a piece of that space. Also, don't forget that there are thousands of authors writing thousands of books. Each one wants a piece of my airtime to plug it. It had better offer some benefit to me and my listeners. The needs of the authors are not important to us.

Rich

Hello everyone!

I am a student studying radio broadcasting at Mohawk College in Hamilton. I have been assigned the task of preparing a demonstration of the net to impress upon local broadcasters the importance of having a web presence.

My plea: Would some kind soul mind posting a list of Canadian radio station url's? I have several already, but assume there must be more out there.

Thanks very much, everyone!

BTW: This is my first post to the list. I've learned a lot already in just a couple of weeks lurking...

I read that Pulizer Broadcasting is seeking to purchase a sister station to provide a home for ASU, Diamondbacks, Suns, and Coyotes. I' m wondering if there is any news on this.

Wouldn't KUKQ at 1060 AM be a perfect outlet for KTAR's sister outlet.

Also, I hear it may be all-sports. How will this affect KGME?

Speaking of KGME, what's the story on their signal boost? I've heard about this for a long time, but no action. Their signal is really lacking in the East Valley.

Also, is KGME's John Cannon bolting the station on speculation that he will find a spot on KTAR's possible all-sports sister station?

Just my thoughts and questions on this-and-that.

I remember WWWE buying an expensive, tone generating digital clock module that received WWV signals on shortwave (to make sure our "tone" was on the money). A couple of months and one P.D. later, it was decided that the tone was difficult to use with delay -- and also interrupted talk hosts who would talk past the top of the hour :-) So, the tone was turned off -- and remains off today, after a very short life.

Newsradio 1370 WSPD-AM is still looking for a full-time Reporter to join our 7-member News Department. A degree is preferred, and you must have at least one year's verifiable experience reporting, writing and presenting radio news, along with the drive to work largely on your own, covering spot news and developing your own stories during an evening shift Monday thru Friday, with occasional fill-in anchoring duties. This is a great opportunity to join a staff at a top-flight News-Talk station that's part of the Noble Broadcast Group, with two sister operations in Toledo, and similar duopoly holdings in San Diego, Denver and Kansas City. You'll work with a great team and good gear; our Toledo facilities will soon be fully digital. Pay is in the mid-teens. The position is open NOW, so forward T & R immediately to:

Dave Brannen
News Director
WSPD Radio
125 S. Superior St.
Toledo, OH 43602

I think you're asking for infomration ? Anyways there was/is a station
broadcasting out of Mexico with a target audience of Los Angeles. The
Mighty 1090 XPRS stopped broadcasting in English a few years back. It was
also one of the many stops for the Wolfman Jack show. They would switch
over from Spanish to English around 6 PM and had a variety of different
formats for years.

Roger.

Well the long waited change has happened at WLXC in Lexington SC which had actually done nothing for the Lexington SC market, but tried to be a Columbia station and all sports. Frank Baker now has control and it's doing his The Breeze format out of Charleston SC. This is a "Beach" format, as aired on the station he has near Charleston (licenesed to Awendaw SC, and the Beaufort station that blasts into Savannah as well. The link to here is ISDN. It sounds awful. Talk sounds fine, but as the audio becomes more complex, the worse it sounds. WCOS AM will now go all sports.

And today for WOIC on 1230 it was <saw saw saw > KRASSSSSS!

Down came the old tower and up with the new one and back on today. Soon the BE AM-1 shall be on the air, retiring an old RCA BTA 1R. Now they need to have some DECENT audio processing.

Andy Thomas is back at WVOC (AM 560) . He's been back for about 2 weeks now. Under previous PD ratings had dropped to the lowest in years. Andy seems to understand how News Talk works. Welcome back.

More Columbia goodies when I can report on them..........

From: TRRadio@aol.com
Message-ID: <4du8q0$6jd@vixen.cso.uiuc.edu>
Source record: 26888

A quick update...

Suave 93 is on the air. The former WPAT-FM went off the air and into history at 12:01am Saturday and the adult Latin sounds of Suave 93 hit the air. The format is geared to the Hispanic population of the NYC area. One plus for the new format - the return of Paco to PM drive. He used to rule afternoons at WKTU in it's heyday in the late 70's and early 80's before a drug arrest and conviction.
(Listening for a little bit - a mix of both Spanish and English hits, plus Spanish versions. It was interesting to hear Janet Jackson's 'Come Back To Me' in Spanish, followed by brother Michael's 'You Are Not Alone' in english.

When I was PD of WIBR in Baton Rouge I hired a blind board op named Otis Wilson. At first we used a braillewriter for logs, but he then got a laptop with a voice synthesizer that he would plug his headphones into and "listen" to the log. He also put clear braille labels on the carts, or would listen to them in cue before playing them.
After he got his bearings he had no problems at all. As he likes to say, "We can now do anything but drive a car."

Greg

P.S. I know you read this group now and then, Otis. If you see this drop me a line.

Here's how 2 local stations, in San Diego, do car giveaways. It seems like a smart way all around. Give away a key an hour for an extended period of time. Maybe add a station mug, or restaurant gift certificate. The locals use a 'Key Song' or a 10th caller at the sound of "X". Then have all of the winners show up for a "Listener Party". You might even coop with a charity to raise funds for it. All the listeners get their keys, display station loyalty and try their keys. The winner drives away in their new car...the others have fun...the station gets a strong promo.

Rog.

In AIRWAVES #1761, Kevin Young asked:

>>An automotive dealer group is inquiring with our adult contemporary radio station about ideas to give a car away (or many short-term leases).

Anybody heard of some fun promotions where stations gave away cars? Thanks!<<

We did the old "hands on car" promotion a couple years back. That's where you qualify, let's say, 10-15 people to participate. They each have to hold one of their hands (they can switch off) continuously and the last one left wins. I believe we did give them a five-minute break each hour. I believe we went for something like 30 hours before we got a winner. We did it with a live broadcast at the dealer's showroom..and we got quite a lot of press (TV/newspaper) with it.

: Alternative. Interesting that the late Ric Carroll was saying that 15 or
: so years ago with his pioneer KROQ format ...

As someone who grew up on KROQ, I recall that Ric Carroll had problems with what to call it -- at one point, it was "Rock of the 80s". At some point, I expect my beloved 80s music to be considered "classic", so then what will you call it? "Classic rock" is such a generic term, it can be attached to anything; maybe doing formats tied to decades makes more sense. After all, "modern rock" is just 90s rock; it's audience will grow up too ...

Message-ID: <4du8qa$6ju@vixen.cso.uiuc.edu>
Source record: 26895

Hi:

I wish to put in my 2 cents on this classic rock radio subject.

Why doesn't the classic rock stations, at least the ones in my area, play new classic rock?
The Beatles, Tom Petty, Eric Clapton, The Rolling Stones, Van Halen, David Bowie, Aerosmith, The Pretenders, The Eagles, Rod Stewart.
What do they have in common?
They put out new albums in the 90s, yet these classic rock stations refuse to play them as if the rock and rollers stopped making new records in 1987.
These, plus Collective Soul, U2, Dave Matthews Band, Alanis Morisette, etc.etc. These new rock artists as well as the new albums the classic rock artists put out will easily fit in with the classic rock formats.
Who says classic rock is restricted to just music of the 60s-80s?
Maybe then there wouldn't be so much burnout of the old and so much ignorance of the new.
Even the album tracks (AOR) from the best-selling albums should also be mixed in. That's how you program a rock station.

Keep classic rock alive. Play new music!

david tanny

sincerely

Mark Byrd wrote the quoted material below

" Hmmm. I always thought that the term "Clear Channel" meant that it was the
" only station on that frequency. If this isn't the case, then what *does*
" "Clear Channel" mean?

Depends. Used to be a Class I-A Clear was the only station on that channel at night. Class I-B was a shared channel, usually one in the East and one in the West. I may be wrong, but I never thought the 21 U.S. and dozen or so other North American clear channels were ever intended to have just one station on them at all. However, for decades WOIA in San Antonio had 1200 all to itself, and I think WLW in Cleveland had 700 alone. I may have the calls mixed. Anyhow, this may have been because they were closer to the middle of the country and might have had interference problems. As with anything FCC, the creation of clear channels was a philosophy, not a science.

The AES produced some rather interesting reports on the multiple stages of audio coding. The terms Heterogenous and homogenous are used to describe the multple levels or tandems.

Homogeanous Tandems are multiple encode decodes of the same algorithm where Heterogeanous Tandems describes multiple encode decodes of different coding systems.

Would or is.??????

My theory

I bit reduced or data stripped stereo feed should never be lower than 192 kbit /s at 44.1.

128 kbit/s is audibly unacceptable

a two stage tandem at 192 kbit /s is marginal and equates by my ear to around 160 kbit/s

it should be noted that the DCC and minidisk both use data rates well higher than 192 kbit/s

>The general idea should be that data storage is fairly cheap. Data
>transmission is fairly expensive. So, store without bit-rate reduction and
>transmit with as few generations as possible of bit-rate reduction. This
>would point you to DAT or hard disk based recording.

Dat uses no data compression and is the preferred archival medium however the main constarint with broadcast appears to be the obsession with 128 kbit streams

I wonder why??? 2b+d standard isdn ????

>I use the term 'bit-rate reduction' rather than 'compression' because it
>accurately describes the process. Data compression is lossless (i.e. the

>broadcasting. The criteria and amount of data thrown out has an impact on
>the audibility of the system.

Ever run PKZIP over a wav file???

There is no easy way to reduce the data of a digital audio stream. What happens in a bit reduced stream is large chunks of audio deemed inaudible are flushed down the toilet. Which bits, ahh good question.

A simple description of Musicam (ISO MPEG Layer II) is

A snapshot of time is converted to spectral information using FFT (fast fourier transforms, the bit they covered in that math class you skipped) It is then devided into 32 subbands and a phsych accoustic algorithm is applied to determine which spectral components will not be heard.

What wont be heard, okay , some guy is playing the pan flute and next thing Tommy Lee starts beating the death out of his drum kit. During this the ear will not hear the pan flute, so why record it. Let me assure you that even an SM58 will here the pan flute. The pan flute during tommy lee's solo will be deleted from the recording forever.

ISO MPEG layer 3 breaks down the spectral information to 128 subbands and the effects are a lot less noticable. I have tested many people on A B testing between 128 kbit layer 3 verses straight cd and the result is 50 50 , It seems unusual that it has not taken off

Incidently TELOS produce a ISDN box that runs ISO MPEG layer 3 and sounds stunning at 128 kbit 44.1

Maybe we should really listen to the pan flute and send Tommy Lee back to his silicone valley.

We have just implemented RCS master control automation using 44.1 192 kbit rate into an Stereo max and then into an Optimod 8200. We run composite stl which puts the processing at the studio however now Orban have released the remote software i do most processing adjustments via modem.

Geoff

I've worked at two stations where we backtimed the ID jingle so the net
tone comes between the calls and city of license.

(PAMS Phili Story jingle) WQQW (CBS tone) Waterbury.

(JAMS Rather be in Denver jingle) WAVZ (ABC tone) New Haven.

As I understand the rules, television call signs may be printed on
the screen (thus not having to be spoken in English), but radio
stations must speak thier call signs at least once per hour in
English. One of Ft. Worth/Dallas' Spanish language stations works it
like this: "This is KFJZ, Ft. Worth [English]. Esta Es KFJZ...[in
Spanish]"

Yes, in fact WGN still uses a time signal. It is identical to the
original signal you heard so many years ago, though has been generated by
a solid-state device for last 25 years or so. There is a very interesting
story surrounding that tone and what they did before it was generated
electronically. I'll see if I can get my hands on a copy and post it if
it's not too long.

}
} ABSOLUTELY RIGHT!!
}
} I have had this debate with the Chief Engineer of a NYC "Light" radio
} station. Programmers of these formats continue to hold that keeping the
} compression down helps listeners stay tuned longer. They claim the
} compression encourages passive listeners to reach for the volume and turn it
} down.
}
} Nonsense.
}
} Unless you are a classical music programmer, all you do by backing it down
} is make your station sound weak. And, weak IS the word. If the station
} does not sound loud, average listeners will keep going to the next "strong"
} signal.

This kind of arrogance is what is wrong with radio. The very idea
that someone can sit there and dictate that 'most' listeners can't hear
this, or don't notice that, is absurd.

That having been said, I do agree that some compression to maintain a
high modulation level is a good thing, even for (some would argue
especially for) classical stations that have a much wider dynamic
range than most pop music.

However, going beyond the maintenance of high modulation and entering
into excessive clipping and artificial modification of the sound based
upon some person's opinion of what some illusory 'average' listener
can or cannot hear is the height of arrogance, IMHO.

Perhaps in the days of AM top-40 stations this had more validity,
since high-fidelity was not a factor. But, in case you had not
noticed, we now live in the age of CD's DAT and high-end cassettes.
The so-called 'average' listener is no longer listening on a 5 tube table
radio or a monophonic car receiver with a single-cone speaker mounted
in the dash.

People spend a lot of money on quality audio systems. People *do*
care about good sound, more so then ever. The increases in the

quality of receivers and amplifiers is not only limited to extremely high-end equipment, either. Now-a-days good car audio can be had for well under $200.00 and even the OEM stuff is far superior to what was available just 10 years ago. There are people who spend thousands on car audio, even to the point of removing seats and trunk-decks to place speakers and amps. Car CD decks are on the increase too.

For a radio station to arbitrarily clip and squash the audio into oblivion is to slap the face of those who choose to hear good quality sounds on their receivers. And it is NOT limited to classical or jazz listeners either. Most people choose not to crank their boom-boxes to the point of distortion and I see no viable reason that a broadcaster should take that control out of the hands of the listener and force them to listen to badly distorted, artificially pumped up sound that bears little resemblance to the original CD, because of some half-baked, antiquated notion that the stupid, tone-deaf, brain-dead listener cannot possible appreciate good sound quality.

While I would concur that most average listeners are not *aware* of the technical side of clipping and over-driven limiters *per-se*, they do notice the fatigue that is generated when sound is distorted and kept at such a tight level that it begins to take on a feeling of monotone. Fatigue is real. I cannot listen to such a station even if they are playing music I would otherwise enjoy.

It is offensive to me when I hear a station that sounds as if they are running their audio through a guitar fuzz-box. I know a lot of other people, too, who have *no* radio experience who wonder why their cassette of a song sounds so much better than the radio playing the same song.

This idea that the listener is some sort of sheep-brained fool that has no intellect or ability to perceive distorted and over-driven music is just another reason why many music fans are abandoning radio in favor of services like DMX, MusicChoice and their own personal CD/Cassette collections. In an age where radio programmers are screaming about lost revenues due to listener migration, maybe we should realize that we no longer live in the era of AM radio and 45 RPM vinyl records. It worked for the 1960's top-40 wars, but today the listener is much more sophisticated, and so is her receiving equipment.

Again, I know there is a place for compression.. Especially with rim-shot signals and such where loudness can compensate for a weaker signal to some extent. I know that psycho-acoustic processing can make a station sound fuller and richer, and that the radio environment requires some help to overcome noise and such. But I do not believe that there is anything to gain distorting and squashing the music to the point where it sounds like a 1960's transistor radio turned up all the way. And the assumption that those cattle out there listening are unable to tell the difference is absolute arrogance.

} Keep the compression UP!!!

OK, but keep the distortion DOWN!!!

Quality audio *will* attract quality listeners.

Well there's a station in Philly that we stumbled upon in our office one
day last summer that plays mostly 70's pop&disco and classic rock, with a
few 80's songs thrown in now and then. The 12 people in my office love it.
In fact, since there aren't any NYC classic rock stations left, we listen
to it nearly all day now. (we're in NJ, and NY is closer, but we can also
pick up most Philly stations)

729. Computerized Cartridge System

Newsgroup: rec.radio.broadcasting
Date: 1996-01-23 00:00:00 UTC
From: Mike Howard <howard_michael@jpmorgan.com>
Message-ID: <4e1u92$m7b@vixen.cso.uiuc.edu>
Source record: 26708

I've written a computerized cartridge system that's easy to use, runs on a Pentium Computer with 16MB RAM, and best of all allows upto 8 .wav files to be played simultaneously through one P.C. sound card. I was wondering if it's worth my while pursuing this, as I think it's a great system and everyone I've shown it to drops their jaws in amazement.

The system runs under Windows and looks like 8 cart machines. I'm undecided as whether to stick to dragging and dropping files onto the machines or have a repository of 'carts' that can be entered via the keyboard. I'm also adding a recording feature, that'll eliminate dead air from the start and end of a recording. The system is also programmable, so that it's possible to tell it to start cart one, then 3 seconds later for example, start carts two and three and when all 3 are finished start cart 4.

I'm not a huge software house or production facility with millions of dollars behind me, but I really think the system is good (I know I wrote it - but it's really got potential).

Any advice or ideas?

Michael Howard

"More music, more often."
Correct me if I'm wrong...but with today's digital recording techniques (DAT and CD) can't you speed up the playback as fast as you want WITHOUT changing the pitch of the song itself? No more fear of the "chipmunk effect" if you speed up all the songs in your hot rotation by 5% or even 10% to fit another record into the hour without cutting into your commercial inventory.
Wonderful what digital technology can do for us, isn't it? :-)

There's a new cable series that should appeal to radio folks. It's on the American Movie Classics channel, and it's called "Remember WENN." WENN is the call letters of the fictional station where the show takes place.

It revolves around the writers and talent of a 1930's station where soap operas, kiddy adventure shows, and other local "live" shows are produced. Good scripting and a good cast.

Arbitron gathers data on the non comms, they'll even sell it to you for a
price . . . but they won't let the numbers out to the general public.

Many years ago I managed WJBX in Bridgeport, Connecticut. I was chatting with
George Lombardi of Sacred Heart University when I found to my dismay that his
WSHU not only beat us, but had more than double the listeners and rivaled the
top station in the market.

I wish I could get my hands on NPR data. Anybody have it?

I was once a radio news director, and also deluged with books. While I'm an avid reader, most didn't merit keeping. I agree. There has to be some benefit to listeners. We authors appreciate all the exposure (of our books <g>) we can get, but working on the other side of the business has helped toughen up my hide. I'm a big enough girl to know not everyone's going to want my book. Enough did that it went into a second printing as soon as it hit the streets, but that still didn't make it a best seller by any means. But hey, my fragile ego is happy.

743. WKYN promotes Imus, programming know-how

Newsgroup: rec.radio.broadcasting
Date: 1996-01-23 00:00:00 UTC
From: rhh@research.att.com
Message-ID: <4e1u9r$ma7@vixen.cso.uiuc.edu>
Source record: 26756

For their first day of Imus, WKYN Florence/Cincinnati 1160 played, not the Imus program, but an unbroken series of Imus's Gen Patton, Dick Nixon, etc. sketches.

The effect is remarkably unlistenable, a fine illustration of how Imus' pacing that sets these off.

I imagine some hack thought he'd get rid of the dull parts. I hope they don't improve the program from here on.

How many radio shows out there showcase local bands? Here on Long Island, we've got Locals Only on 94.3 & 103.9 WRCN. Last I heard, there was Street Beat on WMMR in Philadelphia. What others are there, and how many?

747. Pre-produced news features

Newsgroup: rec.radio.broadcasting
Date: 1996-01-23 00:00:00 UTC
From: bobseybold@aol.com
Message-ID: <4e1ua3$mb5@vixen.cso.uiuc.edu>
Source record: 26760

In Digest #171, Lisa Wheeler asks:

> I'd like to know how many stations (with news departments)
>use pre-produced news features (AP, CNN, PR or government agency
>feeds) in their newscasts?. What makes you want to run these
>"outside" features...topic, production-quality, etc...? On that note,
>what makes you avoid them like the plague?

First, I think you're defining the category too broadly. Stations that are members of a radio network (i.e. ABC, CBS, AP Radio) do so in order to have access to regional, national and international news produced by the network. Some of this product is feature material. I would not call these "outside" features, any more than wire stories in the newspaper, or network feeds on TV are "outside" features. Local staffs are not equipped to report stories outside their local area, regardless of whether it is straight news or a feature story. Say what you ewill about "the media", but networks and wire services still put journalism ahead of promotion.

With that distinction, I think we can address the question better. At WSPD Radio, reports from PR firms (i.e. News Radio Network) dressed up as courtesy news reports are offered to us on an almost daily basis. We refuse all such offers, because usually the news value is minimal, the topic already dated (or covered by a legitimate radio network report), and -- most importantly -- the connection/plug for the advertiser is rather transparent.

Taped reports offered by government agencies, industry groups, and others are also not used. The only exception to this rule is the use of material provided by several universities in the state.

These telephone newsline features usually provide a handful of sound cuts, along with a complete story on the featured topic. They always include comments from a university faculty or staff member, often many of the same people we contact for expert comment on news stories or talk show topics. The sound cuts are used in stories written by our staff. On average though, we may omly use 2 or 3 of these stories a month in a daily public affairs news feature produced for our sister station, WRVF-FM.

With a news staff of 7, including 5 full-timers, and affiliations with AP, CBS, and Zap News, we have plenty of true "news" product and talent available to us, without needing the "free stuff". I know many a radio news operation isn't as lucky.

749. NY Radio Update

Newsgroup: rec.radio.broadcasting
Date: 1996-01-23 00:00:00 UTC
From: RayDio@aol.com
Message-ID: <4e1ua6$mbr@vixen.cso.uiuc.edu>
Source record: 26762

I got a chance to visit my hometown this weekend. Long Island, NY is a great place to listen to the radio. There is no shortage of stations to choose from between New York City, Long Island, and Connecticut!

Friday (1/19/96)/Saturday (1/20/96) at 12 midnight, I got a chance to hear "Today's 93.1" WPAT-FM (AC) transform into the new "Noventa y Tres punto Uno Suave FM" (spanish). Karen Carson said the final fairwell for the station except for a pre-recorded message from WPAT's Operation Manager. Carson said you could still hear her at the other end of the dial (106.7 WLTW "Lite-FM") on the weekends. On Saturday, I cought 930AM WPAT. I guess the sale of the AM station hasn't been completed yet (Does anyone know about the future of WPAT-AM?). By the way, Billboard Magazine's listing of the New York Arbitrons showed Suave FM's sister station, WKSQ 97.9FM (also spanish) as the second highest rated station in NYC.

I've been waiting to hear the "New 92/3 K-Rock" (WXRK) and their Modern Rock format since I listened to Philly's WYSP simulcast Howard Stern and Robin Quivers...OOOPS!...I mean, Douche Baggy-Bag and Super Snatch kick off the format a couple of weeks ago. The station sound smooth and techno! Compared to the other Modern/Alternative rockers in town, I think they have a good shot at sucess. K-Rock is playing purely "Modern Rock". There are a few survivors of the old Classic Rock format, like U2, but they are songs/groups that have always been categorized as Modern. K-Rock has been broadcasting without DJs other thatn Stern since the change, but on Saturday (1/20), Maria Malito was back in the booth in the morning. She appeared to be the only DJ all day. I heard K-Rock playing some of the following: Talking Heads, Presidents of The United States, Green Day, Smashing Pumpkins.

Long Island's WDRE 92.7FM (and 98.5 on the east end of LI) sounded actually a bit more mainstream than K-Rock. Their playlist, for instance, included Blues Traveler.

Q104.3FM WAXQ (NYC) may have the toughest battle with K-Rock's switch. Q104.3 still sounds great. They call their format "Pure Rock" and probably could be best described as K-Rock plus hard rock, i.e. Pink Floyd, Led Zeppelin, and Ozzy Osborne. Q104.3 sounds a bit like WYSP in Philadelphia (K-Rock's sister station) with a bit of a harder edge. Good move on Q104.3 part by picking up Rockline, which apparently was recently dropped by K-Rock. Rockline (Mondays 11:30PM Eastern) is a long running syndicated AOR call-in/interview show.

Z100 WHTZ-FM (100.3, NYC), despite a slight ratings drop, still sounds exciting and upbeat. Their format could probably be described as Modern CHR. They'll play the more mainstream Modern Rockers and lean towards the Top 40 sounds every now and then. BTW, Kudos to Z100 for keeping Rick Dees' Weekly Top 40 on Saturdays from 5AM-9AM. (I think they also air the Top 30 Hit List

on Sunday mornings, another CHR Countdown show).

WNEW-FM 102.7, listed in Billboard Magazine as an AAA format sounds weak at best, and so are their Arbitrons (a 1.7, I think).

Other area Modern Rockers that continue to sound good are X107 in White Plains, NY and Connecticut's 104-FM (didn't get a chance to hear it this wekend). As far as the absence of Classic Rock in NY, WBAB 102.3FM and WRCN 103.9FM & 94.3FM on Long Island both are sounding pretty good. In Connecticut 95.9 WEFX ("The Fox") has always sounded good, and I've always liked I-95 WRKI (although, I was criticized heavily for stating so once). WPLR 99Rock (99.1 in New Haven) has always been an interesting station; not afraid to play anything, as long as it rocks. New Jersey's WDHA 105.5 FM is still playing new and old album rock.

Rumors continue to fly that Evergreen will be taking NYC's only country outlet 103.5 WYNY-FM away. On Long Island, however, WRNC's sister station, daytimer WGSM 740-AM is playing "Todays Country Hits".

Ken E. Norian wrote the quoted material below:

" I guess having been part of several radio stations that no longer
" exist, it was particularly poignant to listen to WPAT (Patterson, NJ)
" serving the New York area in its last hour.

For about 10 years in the 1960s WPAT owned a station in the SF Bay Area, KPAT (now KBLX and KVDO). It was said to have been formatted in exactly the same way as WPAT. Some things I had noticed were tempo sweeps where tempos would build and fall among groups of songs. Often, different versions of songs were played back to back. Different dayparts seemed to have different styles. I thought it was quite good. I don't believe it was ever successful here, but at the time, the AM was 250 watts and the FM was on a tower at sea level, so coverage didn't match other stations. I think that given a better facility it might have worked here, too.

From: ehelvey@crosslink.net
Message-ID: <4e1u9o$m9g@vixen.cso.uiuc.edu>
Source record: 26765

I have gone digital and and down-sized my project studio so the following pieces of equipment are now surplus:

TASCAM M208 mixer, 8 in (mic or line), 8 tape in, 4 out, stereo out, foldback out, effects out, effects return, pfl, 100 Hz, sweepable mid-range and 10KHz EQ on each position, mic pad, adjustable mic/line gain, slide faders, monitor out, 4 VU meters (not LED's), and unit can be table top or rack mounted. This mixer has never been on the road, I've had it about five or six years, it has never been used commercially -- only in my little project studio -- probably used a total of 25 to 30 days a year. It is mint. Manual is included along with the rack mounting adapters. Asking $400.00 plus shipping.

APHEX AURAL EXCITER Type C, two channels, adds brilliance and presence to live or recorded sound, MINT. About five or six years old. I bought it new, took it out of the box, put it in the rack, used it about the same amount as the M208 mixer and removed it from the rack and put it back in it's original packaging with the manual.
Asking $125.00 plus shipping.

DAK1 (by BSR) single ended noise reduction unit, two channels, reduces tape and system hiss and similar noise from recordings, adjustable threshold and frequency. MINT condition. I bought it new about five or six years ago put it in the rack (it uses one rack space, however, I do not have rack adapters for it), took it out of the rack and put it back in it's original packagining with the manual.
Asking $75.00 plus shipping.

FURMAN PB-40 patch bay. 40 patch points (this strip is missing two positions and has been modified to provide a common two track record bus on about eight positions. Jacks are 1/4" tip/sleeve on the front and back of the patch bay. It is in very good condition other than the items mentioned above. It requires one rack unit.
Asking $50.00 plus shipping.

HARRIS/AIWA XD-001UH DAT RECORDER. Older unit. Cosmetically it is very good. It seems to be operating fine except it will occasionally drop out for a fraction of a second on playback. It records fine. I bought it second hand. I do have the, hard to come by, service manual as well as the operation manual. Although originally sold as a professional DAT to radio stations it does have SCMS protection circuitry. Due to moving to a much, much smaller home (I work at home) and going all digital I bought a new TASCAM DA-P1 to replace this much larger unit.
Asking $400.00 plus shipping.

TECHNICS SH-9010 PARAGRAPHIC EQUALIZER. This is a rack mount unit built by Technics as a high-end prosumer equalizer. I bought it second hand. The

original carton is with it, although the original packaging is not. I also have the manual. The unit is almost mint. It provides five bands of adjustable frequency and bandwidth EQ, +/- 12 dB on each of two stereo channels. It has an EQ in/out switch for A/B comparisons. It is built like a Sherman tank, solid, heavy and gutsy. I haven't used it in about three years, but it was working fine when I pulled it from the rack back then.
Asking $225.00 plus shipping.

AMPEX ANALOG STUDIO RECORDER: Attn all you analog lovers, if you've never owned an Ampex, here's your chance. This unit consists of an AG-350 transport, the second generation of the classic 350/351 transport, a 3 speed, reversible, Beau capstan motor (wired for 3.75, 7.5 and 15 ips, however the reversible feature is not currently wired). The electronics are the original, classic Inovonics 355 stereo record, play, selsync electronics (both channels mounted in one 3.5 inch rack unit). The model 900 power supply is included. The entire package is mounted in an Ampex AG-440 roll around, studio console. Of course, the machine accepts 10 inch reels and has two track 1/4" heads. I haven't used the machine in at least three, maybe four years, but before moving it to a new storage location, I ran a 15 ips MRL alignment tape on it -- and without tweaking it, it met original factory specs. I recorded tones on it and the record response was within factory specs. It's a great machine for editing, too. This is not a UPS shippable machine. So, it would be best if you could come pick it up, or it will have to be shipped by some kind of truck. Documentation is included on the transport, the electronics/power supply and the capstan motor.
Asking price $600.00 plus shipping.

SONY PROFESSIONAL AUDIO CASSETTE TRANSCRIBER. This is a heavy duty machine designed for court transcribers and manuscript transcribers. This is a fairly old machine but, built like a tank. It includes a telephone input, mic input and has a foot pedal that starts, stops and backs up the tape. It also has variable speed. This particular machine actually came out of the White House where it was used to transcribe President Reagan's, George Bush's and Supreme Court comments and proceedings. It's in decent condition but could use some routine maintenance. Asking price is $75.00 plus shipping.

CANON FAXPHONE 50 FAX MACHINE. I threw this in this list just incase anyone is in need of a nearly new, stand alone fax machine. It is about two years old but, was only used for about a year. It is in its original packaging with manual. It uses 328' rolls of thermal paper (two new rolls plus what is in the machine are included). It features a paper decurler, sheet cutter and 10 page document feeder. I now have a plain paper fax and a fax modem in each of our three computers -- we are over-faxed, and we use e-mail for much of what we used to fax. Asking price $250.00 plus shipping.

Source record: 26770

"Anybody define...'motivational format'?"
I've heard people describe it as "all Tony Robbins, all the time." That's an exaggeration, but there are a few stations especially in Florida and California who are either buying programs from folks like Robbins and Les Brown and running them; excerpting little bits and pieces of their tapes and classics from people like Earl Nightingale and playing them in rotation like top 40 songs (with stop sets of spots advertising other self-help tapes); or brokering out chunks of time for motivational infomercials from people like Robbins, Barbara DeAngelis, Fran Tarkenton, etc.
We keep hearing someone's going to take a rimshot station in our market in that direction, and other rumors about struggling stations in the Northeast and Great Lakes occasionally include that kind of format as well. But it never seems to happen. So far, this seems to be a limited phenomenon confined to the South and Southwest. I don't know what makes those areas of the country more likely to generate this type of format. I also haven't heard about whether or not these stations do any better than other marginal stations brokered to preachers, snake oil salesmen, or whatever...

It's very simple. Send it Certified Mail.
You get a signature of who received it.
Make sure you have the Producer's Name on it.
If they do not get the package, ask to speak to the General Manager.
Chances are, if mail coming in is being stolen, so is
Station Property. The GM will be glad to know who to fire.

Rich,

You missed an important point here. My radio is playing right now, as it was the other night, when I mentioned Still, which was playing as I wrote. My radios are operating an average of 5 or 6 hours a day. That may not be "all day," but I really can't believe it is "insignificant." My point was that 100% of this listening is to non-commercial radio.

The post I was responding to referred to WBUR, which is a non-commercial Boston station. I, for one, would be interested to know the standings of the non-commercial stations in this are.

Additionally, since you've brought it up, just what justifies selling "partisan hate?" I grew up during WWII and was led to believe that one of the war objectives was to silence "partisan hate." If I had young children, my radios would be under lock and key. My children are quite grown, and I'll assure you that they aren't doing "partisan hate," either in their public or their private lives. Does your bank account really justify promoting a negative view of the country you live in and the people who populate it?

Dave Ross produces a M-F current events/humor feature for CBS Radio. It runs 2 minutes (incld. a :30 spot). Very funny and often insightful stuff. If your local CBS Radio afill. doesn't run it, call and ask them to add it.

DK>I guess that some talk show hosts have trouble controlling their emotions
DK>to the point that they are performing in a rude manner.

I disagree. Talk Show Hosts worth their salt control their emotions
precisely. The appearance of lost control is an art that gets ratings.
Any host who loses control is a poor performer.

Rich

DL>Years ago (and no, I'm not advocating for a return to the 'good old
DL>days'), talk radio was a form of discourse. There was an expert, and
DL>an exchange of ideas. Name-calling and insults were not usually
DL>acceptable, since the purpose was to express different points of view.

Donna,
I guess you never listened to Joe Pyne. Even though his show would
be considered acceptable discourse in church, today, he was quite a
rogue in the 60's & 70's. Today's "Hot" Talk Radio owes a lot to Joe.

DL>In the present day, as ratings become even more important than ever and
DL>stations feel they must do whatever it takes to make themselves stand
DL>out above all the clutter (and all the other choices, like TV, VCR,
DL>video games, etc), the end seems to justify the means. Somebody in
DL>radio-land got the idea that 'shock-radio' and a barrage of insults
DL>is what works. As a result, there is little discourse.

Actually, broadcasters found that listeners would listen to this
stuff and write that fact in a diary. They found that "proper
discourse" got them ratings that would embarrass public radio.

DL>there's a strange sort of catharsis about it. But somehow, the fact
DL>that G. Gordon Liddy and his ilk feel free to say the president and his
DL>wife are traitors deserving of death, or assorted racist talk hosts can
DL>now use the "N" word with impunity or talk about the assorted conspiracy
DL>theories doesn't make me feel any better. I'm a radio consultant, and
DL>a former talk host too, and I realise you need a 'shtick' to succeed,
DL>but why has nastiness become that shtick in all too many markets?

Again, it gets ratings. As I've said before, there's no more sure
thing for numbers than bashing the President and First Lady. Right wing
radio has all the best bets for success - conspiracy, paranoia, hate,
nastiness and a belief that anyone less fortunate than Steve Forbes or
Newt Gingrich is sucking the rest of us dry. It's radio that lays
blame. It means that I can listen and know that "I'm not one of those
_____ (fill in the blank) Libruls destroying the country." It's so
simple. If I disagree with you, then YOU must be a Liberal. "Liberal"
is a catch all pejorative. It works like a charm.

DL>more consolidation of ownership and more syndication, I wonder what
DL>chance we have for a return to intelligent conversation on the air...

Zip.

OK, so what's the real poop behind 620's dropping of the "entertainment" format? I know the ratings, over all, were slipping but this type of radio was great. Was there a change in ownership? Christ, the last thing Tampa Bay needs is another news or sports talk station. I find it hard to believe that, in this market, more people are listening to sports, with the Buccaneer situation and all.

Sure, 87% of the "entertaining talk radio" programs were crap. It was the other thirteen per cent that I miss. You had a certain few people that busted their asses to make it work, namely Bennington and Lassiter, but the rest was pretty much just vocal wallpaper.

Still, I miss it all. Maybe some other sap station will take a chance. I happen to believe that creative radio isn't dead in the '90's.

E-mails welcome,

Pisces

* New Player in Town...:

As of last Wednesday(1/18), the new kid behind Boston's radio dial is
Evergreen Media Corp. Texas-based radio chain took over all of 12
Pyramid's stations around the country including
an FM duopoly and one AM station in Boston (WXKS-107.9FM "Kiss 108",
WJMN-94.5FM "Jam'n 94-5" and WXKS-AM 1430).

The $306.5 million deal which was first announced 6 months ago,
makes Evergreen the nation's third largest radio broadcaster with
34 stations. Pyramid's CEO Richard M. Balsbaugh, who began Pyramid
with WXKS 107.9FM back in 1981, made about $30 million from
this sale. Balsbaugh is vowing to get back into the Boston radio
business. But dont look for Richie anytime soon. That's because
as part of a non-compete clause included in the final sale of his
stations, Balsbaugh has to wait at least 1 year before he can look
for any kind radio work in 13 markets where Evergreen now owns stations :
Boston, Los Angeles, New York, Chicago, San Francisco, Washington, D.C.,
Dallas, Philadelphia, Houston, Detroit, Miami, Charlotte and Buffalo.

Even after a year in exile, Balsbaugh's re-entry
into the Boston market as an independent operator will be close to
impossible. Boston is now a corporate playground for such
heavyweights as Infinity, Greater Media, Granum, CBS Radio,
American Radio Systems and now Evergreen. Most of them already
doubled up on the FM dial. In Evergreen's case, it expects to have
a triopoly in Boston once the new federal law relaxing ownership is
passed and the $34 million acquisition of WCLB 105.7FM from Fairbanks
can be completed.

No immediate format/on-air changes are planned for both
WXKS 107.9FM and WJMN 94.5FM which in the just released fall
Arbitrons for Boston were the top 2 stations in 18-34 demo.
However, Kiss 108 kept losing listeners across the board while
Jamn 94-5 continued to grow...As far as management goes, for now
Matt Mills stays on as the General Manager for both WXKS and WJMN...

* 50,000watt Correction : In my previous BRW update(1/10/96), I said
that Fairbanks' WKOX AM 1200 already received the FCC approval
for its power upgrade to 50.000 watts. As of now, that is not
the case -- 'KOX is still awaiting FCC's decision, though station's
management doesnt expect any roadblocks.
[Next Boston Radio Watch will include the results of
Framingham Selectmen's meeting scheduled for next week to
review WKOX's plan for power upgrade]

* American Radio News :

Boston-based American Radio Systems, keeps making more news off
the air. On January 12th, the company, which went public last June,
has filed a registration statement with Securities and Exchange
Commission covering its proposed public offering of over 5 million
Class A Common Stock. ARS will use proceeds from the stock sale
to pay off its outstanding debts. Some of that money will also
go to acquire more stations in markets where ARS already owns
radio properties, including Boston.
Here, ARS has an option to buy all business WBNW AM 590 from
Back Bay Broadcasting.

Also, as December was coming to a close, ARS also announced that
it was pulling out of a potential deal with another Boston-based
company, Marlin Broadcasting. ARS and Marlin had a complicated
a stock swap/land deal on the table as the result of which ARS
was going to end up with Marlin's classical music station in Philly
and Detroit. That deal is officially dead.

* Programming Notes :

- CBS Radio Group chose Ted Jordan from its owned+operated
Pittsburgh's KDKA to become the new General Manager at WBZ AM 1030.
Earlier this month, former 'BZ GM Ed Goldman left that position to
head CBS' AM stations group. Jordan, who starts on January 29th,
got his start in radio at WBZ-AM back in 1975....

- WBZ is not the only station with new GM. Crosstown rival WRKO AM 680
also got a new boss in the house. And, he is no stranger to the market
either. ARS brought up Brad Murray from its Baltimore AM/FM stations
to fill a vacant GM spot at the all-talk station. Murray was with
the old WHDH AM 850(new WEEI) back in the late 80's.

- The new permanent morning man at 70s Hits WEGQ-93.7FM is finally here.
Gary Craig, a veteran of Hartford radio scene(WTIC-96.9FM and WKSS 95.7FM)
now wakes up Eagle 93-7 listeners every morning with 'Eagle Morning
Crew'(yeh, very original title...:-)

Speaking of other related WEGQ-93.7 stuff. That station has been
running promos for its sister AM station -- all sports WEEI AM 850 :
"For 70s hits it's Eagle 93-7, for all sports it's SportsRadio 8-50".

Speaking of 'EEI, the station's overall numbers came out flat
in just released Arbitrons. However, its target audience -- males
25 to 54 -- is up in every part of the broadcast day : Imus is
#1 in the morning; the midday combination made up of ESPN's
Fabulous Babe(10am-12pm) and 'EEI's own A-team with Dale Arnold
and Eddie Andelman is now #3 overall(#1 on AM dial; it beats
Jerry Williams and Rush on WRKO); And, the Big Show with PD Glen Ordway
during afternoon drive is ahead of Howie Carr Show on sister talk
station WRKO AM 680 among all males 25-54....

WNEW's news sounder was a single-pitched warbly tone, as if the phase were oscillating. If I were to mimic it with my voice it would sound like were saying AH-OO-AA-OO ... at about 2 cycles per second.

I would love to hear it again. Actually I have it on tape somewhere, but finding it will be a chore.

I'd say that they aren't totally right, anyway. I have been consistently surprised when friends who identify their musical taste as "current alternative music" get excited when they hear an old 70's pop song. You wouldn't expect an alternative rock fan to get excited upon hearing "I Can See Clearly" by Johnny Nash, but it does happen. Whether these folks exist in large enough quantities to make a station playing old disco and pop music is another matter. But unless someone is willing to try, I don't think we'll ever know. Who knows? Maybe the next big music format will segue old Carpenters songs into the latest by Oasis...

CKO did that everywhere! I went to the toronto office one night to see a friend who was operating the board. They had about a dozen carts, one for each market, with the local spot for that station. The guy hits one big TAKE button and they all start simultaneously
Talk about a strange setup! As for the format, 680 is VERY different from cko. Think of it as a local version (on radio) of CNN's headline news. 20 Min. rotating cycles of local, regional, national news with drop ins of business, traffic, wx, etc. I like it (but I'm biased)
and many folks i've talked to like it as well but they all complain at first about the 20 min
cycle, saying its "monotonous, and the same news over and over again".
I keep telling them YOUR NOT SUPPOSED TO LISTEN TO IT CONTINUOUSLY
ALL DAT! Its ment as a service. You tune in, get the news and tune back out.. several times a day maybe. As for hiring local talen, when they went to this forma, 680 kept most of their
existing news staff and picked up LOTS of experience from other local stations around town and from across the country. Takes lots of people to run this kind of operation...this is, of
course if Rogers plans on doing the exact same format as in TO.

The one tounge twister that I have to deal with is when I fill in for the morning man at WBAZ, Southold. It's a live spot for Sofa Express. The line goes, "even if you don't need a sofa or armoir..." the last three words always come out sounding like "sof-am-wa" I tried to convince the higher ups that having the words "You don't need a sofa" in a spot was really bad copy in an attempt to get them to change it but I was informed that the sofa express people are really sticklers for their copy and that's the way they like it. Sigh.

One other weird slip I made one day was when trying to say "some drizzle possible" in a weather forecast. I coined the new word "drizzable." I already copyrighted it so each time you use drizzable on the air please send me five cents in royalties, thank you.

ABSOLUTELY RIGHT!!

I have had this debate with the Chief Engineer of a NYC "Light" radio station. Programmers of these formats continue to hold that keeping the compression down helps listeners stay tuned longer. They claim the compression encourages passive listeners to reach for the volume and turn it down.

Nonsense.

Unless you are a classical music programmer, all you do by backing it down is make your station sound weak. And, weak IS the word. If the station does not sound loud, average listeners will keep going to the next "strong" signal.

In NYC compare the sound on WPLJ and WMXV. MXV has sounded low and hollow (due to lack of compression) for years (new P.D. Steve Weed seems to be changing this..but..). Scott Shannon at PLJ has always been a believer in compression. Now, I realize there is a difference in music, but there is also a huge amount of overlap in their playlists. Who do you think the average listener will pick given a choice (most likely from their car). A strong sounding station or a weak sounding station. Its a no brainer!!!

Keep the compression UP!!!

Donna Halper wrote the quoted material below:

" I'm a radio consultant, and
" a former talk host too, and I realise you need a 'shtick' to succeed,

I disagree. I can think of many radio talk show hosts who succeeded without schtick, and did so for years. Sally Jessy Raphael, Tom Snyder, Gil Gross, Larry King, etc. Sally was on NBC Radio's Talknet from 1980 until the early 1990s I think, then moved to ABC Radio for a few years, did a good show, was usually carried in good time slots, and did nicely for herself. Dean Edell is on 600 stations and he doesn't have schtick. Nor do Laura Schlessinger or Joy Browne. Weekend financial host Bob Brinker (Money Talk) doesn't use schtick either.

It seems that schtick is used mostly by marginal people who don't last very long, the Morton Downey Jrs. of this world. The only successful schtick artist I can think of is Rush Limbaugh.

richwood@commspec.com wrote the quoted material below:

" It's tame. The real New York Bob Grant would have said: "Get off my
" phone, you scumbag." Or made reference to an Arab taxi driver as a
" "towelhead." Or, muttered some pejorative in Italian. He used to refer
" to David Dinkins, a black former New York Mayor, as "a washroom
" attendant."

For generations we San Franciscans looked to New York as our guiding light. We wanted our opera to be as good as New York's. We were overjoyed when the New York Giants baseball team came out to live in SF, not because they were any great team, but because they were from New York. We have so long compared ourselves to NY, and then suddenly one day NY fell apart.

People from SF go to NY and say how terrible NY TV news is, how awful the talk shows are, how the streets all smell of urine, and how the place has a scary hate-filled core to it now. It's really so sad to know this is happening to what was once the premiere American city.

It may be that our political activism is what is saving us from the same fate. If a hate-talk host were to call someone a towel-head you could bet that boycotts would be organized, pickets would march, and the station would get rid of the bum. Not idle threats, our political activism has indeed brought a lot of change to the landscape. Hate radio just doesn't make it out here, perhaps because people here realize that it's a stupid tactic designed to divide people. WABC may be #1 with their hate radio format, but co-owned KSFO here is way down at #30, and they've been easing away from their hate talk little by little.

Let's hope that across the rest of the country people begin to realize that the corporate interests that fuel hate talk see it as a cheap way to get listeners; and let's further hope that more people don't take these shows seriously, or the rest of the country will become as nasty as New York.

As of today, Music Choice [formerly known as Digital Cable Radio] is only available via cable and the DIRECTV digital satellite system. We're always looking for different avenues of distribution and are currently working on a bunch of them.

Bill, as for the seperate DMX receiver, you can get a DSS setup, for the same price as the DMX box. Then you have to add in the cost of the C-Band antenna [providing you have the space]. Sure, there may be more formats up there but is quantity better than quality, particularly if a lot of the formats are ones that you'll never end up using?

Regards,

Ron Yurman
Senior Manager - Broadcast Operations
Music Choice
ron@musicchoice.com

[Moderator's Note: Ron, my main reason for saying that DMX is a better service is not because there are more formats (although that is a good point too) but because of their DJ remote that lists the titles and artists of the selections. On an 'announcerless' service like yours and DMX, that is important, IMHO. Bill]

RE the old midwest (Chicago/Milwaukee) dragstrip spots which ran on WLS, the late, great WCFL, WOKY, etc: Those (for Great Lakes Dragaway, Union Grove, Wisconsin) were produced at WOKY/Milwaukee in the late '60s and early '70s. The voices were Bob Betts (WOKY News Director) and Gene Johnson (a WOKY part-timer and old Storz guy). They used to disappear in to the production room every week and yell their guts out. The results were classic (and the out-takes were even more classic). I was a news guy at WOKY at the time (under the name Doug Harmon), and worked for Betts.

I worked with a jock in Dayton, Ohio (WDAO) about 25 years ago named Long John Silver (I forget his real name) who was legally blind. He could see, but not well enough to get a drivers' license. We used to type copy for him on old-fashioned speech typewriters and he still had a hard time seeing it, but he sounded great on the air. He went on to work at WOWO in Ft. Wayne and, I believe, did a stint in Chicago before going back to WDAO. I last talked to him about nine years ago...he was still working there (although the station had wound up on a crappy little AM signal after a frenzy of buying and selling in that market.)

If you will notice, these people are not on the air anymore. The medium is changing from stodgy, guest-oriented radio to slicker, personality (and ego) oriented radio. The medium seeks to engage the listener, to polarize them. Today, a good host lets his opinion on a topic be known instantly, and then has to defend it. The days of being able to sit in the middle on a topic (with very few exceptions) are over.

>Dean Edell is on 600 stations and he doesn't have schtick.
>Nor do Laura Schlessinger or Joy Browne. Weekend financial host Bob
>Brinker (Money Talk) doesn't use schtick either.

All of these hosts have specialty shows, and their audience is not as large (and ravenous) as someone like Rush. Dean Edell, for example, is part of the Rush Limbaugh package. Most often, if a station wants to carry Rush, then they have to carry Edell as well. That kind of package would boost anyone's numbers.
Bob Brinker is part of the ABC network, and I know that the only reason the station that I work at takes his show is because it is cheaper (and easier) than filling a time slot on the weekends.

>It seems that schtick is used mostly by marginal people who don't last
>very long, the Morton Downey Jrs. of this world. The only successful

I must disagree. As a talk radio producer myself, the schtick is an act used to draw attention to yourself when the airwaves are over-crowded with a million gabbers. You need to do something to get the attention of the audience, then they can decide whether or not to keep listening.

I'm currently transcribing an interview, and need to verify a few broadcasting-related facts. It's an old interview and, because of the quality (or lack thereof) of the tape, it's especially difficult to hear the calls and tell which letters are being said. I'm hoping some of you will be able to confirm some of the below information. All references are from the late-40s and early- to mid-50s.

The subject of the interview refers to a Hartford, Connecticut-area school where he learned broadcasting in 1947. Sounds like it might be the "Randall School." Anyone know of this school and the correct spelling of the name?

He refers to a Hartford, Connecticut station: WCCC. I just need verification on that call.

He says the above station was in a hotel. It sounds like it might be the Hotel Bond, but I can't be sure. I know the hotel was destroyed many years ago.

Here's a tough one. He says the above station was owned by brothers who were jewelers in the Hartford area. The Savid Brothers? The Sabit Brothers? I figured I'd toss this one out to see if anyone knew; if not, the reference will be edited out.

Refers to a radio station in the Greensboro (or Burlington), NC area: WFNS. I just need verification on the call letters.

Says he worked in the "tri-city area in upstate New York for the first Lowell Thomas station which was a UHF network, WCBA, -B, and -C." I just need verification on the middle letters of that sequence. CB? CV? ZB?

Thanks for any help you may be able to offer.

Regards,

Jason Roberts

Source record: 26720

Sorry if I'm responding late to this thread, but I've been on away on vacation...
I've been doing children's call-in radio since 1983, when the original hosts of WNYC's Small Things Considered walked off in a snit 15 minutes before airtime. The local Small Things Considered begat the national Kids America, heard in 26 markets through (then) American Public Radio, then cancelled on Christmas Eve, 1987 for lack of funding from the Corporation of Public Broadcasting (and lack of commitment from WNYC).

On January 4, 1988, KID'S CORNER was born on WXPN in Philadelphia. It's a daily, live, one-hour call-in show for kids. Following a 3-month test period, the show has been financially solvent and a moneymaker for WXPN. Our funders (remember...this is public radio) have included McDonald's, banks, the Philadelphia Phillies baseball team, local realtors, and listener contributions, among others.

Does children's radio work? You bet it does. KID'S CORNER has been a ratings grabber among adults and continues to rake in bucks for the station. Would it work on a national basis? I believe so. Would it work on commercial radio? In a heartbeat.

To follow yet another thread (the one on rude talk shows), the greatest joy about talking to kids on the radio is that they aren't prepared to be confrontational. The callers are seeking information, sharing information, and are genuinely interested in the guests.

It seems that others are looking at the potential for kids' radio as well. If you're in the DC area, check out the Radio Zone stations. These are Radio Ahhhs affiliates with a huge local identity, thanks primarily to a brilliant morning show that appeals to all ages.

>
> OK, but keep the distortion DOWN!!!
>
> Quality audio *will* attract quality listeners.
>
>
> William Pfeiffer - (wdp@airwaves.com - airwaves@dialnet.net)

Jim Schulke, who ran the most successful beautiful music syndicator in the 60's and 70's, always maintained excessive compression was a fatigue factor which decreased time spent listening. In fact, equipment specs and settings were written into many of his station contracts.

With TSL levels dropping practically everywhere except in ethnic radio, he may have been on to something.

What are "quality listeners"? The yuppies with $3000 car stereos in
their Lexuses? Why would a station prefer to attract them at the expense
of the great unwashed with their tinny factory stereos, or at best some
cheepo Clarion? Granted, there are limits to compression, and the larger
the market the more these limits seem to be exceeded. Uncompressed
audio, while sounding good at home on an audiophile system sounds AWFUL
in the average car. Why? Road noise, traffic noise, loud passages too
loud, soft ones inaudible. Ditto for work environments, listening at the
beach or even working in the yard.

Lotsa people have gone broke programming for the audiophiles. I think
the average GM would rather see a 5 share of average listeners than a 1
share with "quality" listeners. Whoever they may be.

STeve
one of the great unwashed, pass the Right Guard

WNEW did have a time tone before the sounder, (which is still in use on Juke Box Radio, 103.1). It disappeared sometime in the 1970's when they stopped simulcasting the news on WNEW-FM. The time tone was used as the cue for the FM to cut in since it was never heard on FM. There was always this 1/2 second gap between the tone's end and the sounder, and the FM would still cut in late most times. Had it not been for the simulcast, the tone would have been dropped years earlier like all other stations did when WU stopped providing their time service.

WNEW-TV also had a time tone during the 1950's. I vaguely remember that it was never in perfect sync with the tone I heard on the radio my mother would be playing in the next room. It lagged or led by 1/4 to 1/2 a second and was a hair longer than any other radio or TV station's tone. It had an electronic siren type of quality, so it could have been a squared or triangular wave. It sounded like 400 Hz.

One weeknight, I guess it was the fall of 1958, I think I was 10 years old, the tone went on at 7:00:00 as expected, but then it began repeating at :00:01, :00:02, :00:03, :00:04, :00:05 and by :00:06 the board op faded it out, never to be heard again on channel 5.

I imagine today that it probably was controlled off a sycronous clock motor turning cams and hitting the appropriate switches wired in series, probably with one going at 60 RPM so you could control the duration of the tone. The 1 RPM contacts must have jammed.

I do remember it well, I know I was sitting on the floor in front of our 1953 vintage Freed-Eissman TV, which we dumped in the early winter of 1958-59.

Not only that; I just saw a list somewhere (on the web) of
the 10 top _billing_ stations in the _country_, and it was
in the upper half of those! (No modern rock -- alternative --
station was on that list. The top billing station listed was
WFAN NYC -- sports, right? One or two oldies stations, like
KRTH(FM) LA, also made the list.)

Has anyone ever noticed that right-wing talk show hosts and their politicians can bash the poor, pick on women, children, the very old, gays, and anyone else they deem to lack values and it's all Ok. But when a left-wing talk show host gets on the air (myself, Tom Leykes) and stands up and says enough and prove what your saying OR gets down and dirty we're rude!

Well I hope those of you out there who are so infected with ideological sickness that you can't see the shore out of the fog better know that things are changing and people are starting to wake up. I am number ONE in my time slot adults 25-54 AND I'M LEFT-WING and I'm in this country's third largest market. And even if I wasn't number one it wouldn't matter because heap enough crap on people and they have a tendencey to stand up and fight back. It's radio and nothing more, but sometimes it cuts very close to life, and I'm sick of the right-wing hate mongers and animals who do nothing but complain.

YOU MADE THE RULES LIVE WITH THEM.

Actually, KCMQ's format flip was (from Country) to AOR. Prior to being
Country, it _was_ CHR.

812. Rude Talk Show Hosts

Newsgroup: rec.radio.broadcasting
Date: 1996-01-24 00:00:00 UTC
From: SNOWMAN <jlsnow@fcseng.frco.com>
Message-ID: <4e3vtr$pv7@vixen.cso.uiuc.edu>
Source record: 26728

Ed Nielson wrote about the rudeness of some talk show hosts. To which I say:

Yes, some are extremely rude. In some parts of the country, I think rudeness is a way of life; actually entertaining to people. They are rude themselves and so don't feel upset when someone is rude to them.

I think Bruce Williams is rude. He starts off very nicely and, usually, by the end of the conversation, he is using an obviously condescending and impatient tone of voice. He must just have good practical insights or I would think he would be history by now.

Other rude offenders include liberal windbags such as Tom Leykis, Larry King and the guy on WLS late at night. Never listened long enough to get his name. His on-air presentation is so obnoxious and sarcastic that I have never stuck around long enough to figure out his real message.

Rush, on the other hand, is not rude. He IS outspoken and opinionated, but I've never heard him hang up in a huff. He is engaging with those who disagree with him. He really tries to win people over to his opinion. That, in my view, is constructive.

My own politics are an odd mix of both sides, and I know there are exceptions to any generalization one might make, but I have noticed that obviously liberal hosts have a tendency to be more emotional and discourteous with callers who don't agree with them. Hmmm... an interesting phenomenon.

Message-ID: <4e3vtt$pv9@vixen.cso.uiuc.edu>
Source record: 26730

And while we're on the topic of 1960s Philly radio...I was speaking to my boss about the wonders of the Internet and how I subscribed to a couple broadcasting news groups. I told him what a wonderful exchange of information they were and how many times people are locating and/or attempting to locate jocks from years past.

He was interested in this aspect and asked that I try to locate/find out what happened to some people in Philly his father used to work with. My boss' father is the late Joe Conway, Sr., who managed WIBG for many years. His son - my GM, Dan - is interested in tracking down a couple of his father's old jocks: Joe Niagara, Hy Lit and Bill Wright, Sr. Anybody know what happened to these fellas?

I appreciate your help!

>
>
>Here's how 2 local stations do car giveaways. Give away a key an hour
>for an extended period of time. Then have all of the winners show up
>for a "Listener Party"...

... and try their key in the lock.
Having done this one a couple of times. 1: The lock won't handle to intense forcing... get yourself a rope, plastic covered chain or similar, and use a heavy duty padlock. 2: Try all keys first yourself to ensure only one key fits... it happened to GM in NZ with launch of Holden Vectra, potentially cost them 10 cars, not sure of the final outcome however. 3: Hope that the lock doesn't open for the first or second contestant. Fate, or the Fairy God of Radio Promotions, generally intervenes and the prize will last... at least it did twice for us.

As well as phoing in to register for the draw for a key... make registrations possible at sponsors store/business, plus have the car on display at their store for a day. Client involvement and ad schedule helps offsets cost of car, and promotion creates foot traffic, have to go in store to register for the draw to win a key and a chance at the car, so sponsors are happy, everyone is happy 8-)

After nearly 30 years announcing and programming in North and South Carolina, I picked up an MA and began teaching the biz at a university. I later got my Ph.D fromn the Univ. of Kentucky so that I could keep my job. After a mild heart attack a couple years back, it seems the school doesn't want me around anymore--which is just fine because I yearn to get back into the radio business. I am no egghead and am well aware that degrees don't impress--even scare away the powers that be in the industry. Market choices are up in the air although small and medium are (were) my forte. Any ideas on how to break back into the work I really love? I'm here for another year if I like, but I can make a break soon with contract renewal. Another thing--I'm not naive--I know that the bottom line is what counts. Thanks for any input--I'm 55.

Since XTRA 104 in Washington was cited as an example of how the 70's format can work, I must point out that WXTR has a 1.2 share !@+ and a 1.4 share in Adults 25-54 in the current Arbitron. Meanwhile Classic Rock leaning rrow 94.7 had a 3.0 share in Adults 25-54. It may not be in the top ten but it has DOUBLE the audience of XTRA. Bo Donaldson and Paper Lace records??? You MUST be kidding. They didn't call it DISPOSABLE Pop for nothing.

Hi ! I'm looking for an old friend from back in my Air Force days (during the end of Vietnam). His name is Dave McAlary. I'm not sure of the spelling, but I think it's close. While we were in San Antonio together, stationed at Lackland AFB he worked part-time at a SA c/w station with the air name of Tom Wayne, I think. He's originally from the Boston area.

If anyone knows Dave, or knows of him, or if he happens to be on the Internet. I'd really like to find him after all these years. I can be e-mailed at ehelvey@crosslink.net or called at (540) 869-8470, ext. #5.

Thanks to anyone who can help me find Dave.

Here in Static Island, NY we get WHTG-FM (Eatontown, NJ).

Besides being a better modern rock station than all the "me too"
stations in NYC, they have a show called Local Licks, featuring NJ bands.

I think you can still hear that on KNX in Los Angeles. Where it *really*
seems hokey is on TV, and KTVU-Ch 2 (fox) here in the Bay Area uses a canned
teletype sound through their entire 10 O'clock News. (Apparently it doesn't
hurt their ratings; they brag about being the "#1 prime time newscast in the
country.")

Really now, when was the last time you saw the type of machine that made
these sounds in a broadcast facility??

Denny's morning show at WVKS isn't particularly music-intensive...but it
is a bit more morning-zoo-like than one would expect WLS to be interested
in. A bit of a jump from Toledo. Plus, WVKS had good numbers _before_
Denny. And his career has been mostly CHR and AOR, including Grand Rapids
and Minneapolis (WLOL/CHR).

WMCA manually used a gong. They tried to do it in sync with the WU clock,
but later they just waited for the record to finish or the announcer to
finish the station ID. The gong then became the news attention signal,
they would ring it 5 or 6 times fast for a news bulletin interruption.

WMCA continued to used the gong even after WABC created their "chime time"
gong after every record, (actually a recording of the boxing ring bell at
Sunnyside Garden arena).

830. Pitch vs. Speed

Newsgroup: rec.radio.broadcasting
Date: 1996-01-24 00:00:00 UTC
From: robert573@dallas.email.net
Message-ID: <4e3vtr$pv8@vixen.cso.uiuc.edu>
Source record: 26746

With all this talk about speeding up music and pitch... if my understanding on this is correct, any tape deck, turntable, CD player and DAT machine with pitch control, WILL change the pitch...

My understanding is that Pitch and Speed are actually two seperate aspects of audio, even in the digital domain.

As I understand it, if you want to increase speed without affecting pitch, you'd need a pitch shifter...

Radio Shack sold a portable cassette recorder that had both pitch control and pitch shifter, which would allow you to speed up the audio and maintain perfect pitch at the same time.

If I am wrong about any of this, someone please correct me.

Now, I have one last question.... why is it that everytime I listen to a song, after I wake up in the morning... the song always sounds faster than it should be, even though the pitch is fine? I mean, I get this effect on any song I listen to, on any source (radio, tapes, CD's, etc...)

Anyone else notice this, or is it just me? <grin>

[Moderaor's Note: Maybe your brain is just in slow motion that early and everything seems fast. That is the case with me, at least <grin>. Bill]

I miss CKO, especially because I used to listen to Ted Tevan and Pat
Burns. Being from Montreal, I remember those voices all too well from my
youth!

I op at CHWO Oakville. I normally work Earl Warren's Saturday monring
show but occasion I get to work with Jimmy Tapp (another ex-Montrealer,
and voice from my youth - Hercules!). Last time I was talking to him,
Jimmy told me that Ted's back at 600 in Montreal, but he hadn't heard from
Pat in a while. Is he still out in Vancouver?

time
>Shakey's Pizza kind of look. Classic rock stations don't have this option
>in most cases; besides, most have opted for a somnolent presentation
>reminiscent of the mainline Protestant church services of my childhood.

I don't think the aim of either format is or should be to be foreground entertainment the way a CHR, Hot AC or even AOR/Modern/Alt station is. By being a steadfast, reliable and ultimately familiar place, you can rack up tons of funds by being everybody's second or third favorite button. Sure, they'll spend a big chunk of time with the leading stations, but when they want something familiar, the CR and Oldies stations are always there, and the listeners know they'll hear something familiar and likeable.

Also, one way I've heard CR's getting around the new product thing is by doing "then and now" double-shots. It seems to work well, and - unless the artist has changed substantially - it doesn't stick out like a sore thumb. New Tom Petty blends very nicely with old Tom Petty. As long as "classic" artists are still producing, the format can keep freshening up this way.

From: zoniecat@aol.com
Message-ID: <4e7ibt$5ih@vixen.cso.uiuc.edu>
Source record: 26602

References: <4dg2pd$pf1@vixen.cso.uiuc.edu>

In all the debate (if you can call it that) over the problems plaguing Classic Rock, nobody has mentioned the fact that soon - if not already - CR will be able to expand its playlist a few years. Or maybe it will be a sub-catagory of Classic Rock like the Arrow was supposed to be. Before too long, I see hair bands as acceptable on Classic Rock stations. (After all, they're dead too!)

People now in their late 20s to mid-30s were in the formative late-high school to early-college years (the Glory Days - which is what CR and Oldies are built on) in the early- to mid-'80s. Bands like Missing Persons, 'Til Tuesday, The Motels and many, many more could be heard on AOR. So could Journey, Clapton, Styx, Kinks, etc. So could the early hair bands.

As the older demos begin to drop off the Classic Rocker's palette, they should be replaced (and augmented by, now) the younger end. That's just not happening.

834. Compression (revisited)

Newsgroup: rec.radio.broadcasting
Date: 1996-01-25 00:00:00 UTC
From: csp@w3eax.umd.edu
Message-ID: <4e7ibv$5ii@vixen.cso.uiuc.edu>
Source record: 26603

If compression sounded so damn good in all listening locations/
situations, then it would be a *default* in all tapes/CD's recorded...
Unless you really think that the recording industry is not aware of how
listeners absolutely ...love compressed sound (_and_ the fact that a lot
of listeners listen to in their noisy cars, beach etc), so somebody has to...
tell them! :) [cuz they are 'stupid'!]

Of course, some compression is present in the master recordings (eg. vocals,
guitar bass) but not to the incredible extent that some stations do it!
I'm especially talking about multi-band compression that *constantly*
destroys how the songs were originally intended to sound (by the artist/
producer)

I'd like to hear some feedback on what you think!

Chris

Bill & Allan:

You guys are going at it so hard I don't know where to insert my "quoter"!

Gentleman, I think what you guys are haggling over is actually tied into the characteristics of what causes the audio to sound SO compressed! With a little understanding here, both of you might be able to have a better understanding.

While it is commonly understood that heavy compression creates a "squashed" sound. We should look at what factor is causing the "squashing." I've recently embarked upon some very intend research on this very subject! As a designer of broadcast processors, I went out to hopefully find the "holy grail" of processing answers.

Basically, it's almost all in the deriving of the time constants. Now I'm not saying how much attack versus how much release time is needed. I'm talking about how much attack is needed based upon a change in gain trajectory of a signal, and then also how much release is needed based upon the same principle.

In almost every processor available today, analog or digital, all of the time constasnts operate on a set static set of time constants. Sure, some of them might have a two tired release slope, i.e. Optimod, Unity, but these time constants are basically set for a "generalized" program characteristic. They are not optimized for varying characteristics of program material. This is the tricky part.

So, what's happening in the present form of processors, is that these time constants are being pushed into an area where they don't operating optimally anymore and the I.M. increases in a very big way! I've been able to produce this affect quite easily with our own product, as well as our competitors. (all of them!)

So now the goal is to find a method to have smater time constant algorithms that will provide better quality while at the same time maintain a higher RMS level. This would give both of you guys what you're looking for. Quality and loudness! Stay tuned processing fans for more details on this.....

From: smutt@diversicomm.com
Message-ID: <4e7ic4$5ir@vixen.cso.uiuc.edu>
Source record: 26605

Hello. I'm 17 years old and I am a DJ for a 100,000 watt radio station in Gulfport, Mississippi. I started out in radio about two years ago at a 6,000 watt FM station. I stayed there for a long while learning the ropes. I was then hired at the station I am employed at now. It's format was, at the time, CHR, but then switched to hot country. I quit there and went to work for a 50,000 watt TOP 40 station. I stayed there for a while, but quit and am back where I used to be.

I have been in radio now for a little over two and a half years. I've still got lots to learn, but I am wondering if there's any pros out there who can give me some tips or some "reassurance" that I will get better over time. I'm not the best, but I am pretty good.

My main problem is that I work in a small market and will be leaving for Atlanta, Georgia within the next 6-7 months and was wondering if there is anyone in the Atlanta area who can tell me about the stations there. I know I won't get hired for an on air shift at this time, but I'm just wondering about how long it takes to move up from doing a syndicated show to a part-time shift. The reason I say syndicated is because I don't have a whole lot of experience, and in a larger market, that's probably where I'll have to get my foot in at, which isn't all that bad to start out.

Also, are there any other teens in radio who are trying to get their foot in the door? I'd like to email you and talk about how you got your gig and what you're doing to improve your show.

-Greg

>Thomas station which was a UHF network, WCBA, -B, and -C." I just need
>verification on the middle letters of that sequence. CB? CV? ZB?

That would be the three-station TV network operated in conjunction with
WROW, Albany. The original station lineup was WCDA-TV 41 Albany, WCDB-TV
29 Hagaman (Amsterdam), and WCDC-TV 19 [originally WMGT-TV 71] Adams,
Mass. WCDA later moved to the VHF dial as channel 10, WTEN-TV (after
a somewhat prolonged battle with other stations on channel 10, WHEC/WVET
Rochester and WJAR Providence), and WCDB then shut down. WCDC continues
to this day as a translator of WTEN, serving most of western Massachusetts
and a chunk of southern Vermont from atop Mount Greylock.

I don't know that Lowell Thomas was ever involved, but WCDA/B/C was the
first station in the Capital Cities chain, which has of course moved
on to much bigger things :-)

Oh, and there is indeed a WCCC in Hartford.

841. Talk Shows, the real town hall

Newsgroup: rec.radio.broadcasting
Date: 1996-01-25 00:00:00 UTC
From: SNOWMAN <jlsnow@fcseng.frco.com>
Message-ID: <4e7ics$5k1@vixen.cso.uiuc.edu>
Source record: 26610

Truly, the nature of talk radio has changed dramatically and continues to do so. Typically, hosts now have a definite political agenda; an individual with a cause on a 50KW soapbox. Others in this thread observed that the very nature of politics is changing and that change is reflected on the airwaves. The change is that the country is becoming increasingly polarized between left and right. As this process proceeds, people feel an increased threat from the "other side" and seek assurances from their own kind. That may mean hearing someone say what you have always thought yourself. Typically, conservatives listen to conservative hosts while liberals listen to liberal hosts to obtain that feeling of assurance and companionship. Rarely, if ever, do they tune in the other side seeking moderation. The days of moderation and compromise are past. We are now in the throws of a struggle to the death for domination between two fundamentally competing ideologies.

That war is being waged on the airwaves today with ever increasing volume. Competing factions typically mis-characterize and outright distort the viewpoint of the other side. For example, it has been stated in this thread that conservatives hate women, children and the poor; that, if you're not Steve Forbs (wealth) you're dragging the rest of us down. I have listened long enough and carefully enough to know that the conservative agenda for example, is NOT against poor people; it is against poverty. There is an important difference. If I am poor, and you give me benefits that make it more comfortable for me to be poor and then tell me that you are on my side because you are my advocate, you lie. The result of your action has been, rather, to enable my poverty and remove the impetus to take responsibility for myself and work to improve my own conditions. If someone proposes a tax system that would let me get a job earning up to $36,000 per year and pay NO TAXES WHATSOEVER, and you oppose and villify that effort so you can collect more money and hand it back to me, you are not my friend. If you encourage my dependence with excuses about how I am disabled or disadvantaged and therefore have been victimized and therefore can't be expected to perform well enough to elevate myself, you enable and support me in my weakness and I greatfully give power to you as my savior. But, you are NOT my friend.

You ARE my friend if you let ME keep more of what I earn so I can take care of MYSELF. But then, you would have less power over me would you not..... If I am self-sufficient rather than beholden to you for providing my benefits, is that not better for me?

THE LIBERAL AGENDA WANTS TO TAX AND RE-DISTRIBUTE BENEFITS.

THE CONSERVATIVE AGENDA WANTS TO ENABLE BY LETTING ME KEEP MINE.

WHO IS MY REAL FRIEND?

N O V E M B E R I S C O M I N G

The response has been tremendous. I want to thank all of the folks who have been mailing me, and posting to the group. Just to update you, my radio project is on simmer. I feel that the project has potential, but needs to be strengthend, and the only way to do that is to study the radio sector, people with disabilities, educational structures, and the role of government. Someone asked if my radio project, called THE NATIONAL DISABLED RADIO BROADCASTERS TRAINING PROGRAM, was strictly a Canadian effort. At this point yes, however! if I see that this could be done in the U.S. I will definately come down, and work with whomever wants to hire me to develop the initiative.

In fact I wonder if it might be better to start down south? I also wonder how many stations to date have modified their facilities to accomedate persons with disabilities, in the U.S., and Canada? i'd be interested to hear how it was done, and when.

Keep up the positive work, and feel free to contact me at any time. I am interested in developing a top flight program that will place people, and stations together in solid working relationships down the road.

I expect to have the pilot up, and running in a year, for now I need to number crunch.

From: robert573@dallas.email.net
Message-ID: <4e7ich$5je@vixen.cso.uiuc.edu>
Source record: 26617

I'm doing some payscale research on a certian job position in radio, to propose to my employer (and no, it's not "how much do DJ's make?") <grin>

The position I want to get this info on, is Production Engineer. This of course is the position where the person delegated to that duty, transcribes spots to carts, mixes show theme music with voice tracks, mixes levels during interview tapings, etc...

Whats the average pay rate for this position? Particullarly if the station is in the top 20 market? How about at small town stations? And what about non-com stations? (does this position even exist in non-com radio?)

Does the fact that the station is FM or AM determine the pay rate?

Anyone who is in this postion or who has hired someone at their station for this position, please drop me some e-mail. Ballpark figures are fine, I don't necessarily need exact dollar ammount.

thanks in advance!

Rob Bass

That person is Jay Marvin, who wrote in this very newsgroup:

"Has anyone ever noticed that right-wing talk show hosts and their
politicians can bash the poor, pick on women, children, the very old,
gays, and anyone else they deem to lack values and it's all Ok. But
when a left-wing talk show host gets on the air (myself, Tom Leykes)
and stands up and says enough and prove what your saying OR gets down
and dirty we're rude!"
Well Jay, it's time for YOU to put up or shut up! Prove what you
say is true, instead of re-hashing the old lines learned from Central
Liberal Casting. It's very easy to call names instead of giving
substance. It's also very easy to accuse others you don't like as
"Hate Mongers" or "Hate Speach", but in the half hour that I was able
to stomach your show, I heard more of that from you than anyone I have
ever listened to.

>Rush, on the other hand, is not rude. He IS outspoken and
opinionated, but
>I've never heard him hang up in a huff. He is engaging with those
who
>disagree with him. He really tries to win people over to his
opinion. That,
>in my view, is constructive.

I can just see the flames now. :)

Liberals-Out of step, touch, and time. But not yet out of our schools.

A year ago I set up a production studio that's hardly been used.....saneness has prevailed, and I am selling the following:

Arrakis 12000 radio console (has one mic and 13 line modules, one monitor module w/talkback and 4-ch DA module - perfect condition

Crown 75watt studio monitor amp,

Gentner SPH3 phone hybrid/coupler,

Gentner pre-wired patch bay (60 point) with "66" blocks attached

2 Harris compact criterion stereo cart playbacks w/3 tone boards

1 Tapecaster 701RP mono cart record/play.

e-mail me at: Garysice@Tiac.net.....I'll be heading down the east coast in the next 10 days - I could drop off anywhere along I-95 (Mass to Florida).

Joey Reynolds, one of radio's "bad boys" is back on the air. He has just signed a two year contract with WOR-710 in New York. WOR has been trying to change their tranditional demongraphics to a younger audience. Joey hosting an All Night show will certainly be an experiemnt for this "traditional" station.

Rock On!

It occurs to me that letters are letters (albeit pronounced a little
differently) and cities are cities. How do you say Los Angeles in
Spanish? (Hint: It IS in Spanish!) Proper names don't change with
language. When I lived on the border, we did our call letters in both:
K-A-Y-N and Kah-Ah-Eegrey-eNeh. But the city of license can't be
pronounced differently, except maybe with a little accent.

>
Bill-

Point well taken but Music Choice has had the Maestro remote control out for three years or so already. In addition to being a Universal remote that will control most audio and video gear, the Maestro has an LCD display that shows title, artist, album name and record label. Additionally, we transmit promotional announcements via the system as well. Prior to the introduction of the remote, we had a toll-free number which listeners could call to hear the song ID info for the current song as well as the prior two selections.

As a matter of fact, the next generation of cable boxes, the GI CFT-2200 when loaded with a Music Choice module will allow for song ID information on your television screen.

So, in effect we've had some sort of song ID info from day one and are continuing to develop new ways of getting the information across without disrupting the flow of the product! :-)

Regards,

Ron Yurman
Senior Manager - Broadcast Operations
Music Choice
ron@musicchoice.com

[Moderator's Note: Thanks, Ron, for the update on your service. With this new information, I now retract my statement that DMX is inherently a better choice than MusicChoice. I (sadly) cannot get either one (without spending a fortune on a receiver to hook up to my dish). Bill]

When you're my age, 1970 doesn't qualify as "many years ago". <g>

If English IDs were a brainchild of the ITU, no licensee need worrry. The ITU in that era couldn't enforce its terms of agreement with member nations let alone some "recommendation". I remember the hoops CKLW had to jump through to try to keep PJB in Bonaire from blowing them off the air as nearby as Toledo. PJB couldn't keep its pattern in and raised havoc with CKLW's signal all over the eastern part of North America at night. The ITU was no help at all.

>taking place elsewhere?
>
This is taking place elsewhere. I think part of the reason we're seeing this is that for the first time in more than a decade, we have a glut of new artists and songs that are actually good! And many of them may actually have staying power. When the stream of talent dries out, radio relies more heavily on proven "classic" songs to fill the void. We're coming out of that now, but may be over-correcting in many places.

>Personally, I find this new "modern AOR" format hard to listen to.
>While I enjoy hearing a lot of new music, I find it quite
>irritating that I can only hear a limited number of "classic"
>artists, artists whose works are greatly overplayed, IMHO. Also,

>several new and recent songs played in a row, and then all of a
>sudden, a song that is nearly 30 years old and has been played
>over and over is played.

This is a symptom of a playlist that was not well edited. The different genres and generations can be made to work together, but it takes some work. For example, you don't go from Foo Fighters into Lynyrd Skynyrd. But you can go from Foo Fighters into Black Crowes into Lynyrd Skynyrd.

> IMHO, I would find a format that
>combines modern rock with the '70s and '80s rock (Journey, Genesis,
>Foreigner, etc.) that was dropped much more interesting to listen
>to.

I'd guess you're within two years of 30. I made this point in another posting regarding Classic Rock. Journey, Styx, Genesis, Foreigner...they're from the Glory Days of those who were in high school and college in the late-'70s through mid-'80s. We can't ignore this music. (This is my biggest gripe with our consultant!) Why do we play Green Day and "Layla" but not Journey and Styx? We're missing the middle here! If we're shooting for any demographic cell that includes people

25-34, we've got to be playing this stuff. Right, John?

At KUZZ/KCWR, we have the same policy, except that we don't even use
university feeds. In California, the party caucuses in the state
legislature hire ex-broadcasters who package wraps with the local Senator
or Assemblyman, very professionally done, but also very one-sided. We
don't use them either. One of the flacks made a very heavy-handed attempt
to get me fired for that policy about seven years ago.

Now that it's an election year, we are also getting calls from campaigns
offering sound bites of candidates. Some of these callers try to disguise
who they are working for. Our policy is not to use any tape of a
candidate that we did not gather and edit ourselves, or get from AP. We
do buy AP Radio and use a lot of their sound...but none of the feature
material. We do not have a commecial network affiliation.

Since we own a co-located TV station (which happens not to do news), we
also get dozens of faxes a week offering satellite-fed video news
releases. We have the technical capability to download any or all of this
stuff for sound, but we don't, except for the occasional _unedited_ raw
feed, for example the Governor's state of the state address. That way we

do the editing, not some partisan flack.

As a follow-up to my question about the directional antenna and WNEW, I'm about 30 miles north of where I lose WPLY in the car. Maybe a good directional antenna can get that station too. However, it may not be worth getting if they play only the crap they mention on their Web-page playlist (Alanis, Silverchair, Live, Pearl Jam). If anyone listens to them, do you know if they occasionally play *true* alternative such as The Cure, Depeche Mode, Echo & the Bunnymen, The Smiths, and New Order?

What do you base that on- signal? In the Fall book, The Edge's two-signal combo and KZON were virtually neck and neck (remember, you have to add the shares for 106.3 AND 100.3, which get listed separately)... but The Edge has Howard Stern, which can't be underestimated, dual signal or not, plus they're a little more purely "alternative" (KZON leans a little more adult and a little more on older cuts, at least to my ears).

Anyway, it's WAY too early to declare a winner. At least fans of that format in Phoenix have a couple of choices.

The "the late night guy" you're talking about on WLS is me. What talk
show do you host? You may not like what I do, but it works and I'm
only rude to those who want to call in and take it to a higher level
than at the start of the conversation. Of course the one thing I
always notice is if the talk show host is right-wing than making fun
of people of color, the old, the poor, Gays then the host is way too
cool, but if you're left-wing you're rude. I think I left a post about
this elsewhere in this group. You take a shot at Tom and call him a
windbag and you use the term "offenders" I think your guilty of being
RUDE. You talk but you don't do. Maybe you can't. I may offend you,
but you offend me with your keyboard shots. You say you never stick
around? Then how would you know what the show is really like? How
about this: get your own show and THEN do it your way and let's see
how well you fare.

> 58:20!

Here in the UK, the BBC still regularly carry time tones (GTS = Greenwich Time Signal) regularly on many of its domestic networks as well as on World Service.

The time tones used to come from the Royal Observatory at Greenwich (outside which it is still possible to straddle the zero meridian). The original building is now a museum, and the 'working' part was moved to Herstmanceaux (sp?) in Surrrey many years ago. The time signals originated there for many years, but in the 80's they decided to stop originating them as a result of government cutbacks.

So the BBC now originates it's own atomically controlled time signals from Broadcasting House in London. Some of the distribution is done 'inverted'; ie tone is carried all the time on the circuit, except at 'the tone'. Sounds confusing, but at least it proves the circuit.

(The BBC also use the chimes of Big Ben regularly, and these _do_ come live from the clocktower in the Houses Of Parliament - which makes me wonder if anyone in the US does anything similar to that.)

Might be...though Sandusky's just launched a new format on KUKQ(now KUPD-2).
Other talk is that Pulitzer is pursing KOOL AM-FM, which is awaiting transfer from Compass to Par. Par is apparently open to the possibility of selling their new purchase.
Pulitzer would presumably keep oldies on KOOL-FM(94.5) and
either replace the simulcast on KOOL-AM(960) or supplement it with sports.

Hi Jeff,

Try connecting to Audionet.com. they feature sports and talk radio from around the country. they also appear to be open to putting new stations on all the time. Perhaps you could write the management at either Chicago sports station and tell them about this service. --

AMEN BROTHER! You don't mention who (or what) consults your station, but I beleive that CR radio is being consulted to death. What's more, most CR radio sounds like it has no soul. I used to work as a jock at KZFX in Houston. I tried really hard to bring some personality into the fray and it was only until management knew the station was going to change did they let me get away with it. I really don't know why such stations are allowed to operate in such a way as to guarantee failure. Why would you brag about only playing 350 titles?

It's like that line in Don Henley's "The Garden of Allah"-- "I can get you any result you like, what's it worth to ya?" When KZFX was still alive, it was set up to be so totally familiar to commuters for the 20-30 minutes they would be "using" classic rock radio. Everybody else had to suffer. Eventually, they found out that they CAN get enough of your love. Classic rock had so much potential as a great radio format. Too bad it was reduced to a tiny jukebox with the personality of a chair.

Thanks for letting me vent.

>>Donaldson and the Heywoods. I say they're wrong... comments anyone?

Ron, the problem with most consultants and programmers is that by definition, they have to take themselves entirely too seriously sometimes to make themselves believe the conclusions the "jump" to based on research, either on music, or any other aspect of radio programming.. I agree with you...they're wrong. Sure, no one wants to hear Paper Lace, or "disco" all the time on a 70s or hotAC station...but if featured on a weekend, or even a 'special' program, hey, its cool...similar to the more obscure rock n roll of the 50s and sixties that gets played on 'CBS-FM. And, hey, when all else fails, take the tack of Mix 107.3 here in D.C.: they're raking in the bucks with a show called "Retro Saturday Night", where they play lots of the pop, rock, and...shudder...DISCO...music of the 70s. The slogan you hear all through the show is "The Music You Love to Remember...but HATE TO ADMIT" <grin> Hey, its what the audience feels exactly about this music, we're all a bit embarassed to admit we danced and had fun to these tunes...so what? Big deal!

Doesn't sound much like Classic Rock to me. The Rock Hits idea isn't all
that original, Kevin. It's called AOR! We combat the Classic Rocker in
town by pointing out that being old doesn't make a song classic, and even
new songs can be classics. But we're no Classic Rocker. We play rock.
(Sorry, but Hits and Rock still don't go together in my book. Rock is
supposed to be anti-establishment and non-conformist. By its very nature,
nothing is more establishment and conformist than Hits.)

Classic Rock as a format has identified itself by playing a segment of
musical history. To add to that something with no history would be to
undermine the credibility of the format.

This brings back a memory from the 80's, when Top 40 was *the* format. There was a time (about 1984, I believe) when there were four stations doing that format:

92.3 WKTU, 95.5 WPLJ, 100.3 WHTZ, and 103.5 WAPP (now WYNY)

WAPP was the first to pull away from Top 40 and exclaim that "the rock is back." WKTU became K-Rock (and we all know where they are now).

DK>People from SF go to NY and say how terrible NY TV news is, how awful the
DK>talk shows are, how the streets all smell of urine, and how the place has
DK>a scary hate-filled core to it now. It's really so sad to know this is
DK>happening to what was once the premiere American city.

David,
You certainly paint with a broad brush. To suggest that hate radio represents New York City is foolish. If the leading practitioner has a 5 share, it means the vast, vast majority of New Yorkers aren't listening to it. I also take serious issue with the "scary, hate-filled core" characterization. As dangerous cities go, New York is far down on the list. Your chance of being hurt here are very slim. Most of the murders (New York had nearly 1,000 fewer murders last year and has always been far down on the list as a percentage of the population) are committed by family members or "friends."

My street doesn't smell of urine. New York has the same homeless problem every US city has, including San Francisco. New York still has some of the finest architecture in the world. It has theatre no other city can match. It has a level of excitement to be found nowhere else, 24 hours a day.

You are correct in your comment about radio here. It's boring. The risk of experimentation is too great. However, before you label New York as being the worst, listen to Talk Radio in a few other cities. Listen in Phoenix. You'll hear hate that wouldn't succeed in New York. Listen in Colorado Springs and a few other places where "towelhead" is a mild assault compared to the beyond-arch-conservative-superpatriot stuff.

Our biggest problem is that we're the world's entertainment capital. As such, the world sees New York as the backdrop of the most violent shows on the tube. My neighborhood in Greenwich Village is a major location for movies and TV (the bastards take all our parking spaces). That same neighborhood suffers from none of what's pictured in the films, yet the world believes it's a dangerous place.

I lived in San Diego for 8 years and felt more at risk there than I ever have in New York. Per capita, the San Diego murder rate is higher than New York. My car was broken into at least once a year. It's only happened once in 9 years in New York.

Come and spend some time here. You may not want to leave San Francisco to live here, but New York will show you one hell of a good time.

|: techniques (DAT and CD) can't you speed up the playback as fast
|: as you want WITHOUT changing the pitch of the song itself? No
|: more fear of the "chipmunk effect"...

Sorry. Speeding up the playback on a DAT or CD _does_ raise the pitch as well as the speed. And you can't do it as "fast as you want": the most I've seen on DAT or CD players is +/- 12%.

(Besides, changing the speed also changes the output sample rate. You can't connect digitally from a varispeed CD to another box unless it's particularly agile.)

Changing the speed _without_ changing the pitch requires intelligent sample manipulation, either through a non-realtime file process (most workstations and PC editors) or some heavy-duty DSP (Eventide DSP4000 UltraHarmonizer, for example). Since the samples are being read faster than they were created, some algorithm has to decide
a) which samples (or parts of samples) can be eliminated, and
b) how to splice around the deleted ones without artifacts.

A good workstation or modern dsp box should be able to go any random speed + or - 25% without any noticible glitches. This is pretty darned amazing, when you think about it: you're throwing away some non-integral amount of data, as much as one sample out of every four. (Older technologies, like the Eventide H3000B, started to fall apart at seven or eight percent.)

>way, we allow those with a better ear to appreciate that selection of
>music and those without the better ear will hardly know the
>difference.

"Hardly"? They WILL know the difference if it is not as loud as the competition.

>This is the reasoning behind CD's. Sure the $49.00 K-mart
>boom box will not provide the same quality as a Dennon or even a
>higher-end consumer deck, but the CD itself is recorded to a higher
>standard so that the source is capable of taking advantage of whatever
>level of equipment is being used.

Ok Bill. Is not the goal for radio to attract as many listeners as possible? The goal of a CD or DAT is to reproduce the music as precisely as possbile. These are NOT the same things. Yes, clearly there is tremendous overlap between the two objectives. But stating "the reasoning behind CD's" as the reason we should strive to present the music in its "cleanest, most natural way" is not necessarily in the best intersets of a radio station. If, to reproduce that response, you have a signal that can't achieve a descent signal to noise ratio on most car stereos, you are not programming your station properly.

>} Average radio listeners are not radio geeks like we are.
>
>Here is where I have the problem, Allan. Does it follow, in your
>mind, that because someone may not be a 'geek' that we should assume
>that they are without the ability to recognize quality, low-distortion
>sound? Are there only 'geeks and fools' out there?

It is not a question of "ability" to recognize quality. It is a question of whether they will bother. As I said before, most listeners don't make a project out of this even though many (possibly most) have the ability to.

They turn on the radio, hear something they like or don't like and either stay or move on. That first impression is what counts. If the station is not loud, they will move on. Sure, if you confront them with an anylasis of audio, they will see the advantages you are describing. BUT, I am telling you, MOST listeners will never get that far.

>It depends upon what one considers the advantage. Loudness is not the
>only deciding factor in creating the competitive advantage. If it
>were then the recording industry would not be producing the high
>quality sound that they do. If loudness were all that matters, the
>CD's would all be compressed to death as most FM radio is today.

Different goals here. The recording industry is selling CD's and we are selling radio. When you buy a CD ALL of the things you refer to are important and I agee with all of your points. BUT..... we are selling radio. In radio, loudness (perhaps unfortunately) counts for a lot. I don't care about selling CD's. I care about attracting listeners.

>There is a 'loudness mania' out there that *is* causing listener
>fatigue and burnout. Not just for 'radio geeks' but for a large
>and increasing portion of the listening audience that is somewhere
>between tone-deaf and audiophile.

Nonsense. We will never agree on this point. Yes, the discriminating ear can tell the difference. And, I suspect most readers of this newsletter/newsgroup fall into that category. BUT.... Most people will simply never take the time or effort to determine this. That does not mean that I am "underestimating" my listeners. It's not a question of ability. It is a question of relative importance. After working all day at whatever an individual does for a living, this is not something he or she is going to worry about when they turn the car radio on to drive home. BUT... They will CERTAINLY change the station if they can't hear it!

>There are many programmers (and I use that term to include anyone
>involved with the production of the final radio product) who worship
>loudness even at the expense of quality. Who assume that there are
>two kinds of listeners, a few audiophiles and the masses who cannot
>hear or recognize anything other than brute-volume. That is simply
>not the case.

Really! How do you know that? Let me appropriately rephrase that question without the infammatory adjectives: How do you know that most people are concerned with too much volume on radio stations?

>These people, remind me of that scene in the movie
>'Spinal Tap' where the band has an '11' on their amp's volume control
>because "10 is just not loud enough". I learned years ago, Allan,
>that turning up my portable radio past a certain point didn't really
>increase listenable volume, it just made the sound distorted.

That is not an anology here. Turning up volume on a portable radio is not compression.

>} No one is suggesting distortion. High compression does NOT equal distortion.
>
>Perhaps not in the definition of the words, but in real-life practice,
>sadly it does mean that more often than not. And I believe that the
>reason it often means the same thing is *because* of the attitude that
>"the listener can't/doesn't know the difference"

Don't use the word "can't" and "doesn't" in the same sentence. I have never said "can't" tell the difference. "Doesn't" tell the difference is the correct word. I am not insulting the audience which is the crux of your disagreement with me. There are many things in life we all choose not to make a study of. That does not mean we "can't".

>In other words, like the portable radio analogy, Ill turn it up as
>loud as I can without clipping the sound. Instead of the VU meter (or
>perhaps in addition to it) I would use a spectrum analyzer to see
>where I was weak and where I was strong and attempt to use my
>multi-band compression/limiter to create as pleasing and full of a
>sound as I could. It is all in how much credit you are willing to
>give the listeners you are targeting.

You can give them all the credit you want (and, I agree, you should). But if you are programming against a station with a similar format and all this technical tweaking makes you sound lower than your competitor, I promise you, you will have a problem.

>When you decide what music you will play you are targeting a certain
>taste. When you downgrade the sound quality you are assuming that the
>listeners in that taste-group are dummies who don't know any better.

Again, WRONG. That is your prejudice not mine.

>You are forcing those who do care, to listen at the level of those who
>don't.... *or* (and this is a BIG or) you are inviting them to abandon
>you in favor of other delivery methods such as Digital Cable Music
>(and the nearly free cassettes that can be made from sources like
>that) or to the CD store where, for a few bucks, they can bypass your
>opinion of their lack of musical appreciation (and the commercials you
>play to survive) totally.

We are programming against other radio stations, not the record (or CD) store. A true audiophile will do what you suggest no matter what an FM station does. Process it the way you want and they still won't listen. That's a demographic you are sure to lose IF you are only going to attract them for audio reasons. Hopefully there are other programming considerations that will hold them even though they acknowledge the inherent "poor" quality (from their perspective).

>I would rather over estimate the intelligence of my listeners, and
>take the chance that the tone-deaf ones wont notice my *good* quality,
>rather than take the opposite tack and under-estimate my listener's
>intelligence and assume that they wont notice my 'poor' quality.

Hold on.... Not in commercial radio. If you work for NPR maybe you have that luxury. Number of listeners is what counts here. Of course you want to make everyone happy. But, ultimately, this is not a business to show off our technical prowess. It is a business to attract as many listeners as possible. If your station isn't loud enough, you have a problem. Period.

>I think people make decisions *first* based upon the style of music they like. But
>secondly I believe that an ever increasing number of people DO
>appreciate good sound.

Are you saying you believe a significant number of people are tuning out stations because of audio quaility? You will have to prove that. That is an opinion that is not borne out in any ratings/surveys that I have seen.

>As for the ability of the FM station to re-produce CD quality, while
>it cannot 'duplicate' CD because of the limits of analog transmission,
>it can come very close in most cases.... as LOT closer than the
>average station ever comes.
>
>We have an AC station in our market KGBX....
>
>Oh, they do very well in the ratings too, as does their co-owned
>country KGMY which also has marvelous sound.

I can't comment without hearing these stations. If they are loud and clean, that's perfect. If the are successful I'll bet they have plenty of volume.

>And if you are smashing their favorite song with too much compression
>and clipping, they will tire of it and tune out anyway.

Debatable. If it really is distorted, you're right. But you can do a lot of compression before that happens. How long do you think most listeners stay tuned anyway? Listener fatigue for audio reasons should be your biggest problem!

>Allan, I think you and I are not that far apart. The main difference
>that I see is that I give the listener more credit for having a brain,
>and using that brain than I feel you do. I may be wrong in that
>perception, Lord knows I have been wrong many times. But I keep
>hearing that you see listeners as some sort of monolithic block that
>doesn't know what it is doing or why it is doing it.

You keep tying this into some kind of intelligence thing. Look Bill, to use an analogy most of our readers will identify with: When I turn my computer on, I want the software to run. I don't care whether the code is clean or well written. If it does what I want it to do, I'm happy. Does that mean I don't "have a brain". I "choose" not to dissect programming code. Casual radio listeners (the HUGE majority of who is listening) feel the same way about radio. It's just not a priority. As long as they can hear the station and it plays the music they want to hear, it's acceptable.

You know how hard it is to get listeners to remember station call letters, right? Does that mean they are stupid? Of course not. What is a priority

to you as an insider just is not important to casual listeners.

>Yes, Allan, I do believe that the public is more savvy
>than you (and MANY others) give them credit for being. Call me naive
>if you want but I stand by the notion that if you offer quality
>*within* your designated format you will attract quality listeners who
>are a more valuable demographic (IMHO) than those who don't know any
>better.

In commercial radio that "valuable demographic" better have numbers.

>} You are making the classic programming mistake.
>} Using your personal preferences to rule your programming decisions.
>
>Who are we programming to, Allan? Are you not using *your* personal
>opinion when setting your compression?

No. Most successful commercial FM stations are using a lot of compression as I realize you know from your "MANY others" comment above. It is not just a "personal opinion". They do this because it works (objections from audiophiles noted).

>We are not programming to consultants, programmers or engineers. We are programming to people..

Exactly.

>And the schism between you and I is not so much a programming
>philosophy difference, it is more a difference in how we view people.
>You (apparently) view them in a much less favorable light than I do.
>Therein lies the rub. If you saw your listeners as more intelligent
>and discerning, you would program that way. But (in my view) you see
>them quite a bit differently.

As I stated above, this is not an intelligence thing. But, I think your mistake is that you believe all people have the same priorities as you do. You care about technical details most people don't (and you should as a radio insider). That does not make a casual listener a lesser person as I stated above. You, however, should not assume everyone has the same priority you do with respect to audio.

>There are many successful programmers who don't underestimate their
>listeners intelligence and do very well, thank you. And they are not
>all classical stations either. KGBX is a prime example and there are
>many others.

Ok. But, I go back to my original post. In most, (if not all) situations where you have direct competition between stations in format, your station better NOT sound lower or "weaker" than your competitor. You will lose.

As I said before:

>} Quality is good. Number of listeners is better.
>

} In our last episode, "Allan M. Sniffen" <asniffen@computer.net>
} wrote
}
} Hi Bill (and everyone else reading this):
}
} First, let me compliment you on your well thought out and logical response.
} Not that I agree with a lot of it (as you will see), BUT..... IMHO this is
} what makes for interesting newsgroups and newsletters. Now, in the words of
} Kasey, "On with the countdown":

Thanks Allan I am glad you understand that while I dispute some
of your assertions, I am not flaming you, personally. I also
realize you are not flaming me. Intelligent disagreement on such key
issues is a rare and welcome thing. Thank you.

That having been said (I guess I like that phrase, huh?), I wont go
through and repeat all of the things I have already stated,
because we all know where I (and you) stand on those matters. Like
all other holy wars, we are not likely to convince each other to
change our position. Pretty soon we will occupy an entire AIRWAVES
issue just in our debate <g>.

I would love to hear other people's opinions, both from the 'programmer'
and 'listener' points of view. How important are matters of loudness
and compression versus cleanliness and lack of undue distortion?
Please feel encouraged to participate, regardless of where you come
down on this issue.

Now back to our show...

} Ok Bill. Is not the goal for radio to attract as many listeners as possible?

Well, sure. But that opens up an entirely new kettle of fish as to
quantity and quality of those listeners. Heavy Metal stations often
attract very high numbers (for such a niche format). But those
numbers are very heavily skewed toward 16 - 24 y/o males who don't
really make much money They *love* the format and are very loyal, but
you can't sell them much beyond concert tickets and CD/Cassettes (this
according to friends in the biz who have run heavy-metal formats).

Another similar format are the Adult Standards (Music Of Your Life)
formats. Big, loyal, listener base, can generate good numbers, but
agencies sometimes have trouble selling the format because of the
perception that the demographic is 'set in their ways' or other
generalizations that hamper the selling of these formats despite loyal
listeners and (sometimes) good numbers.

So there is more to this than raw 'numbers of listeners'. I can't speak for you, but I would prefer to have a 3 share of affluent professionals driving BMW's and Altima's with Bose stereos than a 5 share of Fast Food cashiers who barely break even, driving their 10 y/o Chevy with a bad Delco OEM stereo. That is just how *I* feel about it. You are certainly entitled to differ with me, as you most certainly do.

} The goal of a CD or DAT is to reproduce the music as precisely as possible.
} These are NOT the same things. Yes, clearly there is tremendous overlap
} between the two objectives. But stating "the reasoning behind CD's" as the
} reason we should strive to present the music in its "cleanest, most natural
} way" is not necessarily in the best interests of a radio station.

There are large numbers of people out there who have, for the most part, given up on radio as their main source of music entertainment, opting for their own collections of music on cassette and/or CD. I am not foolish enough to believe that all of the people in this group would be brought back to radio by turning down the clipping (which is the part of the audio chain that introduces the most distortion), But I do believe that over-processing is one of the factors that will drive more people to join those ranks of radio-refugees.

} If, to
} reproduce that response, you have a signal that can't achieve a descent
} signal to noise ratio on most car stereos, you are not programming your
} station properly.

In my perception, Allan, you seem stuck in an 'all or nothing' mode.

You seem to me to be saying that we either pipe the CD player into the transmitter raw, or process the living heck out of it. As I said in my first missive, I do believe that a well adjusted limiter/multi-band compressor which is tailored to the type of music, average signal strength of the station (the stronger the signal the less is needed) and is adjusted by someone who is technically competent enough to do it right, can make a station sound fuller, and can mask some of the multipath and other problems associated with mobile VHF reception.

} >} Average radio listeners are not radio geeks like we are.
} >
} >Here is where I have the problem, Allan. Does it follow, in your
} >mind, that because someone may not be a 'geek' that we should assume
} >that they are without the ability to recognize quality, low-distortion
} >sound? Are there only 'geeks and fools' out there?
}
} It is not a question of "ability" to recognize quality. It is a question of
} whether they will bother.

We will never come to terms on this core issue, Allan. But I did want to clarify that I include the concept of 'willingness to' when I used the term 'ability to'.

In the sixties, TV stations used to (and some may still) run their
aural information at slightly less than 100% modulation. Then the
commercials were pumped up to a a full 100% with a lot of compression
to make them come across louder than the program audio. Ad people
thought that viewers would not notice, but they did.. and complained.

I agree (unfortunately) that there are a lot of listeners who wont
notice bad sound. They are on one end of the graph. On the other end
are the audiophiles who will notice *anything* we do to the sound.

In the middle are people who may not be able to put their finger on
what is wrong, they probably can't say "Gee I wish they would not use
so much clipping"... But they do react, albeit unconsciously, to
overly clipped sound.

} >There is a 'loudness mania' out there that *is* causing listener
} >fatigue and burnout. Not just for 'radio geeks' but for a large
} >and increasing portion of the listening audience that is somewhere
} >between tone-deaf and audiophile.
}
} Nonsense. We will never agree on this point.

While I agree that we will not agree, I hardly think it is nonsense.
It just makes sense on a different level (no pun intended).

} an individual does for a living, this is not something he or she is going to
} worry about when they turn the car radio on to drive home. BUT... They
} will CERTAINLY change the station if they can't hear it!

I think you are going off the deep end here, Allan. Even a station
with NO processing can be 'heard'. What we are debating is how 'well'
it is heard and what determines that level of 'how well it is heard'.

} >There are many programmers (and I use that term to include anyone
} >involved with the production of the final radio product) who worship
} >loudness even at the expense of quality. Who assume that there are
} >two kinds of listeners, a few audiophiles and the masses who cannot
} >hear or recognize anything other than brute-volume. That is simply
} >not the case.
}
} Really! How do you know that? Let me appropriately rephrase that question
} without the inflammatory adjectives: How do you know that most people are
} concerned with too much volume on radio stations?

I don't think I said that in that paragraph, Allan. All I claimed is
there are more than the two kids of listeners mentioned above.

} >Perhaps not in the definition of the words, but in real-life practice,
} >sadly it does mean that more often than not. And I believe that the
} >reason it often means the same thing is *because* of the attitude that
} >"the listener can't/doesn't know the difference"
}
} Don't use the word "can't" and "doesn't" in the same sentence. I have never
} said "can't" tell the difference.

Immaterial. Whether it is a can't or won't the results are the same.

} You can give them all the credit you want (and, I agree, you should). But
} if you are programming against a station with a similar format and all this
} technical tweaking makes you sound lower than your competitor, I promise
} you, you will have a problem.

That is where superior programming comes into play. And (for the umteenth and final time) I am not suggesting that you lower the volume. I am suggesting that after a certain point, additional audio simply becomes distortion, not more loudness. It takes skill (and decent processing equipment) to achieve a high-volume, low-distortion audio path, but it can be done, and it is done successfully in a lot of places.

} >When you decide what music you will play you are targeting a certain
} >taste. When you downgrade the sound quality you are assuming that the
} >listeners in that taste-group are dummies who don't know any better.
}
} Again, WRONG. That is your prejudice not mine.

Allan, it is not a matter of cosmic 'right or WRONG' (emphasis yours). It is a matter of differing philosophies. There have been successful stations who have done it both ways. It would be good to remember that this is not brain surgery, it is the entertainment-business.

} >You are forcing those who do care, to listen at the level of those who
} >don't.... *or* (and this is a BIG or) you are inviting them to abandon
} >you in favor of other delivery methods such as Digital Cable Music
}
} We are programming against other radio stations, not the record (or CD)
} store.

That is just not true anymore, Allan. You are most definitely competing with all of those mediums, if you are a music station. To believe otherwise is to place your head in the sand. And don't blink, cause when you do you will find another medium just waiting to snatch a few percent of your ever-so-precious listener base away.

Network (over the air) TV found this out. Cable, satellite, DBS and VCR's have taken a huge bite out of OTA TV viewership. If your ratings included those people who listened to their cassettes and/or some satellite music service, you might be shocked as to how much competition that really is. Also Noncomm radio is HUGE in many markets, but is excluded from the same ranking scale as commercial stations by Arbitron. In some markets those number actually out-rank the #1 commercial station.

} A true audiophile will do what you suggest no matter what an FM
} station does. Process it the way you want and they still won't listen.

Again there is that black and white approach. One is either an audiophile or he doesn't care.

} That's a demographic you are sure to lose IF you are only going to attract
} them for audio reasons.

I don't think I ever suggested that.

} Hopefully there are other programming
} considerations that will hold them even though they acknowledge the inherent
} "poor" quality (from their perspective).

Why add another reason to tune out? I believe in good programming AND
good audio. My marketing professor told me to 'eliminate as many
negatives as possible'. Don't give then any *more* reasons to leave
than they may already have.

} >I would rather over estimate the intelligence of my listeners, and
} >take the chance that the tone-deaf ones wont notice my *good* quality,
} >rather than take the opposite tack and under-estimate my listener's
} >intelligence and assume that they wont notice my 'poor' quality.
}
} Hold on.... Not in commercial radio. If you work for NPR maybe you have
} that luxury.

I totally disagree that it is a luxury. And as stated above, in many
markets NPR dominates. It's just that the Arbs don't release that info
to the general subscribing audience (read: commercial stations).

} Number of listeners is what counts here. Of course you want
} to make everyone happy. But, ultimately, this is not a business to show off
} our technical prowess. It is a business to attract as many listeners as
} possible.

Agreed. Never claimed otherwise.

} If your station isn't loud enough, you have a problem. Period.

We already have discussed that point to death.

} Are you saying you believe a significant number of people are tuning out
} stations because of audio quality?

Yes, I believe it is one factor in a large composite picture.

} That is an opinion that is not borne out in any ratings/surveys that
} I have seen.

If Arbitron or Accuratings said it would you then believe it?

Maybe it is time to re-think the conventional wisdom. There was a
time when successful radio was forged by visionary programmers who
created new things. Now we just clone the same old thing and wonder
why people tune out.

} >We have an AC station in our market KGBX

[...]

} >Oh, they do very well in the ratings too, as does their co-owned
} >country KGMY which also has marvelous sound.
}
} I can't comment without hearing these stations. If they are loud and clean,
} that's perfect. If the are successful I'll bet they have plenty of volume.

They have sufficient volume to be heard well (despite the fact that
they are class C2's in a market dominated by full class-C's). But
their sound is open and clean, as well as being loud. Oh, yeah, they
also are well programmed.

} You keep tying this into some kind of intelligence thing. Look Bill, to use
} an analogy most of our readers will identify with: When I turn my computer
} on, I want the software to run. I don't care whether the code is clean or
} well written.

Bad analogy. A better one would be whether the user cares if the
monitor is of high-definition and 'flicker-free'. It is a well known
fact that cheaper, 'interlaced' monitors have a higher fatigue factor
than higher-quality 'non-interlaced' monitors. Also the resolution
(dot-pitch) of the monitor determines how clearly the graphics and text
are presented.

The quality of the software is analogous to the quality of your
programming, while the video quality of the monitor determines how
well that software looks, just like the audio quality determines how
well your programming sounds.

} In commercial radio that "valuable demographic" better have numbers.

Ask Chicago's WNUA (NAC) and WLUP (entertainment talk) whether there are
numbers. Both score in the top 10 and WNUA has among the cleanest
sound in the market (second only to classical WFMT).

} As I stated above, this is not an intelligence thing. But, I think your
} mistake is that you believe all people have the same priorities as you do.

And you believe that they have the same ones as you (via the research
you choose to follow) do. Simple matter of philosophical differences,
Allan.

Let's hear from some other voices on this matter. Don't be shy.

Bill

We are looking into it too. We switched to MiniDisk players as of Sept. 1995.
(WMUC-AM/FM, College Park, MD)

On a slightly different note, I hope MiniDisk - as a medium- really picks up;
That will get the prices lower... You have to pay $500 to get a portable
MD player/recorder and just about the same for Sony's car radio/MD unit..
(currently).

I take apart an old cart, tear out the guts and the post , label the
remaining lower half of the shell and place the mini disk and case in it.
It is then placed in the same cart rackl we use for carts but in a
seperate section for mds. It works quite well, the old cart shell serves
as a drawer. Try it!!!!!!!

Come participate in a celebrity-hosted chat to discuss RAP THE VOTE, an organization dedicated to encouraging urban minority youth to get to the polls and make use of their democratic right to vote.

On Thursday, February 8th, 1996 AT 11:30 ET, RAP THE VOTE chairpersons RUSSELL SIMMONS (CEO Rush Communications, Def Jam Records) and supermodel/writer VERONICA WEBB , along with former New York State Governor and current syndicated talk show host MARIO CUOMO; HEAVY D, President of Uptown Records; and outspoken rapper Q-TIP from A Tribe Called Quest will engage in an online chat at SW Networks' website, NetSpace <www.swnetworks.com>. The chat will adress the issue at the heart of RAP THE VOTE's mission-- namely, to empower urban minority youth to take hold of their future by going to the polls and getting their voices heard.

The online gathering will be part of 24 HOURS IN CYBERSPACE, the world's largest internet event to date. From the same group which produced A Day in the Life of America and Passage to Vietnam, 24 Hours is an international project to chronicle the effect of the digital revolution on everday life. 100 of the world's top photojournalists will cover the globe to document every facet of the online phenomenon.

The live chat will take place from 11:30 to 12:30 EST USA on Thursday, February 8, 1996. Check the SW Rap The Vote pages for more information. <www.swnetworks.com>

Those of us who grew up during the 70's remember hearing these songs on our transistor radios and scratchy old 45's. We enjoy hearing them again, regardless of what the consultants, corporate bean-counters, and "focus groups" would have you believe.

BTW, both of the songs you mentioned went all the way to #1 on Billboard. If a station bills itself as playing "The Greatest Hits of the 70's", I would suggest that they play them.

Actually, the number of subbands for MPEG Layer 3 is 576. And in the US,
it has certainly taken off!

Since there seems to be so many radio historians here, maybe someone can answer this question:
What is the oldest radio show in the US?
My guess would be the Grand Old Opry on WSM, or Rambling with Gambling on WOR. I think they both went on the air in 1925, but which was on first? Or was another current radio show on first?

Folks:

This is one of the things that made Scott Shannon a genius with a capital "G." We played some things you would never have expected on Z-100...like the day, way before anyone knew from New Age, someone called his attention to Ray Lynch's "Deep Breakfast" and the next thing I knew, I was editing it down to manageable length for broadcast on our airwaves. And I still maintain that a major reason behind Bobby McFerrin's CHR success with "Don't Worry, Be Happy" was that after I had moved to WNEW-AM and was playing it there, it was heard by someone close to me who worked in Z-100's music department, who told Shannon, and so on...

I can't speak for what goes on today at WPLJ, but in my four years at the Z, Shannon led with his instinct and everything followed from there. I learned more from him in that time than in the rest of my twenty years in broadcasting all together!

>All I was saying in the previous post (sections exerpted using the "CP" >ID above) was that there is a way to produce professional radio that is >entertaining and profitable, and some (if not many) of our current crop >of radio stations choose to disrespect their "product" time and time >again. Goofing with the speed of songs, walking over songs, and playing >versions other than the album versions of songs without acknowledging >such is sloppy, unprofessional, and disrespectful to the artists featured

>by that station.
>
First off, the artists featured are not our product. The product is the entire package presented on air. Artists are simply a means to attract people. Sure, I like them as much as the next guy - maybe more - but I'm in business for me, not them. Ultimately, if a station plays with the music too much, they'll get the biggest wake up call of all, and it has nothing to do with the artists - people will listen to someone playing the same songs in a way they like better.

As far as "respecting the artists"...how much respect for their song does an artist expect when I get a CD with FIVE different versions of one song? If they're changing the song to increase the odds of my playing it, why shouldn't I feel free to tweak it a little more? If it gets played, it gets played! If not, no sales. No sales, no next album.

>It is possible. I've heard such stations do it RIGHT, so I know it is a >viable alternative to the current portrayal of music these days.
>
There is no such thing as doing it "right." Your right is someone else's wrong. There are a million different ways to present something. The trick is finding one that is most acceptable to the most different people. Towards that end, programmers experiment, and so do artists.

How come you never post the 18-34 Numbers or 25-54 Numbers when Arbs are posted?? Who Cares About 12 + ? Give Us more Meat In That Sandwich.

Russo

[Moderator's Note: The reason for that is simple. Arbitron information is copyrighted and costs a LOT of money. The 12+ numbers, while still copyrighted, are fairly widely distributed to daily newspapers and various other sources. Arbitron usually looks the other way for these base numbers, probably because they offer publicity without seriously compromising the value of the entire package. Releasing other, more sensitive, numbers is strictly verbotten, and not fair to Arbitron, who (after all) has a big investment in this proprietory information which they sell to subscribing stations. Bill]

907. Re: Top of Hour Beeps

Newsgroup: rec.radio.broadcasting

My collection of station ID's has KCBS, San Francisco, KFYI, Phoenix, and WJR, Detroit all having 'gongs' at the hour. I recall KYW, Philadelphia using one in the past, too.

(BTW, I have e-Mailed the staff at WJR twice, requesting a copy of their gong for use on my Macintosh. Both requests have gone unanswered).

908. Compression!!

Newsgroup: rec.radio.broadcasting
Date: 1996-01-25 00:00:00 UTC
From: richwood@commspec.com
Message-ID: <4e7ic0$5il@vixen.cso.uiuc.edu>
Source record: 26688

AS>I have had this debate with the Chief Engineer of a NYC "Light" radio
AS>station. Programmers of these formats continue to hold that keeping the
AS>compression down helps listeners stay tuned longer. They claim the
AS>compression encourages passive listeners to reach for the volume and turn it
AS>down.

AS>Nonsense.

Allan,
Hardly nonsense, since WLTW (Lite FM) has had killer numbers for
years. The lack of mashing hasn't had a negative impact on the station.
Their drop in ratings is due to significant format changes that intrude
on their turf.

AS>In NYC compare the sound on WPLJ and WMXV. MXV has sounded low and hollow
AS>(due to lack of compression) for years (new P.D. Steve Weed seems to be
AS>changing this..but..). Scott Shannon at PLJ has always been a believer in
AS>compression. Now, I realize there is a difference in music, but there is
AS>also a huge amount of overlap in their playlists.

There's also a huge difference in the feel of the stations, far
more than compression, or lack of it. Playlists as playlists aren't as
important as how the whole station is fashioned.

AS>Who do you think the
AS>average listener will pick given a choice (most likely from their car). A
AS>strong sounding station or a weak sounding station. Its a no brainer!!!

They'll choose the station that pleases them the most. This
argument is too simplistic to spend much time on. Radio stations are
far more than individual pieces.

AS>Keep the compression UP!!!

... and watch your TSL go down, especially with women.

Rich

JM>Has anyone heard the rumor some station in Indy dumped Limbaugh
JM>because of a bad book?

Jay,
I believe it was a format change. Some of us are like vultures, hoping for the day the show will fail. Rush could lose 300 stations before he'd be in the same boat as the next lower level of network (or local) talk. The second (far distant) banana is probably Liddy with a very small fraction of Limbaugh's affiliate numbers. One station, even in a major market would be a minor dent in Rush's affiliate list. I guarantee someone else will pick it up. Not so for Liddy.

Any hope that Rush is on his way out is a non-conservative's wishful thinking. He's got a long run still ahead. If Rush loses stations, it'll probably be because of the fees they charge, not some political disagreement with his views or ratings. I converted a Rush station several months ago. Their reason was they couldn't sell the show, locally, and the fees were simply too high.

Yes, there has been a softening in the numbers. In my opinion, it because he's become a mouthpiece for the Republican party and is perceived as "one of them" in a climate that distrusts ALL politicians, regardless of party. If he were to get back to the olden days as an entertainer, the show would be a killer again. I don't hear the variety I used to hear and the constant dittohead compliments are predictable and boring. Rush is a great talent for radio who's begun to believe what he says. It's a dangerous trait.

Rich

>
This is the biggest piece of good advice I've seen in a long time. It's easy to develop tunnel vision. Just the other day, two of us spent 1-1/2 hours looking for "just the right piece of music" for a spot. In the end, that perfect piece of music occupied less than five seconds of air time, and half a dozen other things we found in the first five minutes would have had the same impact. As it is, the piece we finally used was "the closest thing" to what we were looking for. The lesson? There is no perfection. Don't waste hours looking for it.

Jim,

If our moderator can stand _one more_ WGN time tone story, this is
mine and I hope it's not yours. Here goes (and I _swear_ that this is
true):

When the Chicago Tribune owner, Colonel Robert McCormack created WGN
back in (about) 1925...an announcer would formally announce the time
and a sound effects guy would strike a chime car on mic as exactly
as he could to signal the beginning of the hour. Ten years later,
engineers built an automated time tone connected by a relay to
Western Union, which provided accurate time. Some of us remember
the studio clocks controlled by a pulse from WU from our own early
days in radio.

Anyway, the Western Union triggered tone sounded every hour of the
day--with one exception. And here's where it gets _very_ strange:
Just before midnight each day, an engineer, announcer and sound
effects man were sent to the boiler room of the Tribune Tower
building in downtown Chicago in which WGN was located.* Colonel

McCormack had purchased and installed the original pair of steam whistles from the paddleboat "The Robert E. Lee." So, just before midnight, the announcer would say, "We chime in this day with the steam whistle of the paddleboat 'The Robert E. Lee.' The next sound you hear is the sound of the _actual_ steam whistle indicating the midnight hour."

The sound effects fellow would pull the cord that sounded the whistle and the announcer would say, "Serving the middle west, this is WGN Chicago."

WGN stopped blowing the whistle in 1955!

In 1953 at WGN, the engineers decided to construct a unique tone for the station...one composed of three frequencies to distinquish it from the tones used on the old Mutual Broadcasting System--of which WGN was then a part. So, the three-note tone has been in use at WGN for more than 40 years--tube-type oscilators in those days built into a "bathtub-type" chassis but solid state for the past many years.

The Colonel was a very interesting guy. And I hope you found this to be an interesting story.

*WGN radio eventually moved out of the Tribune Tower complex to the building housing WGN-TV at 2501 W. Bradley Place on the north side in, I think, the late 50's or early 60's, but they've been back in the Tower on Michigan Avenue for what?--10years now?

Cheers.

Don

Q22. What is the best radio / antenna to get distant OTR stations?
Q23. Is there a group for modern radio drama ("new-time radio")?
Q24. I have only email access to the Net. Can I still get the files at your FTP site?
Q25. Your Digest and WWW pages only deal with Old Time Radio. Where can I get similar information about early TV?
Q26. I have never heard "Old Time Radio". Can I get an audio sample via Internet?
Q27. I have lots of loose OTR cassettes filling my drawers. Is there a better way to store these things?
Q28. All this new software is a bit difficult for me to use, as I am blind. Can you give me any assistance on how to access your page?

Q1. What is "OTR"?

A1. OTR is an acronym for "Old Time Radio", a term loosely applied to radio programs broadcast from the dawn of broadcasting to the early 1960's. Alternate names are "radio nostalgia", "golden age radio", etc. Usually this applies to radio drama, mystery stories, comedy and adventures.

Q2. You haven't mentioned OTR music, why not?

A2. There was a good deal of "big band" and other music broadcast during this era. For some reason, there seems to be more current interest in the dramas rather than in the music. You will find much more discussion about this topic in alt.music.big-band. There is also an Old Time Music on the Radio WWW page (apparently for Bluegrass music).

Q3. Where can I buy recordings of old radio shows?

A3. There are several individuals and companies willing to sell tapes of OTR programs. A partial list can be obtained from my OTR WWW site or FTP address listed later.

Q4. Which vendors have (lower prices) (higher quality) (faster response)?

A4. Prices, quality and service differ somewhat among all vendors. Check with other subscribers to the OTR Digest to learn of their experiences, then check with potential vendors.

A comparitive price chart, listing many vendors, is available at my WWW site.

Audio quality is an important consideration when purchasing recorded tapes. As yet, there is no "standardized" description of sound quality. Jim Widner and other OTR collectors have suggested

various metrics to describe the quality of OTR recordings. Discussion of these standardized descriptors is summarized at the archive site, and my FTP / WWW sites.

Q5. Are OTR shows rebroadcast? If so, where and when?

A5. Yes, several AM and FM radio stations, satellite feeds and a shortwave station rebroadcast OTR. Check my OTR WWW page for current info, or download STATIONS.OTR from my FTP site. If you learn of other sources, leave a note!

Julian A. Smith (jsmith@blues.epas.utoronto.ca), Frank Passage (passage@pluto.dss.com) and Bill Pfeiffer left the following information:

For AM listening, try the new National Radio Club's _AM Radio Log, 15th Edition: Complete Listing of U.S. and Canada AM Radio Stations_ (Mannsville, N.Y.: NRC, 1994). All AM stations carrying things like "Old Time Radio" are listed with the format code NOS (Nostalgia), and there are lots of other codes. [Order from NRC Publications, Box 164, Mannsville NY 13661-0164 USA. Price range: $20.00]

For FM listening, I'd suggest Bruce F. Elving's _FM Atlas_ (Esko, MN: FM Atlas Pub., 1993). Alongside lists, this has _maps_ of your area and its stations as well. [Order from Bruce Elving, PO Box 336, Esko MN 55733-0336. Price Range: $11.00 + approx $1.00 s/h]

The M Street Radio Directory, M Street at 800-248-4242 or +1 212 473 4668 voice, or +1 212 473 4626 fax. The address is M Street Corp., 304 Park Ave S Floor 7, New York, NY 10010 USA. costs $29.95 + p/h,

Q6. I remember a great show called (x). When was it aired?

A6. Check with subscribers to OTR Digest, or look through the program databases (WWW or FTP). Also see answer A14 below. Please do NOT send requests to -me- to name or find specific programs for you.

Q7. Are there any books about OTR?

A7. Yes, there are many books related to OTR. See my WWW page or FTP site for a list of some of them.

Jim Widner and Everett L. Slosman left this address for a bookstore specializing in OTR books:

Rainy Day Books
P.O. Box 775, Rt 119

Fitzwilliam, NH 03447
(603)585-3448

Bob Crump reminded us that most good used book stores will do a nationwide search for a title, if given enough time. Henry Brugsch <henry@g0gku.demon.co.uk> related a good experience with the following on-line bookstore:

Acorn Books acornbks@netcom.com

Q8. Does anybody trade tapes of OTR shows?

A8. Yes. Check with subscribers to the OTR Digest. My WWW page has a database of private traders as well. Leave a note in the OTR Digest if you want to trade, or send email to me if you want your library to be listed in the on-line database.

Q9. What's this stuff about Copyright?

A9. The copyrights on most OTR shows have expired. Several copyrights have been renewed. Examples of the latter include The Shadow (Conde Nast) and some of Arch Oboler's productions. See my WWW site for the latest "common sense" and legal citations.

Q10. How can I get my local radio station to broadcast OTR programming?

A10. Call the station and tell them of the many people who like to listen to OTR. Suggest this programming will increase listenership and help buy things from their advertisers.

Shawn Fulper-Smith (shawnf@cc1.uca.edu), a managing director of a non-commercial station, tells us: "The days of radio being ruled by the artisians is over, and for some time now it has been in the hands of people who only look at the bottom line, so to reach them you must talk through public radio pledges, or through sponsors on commercial stations."

Local stations may be able to redistribute OTR available via satellite downlink. Ask the station managers to check with either:

Collectors Radio Network (The Radio Vault)
1-800-739-7900

Yesterday USA (YUSA)
(214) 690-3636
YUSAOTR@aol.com

Q11. I have some old transcriptions and tapes, how can I make them sound better?

A11. You might try using a good equalizer and/or digital signal processing (DSP) unit between the playback and recording devices.

Some people have mentioned that the Radio Shack DSP unit does a fair job. There are also other, more expensive DSP units available from Ham radio stores and audio stores. Some subscribers have attested to the efficacy of the Timewave brand of DSP units.

Randy Riddle (Rriddle@aol.com) left this information:

There's a firm that sells archival quality turntables and sound processing units that can dramatically improve old recordings. Their sound processing unit runs around $300.

Audio 78 Archival Supplies
PO Box 187
San Anselmo, CA 94979
415-457-7878

Henry Brugsch <henry@g0gku.demon.co.uk> left this information about Digital Audio Format (DAT):

The dat-heads mailing list maintain an archive of all their material at the following site: ftp.atd.ucar.edu. Log on with the usual anonymous then, your routine password. head on over to /pub/dat-heads/ You will find a wealth of info up there. All the digests to the current day, and mike faqs, as well as market postings on equipment. Highly recommendable for anyone to get their feet wet in this media. Happy taping.

From: hhoward@mindspring.com (Henry Howard)

For cassette machines (and reel to reels for that matter) occasionally take a "Y" cord and connect the output of your cassette player to both "sides" of the "Y". Plug the combined side of the "Y" into your stereo. If the sound is mush(ier) than what you hear normally, you have a head alignment problem (assuming that the tape you are listening to was properly aligned.)

From: Ron_B._Hare@livewire.com (Ron B. Hare)

Dolby HX on the recording deck makes an audible difference. Other audio optimization features are of negligible value for OTR. Dolby HX also requires no playback decoder.

Q12. Are there any OTR clubs near me?

A12. Check the club listings in my WWW page, and leave a note in the OTR Digest asking about local clubs for your area. Send me email if you want your club listed.

Q13. I have some OTR tapes of the same program, but their dates are different. Why?

A13. Sometimes broadcasts are dated according to their original broadcast date, and sometimes according to a date on which they have been rebroadcast. For instance, the Armed Forces Radio Service rebroadcast many Mutual Radio transcriptions at a later date. Your tape may be of one of these later dates. Alternately, somebody might have made a mis-typopgoof.

Finally, some shows -were- broadcast more than once, and sometimes on different programs! For instance, a few Suspense shows were re-scripted / re-cast for Escape. You might also find similarities between certain SF shows as done on X Minus 1 and Dimension X.

Q14. Is there any place where I can get a complete listing of all the episodes in a particular program serial?

A14. Some of the OTR Digest subscribers have contributed Program Logs for several well-known series. The logs are available at my FTP & WWW sites. While you are there, check the online libraries; some collectors have very complete collections of various serials, and they are listed by name or date in their listings. I am currently compiling a database of contributed catalogs and libraries, which will eventually contain most of the readily-available programs for popular OTR series. At present, the dbf file exceeds 70,000 records, and is searchable with your WWW browser.

The "logs and publications" entry in my WWW page gives names and addresses of several vendors of these items. It can be FTP'd as sou_pub.otr. (Thanks to RadioJoe5@aol.com (Joe Coleman)). There is also a Netscape table of logs and log sources at my WWW site.

Jay Hickerson maintains several logs and lists, as well as -Hello Again-, an OTR newsletter. Jay is the author of -The Ultimate History of Network Radio Programming and Guide to All Circulating Shows- (last supplemented in Oct 95). Jay's address is:

Jay Hickerson JayHick@aol.com
Box 4321
Hamden, CT 06514
(203) 248-2887 FAX (203) 281-1322

Q15. Is there any place where I can get a written synopsis of the themes of OTR programs?

A15. Again, some vendors include this information with their catalogs. If you would like to contribute your interpretations of the themes, send them to the OTR Digest for inclusion in one of our databases.

Jim Widner and others have contributed some synopses / introductions
to various programs. They are on file at his and my WWW/FTP sites.

Many of the local and national OTR clubs maintain informational
libraries with this material.

Q16. Is there a World Wide Web page (URL) or FTP address that I can
access for more information?

A16. Yes, there is a growing number of WWW sites, as well as FTP sites
and a Gopher. Each site contains different information, so you
might want to visit them all. The sites listed below are good
places to start, since the major OTR WWW pages have links or
pointers to each other. If you learn of any others, I'd
appreciate your informing me via email!

(1) My site:

World Wide Web URL:
http://www.old-time.com

FTP:
(under development)

(2) AIRWAVES E-Publishing's Site (courtesy of Bill Pfeiffer):

FTP:
Anonymous FTP to radio.aiss.uiuc.edu,
directory: pub/AIRWAVES/OTR
GOPHER:
gopher radio.aiss.uiuc.edu 7070
(select "OTR")

World Wide Web URL:
http://radio.aiss.uiuc.edu/~rrb

Q17. Is there an email newsletter on OTR? How do I subscribe to it?

A17. Yes. The Internet OTR Digest is a freely available electronic
newsletter, mailed every night to subscribers. Traffic has
increased considerably, and the digest is usually mailed more than
once a day!

To subscribe, send email
To: old.time.radio-request@airwaves.com
Subject: SUBSCRIBE

To unsubscribe, send email
To: old.time.radio-request@airwaves.com
Subject: UNSUBSCRIBE

(The body of the message is ignored in both cases)

NOTE: Do NOT use this address to send articles to the Digest! Use
old.time.radio@airwaves.com instead.

Q18. Can I get archived copies of old issues of the OTR Digest?

A18. Yes. The OTR Digests and Index are updated three times a week, and are accessible via:

FTP: radio.aiss.uiuc.edu (directory /pub/AIRWAVES/OTR/)
GOPHER radio.aiss.uiuc.edu 7070 (select OTR)
Web http://radio.aiss.uiuc.edu/~airwaves/history.html#archive

Readers with a WWW browser can access a "smart" archive program. This program can sort and display old OTR articles by author, subject, thread or date submitted. Just the thing to use when you want to catch up on a discussion thread, without plowing through a lot of extraneous material. To access this service, point your browser at: http://radio.aiss.uiuc.edu/~rrb/online.html

Q19. What is the best way to archive OTR programs?

A19. The most popular way seemed to be reel-reel tapes, using each of the four tracks to record monophonically. Modern reel machines are in the > $2000 range, and used open reel machines are becoming harder to find.

Purists claim open reel tapes are best stored "tails out", in which the tape is played (not fast-forwarded) onto the takeup reel. This method of storage makes "print through" of the magnetic sound image a little less noticeable because the "echo" will come before the louder sound that caused it, and be somewhat masked by the louder sound.

Cassettes are generally fine for portability / ease of use / exchange, but they suffer from several problems when used as a long-term storage medium. These problems include "overwinding" and splitting of the tape at the leader. Because of their thinner track width and slower speed (1 7/8 IPS), the density of the information is greater than with wider and faster (3 3/4 IPS) reel tapes. This may lead to a greater loss of signal (particularly high-frequencies) over time.

The Hi-Fi VHS tape is gaining in popularity because of its six-hour storage capability and relatively robust mechanical construction. "Hi-Fi" decks need no video signal to synch the systems, and can thus record audio without an accompanying video signal. One T-120 Stereo Hi-Fi VHS cassette can easily hold 12 hours of OTR audio (recorded monophonically on the right and left channels independently). If the linear track can be accessed independently, this will add six more hours of recording time.

Some subscribers have mentioned Talking Book tape recorders as a possible archival method. These recorders operate at 15/16 ips (half the speed of a standard cassette recorder), and can operate in 4-track mode, thus giving up to 6 hours of play time on a standard 90 minute cassette. As yet, we have no info on long-term longevity of these recordings.

Don Coco (djc@crl.com) left the following information about sources for Talking Book type equipment:

The American Printing House For The Blind 1839 Frankfort Ave. Louisville, Kentucky 40206 Tel. (502) 895-2405 Sells Braille and recorded books, 4 track recorders which record at 15/16 IPS, and other products of interested to Visually Impaired persons. Price of 4 track recorder around $175

I.R.T.I.
1411 West El Camino Real
Mountainview, Ca. 94040
Tel. (415) 961-3161 or (800) 322-4784
Sells all including Radio's, TV's with SAP, Reading Machines, Computers ETC.

Conrad Trautmann (CONRADTRAUT@delphi.com) left this note in response to a query about finding used reel-reel machines:

You can also call Harris/Allied used equipment division at 1-800-622-0022 or call Radio World magazine at 703-998-7600 for subscription information. Radio World is an industry trade and has used equipment listings in the classifieds once a month.

(Jim Blackie [jblackie@aol.com] indicates that the Harris/Allied number has changed to: 1-800-300-0733.)

Richard Novak (rnovak@ix.netcom.com) wrote this informative note on using Hi-Fi VHS as an archival medium:

To clear up any misunderstandings concerning VHS HiFi machines and their ability to record audio, I offer the following..

It should be understood that what distinguishes a HiFi machine from a linear machine is that the audio track is recorded helically (diagonally) on the tape along with the video track. On linear machines the audio is recorded at the upper edge of the tape (and a control track at the lower edge, if anyone wonders what the extra head is for.)

On a HiFi VHS the audio is not recorded as an analog signal as would be the case with linear recording. Instead the analog audio signal frequency-modulates a carrier which is then recorded between the video tracks. A duplicate signal is also recorded linearly to maintain compatibilty with linear VCRs. The FM signal recorded on the HiFi track should not be confused with FM radio broadcasts. One of my customers thought the FM switch on his HiFi was for recording FM from the radio. Today's machines no longer use the label "FM", instead use "HiFi". Less confusing.

The sound recorded from FM radio broadcasts (or any other source) onto HiFi VCRs is virtually indistinguishable from the source. The material can be dubbed to cassette with no generation loss.

There is no difference in audio quality using either six hour or two hour mode.

It is true that at slower speeds the diagonal tracks are closer together. This does degrade the video signal as anyone knows who has compared six hour video with two hour video. But does not degrade the FM carrier with the audio track.

The tape writing speed of the audio track in HiFi mode is the same regardless of linear speed. This is because the head speed remains constant and is independent of the linear tape speed.

Worked it out once and it is around seven meters per second. Whatever it is, it's a whole bunch faster than 7 1/2 inches per second. If anyone really wants to know the writing speed, it is the circumference of the upper cylinder (or video head) multiplied by the rotational speed which is 30 revolutions per second, or 1800 revolutions per minute. (Two heads 180 degrees apart at thirty rps results in 60 frames per second.)

Who cares how it works.. The point is that VHS HiFi is the best and cheapest medium around for recording masters. But not for archiving. Most experts still agree that reel to reel is the best and most reliable method of archiving. (Sticky shed syndrome from the 70s notwithstanding.)

From: ErikS74342@aol.com

I'm using a brand-new dubbing Sony deck that has given me terrific results over the last three months. (Sony TC-WR565, about $200 at Circuit City). It's a dual-motor model, with precise LED volume meters and tape counters. It is one step below Sony's best dubbing deck, which offered few additional features for an additional $70. I wouldn't recommend Sony's entry-level models, which skimp on the details. This deck automatically encodes tapes with Dolby HX.

This particular deck comes with a pitch control that can be used to correct pitch problems with master tapes -- a godsend when working with too-fast reel-to-reel source copies. (Sony also offers the TC-WR465, without the pitch control, for about $20 less. Believe me, it's worth the price.)

To reset volume levels and correct other deficiencies
with master tapes -- yes, you need a second cassette deck
and a graphic equalizer.

Although Bob Burnham does not like dubbing (two-well) cassette
decks for producing highest-quality cassette tapes, he does have
a few recommendations:

One of the BEST dubbing decks (if you must use one) is
made by Denon. Both sides can record at the same time
and both sides have pitch control, and both sides have
separate output jacks for connecting to other
equipment.... almost like TWO <click> TWO <click> TWO
DECKS in one. Tascam (Teac's pro division) also recently
introduced their model 303 double deck. If it's anything
like the 202 MKII, it's probably not worth it. You pay a
high price for the name, but still basically consumer
grade inside and lots of plastic. Denon is better.

I mentioned Kingdom Tapes in Mansfield, PA as a good
source for cassette copiers, and equipment servicing.
All the duplicators I have in use today came from this
company. They have all the major brands (plus their own
house brand), also tape decks, blank cassettes, etc.
Great service (same day usually available). They'll beat
anyone's price on cassette dubbers. 800-788-1122. Fax is
717-662-3875.

Bob Burnham / BRC Productions / P.O. Box 2645 / Livonia,
MI 48151 platecap@gatecom.com / platecap@eworld.com

Q20. My old reels squeak. Why does this happen, and can I fix it?

A20. There are at least two causes for "squeaky reels" on a reel-reel
tape recorder. (1) The tape edge may be rubbing against the
rim of a distorted take-up reel, or (2) the oxide may be
sticking to your erase (or other) heads. If the former, the
least frustrating alternative is probably a new take-up reel.
If the latter, Fred Korb left this note:

If you have any squeaky reels that you would like to
recover, I will be glad to send you more information
on how to do it. Just send me a stamped self addressed
10 envelope and I will respond. Send your request
to: Fred Korb, c/o Oldtime Radio Collectors and
Traders Society, 725 Cardigan Court, Naperville,
Illinois 60565-1202. I am willing to help you preserve
the sounds of radio days gone by.

[Editor's note: Fred's method consists of a kit by which a
lubricating film can be automatically applied to the tape as it
is played. I tried it. Although temporary, it does indeed work!
I'd recommend it for those squeaky tapes that you wish to
re-record onto newer reels.]

Richard Fish <lodeston@bluemarble.net> also left this helpful info about an alternative method:

HYRDROLYZATION is the culprit. The tape material -- the backing, or the binder compound used to stick the magnetic particles to the plastic backing -- has absorbed water from the air. The water molecules actually make the tape expand a bit, so it doesn't fit the machined tape-guides properly anymore; and they can interfere with the lubrication impregnated into the tape; and it is theorized they can even interfere with the polished smoothness of the tape surface.

WHY SOME TAPES AND NOT OTHERS? It depends on the formulation of the plastic backing and binder. In the mid-70's, both 3M (Scotch) and Ampex, the two major tape manufacturers, started experimenting with their formulas. They thought they were introducing major improvements, but instead created a tape much more prone to hydrolization than anything had ever been. The problem did not show up for years, and the formulas did not get corrected until sometime in the mid-80's. Theoretically any tape could get hydrolyzed over a long period of time, especially if stored in a high-humidity situation, but in practice most squeaky tapes were made (roughly speaking) between 1975 and 1985.

WHAT'S THE FIX? Tom Lopez at ZBS (the most prolific and entreprenurially successful producer of radio drama in the US today) gave me his formula and I've done it many times now and it works:

Bake the tapes in a convection oven for 8 hours at 130 degrees Fahrenheit. It is entirely possible to bake a tape twice if the first time doesn't do the trick. You get about a three-week "window", sez Tom, before the tape starts to re-absorb water. So the best deal is to bake the tape and immediately make a copy. But if you forget to do it and it re-hydrolyzes, you can bake it again.

Q21. Where can I find more information about antique radios?

A21. An excellent place for discussions about antique radios, phonographs and accessories is the rec.antiques.radio+phono newsgroup, created by Bill Robie. A pointer to his FAQ may also be found at my WWW site. Basically, r.a.r+p

- Is a *discussion* group, rather than a sales group (see r.a.m)
- Focusses on radios, phonos, and related materials made before the 60s
- Avoids "ham" radio gear (the Boat Anchors group covers that)
- Has a -very- comprehensive FAQ that new folks should read

Several museum sites are available at my WWW page. The WWW site, "The Bellingham Antique Radio Museum" is also available directly via URL http://www.pacificrim.net:80/~radio/ This site contains info and GIFs on old radio hardware, as well as soundclips of OTR show intros.

The University of Maryland also has a WWW site entitled "Broadcast Pioneers' Library". This is an excellent resource for the serious / professional researcher. It can be accessed through my WWW site, or directly via the URL: http://www.itd.umd.edu/UMCP_Libraries/BPL/bpintro.html

Additional sites with pictures of old radios or other hardware resources may also be found at my WWW site.

Q22. What is the best radio / antenna to get distant OTR stations?

A22. Several readers have been acclaiming the GE SuperRadio III as an excellent choice for picking up distant AM stations that carry OTR programming. Although the tuning dial has notoriously poor calibration, the sensitivity and selectivity seem superior to other radios. A SuperRadio FAQ is available via my WWW site.

-Some- readers have had good success with the Select-A-Tenna antenna advertised in several magazines, and the Grove Catalog. The S-A-T seems to be rather directional, and may eliminate off-axis interference.

Ham Radio magazines sometimes carry information about small loop antennas for AM DX-ing. Dan Hughes <dhughes@prairienet.org> left this note:

Several years ago one of the electronic magazines ran plans with dimensions and number of turns, etc to build one of these antennas. I have built several and I'm no mechanic. If you (or anyone else reading this) would like a copy of the article and plans, drop me a stamped, self-addressed envelope: Dan Hughes, P.O. Box 933, Urbana IL 61801.

If you are interested in AM Broadcast Band reception, and technical artlcles related thereto, send a SASE to the following address for their product catalog:

National Radio Club
Publications Center
PO Box 164
Mannsville, NY 13667-0164

Q23. Is there a group for modern radio drama ("new-time radio")?

A23. There are several USENET groups whose charters include modern drama. Check the lists on your local Internet provider to see which are available to you. Here is a list of some of the WWW pages for radio drama (more may be found at my WWW site):

Atlanta Radio Theatre Company: http://www.webamerica.com/artc
ZBS Media http://www.zbs.org/zbs.html
LodesTone Productions
http://www.bluemarble.net/~lodeston/lode.html
Midwest Radio Theatre Workshop?
http://www.thoughtport.com/tpa/non/mrtw

There is also a mailing list for folks interested in current
radio drama:

Send email to: majordomo@world.std.com
Subject:[blank]
text: subscribe radiodrama

Q24. I have only email access to the Net. Can I still get the files at
your FTP site?

A24. Maybe. There are several FTP-by-email servers. Contact one of
them for instructions.

ftpmail@decwrl.dec.com
with no subject line,
and two-line body with line one help and line 2 quit

ftpmail@grasp.insa-lyon.fr
(body: help) Please, European users only.

bitftp@pucc.princeton.edu
(body: help or ftplist for a list of anonymous ftp sites)

BITFTP@DEARN or BITFTP@vm.gmd.de
(body: help or ftplist for a list of anonymous ftp sites)
(Europe only)

Since the OTR FAQ is an "official" FAQ, a copy of it is stored at
MIT, and is available from the MIT mailserver. For more info on
how to get files by email from MIT, send a message
TO: mail-server@rtfm.mit.edu
SUBJECT: [blank]
BODY:
help
end

WWW pages can also be retrieved by email. Contact
agora@www.undp.org for more information

Q25. Your Digest and WWW pages only deal with Old Time Radio. Where
can I get similar information about early TV?

A25. The OTR Digest and OTR WWW Pages are purposely self-constrained
to OTR topics. Folks interested in early TV shows might be
interested in this note from Kathy O'Connell
(oconnell@pobox.upenn.edu):

Let me announce a brand new TV list!!! A woman named Linda has just started a list devoted to 50's-60's Television. You can contact her at LEEKNIGHTS@delphi.com I signed on immediately, and it's a wonderful place to meet other people interested in this subject. Very much like the OTR list, but for television!!!

Q26. I have never heard "Old Time Radio". Can I get an audio sample via Internet?

A26. Yes, if you have a suitable WWW browser and sound card. Connect to any of the WWW sites mentioned above, and follow the pointers to their audio clips and / or soundbytes. Most of the soundbytes can be downloaded, and played on your computer's sound card.

Q27. I have lots of loose OTR cassettes filling my drawers. Is there a better way to store these things?

A27. Collectors with lots of cassettes seem to use just about everything from "underbed cardboard storage boxes" to old soft drink cases. If you want your collection to have a more "professional" look, here is a note from Ron_B._Hare@livewire.com (Ron B. Hare)

You almost need to buy cassette albums from specialty suppliers. Radio Shack used to carry a small line of these and charged too much. We are in the recording studio business, and receive catalogs from several sources. The one one I like best has some of the lowest prices and unhesitatingly deals with individuals and will take your credit card number over the phone for instant shipment (in contrast to some who require account setup, purchase orders, prepayment, cash and other nuisances).

Polyline Corporation
1233 Rand Road
Des Plaines IL 60016
(708) 390-7744
FAX (708) 390-9886

or, their West Coast branch (where I got mine)
PolyWest Corporation
16018 Adelante Street, Unit C
Irwindale CA 91702
(818) 969-8555
FAX (818) 969-2267

They have two catalogs: one for audio and one for video. Cassette albums are available in a large number of different styles, sizes and capacities. The 8-cassette albums I use are CPCN.4+4M/WHT in white and CPCN.4+4M/RBLU in royal blue. Outside

dimensions are 9 7/8 x 7 x 1 1/4 wide, so they fit well on a bookshelf. This model also seems to cost less per cassette than any of the other models, though logic might lead you to the conclusion that the larger capacity ones would cost less.

I paid $2.11 each plus tax and shipping for my latest batch (November 1995). The minimum economical order is 40 albums. You can order smaller quantities, but the price is $4.68 EACH. Check with Polyline before ordering. The prices change frequently.

Q28. All this new software is a bit difficult for me to use, as I am blind. Can you give me any assistance on how to read your page?

A28. Yes. Although my WWW page is best viewed with Netscape, I also have a text-only menu that might be easier on your reader. There are many blind OTR collectors who might be able to help you as well. Two experts in OTR as a hobby and Internet / computers are:
Henry Brugsch <henry@g0gku.demon.co.uk> and
Ronald Staley <rstaley@netcom.com>. One or the other would be able to help you use your computer and reader to access my pages or maintain your OTR collection.

915. Blind Radio Student

Newsgroup: rec.radio.broadcasting
Date: 1996-01-25 00:00:00 UTC
From: John Lovell <jwlovell@ix.netcom.com>
Message-ID: <4e7ibl$5i3@vixen.cso.uiuc.edu>
Source record: 26695

All,

The recent messages regarding blind and disabled broadcasters has been a great help to me and one of my current broadcasting students who is blind. We haven't been getting a great deal of assistance from the Division of Blind Services, who thinks she would do better in a more "traditional" job training program.

Our radio school is part of the Dade County Public Schools, Adult and Continuing Ed. Department, by the way. We've been teaching radio for over 20 years.

My student and I have been trying to figure things out as we go to discover ways to make it possible for her to use the equipment completely on her own. I've hooked up secondary VU meters with the covers removed, as an example, so she can feel the needle when it goes into the red. Braile labels are on the boards to help her learn their use and we've added braile numbers to the side of carts so she can practice running air shifts.

If anyone has additional ideas, or knows of adaptive equipment that might be used to assist her, I would be appreciative of hearing from you privately. Many thanks in advance.

John Lovell, Radio Broadcasting Instructor

> : against the LP?

The big thing is that the quality is *consistent*. When it works, it works 100% - with no fading, multipath, cross-modulation, etc. And 7 kHz DAB sounds much better than AM for voice stuff.

Will the consumer care? I think it depends upon whether there is new content that people will want to listen to enough to buy a DAB receiver. New channels presumably mean new programming eventually.

A lot of people have cable TV in order to get more programming choices. Unless DAB is constrained to only simulcast content available on AM/FM, of course.

NH>* 50,000watt Correction : In my previous BRW update(1/10/96), I said
NH> that Fairbanks' WKOX AM 1200 already received the FCC approval
NH> for its power upgrade to 50.000 watts. As of now, that is not
NH> the case -- 'KOX is still awaiting FCC's decision, though station's
NH> management doesnt expect any roadblocks.
NH> [Next Boston Radio Watch will include the results of
NH> Framingham Selectmen's meeting scheduled for next week to
NH> review WKOX's plan for power upgrade]

Mark,
What business is it of the Framingham Selectmen? The power
increase is none of their business. What I think you mean is that the
upgrade requires a new tower site configuration. They're probably
deciding how additional towers fit zoning regulations.

919. Radio Shack directional antenna

Newsgroup: rec.radio.broadcasting
Date: 1996-01-25 00:00:00 UTC
From: ppplanet@epix.net
Message-ID: <4e7ic2$5ip@vixen.cso.uiuc.edu>
Source record: 26699

Radio Shack sells a directional FM antenna for only $20. Does anyone know if it's any good? I'm trying to pick up WNEW, which is 120 air miles away. Right now I can only pick it up in the car when I'm at a slightly higher elevation.

[Moderator's Note: They work pretty well, but there are much better ones available from regular electronic supply houses. The RS model is good for moderate distances and moderate F/B ratios. For more directivity and/or distance, you may wish to get a better (more elements) FM yagi. Bill]

* 16-year morning voice at 98.5 says good-bye....:

American Radio Systems' Hot AC WBMX 98.5FM and
its long-time morning voice, class-act Joe Martelle parted ways
earlier this week. Martelle, who's been off the air since late
November due to a complicated lung surgery, was apparently bought
out of his contract with the station. The deal had another 7 months
to run.

The buyout had nothing to do with Joe's illness but rather
with management's desire to boost station's ratings and bring
in a new morning personality as it battles crosstown rival
WMJX 106.7FM for Adult Contemporary throne. Also, Martelle
fully aware of management's plans was willing to part with 'BMX
on friendly terms. He hopes to be heard from at a different Boston
station later this year.

Martelle was part of one of the most dynamic morning teams
in Boston radio from 1979 to 1988. Along with Andy Moes
they made up 'Joe and Andy Show' on WROR 98.5FM. In addition, Martelle
had one of the most hottest Saturday night all-request shows
on 98.5FM.[While in college in Boston, I remember
leaving my radio dial set to 98.5 before going to bed on Saturday
night, so that I can turn on Casey Kasem's AT40 the next morning without
looking for the right frequency :-]

After WROR-FM(and its sister station WRKO-AM) changed hands
in the late 80s, the new owner, locally-owned Atlantic Radio(now
much larger American Radio Systems), dropped Moes from the morning
crew and Martelle was left working solo. [After a failed
attempt of hosting a morning show on the old all-sports WEEI AM 590
from 1991-92, more tamer Moes is now at all-talk WRKO AM 680 doing
2-6pm Saturday afternoon show]

In February 1991, the station switched formats. The old mix of
Top40/AC and WROR calls were history. A faster-paced Hot AC and
brand new calls WBMX("Boston's Mix") were introduced to Boston.
Station's ratings began a steady climb under the leadership of
a very talented PD Greg Strassel. By 1995, the WBMX was
at the top of the AC race in Boston and one the fastest growing
stations in the country. Last year WBMX was named AC station of the
year by Gavin Report. Also, Greg Strassel was named PD of the Year.
And Music Director was picked as the Best Major Market MD by Gavin...

Back in the spring of 1994, ARS management and Martelle were involved
in very sticky contract negotiations. There was some talk that

Martelle might move on to rival WMJX to fill a vacant morning spot(popular Tom Bergeron left to host AM show on F/X network in NYC). At the end, Martelle was signed to his current deal at WBMX while WMJX brought in Gary Dickson from Pittsburgh.
Recently, WMJX picked up some pace and according to most recent Arbitrons is now sitting pretty at the top of 25-54 demo. WBMX came in third.

[Ed.: Whatever the real reasons behind moving Martelle out of the WBMX picture might be, he'll be truly missed on this end....until he returns somewhere else on the Boston dial...:-]

-Mark

921. D.C. Radio Watch / 24 January 1996

Newsgroup: rec.radio.broadcasting
Date: 1996-01-25 00:00:00 UTC

Message-ID: <4e7ibe$5hk@vixen.cso.uiuc.edu>
Source record: 26748

Heidy-ho, Airwavers! Here's a quick look at the radio news biz from the Nation's Capital, Warshington Dee Cee!

Item First: "Along the Ratings Rialto" -- Here are some of the headlines from the latest "Fall" Arbitron, as published by the Washington Post's "On the Dial" (radio) column. (the Post does not do a "chart" as most other publications do, so I'm going to try to reconstitute as best as I can, with numbers for the Summer where available.) This is the top ten, adults 25-54:

1) WHUR-FM (Urban Contemp) 6.5 (down slightly from summer)
2) WASH-FM (Adult Contemp) 5.7 (up from summer 5.4)
3) WMZQ-AM/FM (Country) 5.6 (down from summer 5.7)
4) WRQX-FM (hot AC "Mix 107.3) 5.5 (down from summer 5.6)
5) WJFK-AM-FM (talk, jazz) 5.2 (up from summer)
6) WPGC-FM (Urban Contemp) (no numbers published for
6-10 ranked stations...grumble)
7) WBIG-FM (Oldies 100)
8) WMMJ-FM (Oldies Soul/R&B)
9) WJZW-FM (Smooth Jazz 105.9)
10) WWDC-FM (Modern Rock DC101)

In morning drive, Donnie Simpson at WPGC-FM checked in at #1 with a 7.1 share in the 12+ survey, down from his 8.4 posted for the same period in '94. ABC O&O Talker WMAL-AM's Frank Harden/TimBrandt/Andy Parks came in second, with a 6.4, up from the summer's 5.7. Howard Stern over on WJFK tied with Cash&Murphy at WMZQ for third, and "Diamond in the Morning" on Mix 107.3 came in fifth.

Item Second: "Correctamundo" -- Speaking of Mix 107.3, Bert Weiss of "Diamond in the Morning" faxed the Post to correct an error: He had been hosting mornings on the station during the blizzard when co-host Jack Diamond's brand new 4X4 vehicle was buried in the snow drifts, keeping him off the air for three days.

Item Third: Shuffling the Deck Chairs -- Changes at all-newser WTOP-AM (1500): The station has begun plugging in portions of the Associated Press all-news feed into the weekday overnights, and weekend programs. News Director Hal Brown is quoted in the Post as saying anchors are to refer to it as the "WTOP National Desk" (yeah, yeah, whatever, Hal). Brown is now anchoring mornings along with former AP Radio/Sky Radio anchor Jill Cohen. Morning man Bruce Alan moves to middays, and Debbie Feinsten moves to afternoons, where she is co-anchoring with former WASH-FM morning newsman Bob Madigan. Veteran anchor John Lynker hosts overnights, and Bob Means has retired. Fired from WTOP: business reporter Larry Matthews (who won a Peabody for his commentaries over at WMAL, and also was a newsman for WWDC-AM when that station had a first class news department); news staffers Ann Cates, Mike Yardley, and Orla Reese.

Item Fourth: "Back in the Saddle Again" -- The Post reports that Al Santos, who used to do evenings and the "Sunday Jazz Brunch" on "W-Lite" (WLTT-FM) before CBS switched it to "Arrow", is back on the air again. Santos now hosts the "Smooth Jazz Sunday Jazz Brunch", 9am-2pm on WJZW-FM ("Smooth Jazz 105.9). In the interim, Santos had been at WBIG-FM (Oldies 100) doing nights, as well as doing some traffic reporting for Metro Traffic Control.

Item Fifth: "Go Play in the Traffic" -- Philly-based Shadow Traffic landed a big new affiliate in the D.C. market when it recently signed ABC O&O talker WMAL-AM for traffic reports. The Washington Post reports that this ends WMAL's 12 year relationship with Metro Traffic Control. WMAL joins WOL and WMMJ-FM as stations served by Shadow, which entered the D.C. market just two years ago. Shortly after coming into town, Shadow also had WASH-FM and WTOP-AM...but WASH moved to Metro in the Spring, and WTOP followed in the Fall. Metro traffic reporter Brooke Stevens, who stopped flying in a plane for WMAL within the last few months, will reportedly remain with Metro as a reporter, and is also negotiating with WMAL to become a swing-shift announcer, and a possible partner for afternoon driver Chris Core when his partner Bill Trumbull retires later this year as has already been announced.

Item Sixth -- The New Kid In Town -- Our next item comes to us from Airwaver Tracy Wood who reports via e-mail:

I just noticed a new sunrise-sunset station. The station specifics
are WWTL, 700AM, 5000 watts. Licensed to Walkersville MD it serves
the Frederick MD area and most of NW metro DC. For the most part it's
a relay of WTRM-FM in Winchester (Southern Gospel format) but has
occasionally local brokered programming.

So much for listening to WLW during the drivetime..... I think this
nixes the expired CP for WRES Reston with 250 watts.

Tracy Wood
tracy.woodic.cpcug.org
Sterling VA

Thanks, Tracy... I'll have to check this out on my next road trip to Hagerstown! Also of note: D.C. has one of those "Hertz Travelers Info" stations operating at 93.5 (is this the right frequency for this?) out of National Airport, providing what amonts to a long, repeating commercial for their rental car service. Although operating at very low power, the station can be picked up in portions of downtown Washington on any car radio, or a boombox.

That's it for now...more next time!

KMOX RANK AND FILE MEET
THURSDAY WITH AFTRA;
EMOTIONS RUNNING HIGH

by Scott Simon
copyright 1996

ST. LOUIS --- On-air staff announcers, news reporters and editors of KMOX radio who are members of the St. Louis American Federation of Television and Radio Artists, will meet with union negotiators Thursday to determine a course of action to take regarding protracted negotiations for a new collective bargaining agreement.

Several members who wish to remain anonymous said that they would like for the union to either request arbitration to negotiate a new contract, file an unfair labor practice against CBS, owner of KMOX radio, or advise them if they have options to strike.

The disgruntled employees charge that KMOX is not negotiating in good faith, and that working conditions and assignments have deteriorated to where morale is at an "all time low."

Some members have questions to the status of their working classification and allegiance in a possible job action. KMOX reporters are paid an AFTRA fee of about $10,000 a year for their on air work, but also are paid $20,000 a year by CBS and classified as CBS employees, and receive health and pension benefits from the network. Full-time, on-air staff announcers are paid a scale starting at approximately $42,000 a year, and receive all health and pension benefits through AFTRA.

But then there's the case of overnight talk show host Dianna Proffitt. She works approximately 25 hours a week on air, is paid a per diem about $22 per hour under the AFTRA on-air announcing scale term, but is not a full time employee, and therefore, doesn't receive any health or pension benefits from either AFTRA or CBS. Her plight was documented last year by St. Louis Post-Dispatch gossip columnist Jerry Berger, writing a story when negotiations for a new contract first began.

One reporter questioned if AFTRA authorized a strike, would CBS fire them because they were employees who didn't report for work, even though they are AFTRA members.

Another member who is active in the negotiations, says that no final offer has been made to the rank and file by the station, and calls this current negotiation, "fairly standard," and says that

Thurday's meeting is informational, and not to vote on a job action.

One source said the station, "has made their final offer," and that it calls for takebacks. However, no specifics were given. They said the concern was over job security, in the wake of recent terminations of KMOX per diem personalities Gordon Curry, Tripp Frohlichstein, and Dave Finklestein.

The current agreement between the collective bargaining unit and KMOX was reached in 1992, and eleven negotitations have been held between the two sides. KMOX on-air talent continue to work under terms of that contract, generally known as a "evergreen clause."

That clause effectively prohibits the rank and file from striking, unless KMOX says it will no longer wishes to recognize the contract.

Eleven negotiating meetings were conducted between AFTRA negotiators and KMOX management, the last one a month ago before the Christmas holiday. Negotiating sessions also have been tempered by the long-awaited control of CBS by Group W, which assumed control earlier this month.

Coincidentally, Group W executives are scheduled to be at KMOX this Friday to meet with management and employees. A meeting on January 8 was postponed due to bad weather.

Other St. Louis radio notes, it's being reported that former KMOX automotive expert reporter Dave Finklestein has accepted a position for a two-hour weekend talk show at KSD-AM.

He was recently let go by KMOX radio. No word at press time what hours or day Finklestein will appear.

TR>Not that research is bad, just that it's often badly used. At the same time,
TR>I'm glad that the Ten Commandments or the U.S. Constitution were not first
TR>subjected to the charms of a focus group.

Actually, the Ten Commandments would be the perfect way to keep an audience. It's driven from the top down. Instead of having an audience dictate its wishes, the radio "God" (General Manager?) would command you to listen under the threat of eternal damnation. I know many GM's who would love that approach and have probably lobbied the NAB to lobby the FCC to adopt it. The downside is that there could only be one station and we'd all have to listen to it. I suspect Ralph Reed would be the General Manager, since he claims to have the fast track and the connections.

I also think you'll find that both the Ten Commandments and the US Constitution have been badly used.

> Keep classic rock alive. Play new music!

That's what a local station here used to do, then it got wise and mixed in newer music. (The station is KRQR 97.3 in San Francisco). I lstened to it at work from time to time, but it got boring hearing the same old music over and over again (key word being old). But sometime in the last year, it started adding in newer rock. It was one of the best moves i've seen. They're playing newer stuff by bands that you mentioned, even throwing in occasional music from the various incarnations of alternative (REM, Morrisette) and newer rockers (Etheridge, Osborne). It's always been a popular station, but it's even more so now that people can also hear new music on it.

This can probably start a whole new thread, but gentlemen, you just don't seem to get it: MEN are the ones who find those basso profundo voices ultra-sexy, not women...and we really, really hate it when you crank up the bass and/or compress things to within an inch of their life. (BTW: that was one of my roles at Z-100 at the start - to be the "test chick" whom they were trying not to blow off.)

I don't mean to be presumptuous enough to speak for all women...but I can certainly speak for myself and every other woman I've ever spoken to!

>url's? I have several already, but assume there must be more out there.

Thanks to all of you who responded. Extreme thanks to: Fred... Big Kahuna Productions... who mailed me this tasty url:

http://www.yahoo.com/Regional/Countries/Canada/Media/Radio

The presentation went well. It was held in the college's board dining room. I was one segment of the college's radio advisory committe's luncheon.

The board consists of representatives of local radio stations and faculty. For my demonstration of the web I created a web site for Oldies/K-Lite Hamilton. I used Fred's url's to create a page of Candian commercial and college radio stations and websites, and included a link to the website I had installed on the machine.

I am very new to htm coding. I've been at it about 80 hours now (much of that waiting on a slow 4 meg 486sx), but was able to create a customized site, complete with backgrounds, and scans. I believe that those in attendance were quite impressed.

Hello, I would like to get into radio production some time in the future, and I was needing advice on how to get there, I just got out of electronics school, and decided at the last minute that I wanted to go into radio produciton. I was wondering if radio production is really worth going into, and what are the roles of a production director.

Is there any radio production sources on the internet, not having the best of luck with that, anyway thanks for your time.

: } Keep the compression UP!!!

: OK, but keep the distortion DOWN!!!

This discussion is funny...

If one defines distortion as a change from the original.. Then ANY compression/limiting/clipping is distortion.

When KSFO/KYA were simulcasting a while back and you switched from KSFO to KYA the quality difference was staggering. KYA wasn't exciting, but was head and shoulders above super compressed KSFO. I as a listener tuned OUT. So much for programming for the listener who is radios bread and butter!

[Moderator's Note: Just to keep the record straight, I do not define distortion as 'any change made to the original'. I define distortion as distortion. The sort of distortion that is a byproduct of overdriving an amplifier until the sound gets smashed. Clipping *is**, by its very nature distortion because it tends to create square waves instead of sine waves. Bill]

Just a couple thoughts about this compression discussion:

1. How often do people tune in a station for its overall "sound" versus other factors like the music/programming, the personalities, the signal,etc.

2. In deciding how much compression a station uses, I think that the programming of the station plays a big role. I use the example of 2 NYC stations discussed here before: WPLJ and WMXV (or even WLTW). WMXV and WLTW are more music-oriented. Besides some drive time traffic and news, I almost always hear WMXV advertising "40 minute commercial-free music sets." My point is that there is very little talking. On the other hand, WPLJ, which is very compressed, is very talky, especially during drive time when people are in their cars faced with road noise, etc. The Rocky Allen Showgram on 'PLJ can easily go for 10 minute clips without breaking for music or ads. My guess is that the large amount of compression is necessary to make sure the words don't get garbled among the other sounds. Any thoughts on this idea?

RR>In the middle are people who may not be able to put their finger on
RR>what is wrong, they probably can't say "Gee I wish they would not use
RR>so much clipping"... But they do react, albeit unconsciously, to
RR>overly clipped sound.

Bill,
They do. They tune away after a shorter listening period and find it a less satisfying experience. Julian Breen made the point that Jim Schulke did a great deal of experimenting with both equalization and processing to determine what effects on audiences there might be. It was very clear that less distortion equalled less fatigue and greater TSL, particularly with women.

One thing we're forgetting is that FM has a very steep preemphasis curve at the high end. That means that high frequencies modulate the transmitter more than lower frequencies. If you increase the level, you decrease the highs to keep modulation within legal limits. Many processors have a circuit that chops anything that could drive the transmitter into overmodulation. When that happens, it sounds like hell.

RR>I think you are going off the deep end here, Allan. Even a station
RR>with NO processing can be 'heard'. What we are debating is how 'well'
RR>it is heard and what determines that level of 'how well it is heard'.

He's talking about relative levels. If a listener only listens to one station, he'll never know the others are louder or softer.

RR>That is just not true anymore, Allan. You are most definitely
RR>competing with all of those mediums, if you are a music station. To
RR>believe otherwise is to place your head in the sand. And don't blink,
RR>cause when you do you will find another medium just waiting to snatch
RR>a few percent of your ever-so-precious listener base away.

I don't know about anyone else, but I'm competing with anything that attracts a listener to something else, even a good dinner without the radio on.

Bill, can you give some specific recommendations?

I'm stuck in a radio hole here on the valley side of Dobbs Ferry, NY. I'm probably not even 20 miles up the Hudson from WNEW, but I'm getting such a crappy signal here (I'm guessing loads of multipath - presenting itself as harmonic distortion rising and falling with the audio signal) that it's not listenable in stereo; and my favorite DJ of all time (former WNEW music director Vin Scelsa) is having his homecoming there on Sunday evening.

I need help bad.

From: dmdanhau@newstand.syr.edu
Message-ID: <4ea07h$9a9@vixen.cso.uiuc.edu>
Source record: 26565

I've been lurking a lot in this group the last few months and I can't help but notice that many of you moan when talking about the "modern rock" format. Is your age or musical taste the culprit?

Back in 1978, I discovered KROQ 106.7 in Pasadena/Los Angeles while in college. I was mesmorized by new exciting groups I'd never heard of before, that played music that was fresh, even if often unrefined. I started seeing groups like the GoGos, Oingo Boingo, X, Wall of Voodoo, etc. in small clubs. I became hooked for a lifetime.

So, now it's 1996, and we have this "new" format called "modern rock" that's sweeping radio across the country. It simply reflects another period of many small-time groups with great talent and/or energy getting acceptance. "Modern rock" is just a 90's version of top-40 or CHR.

I reserve the term "alternative" for the less-mainstream groups with a less-refined and/or commercial sound. For the most part, "alternative" is still primarily the playground of college stations.

Just my opinion ...

Dan

Source record: 26566

In Boston the number one station among adults 25 to 54, according to Accuratings, is Boston
>>University's non-commercial WBUR(FM). I find it quite ironic that this
>>demo so coveted by the ad agencies should be dominated by a station that
>>can't run commercials.

I am a bit confused. If non-commercial stations are such a hit, why haven't commercial stations picked up on the demographics and started doing long form news and classical music, jazz and "non-profitable" music formats?

I am by profession, very involved in the management of a public radio station, and while our ratings are very good, I certainly would not expect my commercial radio colleages to take up my format.

What do commercial broadcaster thinks about losing audience to non-profit, and in most cases government subsidized non-comms? Are typical public radio formats being considered for commercial stations?

Interesting. K-Rock, which just a few months ago was advertising itself as the only place where you could still hear the Beatles, Stones, Dead, etc., after WNEW switched to an alternative format, now suddenly, without a word, suddenly drops classic, and all its DJ's and switches to alternative. At the same time WNEW retreats and switches to a mixed format, old and new, in a relatively peaceful co-existence. This is like a dance of the rock formats.

MARKET MANAGER - ANTENNA PRODUCTS

Larsen Electronics is an internationally recognized supplier of quality antenna products for two-way communications. We are seeking an experienced Market/Product Manager for Amateur and Commercial antennas.

Successful candidates will have in-depth experience in radio related products up to 800 MHz. Direct experience with LMR and Amateur markets is preferred. Bachelor92s degree in Business or Marketing, or extensive related business experience required. Position responsibilities include: Product line management, pricing, sales programs, new products, training, and technical support. This position will also include a competitive compensation, incentive, and benefits plan.

Interested candidates may respond by forwarding a resume92 including income history to:

Larsen Electronics, Inc.
ATT: Human Resources Manager
P.O. Box 1799
Vancouver, WA. 98668-1799
FAX: 1-360-944-7556

Pre-employment drug screen required. Larsen Electronics is an Equal Opportunity Employer.

Here in New York, where we have three full time all news stations, one automated (WBBR), it does not seem likely that the genre will die. The two live stations (WCBS and WINS) will soon be under the same ownership, but both are expected to continue as all news, segmenting the market as upscale & suburban vs. midscale & urban.

What seems more likely is the eventual emergence of an all traffic, transit & weather station, maybe as an evolution from all news. All of these stations do traffic 6 times an hour, and weather up to 15 times an hour on one station. Although it is pathetic to watch the reporters grope for something to say about traffic at 2 a.m., the fact is that these items are steadily gobbling up the format.

>only majormarket without a true 24 hour news station? While I enjoy

Nope! Boston has one station that bills itself as the place for breaking news, but they do talk (well done, I must say, but still not "breaking news, all day, every day" as they advertise) evenings and overnights and sports programming weekends, to augment the two all-sports stations on the AM dial and NPR's "Only A Game" on the FM dial. The station I refer to is WBZ. While it's a terrific station, I do wish we had a station that was really all news!

Guess I was spoiled by WTOP, growing up in D.C. and all...

I am having an absolutely **horrible** time with FM reception in my apartment. I seem to have everything working against me: multipath caused by tall downtown buildings between transmitter and me, metal-lath walls in my residence, living somewhat below average terrain level, etc. For some stations, I can't even pick them up clearly with a $400 Yamaha FM tuner. I have had limited success with a simple dipole but it seems to work in only one spot, and that spot seems to move around depending on the weather. Also, I cannot use anything like a yagi because these are far too large to use indoors.

Is there any type of antenna which could help out in this situation? I want to shy away from "amplified" antennas because with urban reception problems, it seems like these only amplify the interference.

tbetz@pobox.com (Tom Betz) had a problem...

} I'm stuck in a radio hole here on the valley side of Dobbs Ferry, NY. I'm
} probably not even 20 miles up the Hudson from WNEW, but I'm getting such a
} crappy signal here (I'm guessing loads of multipath - presenting itself
} as harmonic distortion rising and falling with the audio signal) that it's
} not listenable in stereo; and my favorite DJ of all time (former WNEW
} music director Vin Scelsa) is having his homecoming there on Sunday evening.

Not knowing your actual terrain problems I can only suggest that you
get the antenna as high as at all possible (consider phone poles and
such if they are on your property), and to get an "FM ONLY" yagi
antenna from an electronics supply house which sells a full line of TV
antennas. If they dont have one is stock, which is likely the case,
get them to look up FM ONLY antennas in their supplier's catalog and
let you know what the various models go for.

Get the biggest one that your budget can afford and, as I said, mount
it as high as humanly possible. I have a 10' tripod and a pair of 20
foot lengths of fence pipe (the pipe that supports the top of cyclone
fences) as a mast. On top of that is my rotor and another 10' of mast
on which is my FM yagi (18 elements) and a deep fringe (36 element)
VHF/UHF tv antenna. And *I* am on a hill!!!.

Do get the rotor, it will allow you to pinpoint the best signal, and
you will probably find a lot of other signals as well.

Use RG59-U coaxial cable (the kind cable tv uses) for lowest loss and
best signal rejection. Use the appropriate transformer on the antenna
and if needed, at the receiver. Avoid FM boosters unless you suffer
from truly a low signal problem and have no nearby signals to
interfere.. Boosters amplify everything and will decrease your
receiver's selectivity and noise rejection.

Also, be sure you use a selective receiver. All this added signal
will cause nearby signals to increase (when antenna is aimed at them)
but the directional effect coupled with the rotor can do some serious
nulling of signals that interfere.

Good luck.

Well, Greg, I can help you out on the Atlanta info as well as the teenage radio problem. I am 19 and am working at the WSB broadcasting meca in Atlanta. My main job is producing our sports networks (Braves, Hawks, Ga Bulldogs Networks) and board op our talk shows, but I have also dabbled in production, on-air work on one of our sisters, and hopefully will be able to be doing some administrative work for the network soon. The point of all this is that i was a weekend jock when I was 15 in the much smaller market and my home of Athens, Georgia, about sixty miles up the road. WSB is my fifth "real" job in radio, as i started at about 13. Without plunging into ego-stroking details, I have done lots of things at many different stations in many different formats in the past six years. Currently a sophomore at Emory University, I consider myself lucky to have made so many connections in the business all over the country, not to mention how exciting it is to work along side people i listened to as children. Last night, for example, i produced a two hour talk show for Skip Caray, the lead announcer for the Braves Network. I used to fall asleep as an eight year old listening to Skip.
Anyway, Greg, I'm sure others are bored by the details, and you are welcome to email me for further discussion. But as a 17 year old moving to Atlanta, I would suggest mailing tapes, resumes and a damn good cover letter to PD's all over the city, and don't rule out formats you've never thought of (like news/talk.) I really didn't even consider applying to a news/talk outlet until i got the job. As a general overview, and I'd be happy to go into more detail over email, the radio outlets are as such:

WVEE Urban V103
WALR Urban AC Kiss 104
WAOK Urban/Rel Am 1340

WPCH Lite AC Peach 94.9
WSB-FM AC B98.5

WSTR Top 40 Star 94

WYAY Country Y106.7
WKHX Country Kix 101.5

WSB News/Talk Newstalk 750 WSB
WGST News/Talk Newsradio WGST AM/FM
WCNN Sportstalk Sportstalk 680 the Fan

WJZF Jazz Jazz Flavors 104.1, WJZF

WZGC Classic Rock Z93

WKLS Rock 96 Rock

WFOX Oldies Fox 97

WNNX Alt. 99X

those are the significant ones, addresses and PD's upon request. Good luck!

When I had my oldies show in the Chicago Suburbs, the station I was doing the program on did not have an hour tone, so I created my own.
I went through the 1000s of songs and found little one to two second bits that I assembled on Fidelipac 300 carts that I had wound to hold 10 minutes of tape. Setting my digital wristwatch to WWV before the show (I never trust a clock that isn's also a WWV receiver) I'd be all set for the next 6 hours. Up would come the hour and I'd do the usual "At the tone, __ o'clock!" Punch the cart button and you'd hear "Hey-EY!" by James Brown, or "Mm-mm-mm" from "I'm a girl watcher" to The Grand Gong from the end of the Moody Blues album, "Days of Future Passed".

I used to get requests from listeners to do it at the half and quarter hours too.

Ahhh. Fun and Production!

In article <4e7ibj$5hu@vixen.cso.uiuc.edu>, our esteemed moderator writes:

>[Moderator's Note: The reason for that is simple. Arbitron
>information is copyrighted and costs a LOT of money.

Actually, this is not true. You Can't Copyright A Number. The only thing Arbitron (and other ratings companies) are entitled to by way of copyright is the presentation of those numbers. So, if I say something like, ``According to Arbitron, radio station X has a 25 share weekdays in 25-54'', they have no recourse to copyright law.

HOWEVER (and this is a big ``however''), ratings are generally held to be trade secrets by their compilers. In order to even see the ratings book, you have to sign a contract with the ratings company promising not to disclose this information to anyone else without the company's permission. But, by the same token, only those who have signed such a contract have any obligation to honor it! If someone hands me a ratings book, and I should happen to copy from it some information that I find interesting, that information is no longer secret. The only recourse the company has is against the person who violated their contract with them by disclosing the information. So long as I do not copy their presentation (that part of the work which is subject to copyright), I am free to do whatever I like with the information.

OK Ok it is time for a rec.radio.broadcasting/AIRWAVES Flashback...

About a year ago someone posted a mock 'source code' for Rush
Limbaugh's telephone screening software. David Lawrence of Online
Tonight on WORnet) penned this 'upgrade'.

... From the archives...

>>From: oltdavid@aol.com (OLTDavid)
>>Subject: Re: Telephone caller/talk show software
>>Date: 23 Feb 1995 11:17:55 -0500

I *had* to do some further rearranging on this...let's extend this,
please!!!

---

subroutine rush_screener
get (newcaller)

/* typical */
if (newcaller = agrees_with_Rush())
then (put_newcaller_in_queue());

else /* too_much_even_for_Rush */

if (last_200_callers = agreed_with_Rush())
then (put_newcaller_in_queue());
else
(hangup_on_newcaller());

else /* placate_test */
if (time_boundary = special_disagree.with.Rush_show_segment)
.and. (newcaller = disagrees_with_Rush())
```

```
then (put_newcaller_in_queue())
else
(hangup_on_newcaller());

else /* fan */

if (newcaller = gushing_female())
then (place_newcaller_at_head_of_queue)
else
if (newcaller = black_conservative())
then (place_newcaller_at_head_of_queue)
else
if (newcaller = global(bob_dornan))
then (interrupt_current_call_with_newcaller)

else /* leftwing */

if (newcaller = lookup(liberal_caller))
if (newcaller = lookup(articulate_caller))
then (disconnect_call)

else /* leftwing_but_good_for_image */
if (newcaller = lookup(bumbling_caller))
then (place_newcaller_in_queue());
print to voice "This proves we take liberal callers, and you people
who
don't think so, I urge you to rethink your position"

---

And *I'm* a fan of Rush's!!! :)

AB>to the point fast, otherwise people calling in with problems would just ramb
AB>all over the place.

Actually, being rude to callers is "schtick" that adds a sense of excitement to a show. It's a little like the rush you might get from insulting someone in person and wondering if they'll haul off and belt you in the mouth. It does nothing to enhance the discussion.

Like fights at hockey games, it contributes nothing to the sport but adds something for the TV cameras to point at. It's "schtick." Nothing more.

Rich

JL>THE LIBERAL AGENDA WANTS TO TAX AND RE-DISTRIBUTE BENEFITS.

JL>THE CONSERVATIVE AGENDA WANTS TO ENABLE BY LETTING ME KEEP MINE.

JL>WHO IS MY REAL FRIEND?

Jim,
Sorry, but this analysis is incredibly simplistic. You're concentrating only on the economic aspects of each side. Conservative platforms are far broader than that. They include "moral" directives that believe religious beliefs should be enforced by law (witness their alliance with the Christian Coalition) and a whole host of pork barrel gifts to their supporters while alleging support for a balanced budget.

The non-Conservative side is less closeted about their willingness to waste money, but want the government to guide us through life. Neither one cares one whit about actually solving our problems. They'll both do what's politically advantagous and let the public be damned.

I'm afraid your only real friend, when it comes to the government is you.

I was saving this for a museum piece, but have run out of room! So,
I've got a Broadcast Products AR-2000 program automation system with six
SMC carousels for sale. The system was new in about 1972. It worked
when removed from service a couple years ago, but the AR2000 has a bad +5
volt supply. It could probably be powered with a $30 computer supply. I
have no idea what this is worth, but I'd like to AT LEAST cover the
freight! It'd be great if someone could restore it as a demo of antique
broadcast equipment.

References: <4dg2pe$pf3@vixen.cso.uiuc.edu>

I was reading with interest the discussion regarding
DAT vs DCC vs MD vs ... for a recording medium.

DAT will be around for some time yet (ugh), despite it's problems.
However DCC, MD et al will not make it in widespread usage amongst
professional audio applications or in Broadcasting.

Why? Bit Rate Reduction. It is vital to remember that in broadcasting
the audio may become compressed, converted, concocted, many times before
ever hitting the local FM transmitter.

For Example:
News Reporter in South Africa records an interview on DAT 44.1K.
News Reporter Dubs into Computer Hard Drive system 44.1K
Transmitted via ISDN or Satellite to BBC London at 48K 128kbps (compressed).
BBC London records on DAT 44.1 or on HARD DRIVE.
BBC London tranmittes audio to Washington DC 48K 128kbps (compressed).
NPR records on DAT or on HARD DRIVE 44.1K or 32K compressed.
NPR edits audio
NPR transmittes audio over satellite to member stations.
...oops, NPR also has "Rollovers" which are recorded on HARD DISK 44.1K
NPR transmittes audio over satellite to member stations 48K 128kbps (compressed)
Member station receives audio and...
...records audio on Hard Drive 32K 4:1 compression.
Audio goes through Digital STL - 48K 256kbps (compressed)
Audio enters an Optimod 8200 audio processor which is well known to
trash previously compressed audio severely.
Audio FINALY makes it out over the air.

Is bit rate reduction audible over the FM airchain? Absolutely.
Is it important to keep audio LINEAR whenever possible? Absolutely.
When is good, good enough? The above is an extreme for sure (even though
I can give examples with seven satellite hops), but does prove a point.
For local program origination and for normal broadcast applications,
some bit rate reduction (usually limited to 4:1) is more than acceptable
and inaudible in the typical FM broadcast chain to even the most "trained"
ears.

Source record: 26645

Tuesday morning, WWWE-AM/1100 traffic reporter Jim Endsley ("Fred Wesley") and pilot James MacVeigh were killed when MacVeigh's helicopter tagged a Cellular One tower in Highland Hills, Ohio, and crashed. Endsely worked for Metro Traffic and had been reporting traffic for 3WE for about eighteen months. The crash occurred near the intersection of Harvard and Richmond Roads, about a quarter-mile west of Interstate 271, about 15 miles southeast of downtown.

Apparently, MacVeigh's visibility was compromised when a blinding snowstorm hit without warning. The National Transportation Safety Board's Jim Cain is trying to determine whether MacVeigh tried to swich from visual to instrument flying procedures when the storm hit.

Although not an employee of the radio station, many there consider him a part of the team and will miss him greatly, as will others in Cleveland who have worked with him.

981. AFRTS in Bosnia

Newsgroup: rec.radio.broadcasting
Date: 1996-01-26 00:00:00 UTC
From: San Diego Radio Watcher <sdradio@zNet.com>
Message-ID: <4ea06s$99b@vixen.cso.uiuc.edu>
Source record: 26647

The following was forwarded to me by David Alpern, the LA Radio Watcher. I'm passing it on because of the interest in the region, and the radio-aspect. I'm told that the sites are up and running with real-time radio from the U.S. Shows such as Charlie Tuna, Rush Limbaugh and other AFRTS staples are making it to American-based Bosnia airmen, sailors, Marines, and soldiers via SATNET.

Thanks David for timely information!

ARMED FORCES RADIO AND TELEVISION IN BOSNIA

The Armed Forces Radio and Television Service (AFRTS) has been working to bring stateside radio and television service to Operation Joint Endeavor. Currently, local broadcasting consists of retransmitting the radio and television signals of the American Forces Network (AFN) out of Frankfurt, Germany. The AFN entertainment programming is supplemented by live news, sports and public affairs feeds uplinked from the AFRTS Broadcast Center in Southern California.

Army operated cabled TV and broadcast radio services continue in the following areas: Tuzla, Bosnia-Herzegovina; Zupanja (Camp Harmon), Croatia; Zagreb, Croatia; and, Taszar and Kaposvar, Hungary. Specifically, the following locations have cabled TV services currently:

HUNGARY
Taszar Air Base Kaposvar-South
Air Base Dining Facility Dining Facility
Barracks Dining Facility
JIB/PAO Offices
Auditorium (300 seat capacity)

CROATIA
Camp Harmon (Zupanja) Zagreb Airfield
Dining Facility Hospital

BOSNIA-HERZEGOVINA
Tuzla Air Base
Billeting Common Use Area
MWR Tent
JIB/PAO

NOTES: Cabled TV service for the hospital and MWR Tent at Taszar Air Base is being installed and should be operating by 4 January. Broadcast TV should go on the air at Tuzla Air Base on 3 January. The government of Hungary has given permission to broadcast American Forces Network (AFN) TV to cover both Taszar Air Base and

Kaposvar-South. An AFN TV transmitter is being prepared for shipment and on-air TV in Hungary is planned to go into operation by the third week of January.

A team of seven broadcast journalists and technicians arrived in Tuzla on 1 January with a mobile radio broadcast station. A fully manned radio studio should begin operating at Tuzla Air Base not later than 4 January providing the U.S. Sector commander with a local/regional command information capability.

Additionally, AFRTS broadcast journalists in Tuzla are continuing to provide daily radio and TV reports for use on AFRTS's Europe-wide satellite service. As more troops deploy, EUCOM has requested AFRTS services be expanded to other sites to include: more sites in the U.S. Sector of Bosnia- Herzegovina; Ploce and Split in Croatia; as well as Kiseljak, Mostar, Gorni-Vakuf, and Sarajevo in the French and British Sectors of Bosnia-Herzegovina.

The 209th Broadcast Public Affairs Detachment (BPAD) (USAR) from Rome, Georgia, deployed with nineteen soldiers, five HMMWVs, and broadcast production equipment to Germany on 30 December. They are currently undergoing further training with an Army Artillery Brigade in Babenhausen. On 10 January about half of the BPAD will deploy to Tuzla and Kaposvar while the other half fill positions vacated by Army, Air Force, and Navy broadcasters and technicians deployed for Operation Joint Endeavor.

EUCOM has requested the Croatian government to change frequency and increase transmitter power for both the radio and TV services in Zagreb. Currently the AFN radio and TV services are low powered and reach only the hospital area at Zagreb Airport. EUCOM asked that these services be expanded to reach all of the U.S. and NATO troops in the Zagreb area. (Site team in Hungary reports that the weak 250 watt signals cannot penetrate some of the massive concrete and metal structures bunkers and hangars; this was a Soviet MIG Air Base and ICBM site).

: new artists and songs that are actually good! And many of them may
: actually have staying power.

: >Personally, I find this new "modern AOR" format hard to listen to.

Well, if it's any consolation, I find it hard to listen to, because I like my modern rock w/o the classic rock mixed in. K-Rock (WKRL 100.9) in Syracuse is a modern AOR (actually they say it is Current Oriented Rock) and it _must_ be directed to classic rock listeners that want more variety, because my modern rock friends and I are just _not interested_ in Zepplin, Doors, Ozzy, Megadeath, etc. Seems like walking a tight-rope to me, but then, that's their problem. ;)

Give me that early 80's "new wave" in the mix as "oldies" (what I think of as a modern rock mix) and I'm quite happy though. :)

Jay Marvin's assumption which may or may not be correct is that his listeners are liberal as he is. Are you sure they aren't mostly conservative, or a mix of left and right?

There is a lefty on my station that has at least marginal numbers (although he has been slipping recently), but most of his callers are conservatives. When I talk to listeners at events where we have a booth, conservatives often tell me that they listen to him to get the other viewpoint after we are done.

I think that there is room for liberal hosts IF they can learn to be entertaining, animated and engaging. Most left wing hosts I have heard try to sound too much like pointy heads from NPR. Leykis is the other extreme, too caustic, but he's close to what a successful liberal's act should resemble.

I wouldn't consider either Laura or Burce Williams *rude*, just keenly interested in expediting the show. This is especially important with "advice" type shows such as these, since the goal is to get enough information in order to render an opinion by the host. Protracted storytelling just eats up valuable time.

Now, if you wan't a *rude* talk show host, try Bill Handel or John Kobylt on KFI, weekdays. . .

richwood@commspec.com wrote the quoted material below:

" I lived in San Diego for 8 years and felt more at risk there than
" I ever have in New York. Per capita, the San Diego murder rate is
" higher than New York. My car was broken into at least once a year. It's
" only happened once in 9 years in New York.

San Diego can be nasty; listening to its talk hosts gives one pause to wonder if all everyone wants to do in SD is get rid of the blacks, close the curtains, drink a martini, and pretend it's 1953 all over again. SD has had some real losers on the talkradio circuit, among them Roger Hedgecock.

However, I think judging a city by its talkshows is *one* gauge to the quality of life in that city. In Portland people were more concerned about sports scores and ideas for downtown fountains. And it shows in Portland as a rule: the city is well-designed, carries a cash surplus, and overall is well-run.

Contrast this with Los Angeles talkshows where the bent seems to be on putting TV game show hosts on the radio, and discussing gang violence. Indeed, LA is largely media-oriented; it appears on cursory glance that those who aren't guest starring on Rosanne are selling crack on Hollywood Boulevard.

In New York, while 95% of people aren't listening to WABC-Hate Talk, the issues such as anti-Arab sentiment, reflect the overall patina of New York itself, as evidenced by articles in "New York", the "Village Voice", etc. NY is a racist place, and certainly no place I'd ever want to visit. While I'm not at all Arab, I look Arab enough to seriously question whether I'd survive in such a city. WABC's Bob Grant is someone I'd consider not just an enemy to non-whites, but an enemy to New York.

-- [From: Robert Paine * EMC.Ver #2.10P] --

A fourth option for talk show hosts if they want to get rid of a caller - in your most pleasant voice say "Thank you for calling." CLICK!
As for annoying callers, I worked for a country station in 1981 when The Dukes of Hazzard theme was high on the charts. We got about one call an hour from a (presumably) teenaged boy asking "Can you play the Dukes of Hazzard theme?" (Why he wasn't in school.....) It became a running joke that we ought have said "Yeah, we can play it.", then go on with our rotation or whatever. If he would have called back and said, "I thought you were going to play...", we'd have replied, "Oh, you wanted us to PLAY it. I thought you just wanted to know if we COULD play it." Enough said?

Re: the young man who wanted advice for furthering his career. In the Jan 24th edition of Radio World, Rob Branch writes about how Jack Whitaker of KALL, Salt Lake City, helped him early on. Two important points: 1. "Read everything, including the warranty on your toaster." 2. "Get a well-rounded education; just knowing radio isn't enough." Get a degree in something far removed from broadcasting - chemical engineering, psychology, business administration, nuclear theorem - anything but broadcasting.
Why? A well-rounded education teaches you about the world outside radio. News and talk shows require an understanding of current events, politics, economics and so on. It doesn't matter that you may not like a particular subject. Your caller will. Be able to talk with them.

While surfing the Internet, and heaven knows we've all done that before, I stopped onto the World Wide Web and with the use of the "Webcrawler" I stumbled upon a WWW Page called "Have a Heart for Susan". I took a look at this webpage and found it to be the story of a very brave young woman named Susan Hattie Steinsapir who suffered from degenerative heart disease, brought on as a result of Hodgkin's Disease that was treated and cured with high doses of radiation treatment. Her current condition was so critical she was placed on the waiting list for heart transplantation L.A. Medical Center in Los Angeles. After many weeks of agonzing waiting, a heart was found last Sunday. She received the donor heart that evening, Los Angeles time. I, like so many other folks in cyberspace have been anxiously reading the news from L.A. on the webpage set up by two very caring friends of Susan and her husband Andreas. She progressing slowly after the surgery but is still not totally out of the woods yet. She was a very high-risk candidate for this surgery and has had a few complications along the way since. But things are looking up for her as the circulation has improved dramatically ever since the operation. We're all praying for her speedy recovery.
Might I suggest checking out Susan's webpage and see for yourself. In addition, you might find some exciting new developments in organ transplant-ation that might save someone's life in the future. I am living proof myself on how heart research can save one's life having had two surgeries to repair congenital heart defects over the past 27 years. You might be amazed.

Susan Hattie Steinsapir's webpage is.....

So Jim Snowbarger thinks Rush Limbaugh isn't rude? Perhaps I should defer to Jim's opinion, since I gave up listening to that one-trick pony a long time ago... On the other hand, I can't help pointing out that I always found Limbaugh's condescending attitude toward the "masses" to be incredibly insulting. Also, I don't think it's in the best interests of the American listenership to be told repeatedly, "Don't think--let me do your thinking for you." This is one of the reasons I stopped listening to Rush; I much prefer a talk show host who encourages listeners to take some responsibility for their own thoughts and opinions. In today's political climate, critical thinking is an art that should be *fostered* by talk radio�not discouraged.

Let me suggest a talk show host, local to Dallas, who is entertaining and opinionated, yet interacts with the audience in a fairly non-hostile way: Marc (Mark?) Davis. Davis is opinionated yet willing to consider other views; he can disagree with a listener without sounding annoyingly condescending or making the listener feel like he or she is scum... He knows how to challenge and inform an audience without alienating them. Kudos to Davis!

I'll also throw in a vote for Gil Gross, even though he no longer plays in Dallas. When he was on the air here, I liked him simply because he has a pretty relaxed manner, even when dealing with heavy subjects.
Since he was on here in the late evening, I knew I could listen to his show and be entertained, yet not get so worked up I couldn't get to sleep. Many of the evening shows these days promote such angst! Hey, save it for the daytime; at night I prefer a talk show that doesn't remind me quite so forcefully about how "bad" things are today. At night, I think many listeners want to be entertained, and informed, but not burdened--and definitely not reminded that America is already on a doomsday course to hell in a handbasket.

Just one listener's opinion, of course.

I think KNX 1070 in Los Angeles was one of the radio stations running
the teletype sounds...I tuned in tonight and it's gone.

KTVU channel 2 (Fox,San Francisco) still runs a teletype sounder under
the on-camera anchor segments in it's 10pm newscast.

Still waiting to hear 10 bells!!!

I've had run-ins with the English language many times over the years. I have to preread all copy in case it reads: "22nd" (such as "Oct 22nd". A strange force wants me to say: "October secondy-second". I have announced it that way without realizing it on at least 2 occasions.
While working in Sioux Falls S.D. I was reading live copy for a popular restaurant which featured a different foreign cuisine each night.
I enthusiastically told our listeners that: "They serve Greek dishes, Italian dishes,Oriental dishes,German dishes and French dishes"
I then urged them to:"taste the deliferent dishes" ,instead of "taste the delicious difference"
Several listeners were so amused the had to call and chuckle at me!

A great story for "insiders" to the industry. The following story IS TRUE. It happened this morning, I witnessed it, it is not an urban myth. In honour of Sunday being "National Kazoo Day" the FM/AC station I work at and our AM/Country station were giving away kazoo's. A local dealer gave us a bunch and each time we gave one away we would plug "The Attic MUSIC Centre". Well one of the winners from the country station, showed up at 10am - with a flatbed truck - to pick up his - SKIDOO. Yup, he thought caller one, two and three each won a Ski-doo. Sad but true.

Thanx

1010. Any US wristwatches based on timecode transmitters?

Newsgroup: rec.radio.broadcasting
Date: 1996-01-27 00:00:00 UTC
From: Stefan Schiffer <schiffer@swe.uni-linz.ac.at>
Message-ID: <4ecqfv$ija@vixen.cso.uiuc.edu>
Source record: 26476

Someone told me that there exist NO
WRISTWATCHES in the U.S.A which receive
timecodes from U.S. atomic clocks.

I cannot believe that.

In Germany such wristwatches (e.g.
manufactured by Junghans) receive
timecodes from the DCF77 transmitter at
Mainflingen/Frankfurt. Other watches (e.g.
from Casio) can be tuned to serveral
transmitters in England and Japan but
haven't yet seen a watch which can be
tuned to an U.S transmitter.

So is right, that there exist NO
WRISTWATCHES in the U.S.A which receive
timecodes from U.S. atomic clocks?

Stefan Schiffer

PS: I hope thats the right group for
such a question.

Hi DAN

re your question about WFNX Boston radio watch 22/1.

Yes WFNX is in the Boston "book". They pulled a 1.7 last summer and a 1.5 in the fall sweep just out. Their address is 25 Exchange St, Lynn, MA 01903. Phone 617 595 6200.
Of interest, WBCN in now alternative(5.7 last summer and a 4.7 in the just released fall book)
WBOS is the other Alternative in the market (targets adults)currently on 2.2.
Hope this helps...ROB

1013. WFNX question(Was : Boston Radio Watch)

> From: dmdanhau@newstand.syr.edu (Daniel M. Danhauser)
>
> Just wondering, is WFNX 101.7 part of the Boston market?

Yes, it is.

>Never see them mentioned, nor any ratings either. Are they considered
>to be in another market or are their ratings just so low as to not
>merit mention?

I cant say I never mention it in BRW...:-)

The station is very visible in terms of promotion. Almost every
major record chain store(HMV, Tower, Newbury Comics) always has some
sort of a promotion with 'FNX...

'FNX is also very active in promoting local concert/club scene.
Saturday's 'X-night' at the local Axis club is one of the longest
on-going radio promotions in the area...As part of it, WFNX's
"Liquid Todd" Wilkinson hosts "The Spin Cycle" from 9pm-12a...
"Spin Cycle" is a 3-hours of non-stop, commercial-free dance/techno
mix -- one of a kind in this market...

Yet, Arbitron ratings seem to indicate that the station is
on the low end of things. The most recenet book had them in the #20
spot for overall(12+) audience. They dont show up in Top 10 for their
target 18-34 demo...On the other hand, AccuRatings, which has
'accurate' in its name and believed to be sampling somewhat
more younger listeners, shows 'FNX doing very well with 18-34's...
Go figure! :-)

There are different reasons why WFNX 101.7 isnt where they're supposed
to be with an explosive format like AP/Modern Rock. My 2 cents :
most of their rating woes are due to its weak signal which doesnt
cover a lot of parts of the city well. They are looking to
build a translator at 101.3 which should relieve some of the reception
problems in the Back Bay/Fenway sections of Boston -- 'FNX's reception
at their corporate office on Brookline Ave(just outside Fenway Park)
isnt that great sometimes....I think listenership only goes
as far as a good signal will take it. It's a lot easier for an
average listener just to tune to, say WBCN or WXKS(yeh, Kiss108 has
that Z100 feel thesedays; if you havent heard it in a while, you'll
be pleasantly shocked :-) for their AP/Modern Rock fix rather
than putz around with an FM antenna or move the reciever around
the living room...:-)

Best Regards,

-Mark

In response to: dmdanhau@newstand.syr.edu
re: WFNX-FM in Boston

Yes, WFNX-FM is indeed considered part of the Boston radio market, even though it's licensed to the northern subsurban city of Lynn (the frequency was previously used for the former WLYN-FM). 'FNX management most definitely aims for the Boston market, as its parent company is the Boston Phoenix, a weekly arts/entertainment/local news paper (they even i.d. themselves "Boston Phoenix Radio"). I believe they have moved or will move their station studios from Lynn right into downtown Boston.
As Scott Fybush and/or Mark Schneyder have related in the regular Boston radio scene reports here in Airwaves, there is now fiercely escalated competition between 'FNX (Boston's principal commercial "alternative rock" station for many years) and old WBCN-FM, which WAS one of the nation's vital commercial new rock stations from 1968 until sometime in the late 70s or so, when they gradually sold out to ugly Big Business and became a boring old stodgy corporate monolith, more concerned with market image, ratings, and lots of glitz and money, essentially forgetting music. What's happened now is that 'BCN mgmt. (under the stinking Infinity corporate umbrella) has had to own up to the fact that they missed the boat years ago by sticking with their old reputation as the home of dull mainstream mega arena rock, while 'FNX carried the modern rock flag and captured the new generation of younger listeners (crucial in Boston, given its enormous college population). 'BCN had the edge in greater transmission power, lots more money and industry pull, but 'FNX has been taking away much of 'BCN's market "share", despite the weaker signal and the less "glamorous" air staff. 'BCN tried to persevere on the sheer "strength" of its dj "personality" visibility, but had to start reaching for new gimmicks to keep listeners (bringing in Howard Stern's drivel, high-bidding for the New England Patriots game broadcast contract, etc.). Meanwhile, 'FNX earned awards as the country's best commercial "alternative rock" station. So the Infinity Big Cheeses decided enough was enough and broke precedent by conceding that they had to change their focus musically. So as of the end of '95, they jolted their old die-hard audience by promptly jettisoning the old music format (Aerosmith, J.Geils, The Cars, Journey, Heart, The Eagles, Van Halen, Boston, all of that dead wood) and overnight started programming very much the same sort of thing that 'FNX has been playing for years. Naturally, 'BCN's spin on it is very unconvincing, especially since they're using some of the same old dj's who used to swear by that old music.

'BCN now sounds like the new corporate flavor of "alternative" programming that one will find in many major metro areas of the country (Alice in Chains, Pearl Jam, Nirvana, Lenny Kravitz, Soundgarden, Alanis Morrissette, Crash Test Dummies, etc.), only they stick entirely to the hits, of course. And every chance they get, they fill up the airtime with blatant self-promoting plugs, depserately trying to braincram their listeners into associating the new "alternative rock" sound with WBCN (and not WFNX).
'FNX is still a very tiny bit more adventurous. The thing is now that the head-to-head war will force both stations to really step it up in trying to outdo one another in any way they can imagine (not that imagination is a strong point for either of them). 'FNX had the edge in promoting the very strong local music scene, but now 'BCN is aiming to steal that thunder.
For a short time, it may be good for listeners and genuine music enthusiasts, as more good new stuff will likely get some much needed exposure. But I predict it will eventually devolve into a dismal Coke/Pepsi commercial tug-of-war, with stupid gimmicks and marketing games dominating over any focus on actual MUSIC (god forbid they should rely on real music to lure listeners!). 'BCN will win that war, because they've got the bucks; and they've already kicked off their campaign by staging a stupid publicity event under the guise of supporting some vacuous "Legalize Marijuana" project. Anything to get on the 6 o'clock news. Yawn.
The best part of it all is that the area college stations will be supplied with an endless theatre-of-the-stupid variety show here, while they continue to program the best truly interesting new music on the local airwaves. Stay tuned for lotsa laughs.

1017. Buffalo/Toronto Radio Watch(1/26)

Newsgroup: rec.radio.broadcasting
Date: 1996-01-27 00:00:00 UTC
From: ag365@freenet.Buffalo.EDU
Message-ID: <4ecqdn$ig8@vixen.cso.uiuc.edu>
Source record: 26500

Happenings in the #40 market(and there are a lot of them,if not all
in WNY):

*New country with an old name....

Tom Donahue,who's made pit stops at WKBW/1520 and-more recently-WGR/550
and currently is PD of WNUC(107.7,plus 105.3 & 107.3;new country),has added
on AM drive duties at the station,replacing Steve Mortenson. Mortenson came
to 'NUC last March after many years at crosstown country WYRK,and was not
heard at 'NUC for a while as 'YRK took legal action to enforce the non-compete
clause in his contract.(Whether Mortenson's still there or not is unknown-
but if he is,it'll probably be in off-air duties.) Donahue himself is a busy
guy;when he isn't there,he's a broadcasting professor at Buffalo State(my
alma mater,FTR).(source:Tony Violanti's column in today's(1/26)Buffalo News.)

*Corey Cranston is now handling 10am-2pm at jazz/news WBFO(88.7;with
WOLN/91.3 in Olean(not to be confused with the new fat substitute marketed by
Proctor & Gamble :))and WUBJ/88.1 in Jamestown,replacing John Werick. BTW,one
Muckoni I forgot to give out goes to him,as well as WBLK and a broadcasting
student at Humber College in Toronto-the Good Guy Award. 'BLK & Werick get it
for coming to the aid of a man whose water had been off for many years;Werick
pitched almost $2,000 out of his pocket to pay the bill,and 'BLK helped out as
well. The Humber student stayed on the air for hours to raise money for
organ transplants in Ontario.(Details escape me,but Canada Newswire had a
story on it some months ago.)

*In southern Ontario:
-CING(107.9,dance;Energy 108)is rumored to be moving their transmitter.
Currently,it's on a tower on Highway 5 near the Niagara Escarpment.
-Word in T.O. is that the low-powered station known as The Phoenix(88.5
in Newmarket(N of Toronto);AC)is up for sale. Among those interested:the
owners of CING and CIDC(Hot 103.5;dance-CHR)and a contemporary Christian
music group(much like a station in western Canada known as the Bridge).
-CIRV(88.9,ethnic)in Toronto got the CRTC's OK to boost power from 330 w
to 1 kW to improve coverage.

*Back stateside:
-WLKA/102.3(Canadiagua),which recently switched from AC to a simulcast
with WMAX/106.7(AAA:Irondequoit/Rochester)has switched calls to WMHX.
-WGES-FM in Oswego is now part of the Radio Corporation group. It'll
simulcast the classic rock on WTKW/99.5(Bridgeport/Syracuse;TK99)and WRCK/107.3
(Utica;Rock 107).(Radio Corp.also simulcasts WKLL/94.9(Utica)and WKRL/100.9
(N.Syracuse)as AORer K-Rock and WTLB/1310(Utica)& WTLA/1200(Syracuse)with a
standards/talk format.)WSGO/1440 was sold with 'GES,and will stay big band
for now.
-Rochester Red Wings(triple A baseball)games will stay on WCMF(990,sports;

SportsRadio 990)this season. The Wings signed the deal last week,but not before hearing an offer from the Lincoln Group-owned WHAM(news/talk,1180; NewsRadio 1180). It wanted to put the games on its sister station WHTK (1280,talk;Hot Talk 1280),but air the first & last games of the season,the Baltimore Orioles' exhibition game and some Saturday games on 'HAM. Wings GM Dan Mason said the offer from WHAM was good,but that SportsRadio 990 did a good job with how it did the games;he added that 990 would cross-promote the games on its sister stations:WCMF(96.5,AOR;96 WCMF)and WRMM(101.3,soft AC; Warm 101.3)(Rochester Democrat & Chronicle,1/21).

*Bryan Scott,former co-AM driver at WBLK,has landed as the MD and PM driver at WAAA in Winston-Salem,NC.

*Some TV news to get to:
-WNYB(ch.49)was sold to Fort Lauderdale,Fla.-based Grant Television for $12 million,as reported in this week's Broadcasting & Cable. In exchange, Grant will transfer inactive WTJA/Jamestown(ch.26)to 'NYB's current owner, Tri-State Christian TV(who owns 4 other stations-2 in Michigan and one in Indiana,which also serves Paducah,KY.)(TCT will have to deal with Craig Fox, who owns half of WTJA.)Grant owns 2 stations outright(in Roanoke & Lynchburg, VA)and the group owns 3 other stations(1 in Huntsville,AL and the other 2 in Burlington & Davenport,IA).
-Syracuse UPN affil.WNYS(ch.43)and the CP for a low power TV in Mexico, NY were sold for $4.245 million to RKM Media in Fayetteville,NY,headed up by Ron Phillips)from Metro TV Inc.(headed by Craig Fox,who owns WOLF/1490 in Syracuse,as well as half of 2 radio stations & 1 TV station in New Hampshire & New York,plus 37.5% of WFXV/Utica-and,if that's not enough,Fox is also very involved in the LPTV game in N.Y.)
-Also,2 new TV allotments were awarded:
*the much talked about ch.51 in Batavia(near Rochester)-awarded to Anthony Font of Birminham,Ala.(If and when this gets on line,could it accomidate one of the 2 new networks? Perhaps the WB?)
*Ch.56 in Syracuse was awarded to Syracuse Minority Television,Inc.

TTYL...

In article <4e7id6$5kg@vixen.cso.uiuc.edu>, forsling@iastate.edu says...
>When the Chicago Tribune owner, Colonel Robert McCormack created WGN back in
>(about) 1925...an announcer would formally announce the time and a sound
>effects guy would strike a chime car on mic as exactly as he could to signal
>the beginning of the hour. Ten years later, engineers built an automated
>time tone connected by a relay to Western Union, which provided accurate
>time. Some of us remember the studio clocks controlled by a pulse from WU
>from our own early days in radio.
>
>Anyway, the Western Union triggered tone sounded every hour of the day--with
>one exception. And here's where it gets _very_ strange: Just before
>midnight each day, an engineer, announcer and sound effects man were sent to
>the boiler room of the Tribune Tower building in downtown Chicago in which
>WGN was located.* Colonel McCormack had purchased and installed the
>original pair of steam whistles from the paddleboat "The Robert E. Lee."
>So, just before midnight, the announcer would say, "We chime in this day
>with the steam whistle of the paddleboat 'The Robert E. Lee.' The next
>sound you hear is the sound of the _actual_ steam whistle indicating the
>midnight hour."
>
>The sound effects fellow would pull the cord that sounded the whistle and
>the announcer would say, "Serving the middle west, this is WGN Chicago."
>
>WGN stopped blowing the whistle in 1955!
>
>The Colonel was a very interesting guy. And I hope you found this to be an
>interesting story.

David Brinkley mentioned another Col. McCormick story in his book WASHINGTON GOES TO WAR...supposedly whenever someone the Colonel didn't know came to see him, after they were asked about their background, club memberships, etc. they were guided to a particular chair in the Colonel's outer office. Soon a photographer would show up, take a picture of the person and rush the film to the Tribune photo lab to be developed and printed so that the Colonel could see if his caller was appropriately dressed and otherwise presentable!

1019. New Haven's New #1

Newsgroup: rec.radio.broadcasting
Date: 1996-01-27 00:00:00 UTC
From: Bill Dillane <pcbill@ns.iconn.net>
Message-ID: <4ecqdo$iga@vixen.cso.uiuc.edu>
Source record: 26502

According to today's New Haven Register:

25+ Fall 95

WWYZ - Ctry - 7.2
WPLR - AOR - 6.7
WEZN - AC - 6.1
WKCI - CHR - 5.8
WELI - NT - 5.4

WPLR is #1 18-34, and narrowly beat WWYZ 25-54.

As you can see, WELI and WKCI continue to go down in each book. Is it because of all of the changes at the two stations? Do listeners resent changes. I believe the other stations listed here show more consistency in their programming.

WWYZ is usually #1 or #2 in Hartford 12+.

Any other CT numbers?

Bill

>I used to get requests from listeners to do it at the half and quarter hours
>too.

This reminds me of the AM/FM duo near Louisville -- WSLM in Salem -- that used to use, and still might use, an old time-announcement record that seems to date back to the early 1950s or worse. On the hour it has a woman singing, for example, "Tick-tock-tick-tock-tick-tock! <upward music sweep> It's five o'clock! <downward music sweep>" They also used it at :30, but those announcements didn't use the sing-song inflection on the time.

WSLM is a religious station that still acts like a small-town broadcaster; they don't use much (if any) audio processing, their announcers aren't too polished (though hardly incompetent), and they've been known to lend out portable PA systems for county fairs and the like.

1021. February 1996 DX Audio Service

Newsgroup: rec.radio.broadcasting
Date: 1996-01-27 00:00:00 UTC
From: gnbc@alpha.wcoil.com
Message-ID: <4ecqdn$ig9@vixen.cso.uiuc.edu>
Source record: 26504

DX AUDIO SERVICE FEBRUARY 1996

Informational Press Release

For the first time in 10 years we missed Jerry Starr on the DX Audio Service. It was not Jerry's fault, or ours. The Federal Communications Commission has been one of those government agencies which was involved in the government shutdown. The FCC will be picking up where they left off which means that the next AM Switch will not be bigger than usual, but just that the information is being held up in Washington. At the present time we have the RCA 44BX in place, the chair raised to appropriate height, and Jerry's favorite beverage in cooling for his next column.

We moved the CPC tests from the Voice Mail system to the main magazine. This was because it was costing too much money for people to call long distance and get the information. Visitors can still get information on the magazine by calling 419-228-4199 and following the steps to get information on the magazine.

Our Web Page on the internet is attracting a lot of people. It contains information both on the club, and historical information on the history of broadcasting. The URL for the page is http://wcoil.com/~gnbc/

Fred Vobbe was a guest of Jonathan Marks on Radio Netherland's, "Media Network". Fred talked about the DXing hobby and how radio is reacting with the internet. Contrary to come claims, the DXing hobby is not dying, but getting bigger by the day. The National Radio Club has reported record membership. The DX Audio Service, which is published by Fred, is also growing rapidly. Fred will also be on the "Al Wisk Show" on WBAP-AM (820 kHz) in Fort Worth TX, on February 2nd at 11:30PM (Eastern Time). We would like to thank Jonathan for his interest in setting up an interview with Fred, and letting the world know about AM Radio DXing, and the DX Audio Service!

In the February 1996 DX Audio Service, Fred reads a letter he wrote to Radio World Magazine's editor concerning the comment that "Real Audio is in and DXing is out." Many of us who are in the hobby can agree with Fred's statements that DX'ers are not a dying group, and that silence of the masses may have given that impression. In fact, many people DX by listening to out of town radio stations, and just don't know that they are DXing.

Kenneth Chatterton
General Manager, NATIONAL RADIO CLUB

Program Details on the February 1996 DX AUDIO SERVICE.

00:00 Introduction of the magazine by Fred Vobbe @ Address information.
01:22 Information about Assignment Aircheck - Issue 1 "Ladies on the Air". A C-90 cassette containing Lady Announcers.
02:07 Detail of the Al Wisk Show on WBAP-820 AM interview. Also information about WBAP's Web Page.
04:15 The Travellog with John Bowker - 1310 Kilohertz.
(AM Switch not present due to the shutdown of government)
20:56 The Bandscan with Jim Snowbarger. Central North Carolina scan by guest Ron Clark of Walkertown. Part 3, Starting at 1220 kHz.
33:44 IDXD with Bruce Conti. Aircheck samples of radio from Europe. Profile of 918 kHz, by NRC member Tom Walsh while on business in Germany.
46:02 Close of side one
46:19 End

00:00 Open of Side Two.
00:10 Open with Fred Vobbe and letter from Steve Bezilla, and 85 year old member of the National Radio Club.
00:40 CPC Tests. See list at the end of this press release.
03:14 DX Time Machine. See list at the end of this press release.
04:12 Information on a 100 mW "STLMO" beacon in the AM Radio Band.
04:48 Marketscope with Phil Wayne. FM radio in Clarksburg, WV.
17:27 Historical Moments in Radio. "75th Anniversary of Broadcasting?" John reads an article by Barry Mishkind about radio's early years.
22:09 A letter to the editor of Radio World Magazine, "Is DXing Dying?"
28:14 Musings from the Members. (Comments from the members of the club).
34:28 The DXchange. (Buy/Sell/Trade)
37:32 Media Network's 750th Show!! Letter from Jonathan Marks at Radio Netherlands.
41:05 Details of the HCJB Tests on 690 kHz, via Rich McVicar at HCJB in Quito, Ecuador.
43:45 Close of the DX Audio Service=7F
44:49 Aircheck Blooper from WCCO-830 in Minneapolis, MN (Some people have a problem with the weather).
45:48 Close of February DXAS.

1022. San Diego Radio Watcher 1.27.96

Newsgroup: rec.radio.broadcasting
Date: 1996-01-27 00:00:00 UTC
From: San Diego Radio Watcher <sdradio@zNet.com>
Message-ID: <4ecqdp$igb@vixen.cso.uiuc.edu>
Source record: 26505

Here's the latest from San Diego: 1.27.1996

JAZZ DO IT: KiFM Ltd., agreed this week to be bought for $28.7 million by Greensboro, N.C., based Jefferson-Pilot Communications. The purchace is subject to approval by the FCC, and could take up to four months.

In 1989, KiFM Ltd., spent $11 million for the license in the tight contest to get the 98.1 license.

Jefferson-Pilot also owns top-ranked country format, KSON A/F in San Diego. In the announcement present GM Mike Stafford of KSON, will also become GM of KiFM -- and just as important -- no station layoffs are planned.

Current GM and part owner, Bruce Walton, will become sales manager, when the approval by the FCC.
[KiFM: 98.1; KSON 1240, KSON-FM 97.3]

http://www.KiFM.com
http://www.KSON.com <under construction

Extra XTRA: XETRA-AMs is moving a couple of shows. Xtra Sports 690's Jim Rome is moving to 9 a.m. - 1 p.m., and the popular team of Steve Hartman and Chet Forte will fill the 1 - 4 p.m. slot. The SD Union-Tribune Howard Fredman says Rome's show "skews to younger listners" and the "Loose Cannons" are a good tie in for Lee "Hacksaw" Hamilton. Plus, this places Rome against the syndicated "Fabulous Sports Babe."

On a recent trip to Baja, I drove past the new seven-tower array. It's in the San Antonio section of Rosarita Beach, right off of the Mexican toll road. [XETRA, Tijuana, BC, Mexico, 690, 77.5kw DA-II]

KATO OUT, WHITMAN IN: Reports to me indicated that former KKBH morning man, Brian Whitman, has been in the time slot that Kato Kalin filled at LA's KLSX. No word if Jack Silver is assisting him. Previously, Whitman and Silver did an on-air audition at San Diego's classic rocker, KGB.

WORD HEMMORAGE: "Once again I have no credibility!' says Ted Leitner when he answered questions on Q-106's morning show of Jeff & Jer. The question that brought the phrase? As asked by the morning team at KKLQ, "Is Ted Leitner's tan real or fake?" The KFMB TV8 sports-caster and AM talk show host, is appearing a bit more 'dark' during his TV gig, and some ire was raised that Teddy's Tan was in fact, from a can. Jeff & Jer "grilled" the former workmate to find that it is indeed, real.
They were also successful in stopping Leitner from going into a fifteen-

minute famous "word hemmorage" at Q-106.
[KKLQ 1320 Oceanside, KKLQ-FM 106.5 San Diego; KFMB 760 San Diego]

Web Weaved: Floyd Vasquez, vision@panix.com, writes me that he has posted the Bosnia AFRTS information that I sent out previously this week, is now at his AFN Europe page. Weave it at: http://www.panix.com/~vision/web04.html, and select AFN.

The LIST: The San Diego Radio e.mail list is available, send e.mail to sdradio@sd.zNet.com. It's brought to you in part by the LA Radio Guide. http://www.radioguide.com/rg

Message-ID: <4ecqdq$igc@vixen.cso.uiuc.edu>
Source record: 26506

I am sitting here, snowbound from our latest Iowa blizzard listing to WHO 1040 here in Des Moines. Their afternoon news block normally ends at 6:00pm and it is nearly 10:00pm and they are still on, taking phone calls, helping find missing people, etc. It has been going on all evening. Tuning across both the AM and FM dials, the rest of the stations are playing their automated and music, etc, and very little about the storm. Most of their weather reports were recorded hours ago.

It is no wonder why they, and similar operations across the country have maintained their ratings and receive the awards they do. Radio is still alive!

I worked for WSLM AM/FM in Salem, Indiana in 1973. (FM: 98.9, 50kW; AM: 1310 I think, 5kW daylight only). The station was owned by the same individual since 1954. Had a great collection of old 78s and 45s. Anyway, they had a doorbell assembly for the time tone, with the button near the console. They also had recorded the manager/owner on tape, telling the weather forecast, using a voice similar to a human mimicking (parroting) a parrot. "Cloudy and cold..." Pretty cheesy. I believe they went on the air on Valentine's Day, 1954, and were still using most of the same studio equipment in '73.

I really loved radio, but couldn't figure out how to live on $8/day.

That's what KYSR in Los Angeles is playing (just moved there a few weeks
ago). A mix of current modern rock and modern rock oldies from the 80's.
Kinda reminds me of New York City's WOR-FM (which became WXLO, then something
else later, at 98.7) did at the late 60's: play half new stuff (Top 40) and
half oldies from the 50's and early 60's.

I have no connection with KYSR or the Chinese Communist Party.

>the point?
>

Not much point anymore. In the early days radio stations were used as navigational aids, although that wasn't the intended purpose. =
Ships and aircraft could use their radio direction finders to pick up known commerical radio signals and then triangulate the bearin=
gs to fix their positions. You needed the call signs to be sure you had the right stations. With all the modern navigational aids av=
ailable including LORAN snf GPS, the radio direction finder is getting as much use as Rudy Vallee's megaphone.

Best,

Jay

Daniel M. Danhauser (dmdanhau@newstand.syr.edu) wrote:

: I've been lurking a lot in this group the last few months and I can't
: help but notice that many of you moan when talking about the "modern
: rock" format. Is your age or musical taste the culprit?

I've pondered this too. In the 1970's all the great jocks were successful with Top-40. It was the dominant format in most markets. AM still had some 'uumph' and FM was staking its claim. The top jocks and wonder-PDs were all in their 20's and 30's. Now it's the 90's and FM has all the power! I believe Rick Dees has been joking for years about hearing the tumbleweeds blow by on AM.

: Back in 1978, I discovered KROQ 106.7 in Pasadena/Los Angeles while in
: college. I was mesmorized by new exciting groups I'd never heard of
: before, that played music that was fresh, even if often unrefined. I
: started seeing groups like the GoGos, Oingo Boingo, X, Wall of Voodoo,
: etc. in small clubs. I became hooked for a lifetime.

Continuing on... I believe Kevin Weatherly, Infinity's K-Rock wonder-PD, is in his 30's. What do you suppose he recommends for the future of successful comtemporary hit radio? I'll bet it's "contemporary hit music." Why do you think he and those who think like him dislike the terms "alternative or modern rock?" Are the K-Rocks of the world really alternative, or just actually contemporary hit radio of the 90's?

: So, now it's 1996, and we have this "new" format called "modern rock"
: that's sweeping radio across the country. It simply reflects another
: period of many small-time groups with great talent and/or energy getting
: acceptance. "Modern rock" is just a 90's version of top-40 or CHR.

Hummm, I seem to be ahead of myself in my responses. Oh well, call me a visionary. Perhaps that's why I bypassed FM and took iRock straight to the Internet.

: I reserve the term "alternative" for the less-mainstream groups with a
: less-refined and/or commercial sound. For the most part,
: "alternative" is still primarily the playground of college stations.

And then what is classic rock exactly? The new oldies radio? I think so. Perhaps those of us 40 and older (yes, count me in the group as of May,) just need to accept that classic rock is actually now "new oldies." In the 70's, wasn't the 60's music "oldies?" Are we not talking about 80's and 70's music now when we talk about most classic rock?

: Just my opinion: Dan

Mine too. Perhaps we just need to come up for a new term for the old oldies.
Hummm, how about "old oldies?" Someone call JAM and get them working on
new jingles.

One might argue that this is what's happening right now on WNEW-FM. Its
"Quality Rock" programming includes the best of classic rock (lots of Hendrix,
Doors, Bowie, etc.) right along with the best of what's new, and everything
in between.

It's a promising mix.

Dan here's something different. We did this on an "oldies station"
called KOOL FM. We had "the KOOL crushed car".
We got an old 60's car and had it crushed into a meter cube. (the's a place
in L.A. that did it). We mounted the crushed car on the back of a truck with
lots of signage and visited locations around the city. At each location
people could fill in an entry form and check from a list of 10 makes and
models, which one they think it is. All correct entries were in the draw to
win $10.000 at the end when we announced the make and model of the crushed car.
We also gave clues on air at specific times. The sales dept did well as all
locations were "sold in" with accompanying schedule.
Cheers ROB

It's a tough call, though. One of our stations was strictly classic rock a couple years ago,
then we added a few currents & recurrents by classic rock artists (ie Clapton, Stones, Van Halen, Page & Plant, etc.). Trouble was, most of their new stuff was pretty weak, so we started adding more & more by newer artists (Goo Goo Dolls, REM, Etheridge). Reaction has been
mixed, some like it, some think the new stuff is crap & would rather hear "Hollywood Nights"
again. AOR is in kind of a sticky position having to maintain the "hip" image it had in the 70s/early 80s, yet not blow off the audience that thinks Lynyrd Skynyrd is a cool band. "Traditional" oldies stations have it easier, even though many of their core artists are still
around and even in some cases still recording, it's safe to ignore their new stuff and just play the old songs instead. AOR doesn't have that luxury.

Steve
can't wait for that new Herman's Hermits album :-)

Source record: 26515

References: <4ea07n$9ak@vixen.cso.uiuc.edu>

Garrett A. Wollman wrote the quoted material below:

" Actually, this is not true. You Can't Copyright A Number. The only
" thing Arbitron (and other ratings companies) are entitled to by way of
" copyright is the presentation of those numbers. So, if I say
" something like, ``According to Arbitron, radio station X has a 25
" share weekdays in 25-54'', they have no recourse to copyright law.

The above was held true in the cast of Consumers Union, publishers of
"Consumer Reports." They had always said their reviews could not be
quoted, and in the past they had taken companies to court for copyright
violations when they did quote Consumer Reports ratings. Then a few years
ago, the Supreme Court ruled that while the *articles* in Consumer Reports
are copyrightable, the mere mention of how a particular car or brand of
paint placed in Consumer Reports' rankings was *not* copyrightable.
Consumer Reports lost.

That's because we've been completely, totally _forgotten_ by radio.
Somewhere around 1987-88, the stations that used to cater to us (the
Z100s, the WDREs, the WAPPs) started altering their music to cater to the
current youth, while the older-skewing stations stayed pretty much the
same. Thus, those of us in the late 20s-early 30s age range have had damn
near _no_ radio to listen to for well on nine years now. And we've long
since learned to do without radio as a result, so stations will have a
hell of a time getting these demos back.

In Ft. Worth/Dallas, WBAP-AM 820 is still a national clear channel. It
is currently running a news/talk format with play-by-play coverage of
Dallas Stars hockey, and several college events thrown in the mix.

KLIF-AM 570 is a regional clear channel, I believe, also running talk;
as is KRLD-AM 1080.

<<Programmers of these formats continue to hold that keeping the compression down helps listeners stay tuned longer.......Nonsense.>>

I have seen several studies which prove that less compression(up to a point) lengthens TSLs considerably.

Please remember too that loudness only makes your station stand out to a listener that doesn't know the station. Once persuaded to sample a station, loudness won't keep that listener....good programming and decent audio quality will.

As an engineer, I can't claim to have a pair of "golden" ears, but I refuse to listen to stations that over-process, simply because it is tiring to do so. In the age of digital media that is affordable to nearly everyone, those that still think over-processing is a good thing are about to be left by the wayside.

Even KITS Live 105 in SF has some serious deliberate distortion in their
air chain, which I find pretty fatiguing. Using an Optimod 8200 does NOT
help them any (I don't like the sound of those at all).

I may not tune in a station because of its sound, but I sure as hell will tune one out for that reason, no matter what its programming is.

I'd love to see some objective research on this point. Why should listeners care a whit how loud an FM station sounds? As long as it's loud enough to be audible in a typical car/kitchen/workplace/living room, what does it matter? Listeners choose a station for its programming, not for any technical parameter, be it loudness, equalization or anything else.

There are people who will tell you that the louder your signal is the farther it will reach. On FM, it just ain't so. 1,000 watts is 1,000 watts. All the processing in the world will not squeeze even one more watt into your antenna. In fringe areas where a station's signal is noisy processing can help drown out the noise-- up to a point. But I doubt that putting a Buzzsaw 3000 on the air is going to get a station many new listeners. One would do better to work on one's music and presentation style.

The real point, as I see it, of processing audio is to make it easier to use. Broadcasting music with a wide dynamic range is not a good thing; soft passages will be inaudible to many listeners, and people tuning up and down the dial are likely to go right past your station without noticing it. Your listeners will be constantly reaching for their volume controls, turning them down when the music gets too loud, then up again when it fades into the noise. Listening to such a station is like taking a shower in a badly plumbed apartment building; whenever someone upstairs flushes a toilet you get alternately scalded and frozen. Audio processing applied in moderation will make the loudness consistent enough that listeners need only punch up the station, sit back and enjoy the music.

I think it's important to point out that the compact disc did not succeed so much for its superior sound as for its convenience and ease of use. Compact disc players can be programmed; discs don't wear out; they take up less space; and there are no needles to get dull or dirty. Similarly, if your radio station is easier to enjoy than those of your competitors, all other things being equal, you should get more quarter-hours.

When you get into your car, you can easily tell whether a station is applying enough audio processing. Roll down the windows and take off down the nearest interstate highway. Turn up the volume until you can understand what the jock is saying. Listen to the music. If the wind rushing past

your open window drowns out any of it, you're not processing hard enough. If all the music is audible, your processing is fine. If your competitor wants to process harder than he needs to, let him. The more time and energy he invests in trying to be loud the less he'll be able to put into his programming. And programming, after all, is what attracts the listeners.

This kind of arrogance is what is wrong with radio. The very idea
that someone can sit there and dictate that 'most' listeners can't hear
this, or don't notice that, is absurd.

I hope this does not sound arrogant because I don't intend it to be.

My I submit this for consideration. If in general most of the highest
rated stations use heavy processing does that not indicate that indeed
"most people" are not aware of the heavy processing or don't mind it ?

1041. DAB Capability?

Hi Rich,

I'm just a simple hicky from Holland, but I new what he was talking
about. It's WFLY Fly 92 in Albany NY, and is pretty well known in the
USA. But I agree it would be much more easy if the location of the
station is mentioned aswell. Or even the region where the station was
picked. For JJ, I'm sorry to say that I only have stuff of Fly from
around 1990. But check out one the radio-listings on the WWW, they're
on there somewhere. Maybe they're even friendly enough to send you
some unscoped tapes them selves.

Good luck,

Ivo!

1043. Format Change in London, Ontario

In case you haven't checked it out yet, the former "Classic Rock" 103.1 "The Hawk" has switched overnight to "Today's Best Rock" 103.1 "The Hawk."

Finally a break from a city that has a wee bit too much of the classic rock to promote good health.

I'm not too sure of any major personnel changes on the station, aside from the fact that "Hawk Boy" is still there. Only time will tell.

The new format isn't bad, favouring the best of the 80's, 90's and new music. So far, I've heard some Barney Bentall, Rolling Stones, and Jesus Jones. An interesting mix, I must say!

I'll post more as it becomes available. They are encouraging calls to the on-air staff to offer comments on the new format at 637-1031.

Hi all...
Coming from a news/TALK station myself (a station inten-
ded as foreground listening for longer periods of time) the 680
News approach does take a little getting used to, until you
realize it is, indeed, intended for listeners to use in frequent
short bursts. It also is more likely to generate a high cume
than a particularly strong quarter-hour share...
Having said that, CFTR/680 News is really a good clone of the
"Give us 20 minutes, we'll give you the world" style invented in
1965 (and still used today) at WINS in New York. I think they
even use some of the same production sounders. That works well
in a market that's big enough to generate high cume (and attract
the accounts that buy on cume through repetition) like Toronto...
and it's the way to go if you're not only in a 4 million-plus market
but swamped with competition from other news-talkers with more
long-form programming. I wonder if Vancouver should go that way,
if for no other reason than the fact that it's not much bigger a mar-
ket than Buffalo or Rochester, and no station in markets like ours
ever generates business from cume alone. You need AQH listening
and longer time spent listening.
Having said that, if I were programming a new all-news
outlet there I'd go more to another all-news model in the CBS-
Westinghouse group, the WWJ style. There you get longer
stories, live interview segments, a variety of features, and much
less repetition, encouraging listening for an hour at a time. In
Detroit they're #3 12+ in quarter-hour share out of about four
dozen stations, nudging a 7 share, and doing very well financially.
Maybe that's the format CKWX would do the best with in Van-
couver...it has worked well in a lot of markets of 1 to 3 million
population and works extremely well even in a top 10 market
like Detroit. (KCBS in San Francisco, I'm told, also uses a sim-
ilar approach, and in their market, which resembles Vancouver
demographically, they're #2 overall.)

>clock is ticking.

Actually, I think you're in the wrong here, buddy. I had never heard of Jay Marvin before reading this newsgroup, and so when I was driving home from Minneapolis to Iowa City, I found him on the air just to see what he was like. I ended up listening to the program for most of my drive home. I don't necessarily agree with some of his viewpoints, and I tend to classify myself as right-wing, but Jay's show was entertaining and enjoyable. And, I might add, Jay has always been polite in this group (for the time I've read it, several months now) unless someone who didn't know what he was talking about attacked him (i.e. ...and the guy on WLS late at night. Never listened long enough to get his name. His on-air presentation is so obnoxious and sarcastic that I have never stuck around long enough to figure out his real message.) Have you ever found a formula that makes you number one (in any time slot or any demographic) in the third largest market in the country? Or the second or first, for that matter? Check in when you do.

-Brian!

Jazz Do It: KiFM sold to KSON's Parent Company. Thursday, Jan. 25

KiFM, Jazz FM98, has reached agreement to be bought by Jefferson-Pilot. The media company, based in the south, has two other San Diego stations, KSON AM and KSON FM. Upon completion of the sale, it'll make the third owner to have more than one FM station in the market.

More details in this weekend's report.

[this was the marriage of the unique format stations I sent out on Thursday]

Source record: 26532

Hi,
I wrrote this requestt before but lost the response I got about three months ago.

I am using a Select-a-Tenna coil antenna with my AM radio while I trave on Greyhound busses. This antenna is a tunable loop which you tune to the same frequency of your radio and hold next to the radio to enhance reception. It works prettty well except that I have to hold both the antenna and the radio up to the window to reduce motor noise.

What I am looking for is a portible antenna that i an plug into the jack of the Select-a-tenna. It has a miniplug jack. I envision something that can be magnetically attached to the window of the bus and removed easily when i leave. I don't think Greyhound would appreciate it much if i tried to glue or screw something.

I am legally blind and have trouble soldering, so I don't think I could build such a device myself. I am willing to pay for parts/labor/shipping for someone who could. I also heard about a similar antenna produced by Zenith (I think) but I wasn't sure that this one was still in production.

Thanks in advance

>I was looking at some of the nightime power levels on the station database
>and am amazed at some of the low powered authorizations used by some of
>the former daytimers..

The FCC assigned most former daytimers with a nighttime authorization
determined using some formulas. Many of the stations don't use the power (
especially the ones with just a few watts). One station in MN that has
nighttime authorization uses it only during the winter months to stay on the
air until sign-off at 6:30 (their daytime power is 500W, nighttime
54W (?)). WMIN in Hudson, WI used to stay on the air all night with 7.7
Watts of power running a satellite feed but they gave that up shortly. The
authorization can come in handy during high school football season when the
games go on past local sunset. Some stations have been known to "forget" to
power down.

Yes, but there's a difference. Back in the late 70s-early 80s, the great thing about that music is that _every song was different_. The Go-Gos sounded like the Go-Gos, Wall of Voodoo sounded like Wall of Voodoo...the amount of originality in that era was astounding.

Today, "modern rock" consists of loud guitars and drums, followed by loud guitars and drums. Smashing Pumpkins sound just like Foo Fighters sound just like Goo Goo Dolls...the same thing over and over and OVER from now until the end of time. Not to say that these bands are not good at what they do; their music is great IN MODERATION, but today it is all there is. And it drives me nuts.

My parents had me when they were young; I just turned 26, both my parents are just now in their late 40s. And I was raised on rock music as a result; I was attending Springsteen concerts with my mother when I was only seven. And, of course, styles changed over time: the silly wimpiness of the mid-70s gave way to the harder rock and disco of the late 70s, which gave way to New Wave and BritPop (and of course MTV) in the 80s. And through it all I loved it all, and so did my parents. As late as 1986 or 1987, radio was filled with lots of great music that both they and I loved, despite the fact that I was a "finicky teenager" and my parents were sailing into those demos where they're just _supposed to_ have listened to K-ROCK and WNEW and nothing else. Didn't happen.

But then around 1987 or so, something started to change. The music started breaking down into dull, repetitive subformats. You could listen to all-rap, all-hard rock, or all-dance. All crap, regardless of where you turn. Both I and my parents found ourselves giving up on radio and MTV and pretty much ALL current music. I wish I knew why this happened; I wish there was a way to reverse it; but apparantly there is not.

If it wasn't for WPLJ, we'd probably have all switched to country years ago; at least there there's still some variation from song to song. (And indeed, my father IS starting to listen to country occasionally.) And unfortunately, even on WPLJ we're still kind of stuck, since they're more-or-less stuck having to play the same older songs over and over...after all, there's no new stuff coming out that's anywhere near as inventive or fun. It's all droning guitars and depression. No thanks. I'll stick to my CDs.

Hear, hear. "Alternative" really doesn't mean anything much
anymore, since what used to be classified as such has gained in
popularity--a new moniker is needed. Thus, "modern rock."
As a fan of AAA, classic rock/AOR, *and* modern rock, there's a
lot of energy in modern rock that is sadly absent in a great many classic
rock (and let's not even talk about the sorry excuse for R&B that infests
our airwaves) that's quite refreshing.
Punk, New Wave, and their fusion into modern rock brought a good
deal of fun back into popular music. (CHR is actually listenable now)
What's wrong with a band wanting to show up the dinosaurs? The Baby
Boomers created something, why not our generation?
All this moaning about modern rock just strikes me as the
equivalent of the moaning over the Beatles & Elvis, or the moaning over
swing and jazz. It is real music, and it's also a viable format.

SCOTT LEWISON wrote the quoted material below:

" I am a bit confused. If non-commercial stations are such a hit, why haven't
" commercial stations picked up on the demographics and started doing long form
" news and classical music, jazz and "non-profitable" music formats?

In San Francisco, commercial broadcaster KDFC is in the Top 10. Largely,
though, stations don't have to compete in the marketplace with non-coms
because Arbitron conveniently excludes non-coms from the "official"
Arbitron ratings book. The commercial stations only compete against each
other.

" I am by profession, very involved in the management of a public radio station,
" and while our ratings are very good, I certainly would not expect my commercial
" radio colleages to take up my format.

Well, in many communities, listeners have been ditching commercial radio
for non-commercial. Locally, KPFA (Pacifica, political and unusual music)
and KCSM (College of San Mateo, all jazz) have picked up BIG audience
gains in the last two ratings books, especially the last one.

Why? Magazines and newspapers normally don't deliver aural advertising
(though there have occasionally been exceptions), and don't necessarily reach
the same audiences as radio.

>Each of the off-air and cable TV stations would prove us wrong.

Not really -- it's much more expensive to produce effective TV spots than
radio spots, and it's rather difficult to use audio-only spots on TV with any
real hope of success.

>What do you think and why?

I'd say the answer isn't quite as cut and dried as one might think -- it arguably would be better to have two dozen stations on the band operated by two dozen licensees than to have five or six of them owned by one company, but what if a reimposed ownership limit put five stations out of business?

One answer might be for the FCC to allow same-band duopolies on a space-available basis -- i.e. if the same company owned both a 50 kW AM and a 5 kW AM, the latter would be open for new applicants and would be revoked from the duopolist if any qualified applicants with no other broadcast holdings in the market came forward. This would prevent a number of profitable stations from combining while still keeping the weak ones on the air as part of larger operations.

But in any case I would argue that common AM and FM ownership should be allowed, as the two bands are sufficiently different in nature to justify treating them as different media.

For sometime now there's a technique available that allows you to
pitch up the tempo of the song without sacrificing the sound. In other
words the singer won't start sounding like Donald Duck.
This function is even featured on the new Pioneer CDJ-500 cd players.

By the way, back in '88 I heard of Kost 103 LA pitching DOWN! a song
like Rick Astley's "Never gonna give you up". Is that still done
anywhere?

Ivo!

I am sitting here, snowbound from our latest Iowa blizzard listing to WHO 1040 here in Des Moines. Their afternoon news block normally ends at 6:00pm and it is nearly 10:00pm and they are still on, taking phone calls, helping find missing people, etc. It has been going on all evening. Tuning across both the AM and FM dials, the rest of the stations are playing their automated and music, etc, and very little about the storm. Most of their weather reports were recorded hours ago.

It is no wonder why they, and similar operations across the country have maintained their ratings and receive the awards they do. Radio is still alive!

I would like to offer my hearty endorsement for the $20.00 Radio Shack FM Yagi antenna. Sure, it might not be a "Stereo-Probe 9", but for the money.. it is well worth it. I have owned 2 of these "babies" in the past 15 years and I intend to get another one this spring to replace the one damaged by the Blizzard of 96'. As a result of the use of this $20.00, I have received over 400 FM stations in 36 states, DC and 5 Canadian Provinces. My equipment is a SONY STR-VX750 I bought for $20.00 a hamfest in 1990, 60' of RG-6U coax and a Radio Shack VHF/UHF/FM amplifier at the receiver. I will not put an on-line amplifier at the antenna due to the probablity of amplifying all of the noise thus possibly introducing overload at the receiver.

With just the equipment I have mentioned, plus modifying the IF filters for 110 kHz...I can get DAILY reception of WLNG-FM (92.1) in Sag Harbor, NY, with WPRO-FM (92.3) in Providence, RI in my backyard. What is even MORE amazing is that I am 3 miles from the 100,000 watt WGBH-FM (89.7) trans-mitter and get daily reception of WSKG-FM (89.3) in Binghamton, NY, some 375 miles away ! And this is a possible with the use of a $20.00 Radio Shack Yagi antenna. If you need proof, stop my by radio room and I'll show the QSL cards and letters I have amassed over the years. It DOES the job, nicely ! 73's !

Tom, if you can't get an antenna up on a hill the liklihood that you have decent service with ANY quality yagi antenna is slight. You may be able to do something like point a yagi into a reflection coming back to you from the north...but stuff like this is sheer luck. Your neighbor can try it and have good luck but you may bomb out...

I had the very interesting experience of working with Mr.Schulke in customizing Optimod 8000s for his format in the late '70s. Mr, Schulke, to say the least, had some _strong_ opinions about transmission gear. Some of these, like alleged audible differences between FM antennas, might even be considered eccentric. I _can_ tell you that he concerned himself with sonic minutae that seemed to me to be below the perception of the typical listener. Schulke obviously believed that these factors influenced the listener on a subconscious level.

In retrospect, it's clear that Schulke sold out adn retired at the right time. His format spiralled downward shortly thereafter. It was clear was the reason was not audio processing but instead that the format -- old-line "beautiful music" -- was becoming a dinosaur; old listeners were dying off and new listeners were not replacing them. I think there is a lesson here; programming is _by_far_ the most important factor in attacting audiences. The role of processing is primarily to ensure that the format can be comfortably heard by the target audience regardless of the type of receiver used for listening. Excessive processing (mainly clipping) is an irritant to many adults (women in particular); insufficient processing means that the station is not comfortably listenable in a car.

1068. Re: Compression!!

Newsgroup: rec.radio.broadcasting

From: vancleef@netcom.com
Message-ID: <4ei2ar$bt2@vixen.cso.uiuc.edu>
Source record: 26351

My reason for writing is to ask if an electrical engineer's comments are appropriate for the group. Some points:

1. Virtually all recorded music is "compressed" to some extent. This is most pronounced with classical music. A Mahler symphony, which uses over 100 instruments, can have a dynamic range approaching 80db (that's ten million to one ratio). Phono records could handle about 50 db. Good (not home entertainment) tape equipment could go maybe 60-65 db. AM radio is stuck below 50 db. One of the issues with (non) acceptance of the CD format by some phono record fans is that it is capable of a wider dynamic range, which can be disconcerting to the casual user.

2. Listening levels are strongly influenced by the "Fletcher-Munson" curves. At low levels, the human ear hears frequencies in speech ranges but needs as much as 40db more power to hear low and high frequencies. At high levels, this flattens out. This is why the apparent loudness of a spoken commercial seems high compared to music. The average levels, measured by electronic instruments, may be close, but the ear favors speech reception in a quiet environment (i.e., living room).

3. Apparent levels are affected by background noise. Programming for "drive time" requires a fairly constant power level (i.e., hefty volume compression) because the listener's ears are at the point where the Fletcher-Munson curves are relatively flat. Difference in noise level between an automobile and a quiet living room is on the order of 40 db or more.

4. Volume compression and expansion introduce distortion. If the gain is changed slowly, the distortion is sub-audible. If the changes are quick, the distortion is audible.

5. "Clipping" as a method of controlling maximum modulation introduces very substantial distortion. It's exactly the same thing as turning the volume up on a cheap radio, and the distortion you hear out of the radio is clipping.

6. "Distortion" is a relative term. The musical tone produced by a clarinet is a very distorted version of that produced by a flute. However, when we are talking about music formats that make heavy use of amplified instruments (particularly guitars), we are talking about musical instruments that use electronic distortion as a part of their "sound." What this means is that it is almost impossible to distinguish between the sound recorded in many rock-and-roll and country formats on recorded media and that heard in a broadcast signal except through a close comparison of the recording itself played through an audio system vs. the broadcast reproduction.

There have been a number of studies done on various things. First is the Fletcher-Munson study in the early thirties that "calibrated" response of the human ear. There were a number of studies in the forties that related frequency bandpass to distortion in terms of "listener acceptance," tiring, etc. As "Anita Bonita" points out, these characteristics are different in a sample of women vs. a sample of men. The differences are easily explained by anatomical differences: the average woman is smaller than the average man, and is more sensitive to higher frequencies. This same anatomical difference is the primary reason why dogs are sensitive to frequencies that are supersonic to humans, and whales sensitive to frequencies that are subsonic. To sum up what various studies have shown, women will be quicker to reject a distorted signal.

>From an engineer's perspective, raising the average modulation level of either an AM or FM signal is false economy. It leaves no headroom for even the modest dynamic range that has been accepted by the listening public for decades. Yes, a highly-modulated signal will sound louder, given a constant setting of a volume control, when tuning or scanning a frequency band. But the station that is doing this to announce its presence loudly is also having to process the daylights out of the signal to stay within maximum limits. Highly-processed signals are distorted signals, and every study has shown that distortion tires the listener quickly. The response of a listener who has tuned in a distorted signal is likely to be ten or fifteen minutes of listening, followed by a strong desire to shut the radio off and get some relief from the noise. The volume control on a radio is the proper way to make the audio louder. High average modulation may get the listener's attention for a few minutes, but it is killing the goose that lays the golden egg.

I *can* cite some of the studies performed over the years.

>I'd love to see some objective research on this point. Why should listeners
>care a whit how loud an FM station sounds? As long as it's loud enough to
>be audible in a typical car/kitchen/workplace/living room, what does it
>matter?

This is like most things in radio. Obviously most people don't OVERTLY care what a station sounds like. It is part of an overall impression they get from the station.

>Listeners choose a station for its programming, not for any
>technical parameter, be it loudness, equalization or anything else.

Of course. But, as formats become more and more similar, as is the case in major markets with LOTS of signals, formerly irrelevent things like compression become more important.
>
>There are people who will tell you that the louder your signal is the
>farther it will reach. On FM, it just ain't so.

True, but that's not the point. The point is how do you sound relative to the signals around you, paticularly when the formats are very similar.

>The real point, as I see it, of processing audio is to make it easier to
>use. Broadcasting music with a wide dynamic range is not a good thing; soft
>passages will be inaudible to many listeners, and people tuning up and down
>the dial are likely to go right past your station without noticing it.

Absolutely!! So where do you draw the line and set your levels?

In reading the responses to this thread, I think there is another point to be made here. My arguement has been that you had better sound as loud as your competitor, and if possible, louder especially with a Rock, Oldies, or Urban Contemp. format (without distortion). Major market stations are in a much different situation than medium/small markets.

Think about it. A CHR, Rock, MOR, (or almost any music format) is duplicated over several stations in a major market (where a 6 share can easily make you #1). This is not true in smaller or medium markets. I therefore would suggest that due to the fierce competition, relatively minor

differences between stations, such as compression, become more relevant. And, loudness itself becomes more relevant.

It's just like station "a" running a contest and station "b" not. When very few other things separate them, this becomes important.

This arguement breaks down to where you're from. Major market programmers don't have the luxury that smaller markets do to tweak with wide dynamic range and audio response. They have to compete against lots of other stations of identical signal strength.

Yes, the number one consideration is good programming. No question. But, everyone in a major market is likely to be a good programmer. In the end, it's going to be minor things that frequently makes the difference. Unfortunately, audio purists as going to lose out here. That 6% is more likely to respond to a station with a fair amount of compression than one with lots of audio level lows due to lack of compression.

>
I can tell you that you will benefit *greatly* from the Orban DSE-7000!

It is a God-send to me. I was going to quit radio production two years ago until we finally got one. The time savings for small productions is incredible. Cutting Dick Purtan's daily promos and IDs used to take 15-20 minutes using the 4 track. It now is done in 5 to 10 minutes! I leave music beds and jingles in the workstation. It's now just dubbing and editing Dick's voice track, sliding work parts around and dubbing and labeling carts. Editing is a breeze!

You will find that you spend more time doing elaborate productions, only because you can do so many more things! If you did the productions exactly the same as before, you would see a substantial time savings.

The audio quality is great and the little features like "Time Fit" really do work. It's the first good time compression I've ever used. Some voices lend to artifacts, but many do not and you would never know they were "scrunched"! With the Orban, you can mix and match the good new time compressed parts with the original tracks and still come up with time savings, if you have many artifacts (artifacts sound like bad tiny edits or tape glitches).

Putting Hook Tapes together (with everyone always changing their minds) is now incredibly simple. (Have you ever had to change several hook montages on a tape? Not a pretty sight..)

You are now going to find production work fun again and your productivity and the quality of your output will improve greatly. Just be sure you watch your recording levels! Digital recording is susceptible to clipping and distortion if you go deep into the red.

: situations, then it would be a *default* in all tapes/CD's recorded...
: Unless you really think that the recording industry is not aware of how
: listeners absolutely ...love compressed sound (_and_ the fact that a lot
: of listeners listen to in their noisy cars, beach etc), so somebody has to...
: tell them! :) [cuz they are 'stupid'!]

Interestingly, Mix magazine just had a spotlight article on this
subject. A handful of prominent engineer/producers all said that they
check their mixes against "radio" type ratios. They modify the mix as
needed to fit this reality of music, then back off the compression and
print to tape.

: Of course, some compression is present in the master recordings (eg. vocals,
: guitar bass) but not to the incredible extent that some stations do it!

Precisely. But recording engineers that I know all feel that a
compressor is more useful than an eq. There is also a difference in the
"sound" of many of the radio singles from the sales CD's. Seems to show
up on music from newer artists, as I noticed it on a Patti Loveless
single vs the album cut.

I've been meaning to do some tests with overall audio compression along
with additional separate microphone compression. I think these could be
balanced to work together, avoiding the excessive compression that ruins
most music on commercial stations.

I don't think most listeners understand compression. It took me years of
tinkering to be able to hear it clearly myself. But I do think that
listeners will tune out a heavily compressed station without careful
analysis, just because the sound did not please them, or because of
fatigue. Compression is more an ego booster for program mamagers than it
is a rating booster.

#<<Programmers of these formats continue to hold that keeping the
#compression down helps listeners stay tuned longer.......Nonsense.>>

#I have seen several studies which prove that less compression(up to a
#point) lengthens TSLs considerably.

#Please remember too that loudness only makes your station stand out to a
#listener that doesn't know the station. Once persuaded to sample a
#station, loudness won't keep that listener....good programming and decent
#audio quality will.

#As an engineer, I can't claim to have a pair of "golden" ears, but I
#refuse to listen to stations that over-process, simply because it is
#tiring to do so. In the age of digital media that is affordable to nearly
#everyone, those that still think over-processing is a good thing are about
#to be left by the wayside.

I've been watching this whole "Compression" thread carefully, and Sid's very concise post here is probably the best wisdom I've heard on the subject! From the standpoint of the listener, it would be entirely logical to conclude that people will spend a longer time with your radio station if you make it easier for them to stay with you...that is, after you've convinced them with BOTH your programming and a modest bit of compression that it is a station worth spending some time with in the first place! I think someone came up with the term "psychoacoustics" to describe this sort of multi-dimensional analysis.

I seem to remember that when the first Optimods came out, the sales literature talked about the effects of loudness that became distortion (as opposed to loudness that is "presence") as a factor of listener "fatigue". This may be less of a factor in rock/modern rock and other stations, than in many of the AC/"Smoth Jazz"/Classical music formats. I worked at one of the first stations in D.C. that had one of the early Optimods in the mid 70s (WASH-FM, in its heyday as a Full-service AC station owned by Metromedia). The station had a BIG sound that wasn't distorted...and that's what Sid is talking about (above). A careful balance of loudness *and* clarity. Anyone who maintains that you can't have *both* doesn't know what he's talking about, and in any case, misses the point entirely.

1076. Re: Compression!!

Newsgroup: rec.radio.broadcasting
Date: 1996-01-29 00:00:00 UTC
From: Bill P <rrb@clm.aiss.uiuc.edu>
Message-ID: <4ei2av$bt8@vixen.cso.uiuc.edu>
Source record: 26359

} From: vancleef@netcom.com (Henry van Cleef)

} My reason for writing is to ask if an electrical engineer's comments are
} appropriate for the group. Some points:

[..]

} Highly-processed signals are
} distorted signals, and every study has shown that distortion tires the
} listener quickly. The response of a listener who has tuned in a
} distorted signal is likely to be ten or fifteen minutes of listening,
} followed by a strong desire to shut the radio off and get some relief
} from the noise.

Exactly. My experience is that I may listen to some high-energy music
on our local CHR (KHTO) and really enjoy it. But after a little while I hit
the button for one of the softer stations. Among my favorites has been
KZPD, an automated, MOR-skewing EZ station that (thankfully) includes
a lot of jazzy arrangements.

As soon as the station changes, I feel a physical relaxing in my ears
and head as the 'wall of sound' disolves into actual dynamic range.

I actually like KHTO. And untill a few weeks ago they were very
listenable. But ever since being bought by grunge/COR KTOZ-FM, the
same ultra-compressed, totally smashed sound that has plagued
Channel-Z is now being done to KHTO.

It is especially horrible when they do remotes from a local dance club
via some sort of RPU. The RPU is a little rough itsself
(understandable) and with the new *ultra-hard* clipping that portion
of the day is even more unlisteneable (and is among my favorite
shows).

What seems to be happening is that the bass is cranked up to the point
that it obliterates the other information during the attack of strong
bass note. This masking is gone as soon as the note decays, so there
is a noticable 'pumping sound' in time with the bass line.

} The volume control on a radio is the proper way to make
} the audio louder. High average modulation may get the listener's
} attention for a few minutes, but it is killing the goose that lays the
} golden egg.

Are you available for consultations? I can think of several stations
that could benefit from your advice.

The station was owned by the Savitt family. Bill Savitt ran the prestiege
jewelry store in Hartford. It was shut down several years ago and the
inventory sold off when Bill's kids were uninterested in continuing the
business. Bill died last year, I believe.

From: Rob Landry <umar@cybercom.net>
Message-ID: <4ei2b2$btd@vixen.cso.uiuc.edu>
Source record: 26364

Steve Work writes:

>I am having an absolutely **horrible** time with FM reception in my
>apartment.

How do your neighbors address this problem?

Is there an FM antenna on the roof than you can get access to? Can you (or you and some of your neighbors) put a Yagi on the roof?

How's your TV reception? Do you use a TV antenna on the roof (if so, try hooking it to your FM receiver)?

Do you have cable TV? Does your cable company carry FM radio stations (many do)?

Assuming the answers to these questions are they don't, no, no, terrible, no, no, and no, about the only thing you can do is experiment with different types of antennas and different antenna positions.

One thing you need to look out for is receiver overload. If you live within 2 miles of an FM transmitter (like, say, the World Trade Center in New York City or the Prudential Center in Boston) chances are your radio's front end is getting overloaded.

There's a simple filter you can make from a piece of coaxial cable (RG-58 or 59 will do) that can eliminate this problem if you have it. There are 2 variations:

1) Favor a station. Cut a piece of coax about 4 feet long. Strip off the insulation from one end and connect it to the antenna terminals of your receiver, in parallel with your antenna. Take some wire cutters and cut 1/4 inch from the other end of the coax and observe the signal strength meter on your receiver while tuned to your favorite station. Probably you won't see much of a change. Cut off another 1/4 inch and look again. Keep doing this-- it may take 20 or 30 cuts-- and you'll see the signal strength rise as you approach 1/2 wavelength. When the coax is exactly 1/2 wavelength long, the signal will be as strong as it can get. As you tune above or below this spot, the coax will begin to attenuate the signals you encounter. The farther up or down you tune, the greater will be the attenuation.

2) Suppress a station. If you know that a particular station is overloading your radio, you can cut a coax filter that will suppress it as much as 40 dB. Cut a piece of coax about 2 feet long and connect it to the antenna terminals of your receiver, in parallel with your antenna. Tune the receiver to the unwanted station. Now cut 1/4 inch off the other end of the coax. You probably won't notice much difference, but cut another 1/4 inch off the

coax and check again. Keep doing this; eventually you'll start to see the unwanted station drop in strength as you approach 1/4 wavelength. When the coax is exactly 1/4 wavelength long, the signal will be as weak as it can get. I used this technique at a transmitter site in Boston and measured more than 40 dB of suppression.

If you need to suppress 2 or more stations, you can put 2 or more coax filters in parallel with your antenna.

I have found this technique very useful.

Rob Landry umar@cybercom.net

[Moderator's Note: My experience with coaxial resonators like that is that it is fine unless the offending station is very near the desired station. The 'Q' of such a setup is not foing to be very sharp.

From: ehelvey@crosslink.net
Message-ID: <4ei2b2$bte@vixen.cso.uiuc.edu>
Source record: 26365

Hi, again! I was both surprised and delighted to find my friend, Dave, in less than a week through one posting on this newsgroup. So, why not try to find a few other guys I've lost track of. One is Chuck Sprague. He was also stationed at Lackland AFB with me in late 1969-early 1970. Chuck is from either Wyoming or Montana. I don't know if he's involved in broadcasting now or not. I believe he was involved in politics for a while a number of years back.

The other guy I'm looking for is Bill Lunnie. Bill was my replacement in 1973 at Bolling AFB where we produced the Serenade in Blue radio series for AFRTS and US commercial broadcast. Bill later left the Air Force and worked for the American Bankers Association and the last I heard, about 18 or so years ago is that he took an on-air job at a small radio station somewhere in New England.

The final guy I'm looking for was stationed with me at Bolling AFB -- we were co-producers in the same unit of the Secretary of the Air Force Office of Information. His name is Mike Smith. I think Mike is still in the Washington, DC area. I know he had a production position with the American Red Cross in DC for a number of years and was still living in Suitland, MD in the same apartment building we both lived in while stationed at Bolling. I haven't seen or heard anything about Mike in probably 15 years.

If anyone knows Chuck, Bill or Mike or knows of them and/or their current whereabouts I'd really like to find them after all these years. I can be e-mailed at ehelvey@crosslink.net or called at (540) 869-8470, ext. #5.

Thanks to anyone who can help me find Chuck, Bill or Mike.

During the seventies through late eighties, many American broadcasters, produced custom instrumental recordings of pop hits. Many of this material is nolonger being aired. Does anyone have any of this material out there. Bonneville Broadcasting had a set of some 200 cd's of this music. I know that much of this obsolete material had been thrown out. Hopefully there are still a few collections out there. If there are, I would be most interested. I was told that these recordings can not be legally sold to any individuals, but if it is going to be tossed out anyways, it would not make a differance if you threw it in the garbabe or my back yard.

Let me know. Thanks!!!

BBC Hereford & Worcester, on 738kHz AM from Worcester, England,
simulcasts its FM service at 37.5W erp, 24 hours.

It's a very good site (at the confluence of two rivers), and can be
heard over 100 miles away in the day, and in some very odd places
at night. I think it channel-shares with a station in the Czech
Republic, and somewhere in France.

John Hayward-Warburton, on the staff of the above-named station.

Aaron L Dickey (kieran@interport.net) wrote (in response to my earlier post):

: Yes, but there's a difference. Back in the late 70s-early 80s, the great
: thing about that music is that _every song was different_. The Go-Gos
: sounded like the Go-Gos, Wall of Voodoo sounded like Wall of Voodoo...the
: amount of originality in that era was astounding.

: Today, "modern rock" consists of loud guitars and drums, followed by loud
: guitars and drums. Smashing Pumpkins sound just like Foo Fighters sound
: just like Goo Goo Dolls...the same thing over and over and OVER from now
: until the end of time. Not to say that these bands are not good at what
: they do; their music is great IN MODERATION, but today it is all there is.
: And it drives me nuts.

: ...after all, there's no new stuff coming out that's anywhere near as
: inventive or fun. It's all droning guitars and depression. No thanks. I'll
: stick to my CDs.

Sorry to disagree, but No Doubt does not sound like Toadies which doesn't sound like Veruca Salt or Elastica or The Breeders or Rancid or on and on. This is all "modern rock", which admittedly mixes in the more mainstream stuff you're complaining about. I understand your complaint, but realize that the "modern rock" format is meant for mass appeal. I use it as my background music for work.

When I feel truly adventurous, I listen to "alternative" on a college station. That's how I hear the REALLY different stuff and find new bands I really like. If the music has commercial potential, it'll make it to the mainstream, eventually. After all, KROQ in L.A. played the Police, Bangles, GoGos, and others when they were NOBODIES. I'm certainly not offended if others discover a good thing ... :)

Daniel M. Danhauser wrote the quoted material below:

" Back in 1978, I discovered KROQ 106.7 in Pasadena/Los Angeles while in
" college. I was mesmorized by new exciting groups I'd never heard of
" before, that played music that was fresh, even if often unrefined.

KITS in SF is considered a standard bearer of modern rock. Listening to
it from time to time, it sounds to me like 80s oldies. Basically it
appears that they got into European-style post-punk music (what we call
"Eurotrash") and stayed with the same playlist. You can still hear
Depeche Mode on a regular basis there. At one point they tried to add
rap and other more current genres, but the audience didn't go for it.
So, my impression is that "modern rock" is just oldies once again.

You must be as bored as I am on this Saturday!
My name is Noid (really it is), I am a morning show producer for an AOR/talk show in Syracuse, NY. The station WAQX-FM, the host Lytle in the Morning. I just wanted to see what other radio producers are doing and so-on! Exchange ideas, etc. I am already on the big computer services for morning prep but it is key to network with other people.
E-mail me direct if interested!

Noid

Larry -

Reporters groping for traffic at 2 a.m.? I guess you're lucky enough
not to have to go trolling through The City at that hour, buddy! Trust
me: as someone who spent six years covering ballgames at Shea Stadium
and then shlepping back to New Jersey - frequently at precisely that
time of night - there is traffic throughout the metropolitan area at
even the most ungodly hours. (In fact, it was then that I started
talking to my friends at WINS and NewsRadio 88 about the feasibility
of all-traffic-and-weather radio. I can't say it would fly anywhere
else, but it would definitely get some ratings in this part of the
country!)

The other interesting thing that occurs to me, is that so many
of the non-wacko hosts (predominantly liberal in their outlooks)
like Sally, Tom Snyder, Larry King and Oprah, have moved on entire-
ly from radio to the wider audience available from network or
syndicated TV...a venue where people like Rush Limbaugh have
hardly enjoyed the same degree of success.

"Who is my real friend?"
Sorry to say you may not necessarily know who your real friends are. And talk radio has largely been a disinformation agency in behalf of those few who will really benefit (including men like Limbaugh, who stands to save $1 million a year from the plan and, according to the NY Post, has been overspending so much lately he needs it). Liberalism gets represented mendaciously and set up as a straw man, while the real face of conservatism remains hidden until it's too late.
The Forbes agenda, flat tax and all, is likely to be a real whammy for the middle and upper middle classes, the core of the consumer economy and the mass of small business owners. Losing the remaining deductions means you lose whatever leverage you had against a high tax bill...a homeowning family of four pulling in $1500 per week, according to the Treasury Dept., could end up paying up to $10,000 a year more in taxes under the Forbes plan, $12,000 more in tax a year under Dick Armey's somewhat higher-rate proposal.
Flat tax plans may offer a lot of goodies for the rich...but if you aren't making $200,000 a year, you will pay MORE tax to Uncle Sam than you did before. That's even true of the working poor who'd supposedly be tax exempt, because the loss of Earned Income Tax Credits can leave a family of four making $20,000 a year up to $2000 more out of pocket annually.
Sorry...I don't support raising your taxes to give Steve Forbes and Rush Limbaugh a break. And I bet when you really take a close look at it, neither will you...
Bob Smith, middays WXXI-AM 1370 Rochester NY

>I've heard Laura Schlessinger do this as well. They're both interested in getting
>to the point fast, otherwise people calling in with problems would just ramble
>all over the place.

10, maybe 15 years ago when WBZ was AC by day, talk at night they were VERY guilty of this. Callers would get on the air and ramble endlessly, never making a point. "I remember you back in the 60s when you were in Cleveland, remember me? I called to talk about blah blah blah." And then the host (Bob Raleigh seems to come to mind as a particular offender when it came to this) would say "oh, yeah", and then they'd reminisce on the air for seemed like forever. About the only time I tune in talk radio is if I'm driving late at night...tends to keep me awake better than music, but this would put you to sleep in no time!

I'm sure a good % of people who call talk stations are extremely lonely people with no life & I imagine it must be a pain for a host to get rid of them, or at least make them get to their point without being rude.

All-news radio is definitely not dying, but it is a major-markets-only format because of the extremely high cost of doing it properly. It can only be profitable in huge population centers. But I can't speak to the KRLD situation. All I know is that stations like KCBS, KYW, WINS, WCBS, KNX and KFWB are doing well and bringing in potfuls of money. But when tried in middle-sized markets, the format is a financial disaster, because the revenue just isn't there.

And yes, KCBS is one of the best, and I'm not saying that just because I used to work there!

OK, wait a minute. Some have said that rudeness to callers is a schtick, therefore contrived. Would this mean that the host is actually a civilized erudite chap who PRETENDS to be cantankerous for the good of the bottom line? Yet so many claim to find rudeness off-putting. Isn't it just a likely that many polite and measured hosts are actually testy blokes PRETENDING to be cool and collected? Wouldn't it all be better if the calm orators and the cranky ones alike just were themselves? Why should all talk hosts have to perform within such narrow parameters of tone like TV newscasters? What's instrinsically wrong with an edgy demeanor anyway, if it's genuine?

--

Bravo Lori, Bravo!!!!!

It seems that Rush's personal creed is: MY OPINION IS THE ONLY
ONE...ANYONE ELSE'S DOES NOT COUNT!" It is scary whe it seems that Rush's
values have affected daily life. For instance, we all know that Rush
feels that animals have no rights. I seem to remember reading about
incidents of animal cruelty AFTER Rush had gone on a diatribe about
animal activists. Rush, of course will not let opposing viewpoints on his
show. The proliferation of "Rush Is Right" bumpersticker on vehicles
scares me a bit, especially when they share bumperspace with pro-gun and
other messages of that ilk. when you have Rush, along with fellow
conservatives (or is that too mild a word for Liddy and North) caiming to
be the voice of the people, the truth, it sort of makes me wish Jerry
Pippen was on the air somewhere to bring a sense of sanity back.

Now if you want REALLY rude host, check out Mad Dog Dornan next time he
fills in for Rush...oir Bob larson. Now THOSE two are frightenning!

A representative from WXYT in Detroit recently confided in me that the
numbers for Mr. Limbaugh are slipping. My impression of a recent show I
heard was of a host that was not being himself, laughing or yelling with
just a little too enthusiastically, in an non-genuine manner. The
liberal press has exposed a lot of slips in the accuracy of Rush's
comments, and people have begun to take notice.

We need Rich Wood, the WOR Network honcho, to confirm
this (Rich, I hope you're lurking, you often do on this group)
...but seems to me I remember Arnold Passman, who wrote a
history of personality radio in the early 70s, saying WOR start-
ed Rambling With Gambling some time in the summer of 1925.
That would make it first, since WSM didn't even sign on for
the first time until early fall of that year and Grand Ole Opry
started up when the station was about a month old.
Oldest continuous NETWORK show may be a different story.
I think that would be the Metropolitan Opera broadcast (first
on NBC, now on NPR) which only dates to about 1939. Grand Ole
Opry doesn't count because it's distributed nationally as a TV
show, and I don't think they syndicate or network the audio any
more as a radio show.

References: <4ecqeu$ihq@vixen.cso.uiuc.edu>

It's seemed to me for a while that, at least in all but the very
largest and very smallest markets, "opoly" is just making up for
the deleterious effects of Docket 80-90 expansion over the last
decade or so. Look at my hometown of Rochester NY...in 1971 the
local radio scene looked like this:

680 WNYR (country)/101.3 WNYR (simulcast) -- Malrite
950 WBBF (top 40)/92.5 WBFB (classical) -- "WBBF Inc."
1180 WHAM (full svc)/98.9 WHFM (MOR) -- Rust
1280 WROC (full svc)/97.9 WROC (btfl mx) -- Rust Craft (different company!)
1370 WSAY (top 40) -- Gordon Brown
1460 WHEC (full svc) -- "WHEC Inc." (Gannett)
96.5 WCMF (rock) -- Community Music Svc.

There were also two - count 'em! - noncomms, the University of Rochester's
WRUR 88.5 and Irondequoit High's WIRQ 90.9, and three commercial TV stations,
two of which were co-owned with radio (WHEC and WROC), along with an
educational TV station that was in some nether-world called UHF. But
sticking to commercial radio, 11 stations, 6 owners. Now let's
fast forward 25 years:

950 WBBF (standards)/92.5 WBEE (ctry)/98.9 WKLX (oldies) -- Heritage
990 WCMF (sports)/96.5 WCMF (rock)/101.3 WRMM (ac)/95.1 WNVE (mod rk*) -- ARS
1030 WYSL (talk)/93.3 WHRR (cls rk) -- Radio Livingston Ltd.
1180 WHAM (full svc)/1280 WHTK (talk)/97.9 WPXY (chr)/100.5 WVOR (ac) --
Lincoln Group Ltd.
1460 WWWG (religious) -- American General Media
103.9 WDKX (urban) -- Monroe County Bcstg.
105.9 WJZR (jazz) -- Victorson Group [son of the "Rust" from WHAM, circa 1971!]
106.7 WMAX (AAA)/107.3 WRCD (NAC) -- Auburn Cablevision

*-owned by Great Lakes Wireless Talking Machine, LMA'd to ARS with option
to buy.

In addition, the city is now served by one noncomm AM (hi Bob!), eight noncomm
FMs, four commercial TVs (none co-owned with radio), one noncomm TV,
and three LPTVs. But again, returning to commercial radio, 18 stations,
8 owners. What about local ownership? In 1971, four of the owners
were local (WBBF Inc., William Rust, Gordon Brown, and Community Music
Services), and a fifth, Gannett, was a national company headquartered
in Rochester. In 1996, four are local (Radio Livingston, Monroe County,
Victorson, and Auburn Cablevision), and a fifth, Lincoln Group, is regional.

Sure, it would be nice to have 18 owners in town, each local, but in reality, Rochester would seem to be a town that can support about half a dozen owners in a free market...whether they're spread out among 11 stations or 18.

I remember how radio sounded in Rochester with just 11 stations vying to serve a market of a half-million or so pairs of ears. I know how it sounds now, with 18 commercials and eight noncomms serving perhaps three quarters of a million. And I can tell you there's a lot more diverse material on the air now than there was 25 years ago -- everything from religion to modern rock to AAA to Bob Smith's noncomm talk.

I suppose the one place where this falls apart is news. I don't have any stats to prove it, but I suspect that in 1971, there were full-time news departments of more than one person at WBBF/WBFB, WHAM/WHFM, WROC AM-FM, and WHEC, just at a minimum. The latter three would all likely have had at least four newspeople. Today, there are only two decent newsrooms left in town, at WHAM and WXXI. I suspect that may be what we've truly lost with the coming of the Age of 'opoly. Much as I'd love to work in radio news in my hometown someday, the options are so limited, and declining so fast, that I doubt I ever will. (Not that I have anything against working in a top 10 market, mind you.)

[I also suspect Rochester may have fared better than other similar-sized markets over the last 25 years. I'd be interested in comparisons...]

HI FELLOW BROADCASTERS...LETS SEE IF WE CAN GET THIS NEWSGROUP HUMMING!!!
I PROGRAMME (ALONG WITH 4 OTHERS)A CLASSIC ROCK STATION HERE IN AUCKLAND. WE ARE THE ONLY ROCK STATION IN THE MARKET. WE HAVE ALWAYS PROGRAMMED 3 TO 4 CURRENT CUTS PER HOUR (INCLUDES RECURRANT). THESE WERE YOUR USUAL NEW TOM PETTY, BOB SEGER ETC. BUT, AS WE ALL KNOW THE MUSIC OVER THE LAST 18MONTHS HAS CHANGED. WE MUST ADAPT WITH IT, WITH OUT LOSING OUR TOP END.
THE COMMENTS ON WNEW REALLY SPARKED UP MY INTEREST.
QUESTION...CAN ANY KIND PROGRAMMER OUT THERE TELL ME WHAT CURRENT (INCLUDING RECURRENT) TO CLASSIC ROCK WNEW PLAYS.
ALOT OF THIS NEW MUSIC JUST DOESN'T FIT WITH THE TRADITIONAL CLASSIC ROCKERS, IE SOME EAGLES, DOOBIES, FLEETWOOD MAC, BEATLES ETC. HOWEVER DOORS,ZEP,HENDRIX, 60,S WHO ETC MIX WELL. HOW DOES WNEW HANDLE THIS.
SHOULD WE UP OUR CURRENTS TO EXPOSE MORE OF THIS GREAT MUSIC OR WILL IT BLOW OFF OUR TOP END?
WHAT ARE WNEW DOING FOR SWEEPERS. IS THE VOICE OF GOD DEAD? HOW ARE THEY POSITIONING THEIR BROAD MUSIC MIX ON AIR?
WHAT ARE THE ACCEPTED ROTATION TIMES FOR THESE STATIONS CURRENTS (OUR TIGHTEST IS 5 HOURS)
I'D BE GRATEFUL IF SOME KIND SOUL COULD EMAIL ME AN HOUR OR TWO OF THEIR PROGRAMMING (mckay@voyager.co.nz)
THANKS FOR YOUR REPLIES...ALL THE BEST FROM DOWN UNDER
ROB

I have a method that seemed to work and it can be done by anyone with a phone and a deck who's speed they trust.

On the trusted deck, record several minutes of the dial tone from your phone (you may have to use the pause button to edit out the usual time-out on dial-tone).

Then play that tape on the suspect machine through a headphone on one of your ears. On the other ear, pick up the phone and listen to the dialtone.

Try to adjust so the two are the same (zero-beat). With a headphone and the telephone, most people with average, binaural hearing can do a very accurate job, even without perfect pitch.

Bill

> I've even gotten to the point of buying a portable stereo
tape player with speed control, because I insist that most
walkman tape players go too fast!

As adjusted out of the factory, yes, but at least some of them have internal adjustments you can use to set it right. One such model (with Dolby B and excellent "you are there" sound quality that I'm amazed at for its $$ price) is the Panasonic RQ-V182. Mine was some 3ish percent fast out of the box, but before taking it in for service (which would have likely cost almost as much as the player cost in the first place <g>!) I decided to take it apart just in case there was something I could adjust obvious. And indeed, there was only only metal-encased adjustment control on the circuit board anywhere near the motor, and when I turned it the tape speed changed, and I was able to get it within a fraction of a percent of nominal (without perfect pitch it was tricky getting it any closer, so I settled for it being hard to tell the difference in an A-B test, tho I know from past experience that differences of half a percent or less are difficult for me to tell so it could still be off within that range perhaps).

>since 1954. Had a great collection of old 78s and 45s.

The AM is on 1220 these days (and since before I discovered it), with 5 kW
day and 82 watts at night. WSLM-FM moved from 98.9 to 97.9 (with 3 kW) not
long ago; 98.9 is still licensed to Salem, but the new station (WKJK, 50 kW)
is a "rimshot" into Louisville.

With all of the recent "Is WFNX considered in the Boston market" discussion going on, I feel compelled to stand up for "The Worcester Station"

107.3 WAAF is the prototype for most of the COR/Alternative hybrid stations.

WBCN is merely a mirror image of what we've done at WAAF for years. Thanks in no small part to Ron Valeri (now with Q104.3 in NYC)

'AAF is also generally overlooked when discussion of the Boston Market is brought up. as a station who's signal penetrates *6* metro markets, including a 2.5 12+ in the recent Boston Arbitrons...WAAF is certainly a player in the market and is responsible for breaking one of the breakthrough artists of 95 (Toadies) along with WXTB in Tampa.

Also, WAAF has been around LONGER than 'BCN (Thanks to Mr.Ahmet Ertegun) sp.?? And even though we suffer from some signal disadvantages are verey visible in Boston.

We've been doing the AlternaRock format that many stations across the country have adopted, for years now.

(Feeling Proud to Be Here)

Paul Marshall

Or how about the old bug (semi-automatic telegraph key) burst between
every story, or I remember some stations using reverb to announce the
dateline of every story. One station where I worked, we even mixed in
sound effects in the background to make the story sound more immediate.

Well I don't know who told you that..but, up here in the Pacific North
West of the United States, Stefan, Seiko (the watch people) started a
company called Seiko Communications.

They sell through distributors a watch called the Receptor. It is a pager
watch that gets its information from FM Radio (broadcast) SCA's. It's
recieves weather, sports scores, stock market information, and it also
functions as a numeric pager. The watch is very accurate since it's
updated 18 times a day via FM SCA from the atomic clock in Boulder, Co.

I had one for about a year and it worked great....except that Seiko is
still very slow to market it nationwide..it is only good in
Seattle-Tacoma, Portland, and Los Angeles/San Diego markets.

so to answer your question, yes there is a watch which receives timecodes
from the Atomic Clock

Here at WITR, 89.7-FM in Rochester, NY we have a program called "Rochester Sessions" that features local bands. This show airs Monday nights at 10pm with a different band that comes in and performs live on the air. It's been a successful show and has done well with the bands that come in and the community as well.

This is true. The NIST has received complaints about this, and they
are working on upgrading the WWVB facility. Currently WWVB runs 13 kW
on 60kHz, they hope to increase the power by 10dB. Compare DCF77 in
Germany which runs 50kW and covers a much smaller area. The signal
from WWVB is not strong enough yet for an item like this to work well
here.

Junghans did make a home clock for the USA that received WWVB.

My understanding of the Seiko pager watch (sold at cellular dealers
here) get regular updates through the data sytem that provides the
paging service. My assumption is that the clock source is locked to
WWV or better (i.e. GPS). These pager watches are fed by FM Broadcast
subcarriers.

Also, the PBS television station network now provides a time scheme to
equipped VCRs, which automatically updates the VCR's clock, eliminating
the world famous blinking "12:00". I don't know if all the stations
provide this or not. I also don't know how many VCRs with this feature
are available at retail or are sold.

There is also a Timex watch that has a connection with the new
Microsoft Network, which may also be capable of relatively accurate
clock time setting.

I guess that I don't know very much about all these things I know
about..

I hope this helps.

The Casio technology you refer to is likely originally from the U.S.
The watch was developed by a company called AT&E working with
both Casio and Tektronics in Portland Ore. The watch received WWV
time codes via FM broadcast sub-carriers and was part of the data
stream that sent paging messages to the watch. This work goes back about
7-9 years ago and I believe the system is still in use in the Portland
area.
(Perhaps someone in Portland could post a follow-up. I believe the
watch was popular among lottery players since the numbers would
be sent out over the paging system.)

The system was also installed in Philadelphia and Washington DC for
closed community testing and it worked well. The watch would check
multiple FM broadcast signals so there was diversity of frequency and
direction which corrected for any fading and multipath. The original
tradename was "Receptor". AT&E had trouble raising funds to roll out
the system nationwide and eventually ended up in bankrupcy and
Casio obtained the rights to the product and has marketed it worldwide
since then. I've seen some reports about Casio wanting to re-enter
the US market. I guess the In-Band DAB proposals conflict with
their technology and this has held off deployment in the U.S.

Not true! There is a ton of great new music out, it's just not being played. There is also a lot of great music that is not exactly innovative or ground breaking, but is totally interesting and exciting, but alleged "alternative" stations refuse to let 'em cut in on their 20-21 spins of the new Bush single per day!

Want inventive or fun? Check out the most recent Pizzicato Five CD on Matador/Atlantic...why is'nt this huge? Most anything on BarNone (the people who gave us Edwyn Collins) fits the inventive or fun category.

The most exciting and compelling radio I've ever heard was WPIX-FM in NYC circa 1979-1980, when they would play something a DJ may have picked up on a trip to the UK or California on an Indie label, then 2 weeks later it would be top-ten on thier playlist. THAT was alternative. WLIR in the early '80s was the same way.

Until "alternative radio" actually becomes an alternative, it'll sound as boring and calculated as most CHR's.

One idea that springs immediately to mind is coverage of hardware,
i.e., AMAX receivers. For example, maybe you could obtain reprint
rights from publishers of equipment reviews (such as Julian Hirsch's
report on the Denon TU-680NAB for Stereo Review in May 1993).

Also useful would be any news regarding how much AMAX is being used in
the U.S. broadcasting industry, and any plans for more.

Glad you're doing this.

The WBZ tones are supposed to be "pleasant". But the two tone
generator is an old tube device with nothing in the circuitry that
locks the tones to anything. According to notes in the documentation
the engineering staff has intentionally or unintentioanlly changed the
frequencies of these oscillators a few times over the decades. The
tone generator was originally intended for public address systems.

I intend to replace the generator in the next 30 to 60 days. I am
looking for information on tones used by old time broadcast stations.
Ideally I would like to use something that dates back to the 20's or
something used by the earliest CBS stations.

JACKIE MCCOY QUITS AT 96.3
Longtime 96.3 radio personality Jackie McCoy hung up her hat for the last time at KIHT on Wedensday.McCoy , who has been with the station through many years, three sets of call letters and four formats(KADI,KRJY,KIHT)(Top 40,Hot ACR,Lite ACR,Oldies,ARRO).McCoy cited the fact that "she was making more money doing a couple of personal appearances a week than she was all week on the air[at Heritage O&O KIHT].McCoy is married to former longtime KWRE morning man "Buffalo"Jody Owen, and together they run J&J Productions, which takes care of their shows and personal appearances.There is speculation that when station founder Richard Davis retired and sold the station to Heratige, that McCoy took a huge paycut, and to boot, they discontinued her and "Mad"Maynard's long running (20yrs),Sunday Night Oldies Program

addendum:With falling ratings, and McCoy leaving after all this time, it is my guess that format changes are evident at KIHT, I would probably be looking for them to be dropping the ARRO, for the classic rock format abandoned by KSD-FM. There has also been speculation that the station might be picking up the syndicated Howard Stern show to try and pick up the pieces and rebuild the staation.

Taking shape.................

The transformation of WLS-FM to country music WKXK continues. The station lured Nancy Turner, formerly of WMAQ and rival country WUSN back to the business. Nancy, who retired last June from WUSN to spend more time with her family, is handling the morning drive until a permanent host is found. Nancy is expected to eventually move to a modified midday shift. Also at the station, Matt McCann, formerly of KDIL in San Antonio, is the midday host. Dominica in from San Diego's KFMB, apparently feeling famous enough to go with one name, handles the evening slot. Joe Caruso, formerly of KCYY in San Antonio and WDJX in Louisville, will handle the overnight shift. Joe was a former contributor to the Steve Dahl and Garry Meier show before striking out on his own.

Speaking of Garry Meier, chances are good that Garry will reappear at talker WLS-AM. Garry has teamed with midday host Roe Conn for the past two weeks.

Long time personalities are a changing..............

Dave Ellsworth, news anchor at infotaining WGN for the past 23 years had been handling the news on Chicago's top rated morning program. Dave was sacked when his contract was not renewed. Dave, who had been the station's news director for 11 years was replaced on the morning show by Tom Pedersen who currently handles the news director job.

Apparently the station needs to cut expenses. WGN-AM is the top billing station in the country with receipts of almost 36 million dollars.

Donn Pearlman is leaving all news WBBM-AM after 25 years at the station. Donn most recently handled the midday anchor desk at Chicago's top rated all news station.

Truth in advertising.............

Also at WBBM, the station has dropped its weekend sports talk programming. That means, for the first time since going "all news
except when we are doing something else", the station will live up to its ads of "all news, all of the time".

The station has dropped its affiliation with Crain's Chicago Business as a contributor to their business reports. The station added overnight business reports from the Wall Street Journal.

Adding to the syndicated stable....

Johnathon Brandmeier, mornings at entertaining talker WLUP-FM is expected to add additional stations to his syndication stable. Johnny is currently heard on WQFM-FM in Milwaukee and WZNF-FM in Champaign Illinois.

Rumor mill....

Is Howard Stern getting ready to return to the FM band again? The word on the street is that all 70's WYSY may be the next stop for the self appointed King of All Media.

1142. Mid-America Radio Watch (28-Jan-1996)

Newsgroup: rec.radio.broadcasting
Date: 1996-01-29 00:00:00 UTC
From: transvox@crl.com
Message-ID: <4ei2af$bse@vixen.cso.uiuc.edu>
Source record: 26488

Now that the FCC is back in business, for a while at least, it's approved an application that will give some parts of the Kansas City metro area another FM signal.

Country station KXKX(FM) in Knob Noster obtained approval Jan. 19 to increase power and antenna height. The change, up to 510 feet and 38,000 watts, will give the station a listenable signal in eastern parts of the KC metro area.

In those areas, the stronger 105.7 MHz signal will interfere with modern-rock KLZR(FM) from Lawrence, Kansas. A poor choice of transmitter location causes "The Lazer's" signal to start fading out right at midtown Kansas City.

Also on Jan. 19, the FCC OK'd Michael Glinter's plans to reduce the power of still-unbuilt KGGN(AM) slightly, from 1000 to 960 watts. The proposed daytimer at 890 KHz was authorized six years ago.

Glinter's other proposal, to move Topeka's WREN(AM) to Kansas City and the KGGN transmitter site, probably won't get approved quite this easily.

****

Kansas City's two "alternative" newspapers fell back on that mainstay of the genre, "The Best Of Fill In The Blank 1995," in their most recent issues.

The _New Times_ named KCUR(FM) the best Kansas City radio station of 1995, and the best DJ, Johnny Dare of KQRC(FM), both without much explanation.

The _Pitch Weekly_, befitting a publication with more ads than the _New Times_, had more categories as well:

* Best FM radio station: KLZR(FM), of which it was said "Lawrence's premier alternative station continues to set the standard from which KC stations pilfer ideas."
* Best AM radio station: KMBZ(AM) which, among other things, "boasts the best morning newscast in the city."
* Best morning radio show: Randy Miller of KBEQ-FM, who "just keeps coming back"--not mentioned was that Miller has not been able to replicate his Kansas City success in other markets.
* Best radio talk show: Mike Murphy of KCMO(AM), described as an "institution."

****

The hazards of duopoly: On a 7 pm newscast Jan. 24, I heard the following outcue on a story: "Larry Mouldenbrink, Talkradio 810, KCMO." The newscast was on KMBZ(AM), KCMO's duopoly partner. Ooops.

****

Now you hear it, now you don't: Last week, I wrote about the Sunday afternoon Spanish-language program on KCXL(AM). This week, the program was gone. In addition, it appears that WHB(AM) is no longer running a Spanish-language show on Saturday nights. Que' pasa?

1143. LA Local Radio Page - now testing Real Audio

Newsgroup: rec.radio.broadcasting
Date: 1996-01-29 00:00:00 UTC
From: Charles Hobbs <transit@primenet.com>
Message-ID: <4ei2ag$bsj@vixen.cso.uiuc.edu>
Source record: 26489

For those of you who have looked at the LA Radio page at http://www.primenet.com/~transit/laradio.html, but couldn't play the airchecks . . .

I have placed five airchecks (KLAC, KFI, KMPC, KBIG and KCBS) in RealAudio format, on an experimental basis. Users with RealAudio players (available for Mac and Windows) are invited to try them and let me know how they sound.

(The RealAudio player can be downloaded at http://www.realaudio.com).

RealAudio's advantages are: a format accessible by both Mac and Windows platforms, as well as an impressive 10:1 compression ratio, resulting in fast downloads and server space conservation. Sound quality is variable; these first five files were converted from existing compressed AIFF files, so the sound quality might not be quite as good as it could be. But go ahead, give them a listen, and let me know what you think.

1144. Re: Copyrigyhts and Ratings

Newsgroup: rec.radio.broadcasting
Date: 1996-01-29 00:00:00 UTC

Message-ID: <4ei2ai$bsl@vixen.cso.uiuc.edu>
Source record: 26490

>[Moderator's Note: The reason for that is simple. Arbitron
>information is copyrighted and costs a LOT of money.

Garret A. Wohlman replied:

>Actually, this is not true. You Can't Copyright A Number.

You can't copyright any letter of the alphabet either, but that doesn't mean you are free to use combinations of those letters that appear in copyrighted books or magazines.

I'm not an expert on copyright law. But I think the law makes a distinction between a fact, which anyone may arrive at independently, and an estimate like those found in an Arbitron report.

You can publish a detailed description of the skeleton of Tyrannosaurus rex in a copyrighted work, and anyone may make a model of the skeleton based on your description without violating your copyright. The skeletal structure of a dinosaur is a scientific fact not subject to copyright protection (correct me if I'm wrong, somebody).

But if you publish a profile of New York radio listening based on Arbitron numbers, you'll get in trouble. Arbitron numbers are not facts; they're _estimates_. Because you can't make a series of observations, independently of Arbitron, and get the same numbers you find in a ratings report, the law treats an Arbitron book as though it were a work of fiction. The fact that most of it is numbers does not matter. It belongs to Arbitron just as sure as _The Lord of the Rings_ belongs to J.R.R. Tolkien, and if you want to use either of them you've got to get the copyright owner's permission.

You are, of course, free to undertake your own study of radio listening habits and use the results any way you like.

Perhaps someone with better knowledge of the law can elaborate.

Two disconnected questions:

I heard a tape of a british personality (similar to Imus in some ways) who played with an American accent from time to time. It was an early 80's tape, and I understand the guy was canned for a while after a comment about government styles (something about the USA being a democrary, and having a presdient, and England being a country and having..... Margaret Thatcher). Anyway, do you know his name.

Second..... I live in the Ohio River Valley (nice flood, huh?) about 55 miles from Pittsburgh, and receive the BBC world service on 540 kHz loud and clear during the day. I have listened at the top of the hour, and did not hear an ID. Any idea where it's coming from.

We also do a beep at the top of the hour at WBZ. Our news and
programming staff makes no effort to syncronize the ID to the beep.
When I worked at KSFO a few of the old timers did a great job of it.
It's really slick when it's done right.

At KSFO we had a 440 Hz tone that was quite accurate. At WBZ the beep
is actually two tones generated by a three tube (6SJ7s I think)
oscillator/buffer. According to the documentation the tone generator
was intended for public address systems used in stores, factories etc.

We need to replace the old beep tone generator and I wondering if
there is an old time broadcast standard for the frequency(s) of these
tones...

Tim Meehan (duke@interlog.com) wrote:

: I miss CKO, especially because I used to listen to Ted Tevan and Pat
: Burns. Being from Montreal, I remember those voices all too well from my
: youth!

: I op at CHWO Oakville. I normally work Earl Warren's Saturday monring
: show but occasion I get to work with Jimmy Tapp (another ex-Montrealer,
: and voice from my youth - Hercules!). Last time I was talking to him,
: Jimmy told me that Ted's back at 600 in Montreal, but he hadn't heard from
: Pat in a while. Is he still out in Vancouver?

Pat's doing editorials at CKST 1040, which is kind of a mish-mash
of talk, music-of-your-life and well.. it's really kind of hard
to describe. I haven't seen him for awhile.

I worked at CJOR when Pat was there.. then CJOR changed format
and Pat ended up at CKO. Teevan was at CKO after I was so I
don't know him. John Gilbert and Bill Williams did the
'Nighttalk' Show when I was there (I was their announcer).

CKO Vancouver went through many incarnations, but for about
an 18 month period we had the most bizarre and eclectic group
of people I've ever worked with. About seven or eight of
us still get together and laugh about how truly strange
the place and people were. We would not have believed some
of the things that happened, except we were there.
I miss the people I worked with, I miss the format, but
there's much of it I don't miss. It was an interesting nine
years, though.

NEWSRADIO (jmckay@interlog.com) wrote:
: References: <4drp3o$el6@vixen.cso.uiuc.edu>

: CKO did that everywhere! I went to the toronto office one night to see a friend who
: was operating the board. They had about a dozen carts, one for each market, with the
: local spot for that station. The guy hits one big TAKE button and they all start
simultaneously

The 50 Adelaide East studios or the contra ones in that
hotel next to Maple Leaf Gardens??

As for Toronto ops running spots for the network,
we'd get spots for the London station on the feed to Western
Canada. I'm afraid I wasn't very patient with those poor ops
when this happened on a regular basis.

Of course, there was the time we ran the 'B' satellite
feed on the air one morning <the morning feature pre-feed>.
Baby Huey was on the feed going .. "Now here's Turning Point
with that a$%hole in 3..2..1.. <pause> F#&K! The $%*&^@ cart's
not %$#@*&ing cued up!" Yes, this was all on the air. At
least 20 minutes of epithet-filled broadcasting, according
to people who had wandered into the station to get the morning
show together.

For a time, the Western network (Vancouver-Calgary-Edmonton)
was on the same satellite as Montreal (in yet another stunningly
brilliant CKO cost-cutting measure). That meant we got
Montreal spots on our feed so we'd have to black them out. Of course,
the network never gave us consistent outcues (no matter how much
I begged them to do it) so a common sound was the start of a
Montreal spot for about two seconds.. then the Western op would
cut the pot and run PSAs or promos here and pray there'd be
enough of a gap on the network feed to join it cleanly.

: Talk about a strange setup! As for the format, 680 is VERY different from cko. Think of
: it as a local version (on radio) of CNN's headline news. 20 Min. rotating cycles of
local,
: regional, national news with drop ins of business, traffic, wx, etc.

From what I've seen of 'WX's clock, it's roughly what
I did when I hosted the afternoon show at CKO Vancouver (which was
not a magazine format as it became when it was decided to put
the show on the network and bring some Torontonian in to host
it) and looks like pretty standard all-news fare.

Everyone in the market is anxious to see how (or if)
it'll work. I hope their management has the patience to give
it some time and allow the local people to use their
instincts and run the operation.

writes (re: Jon Belmont of ABC):

>You may have a better memory that I here. Wasn't Jon's brother in the
>business for awhile, too?

Um, yeah, if you count having a highly-rated morning show in San Diego
for some time being "in the business for a while". ;)

I'm way too young to remember any of what either Jon or his brother Jeff did
in the past. I just heard the stories from folks back in Wooster when I
worked there (which was only a couple of years back now).

Both of them started young at what was then WWST-AM/FM. It's funny to note
how different, yet successful, careers they've had in this business.

Little known fact dept.: They also still, to this day, do liners, IDs and such
for their old station in Wooster. When I left the station in 1994, Jon did
the IDs and Jeff did the liners for country-formatted WQKT-FM, and Jeff did
both for oldies-formatted sister station WKVX-AM. Both are running ABC/SMN
formats, and now that SMN is using the short ABC newscast, I've often wondered
if Jon's ID ever ran into Jon doing the news. ;)

I sure do! Read carefully, and you'll discover this was about Denny Schaefer, WVKS (92.5 Kiss FM)/Toledo (CHR). Hence, the sentence "a bit of a jump from Toledo," which I felt going from WVKS to WLS would be!

Hope this clears up any confusion.

I have a museum piece here, and am running out of room to store it. It's a Broadcast Broducts AR-2000 controller with 6 carousels. I installed it new in about 1972. It was working when removed from service a couple years ago, but the 5 volts supply for the AR-2000 is bad. A 200 watt minitower power supply could probably make the thing run again.
Ideally, this'd go to someone in California who'd like to come and get it! Freight anywhere else would be pretty horrendous!

I would like to add my two cents to the part about BCN. Regardless of whether u like BCN or not, one thing can always be said about The Rock Of Boston: Oedipus knows what he's doing. He has proven himself in the past many times, and he, along with Carter Alan, Steven Strick, and Tony Berardini, knows what to do and how to do it.

I worked there for a while in the late 80's/early 90's and when I first started, BCN was playing Bon Jovi, Ratt, Warrent, and other hairspray bands of the day. Once that passing fad ran its course, Oedipus & crew knew enough to change. Not drastically, but enough to change with the times.

Ok, so BCN is playing to that alternative crowd now...so what? so they may be a little late in changing this time, so what? sister station K-Rock in NY was even later in changing. Yeah, BCN is throwing around a lot of promotional money and lotsa self-serving plugs on the air, but they've always done that...thru every format or musical genre...that's just the way they are.

Don't get me wrong, I am not trying to stick up or defend BCN cuz I worked there at one time...I was fired so I owe nothing to them in that respect. But I feel that management has done their job very well in the past, and they'll probably do so in the future (they hope). I think of it sorta like this: clothes & fashions change, so why not musical tastes? if u don't like it, change the station. As for the dj's on BCN, there is some good talent there that's fine in most any format. Laquidara would prefer to play classical music, but that doesn't matter. And Parenteau is one of the best personalities anywhere.

Like I said earlier, I don't owe anything to BCN, but I do respect what they do. If I like it or not doesn't matter.

And I hope I don't help provoke any kind of flaming war here.

Thanks for your time.

>From what I've heard about the operation here, they say they are planning to give it several
years to prove itself and that its being sold as a "public service", something you tune into
a few times a day for a relatively short spell. When you are done, you go back to your
music station...from what I've seen here, its taking the average listener about a year or two
to figure that out and now many people seem to like the station, although they usually only
tune in for traffic, weather, and sports or headlines, etc. On an interesting side note, I saw
a few messages in this group about a NYC station that is planning to go one step further an
broadcast ONLY traffic and weather! Thats a bit extream but I guess in NY....

After following this subject for several days, I feel I need to put my two cents worth in, as Mr. Foti has done. Well I work as the chief engineer of a major market AM/FM station. I am just glad I don't work with anyone like Allan Sniffen although I know many people in programming like him. My station competes with two other stations in the market with the same format and signal.

We try to emphasize cleanliness over absolute loudness and the result is the longest TSL in our format and believe me the PD here likes all the TSL he can get! I have been complimented by record producers because our audio processing didn't smash their sound to death. I will, of course, give credit where credit is due; our program director puts all the elements he is responsible for (music, talent, promos) in a truly entertaining way, the processing complements it. He doesn't try or desire to adjust the processing himself, he has faith that I am a professional, know my bussiness, and want the station to be sucessful. I'm not saying we don't ever discuss the processing, but when we do we respect each other's viewpoints. This process is known as teamwork and, as applied in our case with the effort of sales and the other departments, has led us to be the number two billing station in the market last year! (Out billing all our format competiors and in business isn't that the bottom line?)

I like to use the "cake" analogy about processing. The programming is the cake and the processing is the icing. No matter how good the icing is, if the cake tastes bad no one will eat the cake. Conversly, if the icing is rotten, no one will eat the cake either but if the cake and icing complement each other, it will be a pleasure to eat. Some people can't understand that if a little is good more must be better. WRONG!!!

Obviously, the people that belive louder is better at any cost have never heard of the term subliminal perception. My theory is that at some, low level, distortion is perceptable in the subconscious and, after some time when the listener has reached his threshhold, he changes stations or turns the radio off.

When you programmers out there who insist on loudness at any cost have tried everything to build an audience and wonder why nothing seems to work, give me a call. I'll be happy to show you the way to better ratings, longer TSL and happer listeners altough they might not be able to tell you exactly why.

Bob Stroupe
Chief Engineer
KKBQ AM/FM

TRADE SECRET: The road to good audio is not just in the audio processor but requires attention to detail from the source all the way through the chain and

the transmitter.

>and head as the 'wall of sound' disolves into actual dynamic range.
>
You're describing, from personal experience, what the tests conducted in
the thirties and forties showed.
To be more specific, before someone challenges me to give citable
references, I have in mind:

H.A. Chinn and P. Eisenberg, "Tonal range and sound intensity
preferences of broadcast listeners." Proceedings of the Institute of
Radio Engineers (Proc. IRE) Sept. 1945.
-----"Influence of Reproducing system on tonal range preferences."
Proc. IRE, May, 1948
Le Bel, C.J. "Psycho-Acoustical aspects of listener preference tests."
Audio Engineeering, Aug. 1947
Olson, H.F. "Frequency range preferences for speech and music." Journal
of the Acoustic Society of America, July 1947.
This is only skimming off the top of work that was done about fifty
years ago. I will particularly single out Harry F. Olson, whose "Elements
of Acoustical Engineering" (Van Nostrand, 1947) and "Musical
Engineering" (McGraw-Hill, 1952) are classic texts. Also, Seashore's
"Psychology of Music" (McGraw-Hill, 1938).

I mentioned the "Fletcher-Munson curves." H. Fletcher and W.A. Munson,
"Loudness: its Definition, Measurement and Calculation," Journal of the

Acoustic Society of America, Oct. 1933, is where these showed up.
Fletcher, in particular, did a lot of work 65-70 years ago correlating
human perceptions of hearing to electrical devices and measurements.
There is one other work that should not be ignored, and that is Hermann
Helmholtz's "On the Sensations of Tone," published in 1862 and still
very much *the* standard work on musical tonality.

Folks may notice that one of these ancient titles says
"psycho-acoustical"----a term that many nowadays equate with "golden
ear" audio fanatics and their beliefs. Helmholtz is "physio-acoustic."
Some of the later workers explored the relationship between physical
phenomena and psychological perceptions.

>
The "pumping" sound you describe is the classical example of
intermodulation distortion. That tub-thumping bass forces short-term
compression of the remaining musical content, and thus "modulates" it.

Yes, I could be persuaded to consult, but my guess is that a good many
CE's would consider me a carpetbagger telling management the same things
the CE's have been telling them.

RO>seemed to me to be below the perception of the typical listener. Schulke
RO>obviously believed that these factors influenced the listener on a
RO>subconscious level.

Bob,
I remember those experiments. Many of Jim's "eccentricities"
bordered on showmanship. They added a certain mystique to the format
and caused stations to pay closer attention to the format than they
otherwise would. Since the format achieved an astonishing level of
success, very few were interested in questioning his techniques.

RO>In retrospect, it's clear that Schulke sold out adn retired at the right

comfortable
RO>listenable in a car.

It's the primary lesson. In our business, programming is
everything. It's our only product. I remember several conversations
with you where you expressed exasperation at the abusive processing
some stations used with your equipment. Processing is absolutely
necessary. It's the WPLJ level of processing that mashes the sound so
badly that, no matter how good the programming, you can't listen for
very long. It hurts.

I agree, but since listeners are in a variety of environments,
shouldn't THEY make the dynamic range adjustment? It SEEMS that we
should transmit with a compromise REVERSIBLE compression (that can be
expanded at the receiver). The receivers would have a little expander
knob where one end would restore the original dynamic range for home use
and the other would mash the sound for car use (or other noisey
environment). The compression would serve as a compromise for those old
radios that don't have the expander, and would also serve as encoding for
a noise reduction system to get over the noise of the broadcast channel
(the expander would decode).
Anyone remember the radios of the 1930's or so that had an
incadescent lamp across the audio as an expander? When the audio level
was high, the lamp resistance went up, shunting the audio less, making it
louder. When the audio level was low, the lamp resistance went down,
shunting the audio more, making the audio softer.

Harold

What I don't understand in all this discussion is...what CDs are recorded without compression? All my favorites sure sound compressed and processed to me!

In the case of AM the sideband energy is what counts. Processing increases the sideband band energy and improves the coverage. Most would agee a louder less noisy signal is a significant advantage from the listeners perspective.

KR>Interestingly, Mix magazine just had a spotlight article on this
KR>subject. A handful of prominent engineer/producers all said that they
KR>check their mixes against "radio" type ratios. They modify the mix as
KR>needed to fit this reality of music, then back off the compression and
KR>print to tape.

Check any good recording studio and you'll find a set of small
speakers used to check the mix as it's likely to sound on an average
radio or boombox. They're used to check phasing, processing and EQ.

KR>Precisely. But recording engineers that I know all feel that a
KR>compressor is more useful than an eq. There is also a difference in the
KR>"sound" of many of the radio singles from the sales CD's. Seems to show
KR>up on music from newer artists, as I noticed it on a Patti Loveless
KR>single vs the album cut.

The "radio mix" is a different bird. It's usually edited for time
and preprocessed for radio.

From: kriston@ibm.net
Message-ID: <4en3rs$s90@vixen.cso.uiuc.edu>
Source record: 26272

I've been listening to the Greaseman for just a short time now, but he's now broadcasting from Atlanta in the morning slot and has hinted that he may be on the Turner network and has said that they are trying to grab the 6-10 AM time slot nationwide.

In the same conversation, I learned that the Greaseman is only syndicated on three stations: Atlanta, Washington DC and Los Angeles.

What is going on with the Grease? Are they targeting Stern? Has he jumped networks (or, it seems, finally joined a network)?

Interesting note: Stern is THIRD place in the Wash. DC area, tied with two AM news/talk stations, behind a MOR station and a popular local morning show. Imus is way, way below that. And by the way Stern talks, he thinks he's number 1 in all his markets. He's number THREE in Washington DC!

We have a long tradition at KBCO in Boulder/Denver of presenting on air live broadcasts of both
local and national bands on an unscheduled basis as circumstances permit in our "Live From Studio
C" shows.

Doing same gave me an appreciation as to why live musical events aren't as pcommon as they once
were- They're labor-intensive to set up, they take hard work and planning, there's plenty of
moments of sheer terror from last-minute glitches and it's often difficult to deal with the bands,
agents, record companies, hangers-on and etc. in the studios where everyone wants the best
possible on-air presentation. There ain't no way to edit the tape and roll it again!

But when it works well, there's an awful lot of "high fiving" going on in the studio and control
room- it's a blast.

But you old-timers out there probably knew this already!It's much easier to just spin the CDs and
a lot more risk-free.

Yeah, there's still some stations doing good old 'real radio'.

In Providence, RI there are a couple I'm aware of: on 95.5 WBRU, and "SoundCheck" on 94.1 WHJY Sunday Nights, which I believe has been running for over 10 years, and has produced CD's of local bands in the past.

In Hanover, NH, 99.3 WFRD produces a weekly one called "Homegrown", which has been on for about five years on Sunday Nights, and has also produced CD's and cassettes of local bands. It's produced by a local musician called Little Wolf (Pete Skinner)

Aside from (mostly automated) CNN Radio and AP's all-news broadcast services, the only major commitment to all-news radio is from the CBS and Westinghouse O&O's. It's really hard to get programmers to try the format, because talk is soooo hot now, and frankly, most people don't listen to all-news all day. Here in Toledo , we do local morning and PM drive shows that feature a fast-paced mix of news, traffic, weather, sports and very short talk/interview segments. For us, all-news in a #54 market would be tough sell, but even in bigger cities that seems to be the case too.

Here in DC it certainly is. I worked at WTOP for years -- and just this weekend heard lots of AP -- I think they're taking big blocks, and it sounds like they just have a desk editor/anchor doing local drops. I noticed the traffic service started her break with "WTOP newstime..."because there was no one to toss it to her! In my early years at WTOP they had newsriters, then it went to anchors writing their own stuff. Also, fewer reporters, sports people etc. WTOP is also using an out-service (the Washington Business Journal) instead of in-house business reporters. But hey, this is the way it's going. All-news is very, very expensive to keep going. But I really think the AP on the weekends is a big mistake. It was very sad to hear.

Any other former WTOP'ers on line???

The first Metropolitan Opera broadcast was December 25, 1931 on NBC. The Texaco sponsorship began in 1940.

> Grand Ole
>Opry doesn't count because it's distributed nationally as a TV
>show, and I don't think they syndicate or network the audio any
>more as a radio show.

The Opry started on WSM on November 28, 1925, but it was a local broadcast until 1939, when NBC started to carry thirty minutes of the three-hour weekly show. The network broadcast ended in 1957, but it's still going strong on WSM. There have been ad-hoc network hook-ups for special occasions like the opening of the new Opry House in 1975, but that's not a "continuous network broadcast."

The other contender for "Oldest Network Show" is the Mormon Tabernacle Choir, which has been running on KSL since 1929--distributed on NBC until 1932, and on CBS since then.

TA>...but seems to me I remember Arnold Passman, who wrote a
TA>history of personality radio in the early 70s, saying WOR start-
TA>ed Rambling With Gambling some time in the summer of 1925.

Bob,
Rambling With Gambling is the longest running radio show,
originally called "The Musical Clock." Gambling took the show over in
early 1925. It began as an exercise show.

TA>That would make it first, since WSM didn't even sign on for
TA>the first time until early fall of that year and Grand Ole Opry
TA>started up when the station was about a month old.

My sources tell me "The Grand Ole Opry" is the next.

ta> From: talk1370@aol.com (Talk1370)

ta> Losing the remaining deductions means you lose whatever
ta> leverage you had against a high tax bill...

That would be true in the Bad Old Days of 91% (!) incremental
tax rates. Or 70% rates. Or 50%. Or even 39-41% (?) rates.

ta> a homeowning family of four pulling in $1500 per week,
ta> according to the Treasury Dept., could end up paying up
ta> to $10,000 a year more in taxes

Hmmm. Let's see. $78,000/year. Hardly MIDDLE CLASS, eh?

Anyhoo, we drop $36K for fam4, so we're at $42K.
Multiply by 0.17 and we get
$7,140!
(An effective rate of 9.1%.)

That's not $7,000 MORE, that's
$7,000 TOTAL.

I dunno where the Treasury got their figures but
They're lying again!

Remember, for a family of 4,
Your first $36,000 is T-a-x-f-r-e-e.
Earn $72,000 and your actual tax rate is 8-1/2%.

Understand now?

Bob,
Don't you mean that $10,000 more will be taxable? I can't imagine
that anyone in the $1,500 a week bracket would pay out $10,000 in
additional tax. After all, $6,000 a month comes out to $72,000 a year
before taxes. While it's well above the American average, it's not a
lot of money.

********** Start of Forwarded Message **********

Or how about the old bug (semi-automatic telegraph key) burst between
every story, or I remember some stations using reverb to announce the
dateline of every story. One station where I worked, we even mixed in
sound effects in the background to make the story sound more immediate.

Ray Dennis
********** End of Forwarded Message **********
Then there's Radio Rumbos in Venezuela which uses doorbells (I'm not
kidding) between each news item. Their newscasts are pretty fast paced,
sort of headline style.
Some stations here in Ecuador do the news headline style with
upbeat music underneath and a break between each story to give the time
to the second, i.e. "it's 8 hours, ten minutes, 27 seconds."
Despite the format, many stations here are much more full-service
than those in the U.S. Radio Quito, the leading station here in Quito,
has co-anchored newscasts throughout the day, many of them 30 minutes.
Add a few radio soap operas, a daily two hour magazine program on the
family, play by play sports, a variety of music and other programs, and
you have one classy station!

Ron Jordan wrote the quoted material below:

" Yeah, I know it sounds hokey, but dang-it it sure makes the news sound
" exciting!

But *should* it sound exciting? I feel that this quest to make news sound exciting has resulted in more coverage of accidents and disasters and less coverage of some very real stories.

Why is it I have to tune to NPR or to the BBC to find out that pregnant women from Mexico spend *less* time in health clinics in LA than native-born Americans because they are healthier? This is news, it totally shatters the myth of Mexicans as using up all our health care, yet I had to get this story from the NPR program "Horizons" and from the BBC program "Outlook", not from any commercial American network.

American news is sick. It's become no better than the National Enquirer or Weekly World News. To think that only 40 years ago, American broadcasters exposed corruption, delved into real issues. Today?

Ok..here's a trivia project for everyone. I'm looking for the "tallest" radio tower. Before you jump the gun, I'm NOT counting buildings/structures like Sears tower or the CN tower in Toronto etc. I'm strictly talking guyed communcations towers. I know that LEBLANC and ROYLE of Oakville Canada [shameless plug :)] built a 1767' tower for WCIX TV-6 in Homestead florida to replace the tower that fell after the hurricane in 1994. My wife is teaching a section on architecture and towers to her grade 4 class and her books mention a station in the US that has a 2050' tower.. I think its KTHI-TV? I know the tallest used to be the warsaw radio tower at 2100++' in Poland but that fell in 1990.

Here's Vin's report for his first night back on WNEW, starting at 8PM:

From: Vin Scelsa
Subject: The Songs I Played
Date: Mon, 29 Jan 1996 05:00:50 -0500
These are the songs I played on WNEW, first show back, 1/28-29/96:

BOB DYLAN Dignity

ROD STEWART Gasoline Alley
SAM COOKE A Change Is Gonna Come
TODD RUNDGREN Just One Victory
NATE OUDERKIRK Edge Of Heaven

SPEECH If U Was Me
VAN MORRISON I Will Be There
ETHEL WATERS I've Found A New Baby
DAN BAIRD I Want You Bad
NRBQ A Little Bit Of Bad
NRBQ I Want You Bad
LUCINDA WILLIAMS I Just Wanted To See You So Bad
STEVE EARLE More Than I Can Do (pre-release)

SHAWN COLVIN in studio guest

STEVE EARLE Valentine's Day (pre-release)

BRUCE SPRINGSTEEN Straight Time
LOU REED Set The Twilight Reeling (pre-release)

SHAWN COLVIN (live performance) Racing In The Streets
(CD) I Don't know Why
(live) The Fall Of Rome (new song)
DAR WILLIAMS This Was Pompeii

TONY BENNETT & SHAWN COLVIN Young At Heart
TONY BENNETT Maybe This Time
VAN MORRISON Who Can I Turn To

SHAWN COLVIN (live) Polaroids and "riff medley"

BARRETT STRONG I Heard It Through The Grapevine
AL GREEN Keep On Pushing Love
EDIE BRICKELL Good Times
PHILOSOPHER KINGS All To Myself (pre-release)

PHILOSOPHER KINGS All To Myself (again)
DIZZY GILLESPIE Night In Tunesia
LOUDON WAINWRIGHT III I Wish I Was A Lesbian (IWIWAL)
THE DELEVANTES Long About That Time
TOM PETTY American Girl
TOM COCHRAN Crawl
JIMMY CLIFF Sitting Here In Limbo

LOUDON WAINWRIGHT III 1994
JIM'S BIG EGO (JIM INFANTINO) Desperate Times

JIM'S BIG EGO Bite Me (Hard)
LEVELLERS Hope St.
AIMEE MANN Choice In The Matter (finally released this week!)
GOLDEN SMOG Glad & Sorry
LLOYD COLE Love Ruins Everything
PHILOSOPHER KINGS Lay My Body Down (pre-release)

GERRY MULLIGAN & BEN WEBSTER Go Home
(Adios, Gerry Mulligan, rest in peace ...)
AIMEE MANN Amateur

LOU REED Trade In (pre-release)
ELLIOT MURPHY w/SPRINGSTEEN Everything I Do (I Do For You)
PATTI SMITH Paths That Cross
EMMYLOU HARRIS Deeper Well
MIKE SCOTT Bring 'Em All In
LAURIE ANDERSON Speak My Language
EDDIE VEDDER & NUSRAT FATEH ALI KHAN The Long Road
(from "Dead Man Walking" soundtrack)
PATRICK SKY Love Will Endure
NICK DRAKE Cello Song

DOG'S EYE VIEW Everything Falls Apart
TERRY ALLEN Buck Naked

Vin brings the spirit of Alison Steele back to her old home by playing:

IT'S A BEAUTIFUL DAY White Bird
CIRCUS MAXIMUS The Wind

POI DOG PONDERING Catacombs
SOUP DRAGONS w/JUNIOR REID I'm Free
ROLLING STONES I'm Free
SPEECH Ask Somebody Who Ain't
BROOKLYN FUNK ESSENTIALS Take The L Train (To Brooklyn)
JACKIE LEVEN Some Ancient Misty Morning

CATIE CURTIS Dad's Yard

THE SUBDUDES All The Time In The World (pre-release)

Show ended approximately 3 AM.

Listen to Vin Scelsa on WNEW-FM (102.7) Every Sunday from 8PM to whenever!

[syndicated TV...a venue where people like Rush Limbaugh have
[hardly enjoyed the same degree of success.

The lack of success is primarily because of poor slots on the sched. If the day is full of Phil and Oprah and Sally and the other liberals, PDs are afraid to put a non-liberal into the mix, on the "It ain't broke, why change things?" mindset.

Here in AZ, there is a libertarian/conservative ex-politico on TV during talk-time. He is doing very well, even though he is simply running tapes of the previous day's radio call-in show.

Bob,
He has. Rush is syndicated by the same people who syndicate Phil
Donohue and Sally. Larry King is on CNN, hardly a massive audience
compared to what's available to Rush and his syndicator. They're simply
very different shows, compatible with different dayparts.

Of the hosts you mention, only Tom Snyder is on a network.

MA>just a little too enthusiastically, in an non-genuine manner. The
MA>liberal press has exposed a lot of slips in the accuracy of Rush's
MA>comments, and people have begun to take notice.

Manos,
There's that "liberal press" thing again. Why is an organization liberal just because it points out and documents inaccuracy? You seem to be suggesting that a conservative organization would be incapable of the same intellectual honesty you credit to the "liberal press."

I don't believe Rush's inaccuracies have anything to do with the slip in ratings. He's just not as entertaining as he once was. He's got a mission, now. Once a host gets a mission, the entertainment value drops and he takes himself seriously. If Rush were to drop the Republican Party Mouthpiece personna and get back to the pre-Lincoln bedroom period he'd see his numbers go right back where they were.

> Paul wrote :
>
> WBCN is merely a mirror image of what we've done at WAAF for years.

I totally disagree with the'years' part. Up until the early '90s,
when Alternative became 'the thing'. WAAF was always borderline Heavy
Metal and AOR -- AC/DC, Black Sabbath, (tons of) Rush, The Cult,
DeepPurple, VanHalen, LedZep, Aerosmith,etc...How do I know? I was an
occassional night-time(less static after sunset :-) listener back
in college from 83-87...

In the last 2-3 years, WAAF drastically cut down on the older releases
and almost everything on their playlist is maximum 3-4 years old --
Green Day, Nirvana, Soundgarden, Oasis, Pearl Jam(bbbboring,IMO),
Red Hot Chili Peppers, Stone Temple Pilots, etc...

Also, WAAF's playlist tends to be much more wider than WBCN's.
'AAF also has a very talented music director/midday personality
John Osterlind in the house. And it shows on and off the air...

> Thanks in no small part to Ron Valeri (now with Q104.3 in NYC).

WAAF has to thank for Valeri for bringing up Osterlind from Hartford's
WCCC. Station sounds *really* great musically now -- I kept it on for
2 hours while driving down to NYC about 2 weeks ago...

>
> 'AAF is also generally overlooked when discussion of the Boston Market is
> brought up. as a station who's signal penetrates *6* metro markets,
> including a 2.5 12+ in the recent Boston Arbitrons...

Emphasis on 'penetrates' here. Maybe we should take a ride thru
some parts of Metro Boston sometime, Paul. And, you can judge for yourself...
There are just too many spots in this town where WAAF's signal just
dies. Period. I wouldnt mind picking up Osterlind's 'The Ozone' on
Radio Shack's DX-440 in my office on Huntington Ave...But, I am not
a huge fan of static. The signal is somewhat better at home in
Watertown but far from 'good'.:-)

>WAAF is certainly a player in the market and is responsible for
> breaking one of the breakthrough artists of 95 (Toadies) along
> with WXTB in Tampa.

Texas-based Toadies' "Rubberneck" came out in 1994. I first
heard them on now-defunct Jon Stewart's Show(yeh, the guy who replaced
Arsenio:-) to promote their new release. Great album. I have a copy
in my "Alternative" collection.[Actually, a co-worker borrowed it

3 weeks ago and still has it...:-]

> Also, WAAF has been around LONGER than 'BCN (Thanks to Mr.Ahmet Ertegun)
> sp.?? And even though we suffer from some signal disadvantages are verey
> visible in Boston.

"The only station in Boston that *REALLY* rocks!" slogan
is something the old 'COZ would use in the early 80s, but hey
if it works why not use it...:-)

>
> We've been doing the AlternaRock format that many stations across the
> country have adopted, for years now.

I honestly appreciate your enthusiasm, but, again, I have a problem
with 'years' part. 'AAF might've jumped on the Alternative trend much
quicker than 'BCN and maybe outdoing the new 'Rock' musically speaking,
but to say that WAAF started it all(Alternative/Modern) in Boston is a
stretch,IMhO...'FNX has been doing it over a decade now.

Regards,

-Mark

The following article appeared in The University (of Evansville, Indiana) Crescent/1-26-96

SPORTSCASTER BOB BUCK DIES
-Beloved, controversial announcer dead at the age of 57

ANDY CULLEN
NEWS EDITOR

The "Voice of the Aces," Bob Buck, sportscaster for University of Evansville athletics and host of radio and television shows, died early Monday (1-22) morning at his home.

Buck, 57, was in his 11th season as UE's play-by-play announcer for basketball, baseball, soccer and football on WBKR (Owensboro, Kentucky). He also hosted call-in radio and television
programs, including coach Jim Crews' talk shows.

Buck's quick wit, coupled with his biting and sometimes controversial commentary, made him beloved and revered by many fans but not always appreciated by school administrations.

He had worked and lost jobs in Toledo, Ohio; St. Louis; Peoria, Ill.; San Antonio, Texas; New
York City and Tucson before coming to Evansville.

Bob Boxell, UE sports information director, considered Buck more than just a co-worker.

"He was much more than someone I worked with," Boxell said, "He was really a good friend. When you first met him, he'd come across a little gruff and crude, but when you'd get beyond that, he
was one of the softest and most gentle people I knew. He'd do anything for you. He was a very loyal
person and a good friend."

Len Clark, station manager for WUEV (Evansville, Indiana), also spoke of Buck's death.

"Obviously it's a big loss for Aces' athletics," he said. "He was a true supporter. We'll miss
seeing him at the games."

While in Evansville, Buck worked for radio stations WIKY, WYNG, and WUEV as well as television stations WEVV and WTSN. He had also worked as a firefighter, bus driver and in banking.

He was an army veteran and a member of St. Agnes and Holy Redeemer Catholic churches.

He is survived by his wife Carol; a daughter; two stepdaughters; a stepson; two sisters; two
brothers [one being KMOX's Jack Buck]; three grandchildren; and one step grandchild .

Services were yesterday (1-25) at the Holy Redeemer Church and burial will be tomorrow (1-27) at the Holy Cross Cemetary, Cleveland.

The death is being investigated as a possible suicide, but a spokesperson from the Vanderburgh County Coroner's Office said the exact cause of death is pending results from toxicology
studies which will take five to 10 days.

Message-ID: <4en3rb$s7r@vixen.cso.uiuc.edu>
Source record: 26423

Ok, so I gotta toss in my two pennies worth on this classic rock thing. First, I must say I'm in the news department...what do I know about music anyway? Well, I'm just entering the 25-40 demo, but I grew up on Classic Rock thanks to my older brothers. They're at the top of the 25-40 demo. Although I still like it...I'm sick of Classic Rock. SO ARE MY BROTHERS! I want NEW music. SO DO MY OLDER BROTHERS! There's so much good music coming out that has a "Classic Rock" approach with an "alternative flavor." The best example I can think of...the Connells. Check 'em out. Very few alternative or AAA stations are playing them. But I have a 34-year old brother who loves 'em and I've got a 16-year old neighbor who loves 'em.

A successful mixture of AAA and "classicy-type rock" is possible. Segues between Van Morrison (anything but Brown-Eyed Girl or other 'hits') and the Goo Goo Dolls can work. Then from there to new Neil Young, and on to Ms. Morisette. You just can't play the Eagles over and over. As the song says..."...Don Henley must die"

Note: No disrespect to the Eagles. Right now, to me they represent all tired and worn out classic rock.

Juan

IMHO, nope! The PD just likes the sound of more compression or "belives" it
gives him an advantage over his competition. I've never seen ANY scientific
proof heavy compression leads to bigger ratings or more pleasurable listening.

If you value your audio it will sound cleaner than a cart. If you don't you
can process harder for the same amount of audible distortion.

Unfortunately for us audio purists... TIME is purchased by AD AGENCIES with regards to the Average Quarter Hour Ratings, and CUMES, not Time Spent Listening. You can have the greatest TSL, and still go broke.

Since agency buys are the driving force in determining spot rates, I would rather tune the processing to get as many listeners as possible. One way to do that is COMPRESS, another is improving the audio chain, but the biggest factor is content. Compression is overrated, and quality of content is greatly underrated. You think RUSH has good ratings because of the audio processing?

My opinions are mine, not my employers'.

Want to hear it?

I recently went down to Florida and brought back all my master tapes of "Saturday Night Fever", the all-70's show that I did on WTCX/Minneapolis from November, 1993 until the station was sold (and format changed) in February, 1994. In 12 years of radio, this was the best 12 weeks I've ever had.

This was a REAL 70's show, done the way they used to do it back in the 70's when I was a grade-schooler, listening for hours on a transistor radio. Lots of personality, phones, energy, etc. And I played ALL the hits of the 70's, not just the "carefully researched and selected" 300 or so that the consultants and focus groups would have chosen. I played everything from "Disco Duck" to "Beach baby" to "School's Out", and had a great time doing it.

If you want to hear for yourself, just let me know. I'll send you as many as you want for just the cost of the tapes and postage. Since these were recorded directly off of the studio deck (unscoped) on TDK Chrome, the sound quality is excellent!

Some (fond?) memories of my Hartford CT era (around 1970 for a couple of years...

Anyway, at that time the school was "The Connecticut School of Broadcasting" and run by Dick Robinson who was air and/or pd of WDRC.

WCCC is correct and was owned by the Savitt brothers who ran a jewelry business for many years. You can tell if someone is really from Hartford (and over 20 or so) by asking "What does POMG mean?" I can't be of any help on the hotel.

The tri-cites are Albany, Schenectady and Troy, NY. WCDA, B, C were UHFs before the outfit got channel 10, Albany. WCDC still very much exists as a full power satellite of WTEN. WCDA and B are long gone although my alma-mater's station WRPI (Troy, NY) is still very much on the old 500' WCDA tower, and I sat in front of its former transmitter at WMHT (public TV - ch 17) during my graduate school days. During my time a couple of guys who subsequently did pretty well (Tom Murphy and Dan Burke) were trying to make a go of WTEN and Lowell Thomas' former WROW(am).

I can't believe I'm sounding like an old-timer, junior grade...

I'D BE GRATEFUL IF SOME KIND SOUL COULD EMAIL ME AN HOUR OR
TWO OF THEIR PROGRAMMING (mckay@voyager.co.nz)
THANKS FOR YOUR REPLIES...ALL THE BEST FROM DOWN UNDER

ROB

Rob,

Sorry I can't give you a complete hour for WNEW, but here's a glance of some
artists:

B52's (light)
Bruce Springsten (light)
The Clash (heavy)
Melissa Etheridge (heavy)
Joe Jackson (light)
Elvis Costello (medium)

WNEW mixes it up successfully because they have an ear for what music has
affinity.
The B52's and Bruce Springsten have very different styles, but the seemingly
disparate
styles work well together because...well, they just do. It's hard to put
affinity into
words. It takes a trained ear, a keen sense of the market and a strong
mission statement.

You may want to check WNEW's web page at http://www.wnew.com. Write 'em a
note
and they may pass you back a sample hour or two.

One other quick note. I've never heard a radio station research so much. By
this I mean
WNEW is constantly soliciting listener input. Through "my three songs",
e-mail requests or, now, listener programming committees. Listeners are
invited to the station to talk about music and have some fun. Not a bad idea.

Maybe listeners are driving the format at WNEW?

"Some stations have been known to 'forget' to power down."
Heard a few of those in small towns in the Northeast over the last few years...but just for curiosity's sake, might this little oversight be more common than we know, especially in the age of deregulation?
And I'm not just talking about the drastic power reductions that the ex-daytimers have to perform. It seems like there's a growing amount of interference on regional and even clear channels, and stations seem to be coming through at night (at least in the East and Midwest) which one would normally not expect to hear based on their patterns. An old trick that occasionally would fool regulators, would be to momentarily kill your carrier at sunset, then just power back up again. Sounds just like a pattern change. But it isn't. If you got caught once with off-spec field strength, you could just say "oops" and get off with a warning or a light fine. With the FCC so understaffed and self-regulation so predominant, could more stations be taking the risk more often? Stations like ours which are still going by the book, are getting a lot more interference complaints on the fringe of our coverage area than we used to, and it's not just a matter of new stations on the air (on our channel, like most of the regionals, there aren't many new kids on the block). Anyone else struggling with this?

Hi Sam,

Recently I heard that there are special boxes available for the
storage of Mini Discs.
These are the size of a cassette box (so way bigger than the actual
MD) and you fold it open to get out the MD. Kinda like the bigger DAT
boxes. There also is a storage sytem, where thes boxes fit in to. The
label side has about the same length as a cart, the height is
sleightly lower. Haven't figured where they're available, but I'll
keep you posted. if you find out anything before me, please let me
know!

Ivo!

>they do; their music is great IN MODERATION, but today it is all there is.
>And it drives me nuts.

actually, i agree with most of your points...in your (and my) *opinion*,
contemporary music all sounds the *same* (within its respective
"category": modern, country, r&b, etc). whereas the music you grew up
with (in your teens, etc.) no matter what the format, will always seem to
mean more to *you*. the only *new* music that will interest you will
probably be music that reminds you of tunes that you already like.
(disclaimer: these are not flames, just mild observations! :-)

i also can't listen to modern rock for any length of time...to *me* many
of the songs all sound the same, with occasional exceptions. *however* i
would surmise that kids growing up now will say the same thing: the
music *they* grew up with (today's stuff) was varied, deep in meaning,
'talked' to them...etc.; and when the next generation sheds their flannel
for office jobs :-) the then-current music will seem repetitive and
cookie-cutter and they'll say that they don't make 'em like they used to.

just like our grandparents think that the music *they* grew up with
had real meaning and the stuff *we* like is all the same.

did i make a point here or did i ramble too much :-)

RRN (The 'Rock Radio Network', headed out of WIC-owned Q107 Toronto) took over the Leafs hockey broadcasts this year, and I have opped more than a few games. They are getting better, but for the longest time we had 26-second breaks, random blasts of DTMF (automated cues, without any warning on our log sheets) going out over the network, and for a while one major problem:

RRN does the games in stereo (or, about a stereo as you can get for a hockey game). It's put up over BN channel 10, a mono sat. channel, and we usually pull it off there. For the first few weeks this season, though, RRN would just plug the LEFT channel in and send it up - without any mixing - causing us to have to crank the pot up and down like a toilet seat depending on if Joe Bowen (left) or Mark Hebshire (Sp?) (right) was talking to keep the levels consistent.

The control message has gone out. Will sysadmins honor it? Who knows?
world.std.com did.

Frustrated because you've had no receptive audience
at which to praise or complain about Paul Harvey? Your days of
frustration are now over! Join us at alt.radio.paul-harvey.
The original post proposing the group follows
---
alt.fan.paul-harvey

for listeners of Paul Harvey News

You can love him, you can hate him, but it's hard to
ignore him. As someone whose name is lost to antiquity stated
more than 20 years ago, if you really want to understand the
thinking of the majority of middle Americans, you've got to
read the New York Daily News and listen to Paul Harvey.
Witness, for example, how Paul Harvey's dissatisfaction with
the war in Vietnam (regardless of reasons, which would have
made for fascinating discussion in afp-h) signaled the real
beginning of the end of widespread public approval of American
involvement.

While Harvey may no longer be the barometer of mainstream
public opinion that he used to be, there's no denying that his
finger is still on a very strong pulse, and it's hard to
listen to one of his broadcasts without having a strong
reaction to *something*: from the trivial, such as the
morning item about the women who had "sextuplets--4 boys and a
girl" that had no afternoon followup to tell how things turned
out, to the more serious, such as why his reporting on the
federal budget has been so anti-Clinton and fails to mention
that a dissatisfied public could vote Clinton out in November,
setting the timetable for a balanced budget back at most one
year, and having budget balanced during a two-term Republican
administration.

Whether the posts have subject headings of "You tell 'em,
Mr. Harvey" or "Has this man lost touch with reality?",
discussion should be lively and spirited.

WABC had THE signal in the metro New York area when they were
"in-charge". Vloumax to the MAX and a echoplate. Takes a small
room to run, and the sound can't be duplicated.

The best radio engineer that I have known had three radios next
to the signal processing gear.

1. A clock radio
2. A boom box
3. the dashboard from a early 70's Maverick

If it worked on them, it was 90% of the audience.

Perception is Reality.

I was also sorry to read that Joe Martelle will no longer be doing the morning show. I made the switch to 'BMX when WVBF changed over to Country (WKLB). Was also happy that Jody Winchester has really become a morning personality now that she is out from under the shadow of Loren and Wally on 'VBF. Joe and Jody were a good team in the morning.

I also wish Joe a speedy recovery from his lung surgery and look forward to hearing him back on the airwaves in the Boston area!

With work keeping me busy I haven't been in the group much lately. Can someone catch me up on what happened to Amy Doyle, the "Dirt Devil." She still does her shtik in the morning on 'BMX but I guess from somewhere in Florida. Anyone know what her "new" job is down there?

Thanks!
David

After 6 weeks Mr. Music Norm N. Nite has returned to WCBS-FM. He gave no explanation for his absence (does anyone in rrb land know?) but he segued into I'm a Happy Man by the Jive Five. It is clear that the music mix is shifting away from the 50s to the 70s and even early 80s. (Hi Andrea!) In a promo they said they are the only New York station to play classic rock n' roll. There is no shift to album cuts but this promo is to lure former K-Rock Listeners.

I'm in the process of going through some nationally produced aircheck tapes from the early 90's. I've listed below stations and jocks and was wondering as to where these DJ's are now. If you want airchecks of what you see here, e-mail me. I apologize for this being slightly incomplete and for misspellings. Thanks for all assistance in advance...please reply via private e-mail and I'll summarize the complete list (this is part 1 of 2).

Kid Cruise, Hilde, "Just Plain Mark" (WXXL Orlando)
Crash (WFKS Daytona Beach)
Welch + Woody, Jojo, Mojo, Cedrick Hollywood (WJHM Daytona Beach)
Gnarley Charlie, ToddZilla, A.J. Hammer (WPLJ NYC)
Kid Kelly, Geo the Hit Man, Freddy Veddar (WHTZ NYC)
Jeff Thomas, George Williams, Broadway Bill, Ron Stevens, Joy Gridnick ("Stevens and Gridnick in the Morning") (WHYT NYC)
Kid Coruna (KKFR 92.3 Phoenix)
Planet Harrison (Eagle 106 - Philadelphia)
"Beemer + Company" (which includes Ryan Paul, for sure) (Z-90 - San Diego)
"Tim + Tom", Hawk Harrison (WFLZ Tampa Bay [the station formerly known as the Power Pig])
Geo The HitMan (KKLQ San Diego)
Panama Jack, "Sterling + Steele" (Hot 97.7 San Francisco)
Brian Christopher (WKXX Birmingham)
Brother J.J. Malone, "Walton + Johnson" (B-97 New Orleans)
"Gnarley" (WHYI Miami)
Dean Kerfman, Mike Beech (KS104 Denver)
"Doctor Dave" (KWSS San Jose)
Larry Morgan (KHMX Houston - I have his last signoff from KWSS San Jose)
"Boomer" (Q-102 Philadelphia)
Harry Williams, J.J. Jackson (WGCI Chicago)
Bill Gable, Frank Lasko (WOCL Orlando)

During a recent spell of bad weather here in the UK, I heard the evening DJ on one station read out an announcement something like this: "Please don't ring this station asking about problems with the weather, especially school closures for tomorrow. Please wait until tomorrow morning and ring either the school concerned or the Education Department. We don't broadcast this type of information."

The phrase 'missed opportunity' immediately leapt into my mind - I wonder why? :-)

} rorban@slip.net (Robert Orban) mentioned:
}

[..]

} The other problem is clipping.

[..]

} With multiband
} clipping, the problem gets even worse.

Ok herein is the rub with me. Maybe I just don't understand this concept.

Why clipping? My understanding is that clipping, essentially, is the act of cutting off the peaks of a sine-wave after a certain P-P voltage is reached. I understand that this will accomplish the purpose of assuring that the signal will not rise above a certain level because as it does, more and more of the sine wave are clipped off, keeping the P-P at a certain maximum.

But, the very act of clipping is to flatten a sine wave (clean audio) into an approximation of a square wave, which is heard as pure distortion. In fact, is it not true, that clipping is at the heart of a guitar's fuzzbox, which is designed to generate symmetrical clipping?

My point is that it is not so much processing that I have an aversion to In fact processing has the ability to make things sound even more sparkling and interesting than w/o it. It is getting clearer to me all the time that it is this clipping process that is probably responsible for the lion's share of the garbage sound that is being foisted on the public in the name of loudness.

Tell me, oh guru's of broadcast sound <g>, is there nothing in this age of absolute digital manipulation of aural information, that can achieve the maximum allowable modulation on an FM signal, eliminate overmodulation, and not generate pure distortion? Something that can monitor itself and make transparent adjustments (according to your preferences, of course) to both the input and output gain so that the resulting signal is as loud as could be, and yet we dont have to resort to draconian clipping. Perhaps a devise that also took into account the transmitter deviation to be sure it is in specs and adjust if it isn't. (We are talking FM here).

I dunno but it seems to me that using clipping as a means of 'brick wall' overmodulation protection, is like trying to cut a diamond with

a chisel and hammer. It is hard to believe that someone hasn't
devised a way to do lossless processing w/o clipping.

Does such a beast exist? Would fellows in the Allan Sniffen school of
absolute loudness (Hi Allan) use such a thing if it existed, thereby
having a lot of volume *and* some degree of cleanliness?

From: swanston@cs.ucdavis.edu
Message-ID: <4epmfl$8gq@vixen.cso.uiuc.edu>
Source record: 26202

Hello,

I'm thinking about purchasing a set of digital cart machines for the station here (KDVS 90.3fm Davis, CA), and am curious to hear feedback from other digital cart users. Primarily, I need to decide on the media. At this point, I'm pretty convinced that I'd like to go with the Denon magneto-optical style cart machines. However, the floppy disk-style "Digicart" machines by other manufacturers are also quite attractive... especially since they use low-cost floppy disks. We already have the Denon CD players which have an interface similar to the Denon Digital Cart machines (sorry, can't remember any model #s here), so that scores another point for Denon.

Any ideas regarding which (if either) is becoming an industry standard? Any gripes regarding repair, lifespan, quality, etc.? I'd appreciate any input.

Thank you,

Travis Swanston,
Chief Engineer, KDVS 90.3fm

>Maybe listeners are driving the format at WNEW?

I definitely see evidence that WNEW is working hard to dig themselves out
of the ratings grave they're in. But as to your assessment that this new
format works .... I respectfully disagree. The current grab-bag of
not-quite-alternative modern cuts and 80's oldies results in some bizarre
juxtapositions and continual repetition of new-wave mediocrities that many
would rather see roll over and die. When they reverted back to "scrambled-rock"
late last fall, I reverted back to my previous listening habits. Perhaps
this is the downside of listeners driving the format ... you try to please
everybody, and end up pleasing nobody.

My better half acts as my "test chick" she is one of the lucky womwn
who have a real aversion to heavy pounding bass and screachy highs,
the agonised look on her face when listening to certain radio stations
is incredible. Having a stsion with a heavy female audience bias, one
has to keep an eye on these things, a good indicator , that i use
regularly is to check the tone settings on peoples car radios /
stereos, if the tops ar wound down then I'm in trouble.....

on the other hand we have to bear in mind that it is the majority who
pay the bills, not the tonal and pitch perfect minority. The majority
listen on cheap radios with 2 inch speakers. The rest of you as far as
i'm concerned, if you really just want to listen to music without
processing / without speed variation / without IMD or multipath /
without jocks blabbering over the intros, can go an BUY the CD

btw a local station here that really turns my better halfs eyeballs
inside out is using one of Frank Fotis Creations, maybe he should pop

over and give it a tweak for them, I myself am very happy with the 8200, once Bob got the 50 uS preemphasis charactoristic wired..

Charles Graves

1242. Boston Radio Watch : WKOX situation....

Newsgroup: rec.radio.broadcasting
Date: 1996-02-01 00:00:00 UTC
From: Mark Shneyder 2-4219 <nhmas@gauss.med.harvard.edu>
Message-ID: <4epmf3$8fp@vixen.cso.uiuc.edu>
Source record: 26210

To update the situation with regards to Framingham's WKOX AM 1200
plans to build new towers so it can start its 50,000watt operation
this spring :

Town's Selectmen held a public hearing this past Monday night(1/29).
An unexpectedly large number of town residents, who are
vigirously opposed to WKOX's plans, voiced out their concerns about
the power upgrade and its immediate impact on their quality of life...
The hearing was originally scheduled to go for 45 minutes,
but it got stretched out to an hour and 1/2 since so many people
wanted to be heard...

Anyway, the selectmen scheduled to have another hearing on Monday,
February 12th before taking their final vote.

A source close to the situation believes 'KOX will get Town's
approval, but there will be a major list of stipulations attached
to it...

This is getting interesting.

Message-ID: <4epmf3$8fr@vixen.cso.uiuc.edu>
Source record: 26211

Well, it finally happened. Two years after acquiring
WEGQ 93.7FM(then WCGY 93.7FM) from Curt Gowdy, its present
owner, American Radio Systems, had its wish come true --
a new transmitter site, closer to Boston. That's right,
sometime last week, without any kind of major fanfare,
the all-70s Eagle 93-7 began transmitting
from its new tower in Topsfield. The previous site for
the 50,000watt station was in Andover.

ARS bought 'EGQ for a bargain basement price of $12.5 million
back in 1994. If the move to a new tower pays off in terms
of higher ratings for the Eagle, this deal will be one amazing
steal.

There's a noticeable difference in signal quality if you
live in the Metro Boston. It's very crisp, static-free
and makes the 70s sound so much...like the 90s.:-)

-Mark

1244. Compression (Ok Bob, ok..)

Newsgroup: rec.radio.broadcasting
Date: 1996-02-01 00:00:00 UTC

>Allan Sniffen although I know many people in programming like him. My station
>competes with two other stations in the market with the same format and
>signal.

Ok ok ok....Bob..... Sorry you don't agree with my compression views.
BUT.... If I made your station successful in a major market environment,
you would not consider me such a lunatic. And, that's the rub here....
Most of the responses which are critical of compression are either comimg
from places like Pasadena Texas (which is not a major market..."2" other
stations?) or from people overly concerned with keeping listeners tuned in
for protracted periods of time. Great if you are in a competitive
environment where you have such luxury!

>We try to emphasize cleanliness over absolute loudness and the result is the
>longest TSL in our format and believe me the PD here likes all the TSL he can
>get!

I'll bet he likes CUME better....

> I have been complimented by record producers because our audio
>processing didn't smash their sound to death.

Sure. Like I care what the record producers think....

>This process is known as teamwork and, as applied in our case with the
effort of sales >and the other departments, has led us to be the number two
billing station in the
>market last year!

Great!!!!!

>I like to use the "cake" analogy about processing. Some people can't
understand that if >a little is good more must be better. WRONG!!!

Of course, as a generality, more is not always better. And, apparently in
your situation, this is true. But, again, you don't have the same level of
competition you would have in LA, Chicago, NYC etc (what most of us would
agree are the major markets).

>Obviously, the people that belive louder is better at any cost have never
>heard of the term subliminal perception. My theory is that at some, low
>level, distortion is perceptable in the subconscious and, after some time when
>the listener has reached his threshhold, he changes stations or turns the

>radio off.

You're right (and I am not so sure it's subliminal)! But you have to first have them before you can lose them. TSL is less important than attracting listeners in the first place. As Ken Norton pointed out in his post:

kenorton@ixc.net (Ken Norton) says:

KN>Unfortunately for us audio purists... TIME is purchased by AD AGENCIES with
KN>regards to the Average Quarter Hour Ratings, and CUMES, not Time Spent
KN>Listening. You can have the greatest TSL, and still go broke.

KN>Since agency buys are the driving force in determining spot
KN>rates, I would rather tune the processing to get as many listeners as
KN>possible. One way to do that is COMPRESS, another is improving the audio
KN>chain, but the biggest factor is content.

Bob Stroupe wrote:

>When you programmers out there who insist on loudness at any cost have tried
>everything to build an audience and wonder why nothing seems to work, give me
>a call. I'll be happy to show you the way to better ratings, longer TSL and
>happer listeners altough they might not be able to tell you exactly why.

Maybe in Pasadena.

And.... I'll give you a list of stations that have consistantly beat the competition with high compression levels! As you (and everyone else) have point out, in the end, compression levels really don't have a lot to do with it. Good programming does. But, as I have stated in earlier posts, in an environment with 40 FM stations competing with identical signal strength and with format variations that are almost impossible for most people to perceive, you have to make yourself stand out in any way you can. Unfortunately for all you audio purists, compression is one way!

With those car windows down and the wind blowing, is it really the record producers we care about or is it that competitor who is using a fair amount of compression?

>TRADE SECRET: The road to good audio is not just in the audio processor but

My first radio job was at a dying AM which carried some programming from an incredibly rinky-dink outfit (in Florida?) called the Sun Network. They almost NEVER followed any discernable pattern. As I recall, there were some breaks that were mandatory for affiliates to
carry, others were optional cut-aways for local spots. Naturally, the mandatory and the optional breaks were different lengths, and since they rarely if ever cut to a break at anywhere near the correct time, (or even necessarily took them in the right order) it was difficult to tell which breaks were which, making for a VERY sloppy on-air sound, which of course we got blamed for by both of our listeners!

What was even more fun was they sometimes would screw up and run the wrong SHOWS in a given time slot. No one ever answered the phone there, either. Is this bush-league network still around?

I have been in broadcasting for 23 of my 39 years. I have cerebral palsey. I currently work for Metro Traffic Control and for AAA michigan, both in suburban Detroit. At MTC i do airborn and studio reporting for about 20 different radio stations, including WJR, WWJ and WXYT. At AAA Michigan, I do traffic/weather/tourist info stuff for about 20 stations statewide. I'm a full-time college student, attending Wayne state University in detroit. Woring on a degree in communications, with an area of concentration in PR. My disability is perhaps not as severe as most. I walk unaided, but do have a little trouble getting around sometimes. The biggest chalenges i have faced have never been physical. They are instead, challenges of attitude, both other people's attitudes, and my own. The stumbling blocks we place in front of ourselves are the toughest ones to get over. E-mail is always welcome.

Source record: 26216

I am interested in obtaining the type of samples used by hip hop and dance stations during live D.J. mixing. Specifically, the voice samples. A few stations in the Los Angeles area (KPWR/KIIS/KKBT) use these quite often during their mixes to start off a block of music or to otherwise add a bit of 'sparkle' to the show. My efforts at finding these through oddball music stores and D.J. outlets were to no avail.

If I am being too vague in describing what I'm after, here are a few of the the samples I've heard that I can remember offhand ... :-)

"This should be played at high volume; preferably, in a residential area."
"Place your head midway between the loudspeakers and set the volume knob to maximum potential."

These samples are often recorded in an authoritive sounding voice, similar to the instructors' voices that you heard during those old educational films at school back the 1950's. THAT stuff! <grin> If anyone can give me a few leads to where this type of sample material can be bought from, I'd greatly appreciate it. I'd be interested in getting it under the WAV file format or (preferably) CD. I'll be using this in a music compilation that a friend and I are putting together in his home studio and are planning to have finished by the end of February.

Thanks in advance.

THE WORLD CHART SHOW, which debuted internationally in February 1995 and now airs weekly on 400 station in 60 countries, premiers on American airwaves Sunday, January 28, 1996 on Chicago's100.3 WPNT, from 9am to 1pm.

The program was created by Tom Rounds and is produced by yours truly. We're the guys who started American Top 40 with Casey Kasem, which ran for 25 years -- until we launched THE WORLD CHART SHOW.

Don't be fooled by the title of the show. Guy Zapoleon (BILLBOARD's Adult and Top 40 Radio Consultant of the Year) says: "The music of the WORLD CHART SHOW is different enough to be exciting -- while definitely familiar to mainstream American listeners."

That it's not going to be a serious player in the marketplace. It may make a few dollars just by virtue of not spending any, but it won't get decent ratings or significant revenues. That's not a business I want to be in.

All-news, done right, is about a 5-share format. (with notable exceptions like Philadelphia, where KYW does quite a bit better than that). Outside big cities, a 5 share won't make money unless the overhead is way below the cost of doing local all-news. If you do all-news on a low-overhead basis with a network, you likely won't get close to a 5 share, because other stations will do a better job covering local news, even if all that amounts to is updated weather reports. To use an extreme example, who's going to listen to an automated, satellite-fed all-news station when the earthquake hits or there's a train wreck with a toxic spill at 3 AM and somebody else is on the air live and local, instantly?

In this 350,000 market, network-based all-news barely did a 1 before the station cried "uncle" and went news/talk. Here it takes a 2 share to bill enough to pay utilities. In Los Angeles, you can bill millions and pay for a big staff with a 2 share, because the cume on all-news will be so enormous. That's why all-news is a major market format.

I understand about the two separate books from arbitron. I guess the real root of my confusion is: Wouldn't commercial stations want to know how public radio, non-commercial stations are doing in the ratings? There are cases that public stations are gaining on commercial stations in some important demographics in some markets. I would want to know that. right? Also, in the markets that audiences are moving to non-comms, wouldn't some commercial station at least look at the format elements that are working for the non-comm?

>I was also sorry to read that Joe Martelle will no longer be doing the morning

I have found that there are changes happening at 'BMX, although I'm not sure what they are. They have stopped mentioning music from the '70s, and have started using a positioner (in jingles, even) of the highly redundant "The best mix of the 80s, 90s, and today." (I've had folks in my office and in my car comment on that phrasology. It surprises me, since promos/liners/etc. from this station are usually pretty literate!)

They don't seem to have adjusted their music in any major way, and I don't think they really needed to, since they've got a nice niche of the market. Does anyone know the scuttlebut on their plans?

Enquiring minds want to know!

: References: <4e7ibv$5ij@vixen.cso.uiuc.edu>

: There are people who will tell you that the louder your signal is the
: farther it will reach. On FM, it just ain't so. 1,000 watts is 1,000
: watts. All the processing in the world will not squeeze even one more watt
: into your antenna. In fringe areas where a station's signal is noisy
: processing can help drown out the noise-- up to a point. But I doubt that
: putting a Buzzsaw 3000 on the air is going to get a station many new
: listeners. One would do better to work on one's music and presentation
: style.

It's been my observation that the worst offenders in this regard have been rimshotters and low-power college stations. While slash-and-burn modualtion can drown out noise, I think it also exacerbates multipath.

Examples that readily come to mind include KJHK and KCOU (low-power stations), KISF, KTOZ-FM, KPNT (rimshot stations in the KC, Springfield, and St. Louis markets, respectively).

Also dreadful in Kansas City are urban-contemporary KPRS (about which one person with whom I have exchanged tapes asked, "are you *sure* it's not an AM station?") and classical KXTR. In the case of KXTR, all the pumping just makes it easier to hear the multipath.

Stations that strike the right balance between too much processing and too much dynamic range include adult-contemporary KKJO in St. Joseph, alternative KBXR in Columbia, and in Lawrence, Kansas, modern-rock KLZR and the University of Kansas' NPR station, KANU. They sound good on just about every radio I have, from Sony Walkmans to my NAD 4300.

The worst sounding market, though, has to be Topeka. *All* the FMs there sound like they're being run through the AGC of a particularly aggressive portable tape recorder.

Someone in one of these threads mentioned using the dashboard of a Ford Maverick to determine how their station would sound in a car. In Topeka and at KPRS as well as the aforementioned rimshotters, I think they must be using the trunk of a Ford Pinto.

From: robert573@dallas.email.net
Message-ID: <4epmfo$8gu@vixen.cso.uiuc.edu>
Source record: 26303

I have a question re: the EEO rule established by the FCC. The exact rule number escapes me (and darn I don't have a copy in front of me to look it up). As I understand it, a station "must" recruite for more full-time staff members, "after" the station has 4 full-timers already on staff.

Question: If the station is a non-com <non NPR> station which is owned and operated by a public school system (i.e. "city" Independant School District), must this station recruite anyway, even though it "is" owned and operated by a public school system which already recurites minorites etc for other school positions?

In otherwords, if station "XXXX" is owned and operated by "Anytown Independant School District" and already has 4 full-time staffers, can they promote a part-timer to a 5th full-time position without recruiting?

Thanks, in advance.

Rob Bass

I agree with you totally Jack. I also wonder where that kind of radio is nowadays. The closest I hear is in the smaller markets that are not researched and rated to death. When I drive to see my parents the only entertainment I hear is in the small town. They still manage to make me laugh (with them not at them) It seems that nowadays they perfect their art in a small market to make it to the majors and read liner cards. Makes no sense to me.....Kim Carson

He got dropped from WXRK in New York when they switched formats from
Classic Rock to Modern Rock. The only talk type programming they have on
WXRK is Howard Stern. In Los Angeles he is only on for an hour a night,
due to low ratings. It would be breach of contract I think to cancel his
show in LA completely.
>What is going on with the Grease? Are they targeting Stern? Has he
>jumped networks (or, it seems, finally joined a network)?
>
>Interesting note: Stern is THIRD place in the Wash. DC area, tied

>
Even more interesting is the fact that the Greaseman's program in DC,
since he now broadcasts his program from Atlanta in the Morning its on
tape delay from that mornings broadcast on that same evening! Before it
was tape delayed an hour on WJFK because of the Don and Mike show running
till 7pm. The Greaseman when he was on in Hollywood, CA started at 6pm
EST.

From: david627@dallas.email.net
Message-ID: <4epmfr$8h3@vixen.cso.uiuc.edu>
Source record: 26307

Mike King asked "What happen to the KPLX Morning Show of Harmon and Evans?"

well one of the duo quit KPLX back in the summer.... and then KPLX brought in some woman to help out in the mornings.. then the other half of the duo left and they have revamped the whole show...

Rumors during the Fall were that there was talk of the station going all talk with its change of compression.. but that seemed not to take place.. there was even ink in the Dallas Morning News of this new sound coming from KPLX... since sister station KLIF has been tinkering with ideas of doing something along the lines of putting its format on FM... the logical thought was for it to go on KPLX signal.. but again that is just rumor...

No telling what is going to happen with it.. their numbers dropped dramtically this last book and I don't know of any movement at the station to boost itself right now...

Hope that answered your question about Harmon and Evans...

As someone previously posted, it is alive and well in top 10 markets. WWJ radio attracts more listeners in Detroit each week than any other station. 24 traffic and weather is important -- but news is also a key factor in all-news success. After all -- big news and tx and wx are all related...so are sports and news. Bad tx or bad wx peak our interest in the cause of the problem, and the effects it is having.

Greetings from the Nation's Capital, intrepid Airwavers! Here's the radio biz news for this week:

ITEM FIRST: -- Kudos -- Congratulations to John Matthews, News Director of Cap Cities/ABC o&o newstalker WMAL-AM (630). The Washington Post's "On the Dial" (radio) column reports that last week, John went to Columbia University in New York to pick up no less than a 1994-95 duPont-Columbia Silver Baton, one of the most prestigious awards in broadcast journalism. He won the award for his 1994 series on Disney's controversial proposal to build an American history theme park in Northern Virginia. Disney withdrew its proposal a week after the series aired on WMAL. The Post takes great pains to remind us all that Disney is now working on its proposed buyout of CapCities/ABC to the tune of $19 billion.

ITEM SECOND -- Getting it from the Top -- For Airwavers in the D.C./Baltimore area,
here's an event worth the trip. The D.C. Chapter of the American Women in Radio & TV is sponsoring a panel discussion on the state of Radio in 1996. Topics include changes in radio ownership rules, satellite radio, EEO, DAB, and other issues. A brief Q&A will follow. MODERATOR: Randall Bloomquist, Washington Bureau Chief for "Radio and Records". PANELISTS: Michael Douglass, President/CEO, Clark Broadcasting Co.; Bill Figenshu, President/Radio, Viacom Broadcasting; Herb McCord, President, Granum Communications, Inc.; Tom Milewski, COO, Greater Media, Inc. WHEN: Tuesday, Feb. 6th, 7pm - 815pm. WHERE: ANA Hotel, 2401 M Street NW, Washington, D.C. COST: Free to AWRT members, $10.00 for non-members. RSVP/more info at 202-775-3510.

ITEM THIRD -- Go play in traffic... -- The Post reports that John Irving, former long-time News Director/morning news anchor for WKYS-FM (93.9) has been named News Director for Metro Networks. He replaces Claire Meyerhoff, who left Metro in November. Meanwhile, Mary Medd has joined competing Shadow Broadcast Services, as President/GM of the traffic reporting service's Washington office.

ITEM FOURTH -- Open up and say "Aahs" -- Dan Turner, Operations Manager of the children-formatted Silver Spring, Md.-based "Radio Zone" (WKDL/1050 Silver Spring, WKDV-AM/1460 Northern Va., WKDB-AM/1570 Baltimore) is moving to the same job with WJDM-AM in New Jersey/New York. As has already been reported in Airwaves / rec.radio.boadcasting, WJDM has recently been bought by Childrens Broadcasting Corporation, which originates "Radio Aahs", heard around the country on 30 stations in most of the top markets. The Washington Post says one of the important aspects of this sale of the nation;s first station on the expanded AM band is that it will finally expose ad buyers on Madison Avenue to the network's programming, seen as a key to the network's growth because of ARBITRON's continued refusal to measure the audience for this format. Last November, if you'll recall, Childrens/Radio Aahs entered into a joint operations agreement with ABC Radio to help develop, and sell national advertising for the

network.

ITEM FIFTH -- Movin' on...up -- All-sports WTEM-AM (570) has picked up most, if not all of ESPN Radio Network's programming schedule, including daily features, weekend programming, and the 'NBA Game of the Week'. The Post reports that this follow's WMAL-AM's dropping of all sports programming from the news-talker's format. That includes Ken Beatrice, whose sports call-in show is now heard on WTEM weeknights beginning at 10.

1264. Noncommercial Ratings

Not quite so simple.

The market totals Arbitron publishes in its Standard Market Reports
contain four categories of data:

1. Listening to commercial stations which make the Arbitron Minimum
Reporting standard and are listed.

2. Listening to stations which fail to make the MRS.

3. Listening to non-commercial stations.

4. Unidentified listening.

While the categories are not broken out separately, I can tell you
from studies I have done that the mix varies considerably by market.
For example, Washington and Boston are relatively strong
noncommercial radio markets. Detroit is not.

The noncommercial station data is available in another Arbitron
product called Maximi$er as well as through the Radio Research
Consortium which processes Arbitron data for noncommercial stations.

Daniel M. Danhauser wrote the quoted material below:

" Okay, now my uninformed follow-up question: Are the shares listed by
" Arbitron shares of all commercial stations in the market or of all
" stations, period?

The stations are listed by AQH, cume, and similar number counts, but not by share (as least as far as I've seen). However, using the regular Arb and the non-com breakout side by side you can determine where the stations stand -- you just can't go to financial underwriters using the Arb book as a comparison; you can only compare against other non-coms.

I happen to be a big fan of National Public Radio. When I lived close to Ottawa I could easily pick up NPR and get great shows like Click and Clack:Car Talk and many more. Now that I am in Toronto I have no idea where I may be able to find NPR and how I should try to pick it up. I would appreciate any ideas that people would like to impart.

Arro format WGFX-FM has done some personality shuffling. Morning newscaster, former morning show host, Mary Glenn Lassiter, moves to afternoon d-j. Afternoon d-j Jeff Lyons aka J.R. will read the morning news. Night jock Kimberly is out....replaced by John Justice. Randy Reed will do overnights.

WYHY-FM (chr) afternoon jock Gator Harrison is leaving for Cookeville, a small market east of Nashville, where he will become p-d and morning man for a country station. Says he's making the move to be close to his fiance.

WWTN-FM (talk) afternoon sports talker George Plaster has a new television show, a nightly sports talk show on a new Nashville outlet WNAB-TV (Warner Brothers network). Ironically his television show follows a call-in show featuring former Nashville mayor Bill Boner (who once claimed he could make love for 7 hours straight) who was recently fired from WWTN.

Rush rebounds. Rush Limbaugh is up by two points on WLAC-AM (news/talk) in the latest ratings and has a clear two to one margin over G. Gordon Liddy on WWTN, who was up a full point.

WLAC gave venerable news giant WSM-AM a run for its money in this week's coverage of an air disaster in Nashville, with some swift reaction time. WKDF-FM raised 2 thousand dollars in four hours for the Red Cross disaster relief fund for people affected by the crash.

1271. New England Radio Watcher: Long Time, Little Happening

Newsgroup: rec.radio.broadcasting
Date: 1996-02-01 00:00:00 UTC
From: fybush@world.std.com
Message-ID: <4epmf6$8fv@vixen.cso.uiuc.edu>
Source record: 26318

It's been a while since my last New England Radio Watcher post, and it seems enough miscellany has accumulated to finally put another one together. So, from across the frigid Northeast...

*WZPK 103.7, licensed to Berlin NH, but serving Portland and most of southern Maine from high atop Mount Washington with 21640 watts at 3874' AAT, is being sold. New owners Fuller-Jeffrey already have a strong presence in the Portland market with 100kw album rocker WBLM 102.9 and modern rock simulcast WCYY (94.3 Biddeford ME)/WCYI (93.9 Lewiston ME). I suspect this may be one of those deals that will require waiting for the duopoly rules to change. In any case, I'd expect the hot AC station to move its studios from N. Conway NH down to the WBLM/WCYY/I facility at One City Center, Portland.

*W232AJ, licensed to Greenville NH, is on the air as yet another translator of religious WGLV 104.3 Hartford VT. I heard it some 25 miles south of Greenville, in Ayer MA, and I suspect it may be emanating from somewhere fairly far south of Greenville, which is a small rut in the road southwest of Milford NH.

*No explanation, just an observation: I heard folk station WADN (1120, Concord MA) running a taped weather forecast that was clearly lifted right off NYNEX's 617-936-1234 weather line...complete with a bit of the time and temperature announcement preceding the forecast, and the complete, "For NYNEX, I'm Technoweather meteorologist so-and-so" outcue." Legal? Intentional? Probably not, on both counts.

*M Street reports that WSNG, 610 in Torrington CT, is dark for the moment, as the station is in the process of being purchased by nearby WZBG 97.3 Litchfield. WZBG is owned in part by Carly Simon and several other wealthy folks who have country homes in the area.

*On the television front, WPXT-TV 51, the Fox affiliate in Portland, Maine, has been sold out of bankruptcy to Florida-based Pegasus Broadcasting. Meantime, still no sign of channel 28 in New Bedford/Providence, which was supposed to have debuted around New Year's Day as a WB affiliate, with calls of either WFDG or WLWC, depending on who you believe.

*And to satisfy the public, I am pleased to report that WFNX, 101.7 in Lynn, continues to serve the Boston area with modern rock, along with jazz on Sunday mornings and the gay-oriented "One in Ten" talk show Monday nights. And WAAF, 107.3 in Worcester, continues to provide hard rock to greater Boston, with DJs including Greg Hill in the morning, John Osterlund middays, and Opie and Anthony in afternoon drive. If things remain slow here, I may be forced to provide additional updates on what hasn't changed locally.

MARLOWE, MICHAELS OUT AT KLOU
ST. LOUIS JOURNALISM REVIEW TABS
ED BISHOP AS NEW EDITOR/GENERAL MANGER
KSD-AM "STAYS THE COURSE"

by Scott Simon
c. 1996

ST. LOUIS ---- Oldies 103 KLOU morning team of Rocky Marlowe and Donna Michaels are out as of February 23.

Marlowe arrived shortly after Dave Dunkin checked in as the station's program director in 1994. Michaels departs after 18 years with KLOU and sister station KMOX.

The show never achieved top five share figures for the 12+ St. Louis audience. No word as to who will replace the duo.

The St. Louis Journalism Review has tabbed Ed Bishop to be its new Editor and General Manager, effective immediately, replacing former publisher, Charles Klotzer, who retired at the end of last year, and turned the publication over to Webster University.

Bishop is no stranger to the SLJR.. He has been a long-time contributor and editor for that publication and also worked at The Riverfront Times and Pulitzer Publishing. Bishop also has been a journalism teacher at the University.

Sources at KSD-AM say the station will "stay the course" for the time being. After a meeting with general manager Karen Carroll on Jan. 30, staffers were told a local host for 1-4 p.m. weekdays will not be hired, and that the slot may be filled with a syndicated show.

New program director Steve Moore has been co-hosting the show in recent weeks with morning traffic reporter Dan Strauss.

Here's the hot rumor. Bruce Bradley may be looking to move to that time period on the "Big 550" from his current post of 11 a.m. to 3 p.m. at "Hot Talk" WIBV-AM, according to what sources at both stations tell me. His contract expires shortly.

But in reality, look for KSD-AM to pick up Dr. Laura Schlessinger's show, which airs live at that time. It's now being tape delayed for night broadcast at WIBV-AM, and the show's syndicator may be looking for a better

outlet. Pardon me if the good doctor's name is misspelled, it's not yet in my spell check.

Moore may be looking for people to host franchise shows such as computers and law on the weekend. But before you talk show wannabes start flooding his office with calls and letters, be prepared to sell the show yourself.

That meeting with Carroll also revealed the station won't spend any money for talent. Ex-KMOXer Dave Finklestein joins as the automotive expert. An earlier report said it would be a two-hour show, instead, Finklestein will be on for an hour.

Right now, KSD-AM is treading water in the wake of the St. Louis Rams inaugural season, which brought a significant flock of listeners to KSD AM and FM, which simulcast and heavily cross promoted the team.

Now, KSD-FM has to rely on being the market's only classic rock outlet, while the AM relies on the success or failure of St. Louis University basketball, which was a good addition three years ago, because the team has made the NCAA tournament the past two years.

But the team isn't doing all that well in a very tough conference, and KSD-FM didn't fare well prior to Rams football. Their winter and spring book could slide as monumentaly as their fall uptick.

Ray,
I grew up in Iowa and listened to WHO. Always was a winner! I worked a couple of summers for KICD in Spencer, Iowa. Up there were the big storms and tornadoes wander through. That's the part of the state I spent my childhood. It was always reassuring to wake up in the middle of the night during a big storm and KNOW that they'd be on the air with non-stop information. I realized when I worked there how much effort goes into it.

Sadly, you don't find that much any more. I work TV now. Here in Arkansas we devote a tremendous amount of time and effort to storm coverage (and do a very good job). But it's still not the same as the old radio days when you tracked storms from neighborhood to neighborhood!

Doug Krile
KARK TV
Little Rock

[Moderator's Note: KTTS in Springfield Mo still does that. In fact they send out mobile units to different areas and get on the spot descriptions. Some say they go a bit overboard, but this is the single station everyone listens to in time of troubling weather or for local news. I think it is a fine example of how public service can make you number 1. Keep up the good work, Curt Brown. Bill).

>In New York, while 95% of people aren't listening to WABC-Hate Talk, the
>issues such as anti-Arab sentiment, reflect the overall patina of New York
>itself, as evidenced by articles in "New York", the "Village Voice", etc.

Mr. Kaye conveniently forgets to mention that WWRL, WLIB, etc. also
represent the overall patina of New York. I hardly consider WABC
to be 'Hate Talk', but if you insist on that distinction then the other
stations I mentioned would fall in the same category.

>NY is a racist place, and certainly no place I'd ever want to visit.

Interesting comment about NYC being a 'racist' place. I'd like to know
what causes it to exhibit that attribute.

>While I'm not at all Arab, I look Arab enough to seriously question
>whether I'd survive in such a city.

Whenever I go to New York, I inevitably encounter people who appear to
be of Middle Eastern (i.e., Arab) origin. They seem to be surviving.
What drives your persecution complex here ?

>WABC's Bob Grant is someone I'd
>consider not just an enemy to non-whites, but an enemy to New York.

If New York is a racist place, and Bob Grant is an enemy to New York,
that must make him a good guy huh? I mean, he is against racism.

1279. BROADCASTING EQUIPMENT LIQUIDATION!

Newsgroup: rec.radio.broadcasting

We are converting to FM, and in the process, getting rid of most of our current equipment. Everything that we are selling is in good, working order. The only damage whatsoever to these components, is that they have our call letters, "KSTO" etched on them, along with an inventory # on each.
This is what we have. I've added in their description blurb from the 1995 Broadcast Supply Worldwide catalog. Pricing is still under discussion.

2 Broadcast Electronics DT90 SERIES Cartidge Player.
Available in mono and stereo record/play and playback configurations, Dura Trak 90 cart machines offer sparkling audio performance, durability, and all the features broadcasters need most, at an affordable price. Features include: superior cart guidance system, rugged direct drive motor, fast forward standard, three cue tones standard, cart-previously-played lockout, 1/2" aluminum deck plate, fully floating active balanced outputs, automatic autio mute switching, front panel 1kHz record defeat, pressure roller cleaning mode, and more.
The list price for this unit is $1,800 (new).

1 Tascam 32 2-Channel Recorder (reel-to-reel)
An outstanding value in 2 track reel-to-reel for 2 track mastering and light production work. Look at these features: Two slotless DC motors and durable capstan motor ensure fast, gentle tape handling with minimal wow and flutter. Digital tape counter features zero return (and it stops accurately), 2 speeds, 7 1/2 and 15 ips, pitch control (+/- 12%), dump edit function, cue lever and front panel headphone jack with level control.
List price $2,299

1 Broadcast Electronics Series 150A Audio Console
BE's 150A and 250A Series consoles feature two inputs per channel, separate monitor, headphone and cue channels, and front panel polycarbonate overlay.
The 250A Series consoles are available in 5, 8, and 12 channel models and include ladder-type step attenuators with cue detent, and roller-cam key switches. The 150 Series features durable, sealed potentiometers with detent for cue in 5 and 8 channel models.
Price not available

If you are interested in any of these units, please contact me via e-mail or telephone.

WWCS-540 in Canonsburg. I think it also carries other overseas
broadcasters. Note that WWCS powers down at night. Note also that BBC
now has five "world services," including one tailored to North America.
For other perspectives, note that CBC powerhouse stations like 740 Toronto
carry other overseas broadcasters overnight via World Radio Network.

I bought a Radio Shack directional antenna (no longer made. The range was supposed to be
200 miles over ideal terrain) in 1983. I wa=
s living near the center of the Adirondacks and wanted to hear some FM stations. It was
successful in getting me to RI, MA, VT, MA, =
as far west as Rochester in NY, ONT, and Que. No, living just 15 miles south of the border
in Vermont, I use it to get to Kinsgston =
and Ottawa in Ontario and south east to NH (Concord). I to am running a amplifier, rotor,
and coax.

: problems, it seems like these only amplify the interference.

Six years ago, facing a somewhat similar situation in my old Kansas City location (I rented and was on the wrong side of a couple of hills), I bought an AudioPrism 6500. It is a tunable antenna with switchable -12 dB attenuation. Its purpose is not to pick up weak stations so much as to enable the user to "tune away from" stations that overload and sharply focus gain on the frequency you want, to reduce overload and multipath. It's not a DX antenna, to be sure, but it is very effective in trimming out the hash that urban dwellers get to put up with.

It takes a little bit of practice to be able to use it effectively but I found that it did indeed help.

Even better is that it's entirely passive and measures just 9" x 9" (2-1/2" high). Back in 1990 it cost $50.

Manufacturer is AudioPrism, POB 1124, Issaquah, WA 98027, phone 206-392-0399. (I just checked with Directory Assistance, and that's still its phone number.)

FAMILIAR NAMES DOT
FOX TV BASEBALL LINEUP

by Scott Simon

ST. LOUIS ---- What do Joe Buck, Chip Caray, and Thom Brennaman have in common besides having fathers who also broadcast major league baseball?

The three were named Tuesday to the inaugural FOX TV lineup of regional play by play baseball broadcasters, starting this summer.

Buck does the St. Louis Cardinals radio casts, Caray is on Seattle's television schedule, while Brennaman, who has been with the Chicago Cubs for five years, is on the beach for a couple of seasons before becoming the voice of the Arizona Diamondbacks when it commences play in 1998.

Fox Sports said one more announcer will be hired to round out their team. One name being mentioned is John Rooney of the Chicago White Sox, who has done baseball play by play for CBS radio coverage throughout the regular season, playoffs, and World Series.

The network will air four regional games on selected Saturdays throughout the summer.

On the other hand, the downside of simulcasting CNN Headline News is, well, you can't see who's talking (and you can't see the weather map during the music segue). Voices are rarely ID'd. The only sections that rarely depend on soundbites are the sports and the "Hollywood Minute." Drives me nuts, especially in the car.

According to Friday's Boston Globe, Boston's 'other' all-sports
station WBPS AM 890 is thisclose to signing a deal with the new
MLS' New England Revolution franchise to broadcast their weekly games
starting this April...I also heard that Revolution management
is looking for a Spanish-language radio package.

On the TV side, no local carrier has been announced yet....I'd
think the new TV home of the Red Sox, Boston University's WABU-TV68,
would be a natural place for the Revolution to land...Over the
past year TV68 has really beefed up its weekend sports schedule by adding
a lot of regional college sports, and New England's #1 pro team,
the Boston Red Sox.

1290. Q: College radio music testing - how feasible?

Newsgroup: rec.radio.broadcasting
Date: 1996-02-01 00:00:00 UTC
From: Tim Reynolds <timrwjar@ids.net>
Message-ID: <4epmfd$8ga@vixen.cso.uiuc.edu>
Source record: 26337

I am on the Board of Overseers for a small commercial college radio station with an AOR format
(probably leaning more new rock now).

The students would like to do some form of music testing to help fine tune their format. They
do compete with other professional stations in the market (non-student run) I have worked at a
couple of radio stations in larger markets that have done either call-out music research,
auditorium tests, or other music testing.

My question is: How feasible is it for the college station to do their own testing, or how much
would it cost to hire a company to test part of their library? Since they are a commercial
station, there is a small budget for this sort of thing, but also it might be a good learning
experience for the students to do it themselves.

If anyone has any thoughts, I would appreciate it, and will pass it along to the station.
Thanks.

>What I don't understand in all this discussion is...what CDs are
>recorded without compression? All my favorites sure sound compressed
>and processed to me!

Historically, all radio broadcasts, disk recordings, and tape recordings had some measure of volume compression. If the attack and release times of compression are slow, then the distortion is subaudible, and not overly noticeable, except with live signals with a very wide dynamic range that a listener expects to be transmitted with a wide range. I think that the most obvious examples are the sound of a large symphony orchestra or a pipe organ with a large reed chorus (jeux des anches). Both are fairly complex as sound sources for recording, and there are a bunch of subjective artistic issues involved in translating the live sound to one or two recorded channels.

Most popular music----in this includes the "big band swing" stuff of the thirties and forties with unamplified instruments as well as the more recent stuff that relies very heavily on amplified guitars----has a limited dynamic range in live performance when averaged over the time needed to play two or three measures of music. This is equally true of chamber music or symphonies written by Haydn or Mozart----the orchestras are much smaller, so most of the performers are playing most of the time.

The CD format is capable of a wider dynamic range than the analog media were. Whether the people who are doing the recording and making the master choose to use that dynamic range or not is another matter. I suspect that mixing popular music is likely to include some flattening of the live music dynamic range.

I can cite one classical CD where the dynamic range is so pronounced that it is disconcerting unless you are familiar with the music in live performance. That is Telarc CD-80244, Bruckner's 4th symphony, Jesus Lopez-Cobos and the Cincinnati Symphony. Telarc's notes say that "the signal was not passed through any processing device (i.e. compression, limiting or equalization) at any step during production)." That's all very nice, but it's pretty obvious that the recording was also mastered from mixing several channels, so all that "unprocessed" signal had a little knob-twiddling tossed in----and that is as much "processing" as any automated methodology.
>

>In the case of AM the sideband energy is what counts. Processing
>increases the sideband band energy and improves the coverage. Most
>would agee a louder less noisy signal is a significant advantage from
>the listeners perspective.
>
Oh, really? Put the sound of chalk squeaking on a blackboard on an AM carrier and you'll get plenty of "sideband energy." I think the average listener, confronted with this sound and the term "sideband energy" would identify the term as a waggish comment on the chairs and tables that were tipped over, etc. in an effort stop that awful racket NOW!

"Improves the coverage." ????? I suggest you take a closer look at a good engineering text on AM radio transmission and reception. Terman "Radio Engineering" may be antique, but he reads well. You're begging the question with this one, because you are really telling us to increase the average modulation level to make more racket come out of the speaker, at the expense of dynamic range. While you are at it, take a look at discussions of "AVC," which means "automatic volume control." Almost every radio fancier than a crystal set has one, and it is nothing but a volume compressor built into the radio.

There are two limits to dynamic range, not one. If you want to increase average modulation to rise above the signal noise floor, fine. But if you increase it so much that you have too little headroom left for any dynamic range---and that may only be the space needed to transmit one "twank" of a guitar----then you're into clipping and high-frequency distortion. That sort of thing was tiring listeners and making them tune out fifty years ago, and that's something that hasn't changed.

>expanded at the receiver). The receivers would have a little expander
>knob where one end would restore the original dynamic range for home use
>and the other would mash the sound for car use (or other noisey
>environment).

In an ideal world, this would be a great idea. There are several severe practical drawbacks. The main one is that the compression characteristic of a modern multiband broadcast audio processor is very complex, and adding the circuitry (even by means of DSP) in a receiver would add a great deal of cost. It takes 9 Motorola 56001s to do the multiband structure on the Optimod-FM 8200, for example.

The other problem is clipping.

Because clipping has, in essence, an infinity:1 compression ratio, the clipped signal does not contain information that would allow the receiver to remove the clipping simply by referring to the processed signal itself. (In other words, you could not do a sort of fancy "Dolby decoder," which needs only the compressed signal to restore the original.

Clipping, if modeled as a process wherein the unclipped signal is multiplied by a control signal, requires a very wide bandwidth control signal. This control signal would have to be transmitted to the receiver along with the processed audio to permit the receiver to undo the clipping. With multiband clipping, the problem gets even worse.

Untrue. TSL is what turns cume into AQH. Given two stations with equal
cume, the one with the longer TSL will have higher AQH shares. Check it
out with your sales manager. Maximizing TSL is very important.

> ... WRISTWATCHES in the U.S.A which receive
> timecodes from U.S. atomic clocks ...

A project is apparently underway to increase the
power of WWVB (60KHz) to accomodate the Junghans
watch. Currently, WWVB's signal is insufficiently
strong to reliably cover North America when received
by a small active antenna like a watch requires.

Another international project is developing a
GPS-based watch.

The AT&E/Seiko Message Watch project which started
in about 1986, but which was discontinued a few years
later, is now again being developed. This system,
however, is intended to convey messages like a pager;
it uses subcarriers of existing commercial and non-
commercial FM broadcast stations and so is not truly
national in scope until several stations in each city
are contracted to carry the system content. Even then,
there will be gaps in coverage because of the
relatively local nature of FM broadcasting.

Well, for Paul Dirschel, try "Jim Douglas" - former morning drive, now
10-2 p.m. on WNSR, Soft Rock 105 in NY. In addition to having a great
set of pipes and good on-air personality, he is one of the nicest
people you could want to meet. Kinda cool, I remember him when he was
a high school intern at WHPC at Nassau Community College.

Source record: 26159

I just noticed tonight that WJDM is running Radio Aahs. They must have just changed their format today.

I am surprized that they would go that route, being the only radio outlet in their market of about 100,000. I would think that format would be hard to sell.

We have a station here in Des Moines running it, but they must not listen to their own station as the feed is constantly cutting in and out and the audio breaking up. It is on an old dog facility on 1390 KHZ that has a screwy directional pattern that the city has outgrown. It should have gone dark years ago.

Ray,
I grew up in Iowa and listened to WHO. Always was a winner! I worked a couple of summers for KICD in Spencer, Iowa. Up there were the big storms and tornadoes wander through. That's the part of the state I spent my childhood. It was always reassuring to wake up in the middle of the night during a big storm and KNOW that they'd be on the air with non-stop information. I realized when I worked there how much effort goes into it.

Sadly, you don't find that much any more. I work TV now. Here in Arkansas we devote a tremendous amount of time and effort to storm coverage (and do a very good job). But it's still not the same as the old radio days when you tracked storms from neighborhood to neighborhood!

Doug Krile
KARK TV
Little Rock

[Moderator's Note: KTTS in Springfield Mo still does that. In fact they send out mobile units to different areas and get on the spot descriptions. Some say they go a bit overboard, but this is the single station everyone listens to in time of troubling weather or for local news. I think it is a fine example of how public service can make you number 1. Keep up the good work, Curt Brown. Bill).

Yes, I bet things haven't changed a bit a KICD. "If there's a radio station heaven."

We have a couple of idiots on the FM band here in Des Moines involved in some kind of lawsuit because one alledgedly stole the other one's 20 in a row slogan.

I think it is truly sad that radio has stopped, for the most part, being what it set out to be.... entertaining, informative, and fun. How many people do you know in this business who spend more time having a good time than wondering what corporation was going to buy them next, or when they would be replaced by an automation system. There is some great radio out there, but most of it is formula crap and boring as hell. Equally as sad is that now even small markets have so many stations that few can actually make money. That means more automation and less staff. The training grounds are drying up! We need to either undo some of the damage that has been done, or teach computers to have a personality because without live jocks in small markets now, there will be no experienced jocks in major markets in years to come.

Source record: 26170

I think news writing has fallen to new lows on KFI-640, Los Angeles.
Is there some kind of fad to write for the "common man"? A story
last week began with this line - "The guy who interviewed O.J. Simpson on
that T.V. show....". How could you use the term "the guy". When I was
an intern news writer if I wrote that I would be gone that day. What is
the rationale behind that style of writing? If Edwin Newman were not alive
he'd be rolling in his grave!

There's a similar story in Cousin Brucie's autobiography.
(Apparently WABC (because they were friendly) got a lot of these calls.)
Brucie describes seguing records and skipping talksets while talking to
the person as long as possible and trying to broker some sort of
reconciliation with the kid and their parents.
I'm not sure that it's anyone's fault, but the explosion in
music markets has fragmented radio so much that there are so many
stations playing popular music...not just one that can "be your friend."

(If you know how to get that back, let me know...)

1326. Compression for Fun and Profit..

Newsgroup: rec.radio.broadcasting
Date: 1996-02-02 00:00:00 UTC
From: Richard Irwin <ricky@sna.com>
Message-ID: <4esfdc$m4k@vixen.cso.uiuc.edu>
Source record: 26220

I have followed, with great interest, the ongoing discussion on audio processing in radio broadcasting.

I built a multi-band processor for WYCL, York, S.C., in 1971, and tested it during the "experimental period" on the 1KW daytimer. This contraption included passive filters feeding a CBS Audimax and a Gates Levil Devil, plus a "de-esser" circuit, activated by a lightbulb and a photocell. The outputs of all the devices were summed via a passive network and submitted to our CBS Volumax for final processing.

It was absolutely the LOUDEST signal I could find on the Delco radio in my 1969 Camaro. I abandoned the project, however, when I realized the trade-off for volume was excessive rolloff on the higher frequencies. Also, the modulation monitor didn't sit at 98% because I was no longer processing in "wide band" mode. If I had one more AGC device in the place, I wouldn't have given up so easily. I had never heard of a "Dorrough" processor in 1971, but of course, today, multi-band processing seems the standard for broadcasters.

Once, while working with a consultant at a station in San Antonio, I used my Orban key to open the Optimod and make the station "sound" like what the consultant expected. When we returned from dinner, the C.E. had set up his 'scope and was frantically searching for the "distortion" that had suddenly appeared in HIS audio chain. That was one time that the Chief lost, and the PD went on to get big ratings. The 400 titles we programmed in tight rotation were more important than the +2 setting for "soft clipping" on the processor.

As someone who shared duties in both programming and engineering for 30 years, I am convinced that the "correct" processing for any signal is related to the format and the preferences of the program director. Even the marvelous new digital processors require subjective evaluation, and the choices made are dependent on issues of perceived volume vs. perceived quality, tempered with concerns for the entire station presentation. There is no "right" or "wrong" way to process audio. What works is what works.

Ron Jordan wrote the quoted material below:

" And let's learn from this lesson that a great souning radio show sounds
" great because of it's producer.

I don't agree with this at all, if the definition of "producer" is "call screener". I've worked without a call screener and had better results, honestly, not that the people who screened my calls weren't good at what they did, but the spontaneity helped the flow of my show.

If a "producer" is actually a producer and spends time booking guests, yes they can be a boon to a show. From what I've seen, most "producers" are only call screeners.

I think you're right, Alan. They havent done any serious
format tweaking. Maybe a little more emphasis on the 80's artists lately.
[In December, they added 4-hour 'Back to the 80s' show, hosted by
mid-day man Joe Cortesse. 'BTT80' is heard on Fridays at 7pm.]

They now tag themselves as 'The Best Mix of 80s, 90s..and today'.
Also, now that their sister-station WEGQ "The Eagle" 93.7FM("The 70's
Specialist") has dramatically improved its Boston area coverage(new
transmitter site), it makes it so much easier to market both stations....

Speaking of Joe Martelle. Apparently, he was talking to Greater
Media's AC WMJX 106.7 earlier this week. So, we'll see if he'll
lands at "Magic"....

Rob Bass of Dallas recently wrote a question regarding the procedure for EEOC/AA reporting for broadcast stations to comply with Federal Communications Commission rules and regulations.

As one who has adhered to the guidelines, I hope to offer a "layman's" interpretation.

ALL broadcast stations, regardless of their classification, must report annually an employment report, should that licensee employ at least five persons full-time.

In the public file, the licensee must maintain for inspection the procedure it uses to comply with the rules and regulations.

And the plan that works everytime is to state that you publish specific job openings in daily and weekly newspapers, at area colleges, community organizations, and with the state department of employment security, AND AIR JOB OPENINGS ON YOUR STATION! Contacting government agencies that work with unemployed persons is an effective and impressive listing that not only pleases the Commission in regards to compliance, but equally works well for the licensee. Interstate network postings of persons with experience seeking broadcast jobs by state employment security departments often times comes up with individuals who might not have known about a particular opportunity to apply.

Many stations don't list government agencies and their own airwaves as places to solicit applicants. Be different and include them.

In your public file, list the papers, schools, organizations, and government employment agencies.

Make a copy of the newspaper ad and put it in the file. Make sure the job listing in the ad is descriptive, has a closing date for application, and make sure you put in the ad, "XXXXX is an Equal Opportunity Employer and also adheres to Affirmative Action guidelines."

About your particular situation of wanting to promote a part-time employee to full-time status. Publish the job opening. Make sure the ad states, "preference will be given to candidates already working in this capacity, who have active and working knowledge of the company's goals and regulations." This one sentence automatically makes your part-time employee the best candidate for the position, since he is active with the station operation, and knows what the company wants from a person in that position.

Finally, don't refer to the EEOC/AA guideline as "recruiting," rather, refer to them as "soliciting." Recruiting can be defined in law as a "search for a person to fill a position." Soliciting can be defined in law as a "search for persons qualified to fill a position."

Reading the EEOC/AA laws, and applicable FCC rules can give you a headache. Hopefully, this summary makes compliance simple, and unobtrusive.

1335. CBSRMT

> while; but I hear he's out of the business completely.

In the 60's and 70's, I was working for WTIC-AM&FM in Hartford, CT., as an engineer, and had the opportunity to record interviews and play and edit excerpts of
many OTR programs for a locally-produced monthly program, "The Golden Age of Radio," hosted by Dick Bertel. (Who now, with me, works for the Voice of America.) The CBS Radio Mystery Theater was an ambitious project produced by Hy Brown, a big name in OTR. Dick and I traveled to New York one day (before CBSRMT went on the air) to interview Hy Brown in his studio, a converted TV studio in Manhattan. (This was a first - many early TV studios were converted radio studios.) He explained to us that he had created a huge library of sound effects and music bridges, which were all on cartridges. The program was produced on tape and music and sound effects added. While this was not traditional live OTR, the listener could not tell that the sound was canned or the show reorded. Some of the programs were quite good, others forgettable. Mr. Brown told us that he had OTR actors champing at the bit to get back into radio drama, and indeed, he did manage to have a who's who of actors on the program, including its host, E.G. Marshall. I seem to recall there was also a very short-lived "Sears Mystery Theater" around the same time. On another note... When I worked for WTIC we carried a number of religious programs from NBC, including The Eternal Light. This show, through the early 70's, was one of the few network dramatic programs at the time, and always starred OTR big names - I think Parley Baer was on every week. We also carried X Minus One on weekends in the mid-seventies. These were rebroadcasts of the original Dimension X series recycled as X Minus One for the second time.

In the international broadcast field, the Voice of Russia (formerly
Radio Moscow) uses the Kremlin chimes at the top of the hour, often
preceeded by a big-band arrangement of Moscow Nights.

Bells or chimes are to my knowledge also used by Vatican Radio, Trans
World Radio and China Radio International.

I worked at an AM daytimer with NO budget for music testing or
research, I decided that the only way any music testing would happen
is if I just started doing hooks and call-outs on anything new that
hit my desk. Worked fairly well. I started getting more calls from
listeners saying that they liked the music.

This would be a wonderful learning experience for your students! Why
pay an outside group to perform a task that might benefit our future
broadcasters?

I used to record choral music concerts and sell the tapes. Once the level was set during rehearsal, it was never touched again. I thought the recordings sounded great! A large part of the performance was the dynamics. Use of wide dynamic range by the performers put much more emotional impact behind the performance, and we did pretty well at maintining that in the recordings. However, I got complaints from some people that they couldn't hear the music most of the time, and then it would blast them out of the room (almost like the live performance...). They were trying to listen to it as background music, and it didn't work! It needed to be listened to just as you would listen to the original performance, just sitting there staring straight ahead and LISTENING. Not doing the dishes, vacuuming, or driving down the interstate with the windows open. IF you want to listen under those circumstances, it STILL seems to me that it is up to the producer of the playback equipment to provide appropriate compression rather than expecting the producer of the recording to throw away half the performance (the dynamic range).

>Almost every radio fancier than a crystal set has one, and it is nothing
>but a volume compressor built into the radio.

Well, yes, I'll say it DOES improve coverage, though we have a trade-off between reasonable sound and reasonable coverage. As we get to the fringe area, we have about the same noise level as we do close to the transmitter, but the signal level is definitely down, so we have a poorer demodulated S/N. If we can "increase the modulation density", we do indeed have more sideband power and improve the demodulated S/N, so more people are willing to listen in the fringe area. I think

the term AVC has fallen out of use, replaced by AGC or automatic gain control. The AGC adjusts the gain of RF and IF amplifiers to present a nearly constant carrier level to the demodulator, independent of fading and changing stations (stronger and weaker stations). The demodulator is presented with a nearly constant RF (actually, IF) level, so, if the modulation level remains constant, the demodulated audio level will remain constant. However, if the modulation is reduced, the demodulated audio level will indeed fall. The AGC does not adjust for variations in audio level, but instead it adjusts for variations in received RF level.
In my continuing argument for reversible compression, it's interesting to look at what phone companies do with nonlinear encoding. We COULD predistort the audio, following u-law or similar curve, transmit the audio, then undistort it at the other end. Of course, it wouldn't sound very good to people who don't have the decoder. But another interesting idea comes up. First off, the predistortion would cause intermodulation products within the audio range. Second, it would cause harmonics outside the audio range. I believe that the encoding would not be reversible unless these harmonics were also transmitted. If we look at AM, transmitting these audio harmonics would take more bandwidth, but at the receive end we'd end up with a better dynamic range than we would without encoding. So... we can increase the amount of channel bandwidth we use to improve the overall S/N (or dynamic range). This, of course, is EXACTLY what's done with FM. We trade use more bandwidth but get better dynamic range than we would have using AM (or narrow band FM). Looking at spread spectrum transmission techniques, we find the same thing. We are running a far wider bandwidth than necessary to transmit the bitrate we're dealing with, but when transmitted over a noisey channel, we get a lower error rate by using a wider bandwidth. So... just as energy and matter are just two different forms of the same thing (and the sum is a constant), we might consider dynamic range and bandwidth two different forms of the same thing (and the sum is a constant). Further, might we consider Armstrong's FM the original spread spectrum system? I've gotta dig up some of Armstrong's original publications and read more about this...

>recorded without compression? All my favorites sure sound compressed
>and processed to me!

In pop music, I think it's safe to say that at least _some_ of the individual tracks mixed together to form the whole have been heavily compressed -- usually by wideband compressors like the various dbx units. It is by no means universal to apply compression to the _entire_mix_, however. It has become conventional wisdom that if this is to be done, it should not be done at mix time but rather by the mastering engineer at the time the CD is mastered. Most all pop CDs have some peak limiting applied (to make them...surprise, surprise...LOUDER), but compression beyond peak limiting is by no means ubiquitous.

Source record: 26238

SPECIAL INVITATION TO DXERs:

I will be a guest on the Al Wisk Show, on WBAP-820, on 2/2/96 @23:00 Eastern, following the hockey game. If you, or any of the other National Radio Club or DX Audio Service members would like to call in, and talk about DXing, please do so. It will be a good time. Listen for the numbers to call in.

WBAP would like to hear from people outside their normal contour, and especially from Canada, the eastern US, the Pacific coast, and other countries. We'll be talking about DXing, and other hobby related issues with radio.

I'm sure they would find it interesting to know how well WBAP gets into your location, and what you use as a radio.

If you can not get a call in, or do not have the time to call on Friday night, please write to WBAP and let them know how well you hear WBAP-820 where you live. You might also want to tell them what stations interfere with their signal, and describe the conditions on the night of reception. I think that would be very interesting to them. I remember how I liked to get letters from people like that when I worked in radio, and it was always interesting to know what it was like at their QTH. Address letters to.... Arnold Evans, Producer: The Al Wisk Show, WBAP Radio, 2221 E. Lamar Blvd., Suite 400, Arlington, TX 76006

Hope to hear you call in!!

>least in the East and Midwest) which one would normally not
>expect to hear based on their patterns.

Well, one BIG problem is the regionals are starting to sound like the old class IV's. Why? All of the low powered stuff DOES add to the skywave mess. Lets see 1370. According to M Street 70 stations. I count 31 stations with lower power..if you count some close to but slightly lower than 250 watts that goes to 34.

> Stations like ours which are
>still going by the book, are getting a lot more interference
>complaints on the fringe of our coverage area than we used to,
>and it's not just a matter of new stations on the air (on our chan-
>nel, like most of the regionals, there aren't many new kids on
>the block). Anyone else struggling with this?
>Bob Smith, middays WXXI-AM 1370 Rochester NY

Well, Bob, I wonder how many of these stations are REALLY running their flea power? Lets say station X has 25 watts, but it's easier to just power down to 250 from 5000. Or just to 1000?

There's this station in the Louisville KY area on 1080. Often times I hear them well some nights as good as WHAS. And then for a spell I don't hear them.

I think this "forgetting" is an epedemic. I have even caught daytimers on clear channels that forgot to sign off ....because the AM is a wasted afterthought ....simulcasting an FM or in one case ANOTHER AM!

The Greaseman is also still on in Philadelphia on WYSP 94.1FM (6PM-10PM Eastern). However, the station is playing more and more music on his show and less and less Grease. They may be planning on dumping him after his contract is up (just guessing).

The Greaseman was also on 92/3 K-Rock WXRK-FM in New York up until their format switch to modern rock. K-Rocks been going without jocks since then (with the exception of Howard Stern and some other "on-air auditions"). It looks like Grease will not return to WXRK, but who knows. So far no one has returned.

1348. Modern Rock Format

Newsgroup: rec.radio.broadcasting
Date: 1996-02-02 00:00:00 UTC
From: misty@bbs.tcbi.com
Message-ID: <4esfdv$m5m@vixen.cso.uiuc.edu>
Source record: 26242

I agree that it's frustrating trying to find a station that plays a variety anymore. I'm in the Milwaukee area, and the two closest things to a CHR are WKTI (extremely dull, light-type chr/hot ac) and WLUM New Rock 102-ONE (Any more Hootie and I'm gonna puke). I'm 30, and used to be a fan of alternative music. Maybe I phrased that wrong. I used to be a fan of most music, especially the stuff that was a bit unusual and cutting edge. The stuff that's getting played on the Modern Rock stations around here is FAR from cutting edge. Even less "cutting edge" when you can hear the same crap on the "hot ac" station too, at least the best of it.

I guess I can't understand how a truely "alternative" format can work on a large scale, considering the very nature of the music (new, different, something that not everyone else listens to) and the people who make up the alternative culture in America.

So... we're left with another watered down format.

Thank God I'm far enough north to get a decent CHR (WIXX - Green Bay). At this point, playing a variety (Some Hootie, then some La Bush, then Madonna etc...) seems to be the cutting edge thing to do...

1349. Re: Non-com "ratings"

Newsgroup: rec.radio.broadcasting
Date: 1996-02-02 00:00:00 UTC
From: dk@crl.com
Message-ID: <4esfdv$m5n@vixen.cso.uiuc.edu>
Source record: 26243

References: <4ecqes$iho@vixen.cso.uiuc.edu> <4epmg3$8hj@vixen.cso.uiuc.edu>

SCOTT LEWISON wrote the quoted material below:

" I understand about the two separate books from arbitron. I guess the real root
" of my confusion is: Wouldn't commercial stations want to know how public
" radio, non-commercial stations are doing in the ratings?

I think you misunderstand. Arbitron puts out one book, and a radio
consortium working for public radio stations takes the Arbitron data and
puts out its own ratings for non-com stations. Yes, it's all Arb data,
but it's not the "Arbitron book" and can't be used by non-coms to compare
with commercial stations.

" There are cases that
" public stations are gaining on commercial stations in some important
" demographics in some markets. I would want to know that. right?

Commercial stations tend to know where the non-coms stand anyhow. But the
point is selling ad time, and most commercial stations are not competing
for the same business as the non-coms are. A commercial station would
sell to the car dealers, the carpet store, the supermarket, but the
non-com would sell institutional ads to the stock brokerage, the local
deli, or the big corporation wanting to position themselves in a favorable
light with an upscale audience.

" Also, in the
" markets that audiences are moving to non-comms, wouldn't some commercial
" station at least look at the format elements that are working for the non-comm?

As I previously mentioned, KDFC here is a classical commercial station and
now is in the top 10 here. Classical usually is a non-com format. No
non-com station is going to touch that format here and try to buck KDFC's
big money. Meanwhile, when KJAZ went Spanish contemporary, non-com
KCSM-FM went fulltime jazz and picked up a huge audience. So, there is
some format shifting here and there, but for the most part, a commercial
station operates with a very different kind of budget than a non-com, and
thus usually can't afford to do a non-com's format.

References: <4epmg8$8hq@vixen.cso.uiuc.edu>

133gergel@wmich.edu wrote the quoted material below:

" Yesterday, I heard a promo from the local top 40 station. The promo went
" like this: 103, actually 103.3, but we round if of for the stupid people.
" [Moderator's Note: Sounds like more truth there than fiction. Bill]

Maybe, maybe not. Most people have too many other things to worry about
than the arcane fact that FM stations end in odd decimals. It's likely
that people will indeed tune to 103.0, not find the station there and
then maybe tune somewhere else.

In SF, KIOI (K-101), reputed to be the first station to call itself solely
by a frequency slogan, long ago went back to calling themselves 101.3,
including notations on their billboard ads. With ratings points meaning
big bucks, many stations can't afford to have someone's receiver tuned to
100.9 instead of 101.3.

From: bbrooks@MO.NET
Message-ID: <4esfe4$m5u@vixen.cso.uiuc.edu>
Source record: 26246

I would like PD & MD 's thoughts on what they consider is the best music scheduling/programming software. So far , I've heard nothing but good stuff about Selector , and it's seems most music stations want a MD that is knowledgeable with Selector. I'm currently MD for a small market station and we're using Results Plus software with Broadcast Programming discs. Is it worth it for us to invest in Selector? I've heard it's QUITE expensive , and the book to learn it is thicker than GONE WITH THE WIND. Is it really going to give me what I want or need to learn? BTW- We had POWERGOLD for a while , but it was not very compatible and friendly with the BP stuff , so we dropped it. Your thoughts please.....

About the statement "Harmon is on KSCS occasionally". Not true. We have hired several guys who used to work at KPLX...J.D. Ryan is doing nights for us and used to work over there...Chris Huff was their music director and is doing some fill in. They did pitch us on the Harmon and Evans countdown the other day. The fax said KPLX had dropped it. The flyer said they were the "Number one morning show in Dallas". Far from the truth. Now I don't feel so bad about all those lies I tell on the air.

>Ok..here's a trivia project for everyone. I'm looking for the "tallest" radio tower.

Different, but related, subject: Does anyone know which directional AM station in the United States or Canada uses the most towers?

I've seen the 12-tower arrays for 1190 Dallas TX and 1500 Detroit MI, and have heard (but did not see myself) that CFTR 680 Toronto once used a 13-tower array somewhere along the QEW.

Are there any existing AM directional stations that use more than 12 towers at the same time? (i.e. for one pattern; not counting separate day and night sites)

Hello. My name is Steve Newman and I work parttime currently at KALF in chico, california (near sacramento). Since I was young, I had several radio personalities that I studied..listened to religiously, etc. And I was hoping that some of you out there might know the whereabouts of some of them. First there was Dancin' Mark Hansen who worked at 95.9 KEZY in anaheim, then X 100 KXXX FM in sanfrancisco (which later became kfrc) and then he was at WILD 107. KSOL. He seems to have disappeared. Any clues? Also Jo Jo wright, who worked at KEZY, also at Power 95 in Dallas, Kiss 102 in charlotte, and WILD 107 in san francisco. Last I heard he was in Philly, but i can't find him. He was also a host on Dance Party USA on the USA network. Also I wonder if Magic Matt Alan is on the air anywhere? He did KIIS Los Angeles afternoons, and then Q 106 mornings for a short time. If you have any ideas as to the whereabouts of these folks, let me know. Also, anyone who wonders where a particular jock (or personality if you will) is these days, post your messages here. Thanks again.

1356. Jim Scott Goes to "Wink 94.1"

Date: 1996-02-04 00:00:00 UTC
From: KFXZ10A@prodigy.com
Message-ID: <4f1bfe$cl7@vixen.cso.uiuc.edu>
Source record: 26100

As expected, former WLW-AM 700 personality Jim Scott started at WWNK-FM 94.1 ("Wink 94.1") Thursday. According to the _Cincinnati Enquirer_, Scott wanted to work where he could play music and conduct more interviews, as he did for years on WLW. In recent years, WLW has run a strict morning schedule of news every 15 minutes, "traffic and weather together" every 10 minutes, and sports every 20 minutes, leaving little time for Scott to do his show. Through Feb. 9, Scott will do the "Wink" morning show with program director Dave Mason. Beginning Feb. 12, Mason moves to an off-air position, and Scott takes over on his own. Former "Wink" morning personality Randi Douglas, a 10-year "Wink" employee, was terminated. "Wink 94.1" runs a mix of adult contemporary and '60s and '70s pop oldies, including some disco but no hard rock. It is owned by Citicasters, owners of WKRQ-FM 101.9 and WKRC-TV Channel 12.

>would be hard to sell.

The owners of Radio Aahs bought out WJDM to make it their New York City outlet. Funny that WJDM would get an expanded band frequency because they are the only service to a city of 100,000, but then new owners come in and completely abandon Elizabeth. But you knew it would happen, and it will happen with other new stations that move into the new band. That's why I cringe every time I see a suburban station claiming they should be in the new band because they are the only station serving their city, but they really want the big signal to serve the market next door.

: stuff you're complaining about. I understand your complaint, but realize
: that the "modern rock" format is meant for mass appeal. I use it as my
: background music for work.

Dan, I don't completely agree with you. I challenge you to differentiate
between Juliana Hatfield, Veruca Salt's lead vocalist, or whichever one of
the sisters sings on the Breeders tracks. Or Letters to Cleo, for that
matter. They all sound *real* similar. That having been said, there are
a lot of unique bands out there. Some of 'em even get airplay. Bjork,
now solo and formerly of the Sugarcubes, for instance. She's way out (and
she somehow manages to make primal howling sound good :). The Cranberries,
while a traditional guitar-rock band, sound fresh. (Although Dolores
O'Riordan DOES sound quite a bit like Sinead O'Connor :)

: When I feel truly adventurous, I listen to "alternative" on a college
: station. That's how I hear the REALLY different stuff and find new bands
: I really like. If the music has commercial potential, it'll make it to
: the mainstream, eventually. After all, KROQ in L.A. played the Police,
: Bangles, GoGos, and others when they were NOBODIES. I'm certainly not
: offended if others discover a good thing ... :)

nod yup.. but the sad fact is that radio stations don't usually take
chances anymore.

A followup comment to Powell Way and others bemoaning
the gathering chaos on the AM band...
I agree that a lot of the stations with marginal nightttime
allocations are deciding on their own to bend the rules. But
even the old-timers with more generous allocations are some-
times being heard in places, with signal strengths, you would
not normally expect. I'm beginning to wonder if we're back-
sliding toward the level of unregulated mayhem that existed
on the band before the 1927 and 1933 radio legislation. If it
keeps going like this, why not just say the hell with it, and
let stations run their daytime patterns around the clock and
hope for the best? Of course that would make a bad situation
still worse, but can we really argue that the sloppy practice
on both the station side and the FCC side we're observing now,
is all that much better?
The answer is obviously to compel stations to obey the
technical terms of their licenses. But that clearly isn't being
done consistently right now...

From: XLFX67B@prodigy.com
Message-ID: <4f1bfl$clo@vixen.cso.uiuc.edu>
Source record: 26112

As reported in today's Daily News, Sunday will be the last day the country format will be heard on YNY. This statement comes directly from Jim DeCastro of Evergreen Broadcasting, which owns WYNY.
Starting Monday, WYNY will play an eclectic mix of programing from other Evergreen stations- very likely to include a simulcast of the Mancow Muller morning show from Chicago. In a week or so, YNY will announce its new format- which is still under wraps, but which sources say is likely to focus on listeners between 25-54 and be either rock-based or dance-based. All current YNY air personalities are unlikely to remain. YNY is giving its on air staff an opportunity to say goodbye to the listeners this weekend.

Hope to hear Mancow in the Morning on Rock 103.5 Monday morning.

And remember the silly sound of the old KXXX-FM's identifier? "99.7-X-100"
(This after they failed to make a really big dent in KMEL as simply "X-100").
Now on that frequency, you rarely hear them mention their dial position at all.
But now it's KFRC...call letters well known in the market. And judging
from their ratings, a station people are finding and remembering on their own
without having a frequency drilled into their heads.

Question: Is it "Big 98" or "Big 98.1?" They say it both ways, and I just
never know exactly where to tune to hear "Kung Fu Fighting"...<grin>

Another question: How many AM stations still drop the "0" from their frequency,
a la KCBS "Newsradio 74" or KNBR "The Giant 68?" I remember a few years
back when KGO went from "81" back to "8-10." I thought the others would
follow suit, but they didn't.

Radio Marti is replacing it's computer music/program scheduling software
with RCS Selector/Linker.

We'd be interested in any comments, advice, experiences, secrets etc.
that any of you may have with this software. E-mail appreciated to either
myself or Oscar Rodriguez (orodrigu@usia.gov)

Thanks in advance.

Blaine,

You'll find that Selector is the most widely used Music Scheduling Software. Music Master(FKAMS - Formally Known as Music Scan)is probaly the second most used.

Both programs have their good features. We currenly use MusicMaster. I personally find it easier to use than Selector (just my preference!). Many stations will want a MD with Selector experience because it is what they are using.

In any case, knowledge of music scheduling basics (hour rotation, sound and tempo coding, minimum rest, artist separation, etc.) is best learned by experience on the computer rather than from a manual. Just my 2 cents.

Blaine, I have used both Seletor (what I learned on) and MusicMaster (previously Musicscan). You are right!!! Most stations do use Selector and it is best to be knowledgable on that. Yes, The reference manual is thick but Selector is on call 24 hours a day(for emergencies) to answer questions. Plus much of it you learn as you go anyway. The manual is clear for finding and fixing problems. I still like Selector best. However, MusicMaster has some good points too! It has a check log feature at the end of the day that is very helpful. It is an added safety feature. But as a whole I loved working with Selector. I was not really computer literate when I learned Selector....But it was easier than I thought. Well worth the money for me. Kim Carson

Imagine a pitch control that DIDN'T change the pitch!

>My understanding is that Pitch and Speed are actually two seperate aspects of
>audio, even in the digital domain.

"Separate"? This would imply independent of one another. I don't know
about that.

Ordinarily, when you make the audio go faster, the pitch goes up. This is
definitely true in the analog domain, as evidenced by vinyl, tapes, and
moving trains (the doppler effect); and true in digital too, if all you do
is move the bits faster.

To get speed change without pitch change, or vice-versa, takes some work.
The usual technique amounts to "chopping up" the audio into small chunks,
and either throwing away some of them, or repeating some of them; and being
careful about how you re-join the parts together so you don't cause clicking.

Even though it may sound simple to do this digitally, it's not trivial. The
"chunks" have got to be large compared to a cycle at the lowest audio frequency.
If not, i.e. if you just throw away bits, you won't get what you expect; the
pitch and speed would continue to track one another, up and down.

>
>Now, I have one last question.... why is it that everytime I listen to a
>song, after I wake up in the morning... the song always sounds faster than
>it should be, even though the pitch is fine? I mean, I get this effect on

>Anyone else notice this, or is it just me? <grin>

My alarm clock "chirps" at me. Often when I wake up, I could swear that
it starts chirping VERY fast, then eventually slows down as I come into
consciousness. Amazing what tricks our minds play on us!

Tim,

Since this is a college station, how about making it an educational
experience? Does the school have a business program, marketing? If so,
maybe there's a professor who would take this on as an upper-level class
project (if it works out for everyone, it could even become an on-going
program with a new class each semester/year taking it on). If no faculty
are interested at that level, perhaps a couple of seniors in that area
would do it as an independent study or practicum under your
supervision (depending how their program is arranged). Your budget would
go a lot farther if it only has to cover some basic research expenses.

> it that matters...

When WRQN used to be called 93Q, in Toledo, they used to have an ID that
said "It's not the size of your tower, It's how you crank your Power!"
If I can remember correcty WRQN in 20,000 Watts and is one of the areas
smaller radio stations, but when they were called 93Q they were beating
the stuffings out of WVKS in the rating. I believe WVKS is 50,000 Watts.

Source record: 26123

Referring to the recent comments about 98.5 WBMX's new slogan "80s, 90s, and Today..", it looks like almost every "Mix" station is doing this now. My reasoning behind it has to do with luring in younger listeners. AC stations must update their playlists, in order to attract people *away* from the 8 modern rock stations in the market. When people get tired of sarcastic, too-hip-for-the-room attitude of the modern rockers, or the screaming of the kiddie-dance station, the Mix station provides a nice relief.

I wish I could say the same for Philly radio. But B-101, which catered to the 25-54 crowd last week, is catering to the 26-55 crowd this week.. and, next week, it'll be the 27-56 crowd, followed by 28-57, 29-58, 30-59, etc. Maybe I'm wrong? Maybe there really is a growing audience for the..stuff.. that they play? Otherwise, I have some ideas I wish I could share with them.

I understand!! But, while we are on the topic of big jumps. Steve Mason worked for WRQN (93.5, Toledo) and did the "Morning Zoo" program and he went from that to XETRA in San Diego. He started doing mornings and then was switched to nights, then went back to mornings, and now does mornings (I think) on XETRA(AM 690)m and anchrs the Tom Schnyder syndicated radio show.

The tallest candelabra tower is south of Sacramento, California, used by KVIE-TV 6, KXTV-TV 10, KOVR-TV 13, and I believe also KQCA-TV 58. It's right around 2000 feet, and sits just south of three other towers of similar height, including a 1500-foot candelabra that was itself the tallest in America when it was built in the 60s. There's still a large sign at the base of the 1500-footer giving the relevant stats (something like 8 miles of guy wire, weight in the hundreds of tons, etc. etc.)

The whole thing is easily seen from I-5 driving between Sacramento and Stockton. Very impressive. The local fire department even uses the 1500' candelabra as the logo on its T-shirts. (Yes, I had to buy one!)

It makes our local TV/FM antenna farm look puny -- nothing above 1200 feet.

>longwave signal may be dandy reaching ships at sea, isn't the signal so
>susceptible to noise at that freq that it would still be useless over
>most of the USA even if WWVB raised the power to 20Mw?

If there is a problem now with noise, then increasing the signal helps
get it above the noise, right?

LF and VLF signals provide some of the best stability. For example; the
WWV* stations broadcast continuous frequency reference signals. If you run
an electronics lab and need to check your very precise frequency standard
against them, WWVB is the signal of choice. WWV's HF broadcasts are subject
to fading and atmospherics which continuously change the time delay of the
received signal. Not so with LF broadcasts which work by ground wave.
You can establish an extremely precise frequency reference by way of WWVB.

Anyway, it works in Europe!

Andy

Hi...
Seen the 12 tower Detroit array myself down in Allen Park, MI...and there are a multitude of 8 and 9 tower configurations in Southern Ontario (which may have the highest concentration of engineers'-nightmare arrays in the Western world). Both CFTR/680 News and CHOG/AM 640 Talk in Toronto have nasty-looking 8-tower setups along the south shore of Lake Ontario these days, shooting north toward downtown Toronto across about 25 miles of open water. And there's a 9 tower array (three rows of 3) in St. Catharines that's used to shoehorn a station in on 1220 without clobbering WKNR in Cleveland.
Don't know of anyone now using more than 12 towers, but there was an application a few years ago for a 17 tower array that WCHB (1200 AM) in Detroit was planning to use when it changed frequency and went to higher power. The FCC gagged on that one. They got higher power (I think 25 kW days, 2.5 kW nights; they wanted 50 and 5) but they had to use a simpler array to convince the FCC it'd remain stable. John Arnold, WCHB's midday talker, told me once that the system they WANTED to build had lines of towers across a main road, in a wierd alignment...he never thought they'd get it built, and he was right.

Bob Smith, middays WXXI-AM 1370 Rochester NY

1388. WWVB (60 kHz)

Newsgroup: rec.radio.broadcasting

Source record: 26132

WWVB (60 kHz) with its' 13 kW of power has problems toward the Northeast US. However, the remaining sections of the Continental US and Western Canada get a fine signal. It is been documented that many attractions at Disney World in Florida and Disneyland in California use WWVB's signal to precisely time out the various "stop-sets" needed to secure an orderly transition for "foot-traffic". In essence, for example....."The Abe Lincoln Exhibition" is timed through the courtesy of WWVB/WWV and WWVH using receivers that automatically search for the strongest signal at a given moment. No doubt they might switch for the new GPS system. For the rest of us, the WWV stations will continue to serve our various needs for several more years. I did get WWVB about 4 years ago using a modified digital shortwave receiver. The signal here in the Northeast was minimal, at best. But considering the pitiful 13,000 watt signal.....not bad. If WWVB could go ahead and power-up their signal, the entire US and Canada should be covered nicely. "An exercise of futility" as one poster wrote, I think not. Longwave is simply 75% ground wave and using WWVB digital format to activate special watches will work in theory. Whether it can be done PRACTICALLY, is.....well, another question. BTW: WWVH in Hawaii uses the signals of WWVB to accurately synchronize time and frequency standard with WWV, since both WWVH and WWV use the same freq's at the same time. Amazing, is it not ? Personally, I use WWV/WWVH to set my timepieces and use their frequency-standard (10 MHz) to calibrate all of my electronic equipment (i.e.-frequency counters, et.al). 73's !

1389. WYNY (NY) Format Change

Newsgroup: rec.radio.broadcasting
Date: 1996-02-04 00:00:00 UTC
From: salucce@ix.netcom.com
Message-ID: <4f1bg7$cn0@vixen.cso.uiuc.edu>
Source record: 26133

References: <4esfec$m6a@vixen.cso.uiuc.edu>

Attention, Tri-State Area Listeners!!!

It's the announcement we've all been waiting for. WYNY, or "Country 103.5" as it's now know as, announced on Saturday morning around 7 A.M. that it will go "off the air" as a country station and as WYNY effective 5:30 A.M. Monday morning.

Much of the day Saturday was spent with key on-air talent reminiscing about the past 9 years at the station, along with listener call-ins. It kind of reminded me of the last weekend WABC had in March of '82 before they decided to adopt an all-talk format after decades of playing Top-40 music.

While I don't listen to country music, I do feel for the listeners. After all, New York may be a very urban town, but there's always enough interest for a country station to get some ratings. The listenership has no place else to turn to now save for perhaps the Nashville Network on Cable TV.

The big question that remains is: What will 103.5 start doing Monday morning? I'm rooting for an all-'70s station, or even a "rock oldies" format. I know some of you out there would like to see a Top-40/Dance station. Well I'd be happy with that too. Either way, I'll be listening to a station I really wasn't tuning in before. This will broaden my choices which were severely limited recently with the turning of WXRK and WPAT.

The other rumored format was an all-news station. While that would be great to hear on FM, and the only other place I've been to which has one of these on FM is Atlanta, I don't foresee this happening being that NY is already saturated with 3 full-time news stations on AM.

May the best format win.

1390. CBS Radio/Superbowl trip

Newsgroup: rec.radio.broadcasting
Date: 1996-02-04 00:00:00 UTC
From: jgallagh@interserv.com
Message-ID: <4f1bg1$cme@vixen.cso.uiuc.edu>
Source record: 26134

I was fortunate to be one of 800 advertisers from around
the country to be part of CBS radio group's annual
Superbowl trip.

Most of us were advertisers on their major market
stations in Boston, NY, Philly, Chicago, LA and
San Fran; and they had a few sales and management
people from each station as well as winners of on-air
contests.

CBS Radio execs did an outstanding job organizing and
orchestrating several days in Las Vegas, followed by
a flight to Arizona for the Superbowl game in Tempe.

The Sales Managers and Gm's from their stations served
as Trip coordinators and I was amazed at how well
organized this event was. It's not easy to keep 800
demanding advertisers fed and entertained for three
days.

To get the trip, you had to buy a major ad schedule in
the first quarter. I am not typically a large radio advertiser
for my businesses, but the trip package incentive
obviously worked--I bought it! I was so impressed that
upon my return, I placed an additional $ 50,000 order on
WBZ in Boston, and for good measure, threw in an
additional $ 40,000 buy on sister TV station Channel
4 in Boston. (This 2nd tv buy was going to go to
a different Boston TV station but at the 11th hour, the
salesman pulled a bait and switch on me, jacking up
the agreed-upon rate by $ 100 per spot.)

Most of you know that CBS radio is the combination of the
old Group W network, combined with the stations formerly
owned by CBS, Inc. Group W actually did the acquiring but
wisely decided to assume the CBS name.

CBS Radio is definitely the premier group of radio stations
in the country. A very class act.

LASSO THE MOON GARY MORRIS

That's just a start on what we come up with here.

eric clapton tears in heaven and rebba love will finds it's way
make a great seque also

truely utahs variety station, we have post it notes on the cd's so that we won't play something that someone has already played. Our library is not vast so it makes it hard, and we also have which songs can be played on a particular cd. Some cd's are limited to only one or two cuts.

a truley interesting variety of music. You never know what you'll hear.

have fun

the dislectic plectic plastic DJ
you can call me plastic man :)

I'm not going to tell you that I am the engineer

1393. Blind people in radio? I'm not alone, EAH!

Newsgroup: rec.radio.broadcasting
Date: 1996-02-04 00:00:00 UTC
From: aws@netcom.com
Message-ID: <4f1bf1$ckh@vixen.cso.uiuc.edu>
Source record: 26172

Exp
ires:
Distribution: world
Organization: Netcom Online Communications Services (408-241-9760 login: guest)

Hello to all,

Several days ago, I found several postings on "blind persons in
radio." I am a 23-year-old blind student at the University of Georgia,
majoring in telecommunication arts. I'm focusing my studies on radio
production and managment, but also work as a news reporter for
WUOG90.5FM. I anchor and report the news, and produce a weekly half hour
news feature show called Athens A.M. on 90.5F.M. Since radio is where it
looks like Im heading in life, it was nice to hear the news that I'm not
the only one. The universitty has been real helpful, in letting me work
at the radio station, but being such a hard field to get into, for a
sighted person, it can be a backbreaker at times, for someone who is
disabled. If anything, I can say the challange makes one a stronger
person. As long as the employer see that...

I would be intrested to find out some other ways, in which people
with disabilities have crossed the rough watters of the radio industry.
There were only a couple of posts which directly addressed the
adaptations which had to be made, or at least that was all the posts
which I could find on the topic. I look forward to hearing any news.

Anthony

1394. Cool New Book On Radio's History.

Newsgroup: rec.radio.broadcasting
Date: 1996-02-04 00:00:00 UTC
From: Bill P <rrb@clm.aiss.uiuc.edu>
Message-ID: <4f1bf2$cki@vixen.cso.uiuc.edu>

One of the best surprises that came with the new year was a new book called "Blast From The Past: A Pictorial History of Radio's First 75 Year" by B. Eric Rhoads. This book was obviously a labor of love from Rhoads who is the publisher of Radio Ink which most of us know, is a radio trade mag.

My first impression of "Blast" is that it's huge. It is probably physically the biggest book on radio that I have ever seen. It's a coffee-table size and is a little over an inch thick and hard-bound. I could tell this was going to be a treat just by the cover, which was covered with photos of radio stars from the past and from today. Inside, the fun really starts. The book has forewords by Paul Harvey and (even) Rush Limbaugh.

I expected a ton of text, and there (thankfully) wasn't that much! I didn't want to read another radio encyclopedia :-). This book has sufficient running text which tells the story of radio chapter by chapter and decade-by-decade. It's just enough.

Here is the real payoff. This book is packed with photographs.
The book claims to contain over 900 photographs in its 472 pages! Most of the photos I've never seen before. Not the usual stuff, for sure.
Most of these books have the same old network PR shots but
Rhoads said he 'scowered basements and boxes of numerous personal collections and archives to find photos never before seen'. The photo quality (and paper) is superb and promises to last a long time.

Each chapter covers a decade. From "Pre-20s" (covering events leading to radios invention), through Marconi, Tesla, Stubblefield, and more. The book makes a strong case against Marconi's claims as father of radio.

Rhoads has compiled more KDKA photos than I've ever seen before, and photos of 9YI in Iowa, WHA (9XM) in Wisconsin, Charles Hearlds KQW and more. Not only are there photos but other important papers like the newspaper ad about KDKA's first broadcast, a rare script from John Barrymore, a floorplan of KDKAs new studios, a program from a Toscanini broadcast, and much more.

Each decade is filled with the same quality photos of radio stars, directors, studios and even shots of vintage equipment (for the techie nerd types like me). This is the first book I've seen showing photos beyond the forties and radio's golden age. This one covers the rock and roll fifties, including quiz show scandals and payola hearings in the sixties. It ventures into other formats like progressive, top forty, boss radio, disco and beyond. All t he way to the present day where it shows hundreds of personalities of talk radio, network radio, and many local personalities. Rush Limbaugh, Howard Stern, Don Imus, Tom Bodet (I always wondered what he looked like), and more.

This is a book you can't put down and is quite frankly a staple for anyone who loves radio. I rarely suggest a book, but this one warrants your consideration.

If you are a radio history fan, but want a light (yet informative) read, drop Eric Rhodes a line at Eric_Rhodes@aol.com. If you wanna order this great book, you can call 800-226-7857.

Oh Yeah, almost forgot, its also got a fantastic radio fan directory in the back. Its about eight pages of listings of collections, museums, clubs, suppliers, and so on.

Enjoy it. I did.

>application, and make sure you put in the ad, "XXXXX is an Equal
>Opportunity Employer and also adheres to Affirmative Action
>guidelines."

Additionally, the FCC prefers that you track your leads as well. For example, if you're station is mostly staffed by white males and you advertise your openings in magazines or newspapers read mostly by whites (Klan Monthly News) you're doing a poor job recruiting/soliciting minorities/women and are expected to change your methods. If you're under represented and you can't show that you're getting a lot of minority/female applicants, you're presumed at fault.

Also, broadcasting on-air announcements generally aren't useful in demonstrating an attempt to hire a more diverse staff. Your station demographics are probably rather narrow, so you're only advertising to a demo that's probably well represented already.

The absolute worse thing you can do is hire by word of mouth, it's also presumed that people tend to acquaint themselves with similiar people (I'm a white male, most of my friends are white). This puts minority candidates at a disadvantage if I hire that way.

MORE CUTS AT KMOX RADIO
RANK AND FILE MEET AGAIN

by Scott Simon

ST. LOUIS --- Vince Schoemehl and Harriett Woods are the latest casualties as the cuts of per diem on air talent continues at News/Talk KMOX.

Schoemehl, the former three-term St. Louis mayor, joined the station two years ago to host on Sunday from 4-6 p.m. a past Missouri lieutenant governor, just started this past fall, hosting an hour each Sunday from 9-10 a.m. Schoemehl's time will be filled by Charles Brennan, while the Woods slot will be filled by the extension of Total Information A.M.

Meanwhile, the rank and file at KMOX met with AFTRA negotiators last night to outline details of a new proposal. There may be a new job description for on-air reporters as a staff position under an AFTRA scale. Currently, news reporters are employees of CBS/KMOX, and receive a smaller AFTRA fee than their staff and news announcer colleagues.

But the sticking point with the rank and file may be the proposal by KMOX for a mandatory six day work week, and other takebacks that still aren't being disclosed. Another negotiating session is being held today at 10 a.m.

According to an anonymous KMOX on-air talent, "there is some progress being made, like the new description and scale for reporters. But others aren't in favor of the six day work week.

"We'll know in an hour Friday whether or not KMOX accepts what we're offering."

There is talk of informational pickets being set up outside of KMOX, in lieu of a strike. Earlier this week, KMOX general manager Rod Zimmerman told the St. Louis Post-Dispatch that they are continuing negotiations in good faith with the union.

1399. AM stereo Sony Walkman

Is it really true that Radio Shack sells a Sony Walkman with AM stereo? I read about it in this news group. I then went to my local Radio Shack in Scottsdale and the salesmen I thought I was nuts. Three of the salesman on duty claimed that AM stereo does not exist, and I could not make them believe that it really does. Does anyone know of any other store other than radio shack that sells a Sony Walkman with AM Stereo?? and for how much money???

* Prime Sports Leaves Boston radio :

What a difference a week makes. On Friday 1/26,
the Boston Globe's Sports section contained an upbeat
story('WBPS is gaining') on a all-sports WBPS AM 890 landing broadcast
rights for the brand new pro soccer franchise(New England Revolution)
which will debut this spring. This morning(2/3) the Globe's 3-column
piece on WBPS was titled : "WBPS goes off the air next week".

According to the Globe and my own very reliable source, here's why
WBPS AM 890 which debuted last February as Boston's second all-sports
signal will cease to exist as early as next week :

WBPS AM 890 is owned by Douglas Broadcasting out of Palo Alto, CA.
Since last February, Douglas has been leasing WBPS to Texas-based
24-hour Prime Sports Radio network. Prime's Boston staff was working out
of WBPS' studios at Flagship Wharf in Boston's Waterfront section.
Most of the WBPS' daily programming included PSR's network feed. The
only exception was a local weekday morning 6a-9a round-table/discussion
show hosted by Mike Evans and Ricco Petrocelli. Also, two months
ago Prime financed to upgrade WBPS' signal.

Last month Prime management asked Douglas to reduce their leasing
rates. After numerous attempts to rewrite and negotiate a new
contract with Douglas Broadcasting, a stalemate was reached and
Prime pulled out by buying out the remainder of their existing lease.

As of Monday(2/5) at 5pm, Prime Sports Radio will have vacated
the premises at the Flagship Wharf studios of WBPS 890 AM.
All Prime staff members: air, production, sales and support staff have
been given their walking papers and the station will now be run
by Douglas. No announcement has been made regarding the format.
[The Globe is reporting a possibility of ethnic language or
religious/inspirational format coming to 890; most of Douglas' other
stations around the country, lease their time to these kind of
formats]. Prime Sports Radio's will run straight network feed until
early next week.

Prime debuted in Boston last winter hoping to put a dent into American
Radio' all-sports SportsRadio850 WEEI AM 850 ratings supremacy. WBPS
undertook a massive marketing campaign over the past year : original
call letters WBMA were dropped in favor of more fitting WBPS(Boston's
Prime Sports); ugly blue+gold WBPS ad signs have been plastered on
almost every city bus; a Web homepage(www.wbps.com) was about to be
unveiled later this month; In addition, WBPS aired some of #1-ranked
UMass basketball games[whenever WBZ-AM had conflicts with the

Bruins broadcasts], Boston Blazers lacrosse games, and
was getting to air all of Major League Soccer's New England Revolution
games starting in April....However, WBPS' 24-hour sports programming
never made any kind of impact in the rating books.

Prime will *not* seek a new affiliate in the Boston market. However,
that doesnt mean that the Boston market will have a single all-sports
station(WEEI) for very long. Rumors are hot and heavy that an all-sports
format(under new but very familiar ownership :-) is headed to
WKOX AM 1200 once the station gets up to 50,000watt sometime this
spring...

-Mark

1403. Buffalo/Toronto Radio Watch(2/2)

Newsgroup: rec.radio.broadcasting
Date: 1996-02-04 00:00:00 UTC

Message-ID: <4f1bes$ck6@vixen.cso.uiuc.edu>
Source record: 26182

Happpenings in the #40 market:

*Giving 'em a big "Kiss"....

The Buffalo News' neXt section(geared to kids & teens)ran the results of a survey of some of its listeners(over 400 responses)in the January 30 edition. When asked what station they felt was the best,WKSE(Kiss 98.5)was the winner-with WEDG(103.3 the Edge)and WBLK(93.7)close behind. As far as air personalities go,Kiss' AM driver,Janet Snyder,was the clear winner(her partner, Nicholas Picholas,was named by only a few of the respondents). DJ Hukher,night jock at WBLK,was second,followed by the duo of Ted Shred & Tom Ragan on 103.3 the Edge.

*And now,a first-the first instant Muckoni of the yaer(and,ever). Now,you don't have to wait until December to find out who gets 'em!(As always,no offense to the NAB,the nominees or winners of the Marconi Award.)
The Hit the Books award goes to an unnamed sports-talker at WGR(not one of the famous ones,BTW)for suggesting that Bills wide receiver Russell Copeland-in trouble with the law for a domestic incident-who suggested that he go to Nebraska to continue with his antics. Besides being a lame(IMO) attempt at sarcasm,he's wrong. Once an athlete's eligibility is used up, you can't particpiate in college games as an athlete again-even if you leave early(in most cases)to turn pro.

*Most of the rest of the action this go-round is out of the market:

-Toronto's CFTR(680 News)has jumped onto the I-Way. You can now reach them via e-mail at: 680news@rci.rogers.com .

*Doug Guyer is leaving the PD post at WNKI(106.1,Corning)to take the same job at a new 100kW station in Cheyenne,Wyoming.

*Becky Meyers,who was promoted from promotions director to interim PD at Utica's WSKS(102.5,CHR;Kiss 102),now has the post full-time.

*Dave Edwards,PD at Syracuse's WNTQ(93.1,CHR;93 Q)is reported to be one of 5 contenders in the running for the PD job at Kansas City's KMXV,according to the AllAccess Web site.(The previous 2 items are from AllAccess as well.)

*In the radio w/pictures department:
-Erie's WFXP(ch.66,Fox(formerly WETG))was sold by Erie Broadcasters Inc. (headed by James Kelm)for $5 million to Jason Elkin of Atlanta,who has no other broadcasting holdings,as Broadcasting & Cable reported in its 1/29 issue.

*Also sold was WABY(1400)and WEMX(94.5)in the Albany area. WEMX went for $590,000,while its sister station went for $200,000. The new owners are

DOT Broadcasting,based in Clifton Park,NY,which is co-owned by William Hunt (its VP)and Paul Bendat(the president/CEO & half owner of WEMX). WABY was owned by Schenectady-based Bendat Communications & Broadcasting(of which Bendat was-you guessed it-president & half-owner),which still owns WKLI (100.9,AC;K-Lite 101)and is trying to sell WUTQ(1550;big bands)and WOUR (96.9;AOR)in Utica,while WEMX was owned by WRAV Inc.of Fort Lee,NJ(the station's debtor-in-possession,headed up by Jeffery Busch). The stations simulcast WABY's MOR format at present.

Hamilton news from Sean Healy(shealy@uoguelph.ca):

Changes a-brewin' at CHML, and Talk640:

The CHML morning show will now be hosted from 5:30am-9am by John Hardy and Lisa Bryant. Lisa was there before, John comes from the afternoon shift.
Moving to the afternoon shift(4pm-7pm)is Brian Wood, who also does the weather on CHCH. Brian was a regular to the morning show, handling the weather reports. He has co-hosted the morning show with Lisa when Bob Brattina was doing Hamilton Tiger Cat broadcasts or on vacation. (BTW, both of CHCH TV's weathermen are now on the radio---Matt Hayes is co-host of the popular "Sunni and Hayes" show on 102.9/K-Lite FM (CKLH).) Wayne McLean is handling the 7pm-9pm duties until February 7, when Bob Brittina will begin his new night talk show from Toronto. The show will orginate from the Talk640 studios, and be broadcast on both stations similar to Roy Green. Bob has hosted several talk shows in the past, on CKOC (1150/Hamilton) and for a short time on CFRB/1010. No word on whether Wayne McLean will be leaving. (I assume he will, because he'll just be preempted by hockey/basketball nights if he stays. That's why Dr. Laura fills the 9pm-12am slot now.)(The only guess I can make is that Bob's show will be sports-based.)
These are odd changes, considering CHML was quite successful during the last ratings period. I assume they are financially motivated. By moving Bob Brittina to 7pm-9pm on the Rock Radio Net, CHML will only require a board operator to plug into either their sports or talk show programming. They still run infomercials between 12:10am-12:35am daily during the week.

Also:
-Bill Kelly drops 1 hour from his shift. He now runs from noon-2pm. The 2nd hour rotates guests from a variety of fields(i.e.finance,cars,etc.)
-Dr.Laura Schlessinger's show now airs from 2-4pm. Apparently,the 9pm-midnight slot will be filled with another show.(BTW,that was the same slot it aired on WWKB in its hot talk incarnation.)
-For the night owl set:David Victor's show airs from 12:35-3am,and is geared to local issues...but,as Sean puts it,"on the occasions when I've heard this show,it sounds like a bad episode of WKRP. Victor has guests in the studio or by telephone;last night(Tues.),he had a guest from Theater Aquarius,a local Hamilton theater group. After the 1am news,he rushed to the phone to take a call from someone who had sat through the entire newscast. It was a high-school student who called to say she enjoyed the Phantom of the Opera. She really didn't have anything to say about Theater Aquarius and

left shortly after that...Victor and his guest just went on rambling. :) "

(BTW,CHCH is on the Web at: http://www.chch.com/ .)

TTYL...

From: transvox@crl.com
Message-ID: <4f1bes$ck7@vixen.cso.uiuc.edu>
Source record: 26183

Yet another step has been taken in the impending breakup of a longtime radio-TV-newspaper combo in Topeka.

On Monday (Jan. 29), Stauffer Communications filed its application to sell WIBW-TV along with eight other full-power and four low-power stations to Benedek Broadcasting of Rockford, Illinois.

The sale comes in the wake of Morris Communications' purchase of the Stauffer chain and its previously announced plans to sell off Stauffer's broadcast stations. No sale price has been announced.

No plans have been announced so far for the sale of WIBW-AM/FM in Topeka. The AM bills itself as the "Voice of Kansas" with a 5,000-watt signal at 580 KHz blanketing most of the state with news and farm information.

Stauffer's other radio stations are KGNC-AM/FM in Amarillo, Texas. During the 1980s, it slowly shrank its radio empire, selling stations in Coffeyville, Kansas; Des Moines, Iowa; and KGBX(AM) (now KTTS) in Springfield, Missouri.

One of the TV stations being sold is ABC affiliate KMIZ (channel 17) in Columbia, Missouri. WIBW-TV is a CBS affiliate on channel 13. Other Stauffer TV stations are in Wyoming, Colorado, Nebraska, and California.

****

The Kansas City _Star_'s feature today (Feb. 2) on the fall Arbitron survey adds the following to information I had already reported:

* Country KFKF(FM) fell from first to second in the desirable 25-54 demo; KCFX(FM) is the new king of that cohort.

* News/talk KMBZ(AM) was the top-rated AM station among listeners 25-54.

* 12+ figures for stations that I had not reported previously: KCCV-FM (0.9, contemporary/gospel); KCCV(AM) (0.8, gospel/talk); KCTE(AM) (0.8, all-sports daytimer; its first appearance in the "vanity" numbers).

****

Kansas City broadcasters are promoting a "Careers in Radio" seminar, to be held at the University of Missouri-Kansas City campus on Feb. 12.

Announcements heard on WDAF(AM), among other stations, emphasize that "minorities and women are strongly encouraged to attend" the seminar, which focuses on off-air positions such as sales, promotion, engineering, and administration.

Sponsors of the event are the Kansas City Radio Broadcasters Association, the United Minority Media Association, and the Radio Advertising Bureau.

****

The locally based "Computer Beat" talk show has added an hour weekly to its schedule on gospel-and-talk KKLO(AM).

Host Andy Graham reports adding a Monday drive-time slot for

the show in addition to a weekly hour on Saturday. "Computer Beat"
is now on at 4:05 pm Mondays and 5 pm on Saturdays.
****
More station pages to browse:
* KKLO(AM), at http://www.grapevine.com/beat/kklo.htm (includes a
daytime coverage map and the station's schedule, including a daily
talk show about trading cards and a weekly talk show about comics)
* KMBC-TV, at http://www.kmbc.com/index.html (this is not Channel 9's
initial home page; if you leave the index.html filename off, you'll
get an extremely annoying "click here" graphic that imparts zero
meaning and wastes your time and everyone's bandwidth!)

From: Radio Geek-NY <70034.1676@CompuServe.COM>
Message-ID: <4f1bes$ck8@vixen.cso.uiuc.edu>
Source record: 26184

Can anyone confirm or deny the following NYC/LI radio rumors:

OK, it's a fact that WYNY 103.5 is dropping the country format.
--what's next?

WDRE 92.7 is changing from modern rock to country. Is it true?

WAXQ (Q-104) is nixing the "pure rock" format. Can it be?

It sounds far-fetched, but WPAT already went Spanish AC, (and
sounding pretty good; I think there will be a lot of cross-over
listening from non-Latinos). K-Rock went alternative and would
sound even better with live jocks.

What's next? NY radio's going nuts! Any other rumors out there?

I don't watch Melrose, so this is all I have:-)

This week in the Norfolk/Virginia Beach, Virginia (aka Hampton Roads, aka Tidewater...):

Mike Arlo, a fixture on WNOR (FM99) since 1981 is moving to sister station WAFX. He'll move into the 10 AM to 3 PM slot. WAFX's format is Classic Hits from the '60s, '70s and '80s.

Taking his midday slot at FM99 will be Sabrina, who had the 7PM to midnight shift.

Also...

WTAR-AM790 has dropped Imus in the Morning in favor of a local news drive time format. Imus replaced a popular Pat Murphy just nine months ago. That left WTAR without a local news/talk show in it's lineup.

Virginia Beach, VA

1407. PHOENIX RADIOWATCHERS 2/2

Newsgroup: rec.radio.broadcasting
Date: 1996-02-04 00:00:00 UTC
From: Michael Hagerty <Michael_Hagerty@azfamily.com>
Message-ID: <4f1beu$ckc@vixen.cso.uiuc.edu>
Source record: 26186

"BLAZE" BOUGHT: Rock KBZR(103.9) sold Thursday (2/1) to a group including consultant Jerry Clifton. Price and future plans for the station, which moved into the Phoenix market from Casa Grande, 60 miles south, less than a year ago, not disclosed. The studios moved to Scottsdale, the stick to Apache Junction, 50 miles east. The signal is still marginal, and is being augmented by simulcasts on two other frequencies, a repeater at 99.3 and KRIM, Payson(90 miles northeast of Phoenix, with a strong signal into the northeast Phoenix metro) at 104.3. Further signal upgrades will be needed to make this a major player. The purchase follows last week's ouster of Ernesto Gladden as Blaze PD.

CLAY EDGES OUT: John Clay, PD of alternative KEDJ(106.3)"The Edge", has parted company with that station...he says he'll stay in town to consult radio stations and work with local bands.

CHICAGO BOUND?: Country KMLE(107.9) morning duo Tim and Willy have confirmed that they are being courted by the former WLS-FM, now "Kicks Country" WKXK,in Chicago.
Big bucks, big market, big temptation...but no deal just yet.
"Kicks" is also rumored to be trying to steal afternoon drive talent Stu Evans from KMLE, a one-two punch that could
have devastating effects on the station, which is locked in a tight numbers battle with KNIX.

KZZP: The rumor that just won't die. With new GM Paul Talbot taking the reins at Nationwide's Hot AC KVRY(104.7), something's gonna change...and the legendary former calls...KZZP...keep getting whispered.
The station owner in North Dakota who has the rights says he'll sell them for the right price. Talbot was Johnathon Brandmier's news guy when Brandmier did wakeups at
'ZZP in the early '80s...now the buzz is that if he does resurrect KZZP, he'll go all the way by picking up Brandmier's syndicated morning show from Chicago...or, if the conversation comes soon enough to capitalize on the current (2/2)cold wave, by trying to convince Johnny to trade sub-zero Chicago for 70 degree Phoenix(give or take 50 degrees). Stay tuned!

TELCOM REFORM: Quick math: Phoenix falls in the category where one broadcaster could own up to 7 stations, no more than four per band. Taken to its logical extreme, all the full-power commercial FM's in market #20 could be owned by....FIVE....YES,
FIVE...companies...with one having room for one more station.
But...it would be expensive. A recent Charlie Van Dyke Column in the

Arizona Republic put the "stick value"...just the price of a license...for a full-power FM in Phoenix at $20 million...a real-world, equipment and other assets sale would be $30 million or more. Who's got $120 million to spend(before buying the 3 AMs to go with the FMs)? The answer may come in the next few months.

1408. San Diego Radio Watcher 2.2.96

Newsgroup: rec.radio.broadcasting

Here's the latest in Waves from San Diego:

SEXIST BATTLE:
Jeff and Jer of KKLQ LOST a bet to Laura Kane in an on-air battle of the sexes. The 'friendly' bet was: who is the best. The contest pitted callers against each other with questions about the opposite sex. As the contest ran, it ended in a dead-heat and the final round stretched into a seven-extra inning stanch. The women won -- and Jeff & Jer -- as part of the bet, have to wear women's clothing, and serve drinks for one hour. [KKLQ FM 106.5, San Diego, KKLQ 1320, Oceanside]

RADIO SKYLINE CHANGING: Is Fine Arts KFSD 94.1 for $ale? The only 100k FMer in San Diego has been the rumor of more than a year to be for sale. Reports about this time last year had the the station sold to Par Broadcasting. But the Fine Arts format survivied . . . until confirmed "winds" have the station as part of the San Diego radio skyline change.

Classical music lovers in the county might not have much choice for listening . . . as the San Diego symphony is teetering on folding.

Here's recent proposals or changes: KCBQ A/F [plus others] to Par Broadcasting [Par owns: KKLQ FM, KOGO, San Diego; KKLQ, KIOZ Oceanside] KHTS, former religios broadcaster is LMA'd to JACOR. The station is currently relaying WDUV, Brandenton, Fla. KIOZ-FM from Par Broadcasting to Compass Media. [It's part of the Par buy of KCBQ and other stations.] KiFM, Jazz 98, to KSON's parent company Jefferson Pilot. KBNN [Julian] sold to a Sacremento, Calif., base religious broadcaster.

A SILVER LINING: Funny-guy Brian Whitman and side-kick and producer Jack Silver, start Monday at classic rocker, KGB, 101.5, in San Diego. The former morning-team at KKBH were on a trans-continent tryout at KLSX, stations in Chicago and other points east.

No word if Hal "9000" Abrams will join the team at KGB.

DISCO IS DEAD, LONG LIVE R&R: [verbal dart alert] Finally reading and understanding the ratings numbers, KKBH officially shifted music format. This was also noted in San Diego county newspapers, but readers of Airwaves and subscribers to the San Diego Radio e.mail list have known about the change . . . since the first of December. The 'Beach takes on number-two rated KyXy. [http://www.thebeach.com]

Hi-Energy Talk: San Diego listeners who desire a local live talk show after 5 p.m., have one station to tune to: KFMB-AM. The Mike Berger & Jeff Prescott show until 8 p.m. Fast paced and funny, the team has made a sucessfull transformation from spinning records.

RADIO GROUP: The San Diego radio e.mail list is available by sending a self-addressed stamped e.mail to: sdradio@sd.zNet.com, or sdrw@aol.com. It's made possible, in part, by the LA Radio Guide.

OUCH: Due to a software problem, my home connection is down until I recover and re-format. I'm hopeful to be up and online at home next week. "I want my OS/2 back!"

Hello,

I'm in the process of developing an audio tape about becoming a Radio Announcer and was hoping the members of the forum could help me decide on what to include in the audio tape.

Please e-mail your responses, or post them here.

1. What things do you think should be covered. I have outlined the following.
Speech communication
Voice diction
Announcer
2. Have you ever heard of a tape covering this subject?
3. What did you think of the tape?
4. This 60-minute tape will include a special report. Would you pay $13.95 plus shipping and handling? If you think this price is to high, what would you be willing to pay?

Thanks in advance, I look forward to hearing fro you.

Besides that problem of hearing the audio of an audio-VISUAL production (voices not named, phrases like "Here, you can see what the damage looks like....."),. the quality of the sound is rather tinny. The announcers aren't cozying up to radio broadcast mikes -- and the sound is rather hollow and distant, yea, aloof -- not the desired character of a radio broadcast: Up close and personal.

The AVC or Limiter circuits in AM radios are volume controls based on RF signal strength, with the intend being to reduce the difference in RF level of different stations before the signal is detected. The control signal is RF based usually without regard to the instantaneous RF modulation envelope, but rather the average RF level. This is not a volume compressor as applied to audio, and does not have the same effect as broadcast processing.

I'm quite sure you know this, Hank, but I thought a correction should be made to your statement.

There are many other ways of doing fast limiting without clipping. Two examples are lookahead limiting (e.g. BBC Delay Line Limiter, Waves Ultramaximizer) and my Hilbert-Transform Clipper used in our television and shortwave products.

It turns out that while these techniques may work well with flat program material, the sort of patented distortion-canceled clipping that is used in the Optimods is the best I have found for peak control of pre-emphasized media such as FM and AM (with NRSC pre-emphasis). This doesn't necessarily mean that some future invention cannot sound better, but simply that clipping (particularly of the distortion-canceled variety, where low-frequency clipper-induced distortion is removed) is quite powerful.

Most of the other techiques trade clipper-induced harmonic and IM distortion for overt pumping, which is a sort of low-frequency IM distortion when you get right down to it. The Hilbert-Transform Clipper, because it eliminates harmonic distortion, is more effective than straight clipping on voice (which is primarily degraded by harmonic distortion) but less effective on music music of its higher IM distortion by comparison to simple clipping. That's why we use it only on processor optimized for voice. (That's a bit oversimplified, because the TV unit uses a sort of hybrid which applies Hilbert-Transform clipping to the midrange and simple clippling to the high frequencies to prevent serious performance compromise with music.)

I used to work at WCCC-AM & FM in Hartford, long after Bill Savitt sold the stations. The call letters stood for the attributes in a diamond: Color, Cut and Clarity. Well, I guess you could add Carat to that, so I'm not sure which three he had in mind.

Bill Savitt ran the stations as local stations and was never interested in raising the power or extending the hours of the AM station, which remains to this day a daytime 500-watt station at 1290. The FM signal gets out and covers both Hartford and Springfield markets more than most Hartford stations.

The art of being a friend on the air, while entertaining listeners is a fading art. Where will major market stations draw the talent for their staffs in the years to come? They'll still come from the smaller markets but unlike the "self contained" personality, they'll be the ones who use "phoners" to supplement their shows. They'll be surrounded by 2 or 3 other people fighting for mic time and if their tape deck or digital editor breaks down, they won't have a show. Anybody over 40 who grew up in New York listening to WABC, WINS, WMCA and WMGM had some incredible talent as role models.The evidence of the fact that it works is that these people are still around and are still doing what they've always done. When was the last time you heard Dan Ingram, Ron Lundy or Harry Harrison do "phoners"? The success of the Drake format stemmed from the fact that everybody on the air thought they could be Gary Stevens or Bruce Morrow without realizing the importance of word economy. Better to have airwaves filled with tight well produced nothing than with Ingram Juniors foaming at the mouth. We're coming full circle again. The preponderance of yacky noise, much of it on the phone, is a reaction to the lack of personality over the past 20 years, as well as a feeble attempt to mimic the success of talk radio. Who's going to be the next Drake to pull in the reins?

I think massive cultural changes would be necessary. It seems almost de rigeur for an air personality to be abrasive and "in your face" these days. Zoom ahead to 1996 and the girl on
the bridge. DO you think someone like Bubba The Lovesponge or Howard Stern would make her smile and change her mind? Not too likely.

Radio production is a total gas, as long as you don't mind very long hours and generally low pay (so what's new in radio?). If you've got a wild creative side, prod can be an excellent way to exorcise those demons. However, be warned: You'll have to do a lot of spots that you think are crap (i.e. client-written spots), and quite often you'll have to sacrifice quality for speed (the meat-grinder factor).

How to get in? Start in a small market until you get your skills built up. Get a tape together with you best stuff and start shopping it around. If you don't have any work laid down yet, your local college station could probably use some help, and you'll get to use their equipment. The best way to learn is to listen to spots that you like and think are effective, then try to duplicate that style.

What does the prod director do? In most small & medium-sized markets, you'll have an airshift on top of the prod. You'll deal with everyone: programming, sales, jocks, GM, promotions, and clients. You'll write, produce, assign spots to talent, and take any heat for missing or otherwise screwed-up spots.

Best of luck. Remember that it's a tough business, and unless you truly love it, you're probably in for an eventual disappointment.

Just to add to what a previous poster wrote, it sounds like WYSP Philadelphia is only running 1 or 2 Greaseman breaks per hour. Sometime after the top of the hour, for instance, you'll hear him do his..uhhh..thing -- then, there'll be music, with him doing a drop ("It's the Greaseman Show! Here's Smashing Pumpkins.. on your Rock Station! 94 WYSP!!"). This is followed by, like, 20-30 minutes of non-stop music, followed by Greaseman telling us to "linger longer for more of the Greaseman, on Philly's Rock Station, 94 WYSP!!"

Yeah, sounds like they'll dump him real soon. Imagine how much easier it is to sell that evening ad space on the station, with less of the ill-rated Nino Greasemanelli.

Darius, developing a playlist that'll fill that HUGE rock-leaning Hot AC hole in the Philly market. I'd show it to you, but then I'd have to kill you :)

1421. Why are stations going alternative???

I was just looking at Arbitron ratings for various markets around the U.S.A., and I noticed that a plethora of alternative stations are either currently in the ratings dumpster, or are headed straight for it. WLUM-FM, in Milwaukee, for instance, seems to have had their ratings slip continuously since they dropped their CHR format. In almost every market that has both a CHR and an alternative, the CHR ranks much higher in terms of ratings. (There are a few exceptions, like Lansing, MI and Denver, CO, and Portland, ME, but in general the CHR ranks much higher.) This leads me to pose the question... Why are stations choosing alternative over CHR?

The Radio Moscow Kremlin chimes are not relayed live, they are off tape.
In fact, the Kremlin chimes PRECEDE the top of the hour, being followed by
an hour-gong like Big Ben etc. (I didcovered this when listening to a
Russian domestic broadcast some years ago).

I assume however (I haven't checked) that they start the tape at the right
time! This is not quite as bad as stations that actually broadcast six pips
off tape!

There used to be a Dutch station that had SEVEN time pips - five normal ones,
the sixth one at a higher pitch (so you thought that was the one to set your
clocks by), and then a seventh one at an even highre pitch and one second long.

Strange!

> a guitar's fuzzbox, which is designed to generate symmetrical clipping?

The audibility of a clipper depends upon several things besides just the
amount of clipping, or how far above the clipper threshold audio is. The
duration of clipping action is very important. If done for a very short
time (like clipping overshoots) it is quite inoquous. If done at
frequencies above 5KHz (where the 3rd harmonic would be 15KHz and above)
the result is fairly benign too. If there is de-emphasis involved post
clipping (like in all FM radios, and AM radios by virtue of IF bandwidth)
even longer duration clips that would normally contain large amounst of
audible distortion are less audible.

Clipping does not necessarily cause square waves. Used judicously, it can
be quite beneficial in preventing overmod cause by short inaudible peaks
that countribute very little to the undistorted waveform. In fact, most
current processors use clipping of some sort by necessity.

Clipping also has the advantage of not changing the gain of all or a
portion of the audio passband, like a compressor or limiter. Since a gain
change must eventually be followed by a change in the other direction,
time constants and rate of change becomes involved, and in most cases
cover more time than normal fluctuations in audio, thus being audible. A
clipper's action is instantaneous, and so long as its action is short and
confined to unlimitable peaks and overshoots, it can be inaudible in
action. Sadly, clippers are often overused, and that's where they get
their poor reputation. The lure of extra loudness causes many to
overdrive clippers and get audible distortion products. It's the same
problem as over limiting/compressing, just a different tool and mechanism.

> My point is that it is not so much processing that I have an aversion

> all the time that it is this clipping process that is probably
> responsible for the lion's share of the garbage sound that is being
> foisted on the public in the name of loudness.

Remember, it's the overuse of clipping you object to. To eliminate clipping completely would require things of fast limiters that make them more audibly objectionable than clipping. I've tried this, it's really difficult to control overshoots with just limiting, even while ignoring the nasty side effects. You wouldn't like it without any clipping, but certainly it is overused as a loudness tool.

> Tell me, oh guru's of broadcast sound <g>, is there nothing in this age of
> absolute digital manipulation of aural information, that can achieve
> the maximum allowable modulation on an FM signal, eliminate
> overmodulation, and not generate pure distortion?
Sure, lots of things, analog and digital. But if you throw competition, ego, and loudness into the equasion, it changes things. Anything tha modifies the envelope or waveform will at some point be audible and objectionable. The method or technology doesn't matter, exept for its programability, control, or predictability. Digital techniques to have some advantages here, some perhaps significant.

> Something
> that can monitor itself and make transparent adjustments (according to

> if it isn't. (We are talking FM here).

This is at some level the definition of design goal of many processors. Most can be adjusted to be completely transparent (or nearly so), OR screaming loud, OR a tradeoff inbetween. It's the tradeoff area that is so subjective and variable. Your preferences can be dialed into, say, an Optimod 8200 for example, and you might be happy. But it's not likely to please everyone. That's why the new processors are so full of user settable variables!

> I dunno but it seems to me that using clipping as a means of 'brick
> wall' overmodulation protection, is like trying to cut a diamond with
> a chisel and hammer. It is hard to believe that someone hasn't
> devised a way to do lossless processing w/o clipping.

I hope I've shed some light on the ins and outs of clipping. I use it in such a way as to provide maximum modulation by controlling short overshoots, but if I hear any clipping distortion, I roll it back. It is, however, a must-have tool, whether built into a DSP based processor, or some external device (analog or digital). The stations I work with do have the final say, though, and some simply want it louder than this, so back up it goes.

>
>I'll bet he likes CUME better....

Two thoughts:

(1) Cume is largely unrelated to what we do on the air, assuming we've got a signal that covers the market effectively. The marketing and promotions department has more effect on cume than do programmers. Put your call letters in front of as many faces as possible: on buses, on billboards, on television. Do remotes from places where people in your community congregate. Get out there and get seen. At WCRB one of the highlights of our year is a live remote on the Esplanade all day July 4, culminating in a live broadcast of the Boston Pops concert just before the fireworks. This is followed by a special broadcast from our studios of music to accompany the fireworks. The crowd usually exceeds a hundred thousand people, and many bring radios.

(2) It's average quarter hour ratings that count with ad agencies-- not cume. AQH is a function of cume and TSL. It seems to me that it must be much easier for a programmer to boost TSL than cume. He can't reach someone who doesn't sample his station, no matter what it sounds like.

The theory's been proposed that regardless of how loud you are, if you're louder than your competitors you'll get more cume. I'm a scientist's son, and I'm willing to listen to the evidence. Produce it.

The information we have from VERY old sales literature from the station... the
call letters stand for ''Covering Central Connecticut''

I don't know if Savitt was the original owner of the station or not. The calls
may have existed prior to his owning it.

2/3/96 - iRock Internet Music Radio was named "UnCool Site of the Day" by
um...er... iRock? Okay, the voting was rigged, but that's no reason not
to stop by and see the newest addition to iRock: The Twisted Mind Pages.
Feel free to stop by and steal anything you see or hear, other than the iRock
name 'cause that's trademarked with the Feds.

iRock traffic is pretty heavy and I do swap links with sites that don't
offend my conservative standards and limited sensibility.

In case you missed my previous announcement, or you've just taken iRock
out of your killfile, the 1/96 issue of Internet Underground magazine has
a feature on Internet Radio.

>
Seletor and Musicscan are the big industry leaders, but they are far from being the best. I worked on Selector for 5 years and Musicscan for three. They both have less than desirable user interfaces, are slow, and difficult to configure. You would need both Musicscan and Selector if you wanted ALL the features.

There is a company in Salt Lake called RSS (Radio Software Services), they have the best musc scheduling around. It has all of the good features of Selector and Musicscan and more. Selector (last time I checked) is about $3500 per year on a 3 year contract. SMARTS will sell you the RSS system outright for $1500. Yes, I'm serious (cheap enough that your GM will love you) and it really is a better piece of software. One of the guys who designed it used to work for selector. Call SMARTS and ask for a demo pack. 800-747-6278 ext. 222, tell Luann you read about it on the internet.

WBZ has had a lot of trouble over the past 12 months. Particularly
in the winter months, gee I wonder why. Most blame the
transmitter...it was broken, we shut it off but somehow it kept
transmitting even though the remote control said it was off.

Our biggest problem is a station that does shut down on time but there
is intereference during the critical hours. One wonders if their
antenna pattern is as it sound be.

1435. StL errors and thanks

Newsgroup: rec.radio.broadcasting
Date: 1996-02-05 00:00:00 UTC
From: Frank Absher <fabsher@siue.edu>
Message-ID: <4f4h1g$n1e@vixen.cso.uiuc.edu>
Source record: 26064

There have been many errors in the recent reporting of St. Louis happenings, and I've been in touch with our moderator about the problem.The most recent misleading statement has to do with station "demands" at KMOX in its negotiations with AFTRA. The report mentions a "mandatory six day work week." This has been in the AFTRA contract at KMOX since I worked there 16 years ago. The wording, if I remember, simply allows the station to schedule announcers to work six days. It is not mandatory.

I don't envy Bill Pfeiffer, but I admire the hell out of him and am truly grateful for the work he does. Like many of you, I'm putting in 50 hours a week and doing heaps of free-lance, so time is limited. Bill's effort allows me to browse the news, much like I do all the trade mags. Please don't assume that he has time to check out all the stuff that's being reported out of St. Louis. There are a few of us here who will endeavor to correct the errors when we catch them. Thanks, Bill, for providing a very important service.

[Moderator's Note: Gee, thanks, Frank. I personally have no first hand knowledge of what is going on with Simon's reports and KMOX. I include his reports, and those of other RadioWathcers without verification, as I do any corrections. Please make your own mids up as to what is what. This is a public information forum and responsibility for the verasity of information rests with the poster. Bill]

1436. Telecom bill outlaws Supreme Court decisions (fwd)

---------- Forwarded message ----------
>Date: 2 Feb 1996 08:56:57 -0800
>From: kadie@eff.org (Carl M. Kadie)
>Subject: Telecom bill outlaws Supreme Court decisions

At long last, the full text of the Supreme Court's _FCC v. Pacifica_
decision is online. This is the decision that constitutionally defines
'indecency'.

The decision itself contains many references to the words that made
the material in question indecent. It also contains a full transcript of
the indecent material.

Under the terms of the Telecom bill, soon to be law, making this
Supreme Court decision generally available is a crime punishable by 2
years in prison and a $25,000 fine.

You might think that because this decision is talking about indecency,
it is exempt from indecency rules. If you read the decision you will
find that there is no such exemption. The material that the Supreme
Court found to be indecent was a radio program about indecency rules.

Welcome to the InfoFuture, where even case law must be kept under lock
and key.

[The decision is available from the EFF's Legal archive.

>My question is: How feasible is it for the college station to do their own testing, or how much

Why would you want to do research for a college station?? College radio is the last frontier for new bands to get exposure. It's also the breeding ground for new music trends. College programming should be as eclectic as the person who is on the air. Their shows should reflect their personalities and tastes. Through that kind of philosophy, a diverse range of programming will enlighten many to the up and coming music trends and expose many more to other styles of music.

How important is college radio? Just ask Soundgarden, REM, Meat Puppets and a whole lot of other bands that have been aroung for at least 10 years; even though they have been popular for the last 2. If you would have tested them back then, they wouldn't have been played!

I worked at WNUR (Northwestern University) and all the music I played was unfamiliar. That's what made my show unique. Not all the shows on that station appealed to me, but they appealed to someone. I must say that the "Music of India" show was pretty damn popular!

College radio can teach the basic fundamentals of radio. However, a majority of the people working at them are doing it as an activity, not a career. Playing the "hits" no matter what format the station is, just makes the college station another radio station. There is nothing unique about it. And if I'm going to hear the same songs on 2 stations, I'll listen to the commercial one because the announcers are more polished and the overall presentation is better.

For the most part, college stations don't have a bottom line. So there aren't any factors dictating programming. Have fun! If you want to play African polka music done by one eyed pigmy's, then do it!!! I will garuntee that somebody will be into it and no other station in the market will be playing it.

>>effective 5:30 A.M. Monday morning......

WYNY was purchased by Evergreen Media. Evergreen is the company which incurred the wrath of Howard Stern by pulling the plug on his show the first time he was syndicated in Chicago.

Evergreen plans to simulcast their star morning man Mancow Muller (WRCX:103.5) on WYNY for the near future while a new format is implemented. (FYI, the format of WRCX in Chicago is rock; REM, Green Day, AC/DC, Ozzy Osbourne-kind of a generic, faceless format) You may remember that Howard and Mancow engaged in a "fierce" battle over the summer complete with a phone which each claimed they "won". Mancow will be broadcasting live from Grand Central Station on Monday February 5 to celebrate his "arrival" into New York.

It should be an interesting battle to see if Mancow "works" outside of Chicago and to see how Howard reacts to his new visitor.

GERRITSEN OUT AT WSIE-FM
NEW KIDS STATION FOR ST. LOUIS?

by Scott Simon

ST. LOUIS --- Roy Gerritzen's, long-time General Manager of Southern Illnois University at Edwardsville's non-commercial WSIE-FM (88.7 FM), was fired last Thursday.

According to a memorandum issued shortly after the dismissal, Southern Illinois University staffer Frank Akers was appointed as the interim manager.

Under Gerritsen's direction, the station's programming became primarily jazz-oriented, and targeted toward attracting St. Louis listeners, even to the point of installing a directional antenna for the 50,000 watt signal toward St. Louis city and county.

It was well-received by St. Louis jazz music enthusiasts. Current KMOX Saturday Night Jazz host Don Wolff and Jim Bolen, the late anchor at KMOV-TV, were alums of the station.

It also was a refuge for the legendary overnight jazz spinner Leo Chears. "The Man in the Red Vest" moved there after his show was cancelled at the now-defunct WMRY-FM.

However, rumors had abounded for months about Gerritzen's future, shortly after the arrival of the school's new Chancellor, Dr. Nancy Belck, in 1994.

She is a proponent of having university resources such as the radio station promote all aspects of this ever-growing campus. One successful project was the return of play by play broadcasts of SIU-Edwardsville basketball. Gerrtisen often criticized any attempt to associate the station with the town of Edwardsville, and sometimes the school itself, and certainly was not a fan of local sports.

Other sources at the university and station tell me that Gerritsen was not up to current standards of univeristy-owned non-commercial stations. They say that his efforts to raise private money to replace declining Corporation for Public Broadcasting funds was extremely weak and non-responsive, often met with resistence from university administrators.

A search for a new manager is underway.

KIDS STATION II? WINU-AM, in Highland, Illinois, may soon be St. Louis' second all-kids radio station.

Sources tell me that radio engineer Randy Wachter, and an attorney, James Gilbertson, have offered to lease the station from current owner Jack Chor. The pair would air "Radio Aahs". Although not officially confirmed, Chor signed an agreement to turn the station over, with some other details still to be worked out.

Chor has been trying to either sell or lease the station for the past two years. He purchased the station in 1991 when it was at 1510 AM, daytime only broadcasting at 500 watts. Chor upgraded it three years ago, switching the frequency to 880 AM, increasing the day power to 1,700 watts, and added a nighttime signal of 160 watts. It was an expensive upgrade, nearly $400,000 for new equipment, transmitters, and four, 440' towers.

Because of that expense, he has struggled to make the station financially successful and wants to return to his financial consulting business.

WINU is located about 35 miles east of downtown St. Louis.

Wachter was the person that put the kids format on WFUN-FM (95.5) in Bethalto in 1993 before having a falling out with owner Bob Howe. Since that time, he has been building his 100,000 watt FM licensed to Steeleville, Missouri, which Wachter also will program with children-oriented programming.

CORRECTION: An earlier posting concerning the hiring of Rocky Marlowe at KLOU-FM in St. Louis stated that he was hired by current program director Dave Dunkin after working together in another market.

Marlowe was hired by former program director Doug Wilson, who left KLOU in late 1994. Marlowe was recently notified that his contract to do mornings at Oldies 103 would not be renewed.

corey alan horob chorob@host1.dia.net

i agree with Juan on this point...MOST classic rock staions don't have
the best mix..HOWEVER, there is an easy way for staions seeking the
25-40 demo to hit the demo on the head...
#1
the latest survey's show that the 25-40 demo love the music they grew
up with (70') but they're favorite songs come from the (80's) see the
latest issue of "RADIO INC" there's a great article on "strict" 70's
format. Logically to hit the demo the best would be to get THE MOST
classic rock music and fitting 80s and 90's music ie HOOTIE, COUNTING
CROWS, SHERYL CROW, MELISSA ETHERIDGE. The biggest complaint that any
classic rock station hears is usually "its always the same song over
and over again", the reason behind that is because classic rock
listeners have a higher TSL. So you find yourself doing what many
oldies stations are doing now, mixing quality with quantity... and an
equally important aspect is the tallent. The classic rock listener is
extremely passionate about the music. More so than the top 40
listener. Remember the TPPP format.

I have tried to remember, over the past year, the call letters for a station I knew in New Britain, Conn. in 1950-52. I was owned by the same owners as WNHC in New Haven---the name Aldo Dedominicus sticks in my mind, and I think he had a brother in with him. (And how would you forget such a name after learning to pronounce it)? The morning man was Wamp Carlson, whose "schtick" was "Uncle Yulius" Scandinavian stories.

Does this ring a bell with anyone?

To quote the press release: Jacor has announced a merger (buyout?) of Noble Broadcasting. The combined organization, financed by a $300M credit line will own 35 staations. Here in Denver, the combined operation will consist of: KOA-AM,, KHOW-AM, KTLK-AM, KRFX-FM, KHIH-FM, KBCO AM & FM and KBPI-FM.The group includes two 50 KW AMs, one a clear-channel, two 5 KW AMs, and all the FMs are class C 100 KW stations. Combined billing for these stations is about $50M.

Thought this might be of interest; I'm sure there's going to be other similar postings on this board from other cities in the near future. Let the games begin!

-Bill

I would say the best way is to get someone who is doing the music at radio station to let you observe them. It seems most are not willing to do this but it would be the best way. I got a P.D who scheduled music to let me observe him. I would make comments to him when he was scheduling and he said "I think you have a knack for this" (Thanks Mike!!) He told me when they got some more money in the budget they would get me a computer. I went out and charged one that afternoon. It was the best investment I made. Just for the chance to do music I had waited about 8 years. No one was willing to teach me the skill or give me a chance. Jump on it when you get yours.

Source record: 26009

Having worked extensivly on both scheduling systems, (Selector & MusicMaster),
I would wholeheartedly reccommend MusicMaster. Here's my reasons:

1. Lots & lots of radio stations use Selector. Why? It's been around a long time.
When PD's & MD's learned to use Selector, they "had it down" It taked the average PD or MD 4-6 months to feel comfortable using the program on a daily basis. Quite frankly, I found it a pain in the ass to learn. When you're in one part of the program, the "F1" does one thing, and when you're in a different part of the program, the "F1" key does something completely different! So many different computer programmers have written code for Selector, it's not consistant.

2. MusicMaster has much less of a learning curve. You can learn the program and feel comfortable using it in just a few weeks.

3. MusicMaster is written by just 2 guys, both who are former "radio people", not computer geeks who got into radio later.

4. MusicMaster does everything Selctor can do, and does a better job.

5. MusicMaster is aesthetically pleasing. It's well laid out, and it's screens are easy to read.

6. MusicMaster support is unparalleled. If you call for support, the fellow who answers the phone just might be one of the guys who wrote it.

7. It's cheaper. And that's the bottom line.

(Disclaimer...I worked for Tapscan, the people who used to sell MusicMaster when it was called MusicScan. I haven't worked for them in almost 6 years, and I have never worked directly for A-Ware Software, the owners of MusicMaster. I spent many, many hours on the phone with Selector users, listening to their frustrations with their music scheduler. Since I left Tapscan, I've worked in radio using both programs. My enthusiasm for the MusicMaster program is NOT based on my past employment with the company, but with my experience working with both programs in a station on a daily basis)

You can check out A-Ware/MusicMaster's home page at:

1464. End of Country music on WYNY

Newsgroup: rec.radio.broadcasting
Date: 1996-02-07 00:00:00 UTC
From: "Bruce Slutsky, Van Houten Library, 201-596-8498"
Message-ID: <4f9ggh$7b4@vixen.cso.uiuc.edu>
Source record: 26013

The country music ended on WYNY Sunday night about 6:25. All weekend the regular DJs: Kat and Dave, Lisa Taylor, Randy Davis, and Dan Daniel were reminiscing about the station while taking calls and faxes from listeners. Dan Daniel, a legend in New York City radio, was practically in tears when he was on at 5:00 and at 6:15 or so.

It is really a shame that radio is such a business. More people listened to WYNY than any other country station in America. I really feel for the people on and off the air who have lost their jobs. Randy Davis was on the station since 1981 when it was an AC station at 97.1 on the dial. Dandy Dan had two tenures at the station in the AC and Country formats respectively. I certainly hope another NYC station will pick them up.

After 6:25 PM the station ran syndicated country programming. I woke up about 6:10 AM and heard Mancow. For the 20 minutes that I listened he was bashing Howard Stern. He used the F word and as*ho** several times. The beeper was too late. It beeped after the F word was completed not during it. I was a little upset that he said "Some hick will turn on the radio and be upset that Garth Brooks is not on." He also described WYNY as a kick ass country station.

If Mancow stays on WYNY, I leave.

Bruce Slutsky

> from Stern on Monday!
>
> [Moderator's Note: So what else is new? Yawn!!! Bill]

Actually, thus far Mancow is making a total jerk of himself: he spent the first twenty minutes whining, literally whining, about what a "mean person" Stern is, how what Stern does "isn't funny", and then following up with a desire to see Stern's daughter's breasts (she's what, 11 years old?). He sounds likes Pat Robertson, telling us that "this is the truth, New York, that nobody else will tell you about Howie," and he's saying it in a very UNfunny fashion. Not that he's trying to be funny and failing, he's intentionally serious, and coming off as a paranoid man completely obsessed with Howard Stern. In all honesty, Mancow's coming off _extremely_ creepy; it's very uncomfortable to listen to.

And now Mancow has finally segued into something else, a bunch of attacks on New York City...not being done in a tongue-in-cheek fashion, but rather a "I really believe this city sucks and is inferior to Chicago" fashion. And now a segue purely for Chicago consumption, complaining about the Chicgo hockey team losing some road game. It's all very odd.

And now back to more Stern-bashing. Studied, prerecorded anti-Stern songs, three or four of them in a row. Creepy as all hell. This man is coming off as flat-out delusional. Oh, and now he's talking about how the telecom bill is allowing Infinity to crush Evergreen...::shaking head::

I think Evergreen has made a giant mistake; this sort of radio simply will NOT work in the New York Market. I can't imagine the reviews in the papers tomorrow will be very good at all, presuming there even _are_ reviews; after all, absolutely nobody outside of us radio geeks even know Mancow is on the air. And I get the feeling that those who would tune into WYNY anyway - the suburban, upper-crusty country fans - are going to be completely disgusted by what they're hearing this morning and will not exactly be spreading the Mancow gospel.

[Moderator's Note: Looks kinda like Stern has someone who can dish out the shit as well as he has for years. Actually, the only Evergreen personality that I think might be MORE of a battle with Stern, is Steve Dahl, but then-again, Steve has mellowed and matured with his audience so, maybe Mancow IS the best match. Read chi.media if you want to see

the flames fly... Bill]

I've seen several comments recently about New York's WPIX-FM in the late '70s. It was the best FM rocker I ever heard. Anyone else have any thoughts on this?

Where are they now?

Meg Griffin - still doing mornings at a Westchester County, N.Y. FM?

Joe from Chicago - Meg's (ex?) husband - last I heard at WPLR New Haven (at least 10 years ago!)

John Ogle (News) - FM in D.C.?

Danny Neer - Last I heard at WNEW

I think Mark Simone was also there in those days. I last heard him on the old WNEW-AM.

Who else was there?

Well, WYNY finally flipped...and Mancow lead the morning broadcasting live from New York City..simulcasting to Chicago. The first non-country song on the air was Oasis's latest hit..and then Mancow chimed in, greeting New Yorkers and bashing former WYNY-listeners, Z100, and Howard Stern.

-hick-asses!
Mancow said he's probably scaring the "hick-asses" that used to listen to 'YNY before the flip. When an upset woman called in to say how she missed the country format, Mancow blasted her, called her a bitch, and then played a few seconds of a rap track called "Bitch, Bitch." But before the bitch track aired, Mancow told the lady to "go do your goat you lame bitch."

-asshole!
I think this morning show shattered all records for saying "asshole" on the air. Mancow referred to Stern as the ultimate asshole, and then called previous 'YNY listeners assholes. And if that wasn't enough, they played a parody of a country song that called country-fans assholes. (I may be wrong, but I think the name of the song was Country Assholes.) Even a listener called in and called Stern/country fans assholes.

-Stern
I think I heard Stern's name more than Mancow's this morning. WYNY even ran sweepers that said "Howard Stern: It's called anal sex with a homosexual Hatian drug user--try it." The animosity of these two radio personalities is well known...and after this morning's radiocast, I don't think there's anyone left in New York who doesn't know about Mancow's hatred of Stern.

-Comedy
Mancow aired a ton of parodies of various modern/rock/CHR tunes...mainly aimed against Stern. Mancow also took a shot at Magic Johnson by playing a game of "Magic Johnson and the Wheel of Ass" with a call-in listener..who did win the game. ("Losing" the game consisted of having to engage in gay sex with Johnson.)

-Z100
Mancow completely blasted WHTZ as well..making personal attacks on several people there. He said PD Steve Kingston offered him a job for mornings at Z but was unable to join Z because of his current contract with Rock 103.5. While Mancow said "he better watch what he says if he does eventually end up working for Z100", he definitely didn't mind his manners when he blasted everyone at the Zoo. "Why does a PD need an airname" said Mancow of Kingston...after an irate listener (perhaps an ex-Z100 employee?) also blasted the Z100 staff and spoke of Steve Kingston and Patty Steele's relationship. (They are married.) In addition to calling Kingston an un-hip ass, Mancow called new Z100-talent Steve Cochran an "unhip bloated loser", Z100 producer Elliot Segal a "talentless little lying troll", and Patty

Steele a "a bitch with skunkhair who everyone hates" and is intimidated by her work on Z100 because she's married to the PD. Mancow recommends that Z100 drop the "Zoo", saying it was cool in the '70s but not anymore, and that they should "drop that loser Cochran".

It'll be interesting to see how Mancow/WYNY fits into New York City radio in the coming days/weeks. It's still not certain if Mancow will stay and 'YNY will be New York's Rock, but if it does, I think WPLJ's morning show is in trouble..as is Z100's. And with another rocker in NYC, that's just another gun pointing at Z100 to change/align it's format a little better.

1471. WYNY Format Of The Day Club

Newsgroup: rec.radio.broadcasting
Date: 1996-02-07 00:00:00 UTC
From: steve c walko ee stnt <scw1118@hertz.njit.edu>
Message-ID: <4f9ggf$7af@vixen.cso.uiuc.edu>
Source record: 26020

At 6:00 EST on Monday 103.5 WYNY dropped the country format and began simulcasting Rock 103.5 WRCX from Chicago. Madman Mancow Muller broadcast from the WYNY mobile studio trashing Howard Stern for most of his morning show. For the rest of Monday, YNY simulcast Rock 103.5 letting the DJ's know that they were being heard in New York City as well as Chicago. Slogans for the day included "Rock 103.5 Chicago/New York". Traffic reports, weather and time checks were given for both Chicago and New York City. It was strange to hear two stations in two time zones 1000 miles apart. A 1-800 number was posted so callers from the New York area could request music. This was a rare opportunity to listen to the music of another city without mailing away to someone for an aircheck. I recorded nine hours scattered between 6 AM and midnight.

---- The interesting thing happened at the start of the afternoon Monday. WYNY would turn down the level of the satellite feed about every twenty minutes to say that they were in a state of transformation. They set up a toll free number with voice mail so listeners could call and say what type of format they would like to hear on the new 103.5 WYNY.

Well I was expecting to hear Rock 103.5 when I woke up Tuesday morning. However the satellite feed was now 92.3 The Beat KKBT in Los Angeles. This tends to make me think that Evergreen will pump one of their stations in each day for at least the rest of the week until they decide what to do with their own station.

Can anyone give me an idea of some other stations with formats that Evergreen owns? I pulled out my old M-Street Radio Directory from 1991 (quite obsolete) and I only found Magic 103 in Philadelphia as an Evergreen Media owned station to add to the list. Maybe if someone knows some other stations they own, we can guess what the station will be tomorrow.

If you like hearing the sounds of other cities stations like I do, this is a dream come true. Welcome to the YNY format of the day club!!!

Steve W
(avid radio listener)

New York radio transformation in one month

92.3 K-Rock Classic Rock ----------> Alternative Rock
93.1 WPAT Adult Contenporary ----> Spanish Soft AC
103.5 WYNY Country ---------------> ? ? ? ? ? ? ? ? ?

JJ>It should be an interesting battle to see if Mancow "works" outside of
JJ>Chicago and to see how Howard reacts to his new visitor.

If Howard is smart, he'll ignore him. I never thought I'd say this but, compared to Mancow, Stern is a class act. I'd let Mancow continue to promote Stern, using WYNY. Stern has, by far, the larger audience and has no need to use WXRK to promote Mancow on WYNY.

It was also very clear (complete with central time time checks) that the show was not geared to New York. I'm not sure New Yorkers will see the humor in a foreigner ridiculing other New York morning jocks (in addition to Stern). The large number of Chicago phone calls won't do well here, either. Other than originating here for a day, the show had no relevance to New York.

I'll bet it'll be a very quiet "battle."

Date: 1996-02-07 00:00:00 UTC
From: lankesta@sabc.co.za
Message-ID: <4f9gf5$76p@vixen.cso.uiuc.edu>
Source record: 26067

Hi.

A while back a friend showed me a freebie publication (Radio World?) in which was an advert from a company offering a weekly subscription to a CD that features brand new music. The CD is compiled for the express purpose of compiling radio programmes and featured a range of different types of music. Upon further enquiry locally, I heard that there are several companies that offer this service, primarilly based in the USA. I wonder if anyone has a contact number (phone or fax) or even better an email address for these companies. Any other info on costs involved etc is welcome too.

Related to that, I'm also on the look out for interviews and soundbites from artists that I can use as part of a programme on breaking bands, chart topping singles from established artists etc etc. These should be reasonably current. Again, any advice would be welcomed.

Thanks in advance

Tony Lankester

Nope...the site in Grimsby (actually ACROSS the lake from Toronto!) is a 10 tower array...two rows of five..or is it two x four? Well its either 10 or 8! There is a 1kw station
in Brampton (suburb of Toronto) on 530 that used to be on 790 2 years ago and they HAD 10 tws (2 x 5) but now that their on 530 I think they cut some down.

Yes, 60KHz is susceptible to AM noise so you certainly wouldn't want to use it for entertainment, but the time code that WWVB transmits is a slow code (1pps) imposed on a continuous carrier by reducing the carrier amplitude 10dB for varying periods to designate binary data and sync. Since the code is slow and predicatably repetitive, it is relatively easy to detect and decode, even in high noise. WWVB is widely used as a time standard; most modern receivers are fixed and use a loop antenna which improves noise rejection. WWVB's primary feature is that it does not fade like it's WWV high frequency cousins do.

1477. HIP HOP/HOUSE SAMPLES

Newsgroup: rec.radio.broadcasting
Date: 1996-02-07 00:00:00 UTC
From: Marcial Moreno <marcial@kaiwan.com>
Message-ID: <4f9gfh$77b@vixen.cso.uiuc.edu>
Source record: 26071

I am interested in obtaining the type of samples used by hip hop and dance stations during live D.J. mixing. Specifically, the voice samples. A few stations in the Los Angeles area (KPWR/KIIS/KKBT) use these quite often during their mixes to start off a block of music or to otherwise add a bit of 'sparkle' to the show. My efforts at finding these through oddball music stores and D.J. outlets were to no avail.

If I am being too vague in describing what I'm after, here are a few of the the samples I've heard that I can remember offhand ... :-)

"This should be played at high volume; preferably, in a residential area."
"Place your head midway between the loudspeakers and set the volume knob to maximum potential."

These samples are often recorded in an authoritive sounding voice, similar to the instructors' voices that you heard during those old educational films at school back the 1950's. THAT stuff! <grin> If anyone can give me a few leads to where this type of sample material can be bought from, I'd greatly appreciate it. I'd be interested in getting it under the WAV file format or (preferably) CD. I'll be using this in a music compilation that a friend and I are putting together in his home studio and are planning to have finished by the end of February.

Thanks in advance.

Brian

1481. re: Is All News Radio Dying

Newsgroup: rec.radio.broadcasting
Date: 1996-02-07 00:00:00 UTC
From: Michael Carraher <70712.547@CompuServe.COM>
Message-ID: <4f9gft$77u@vixen.cso.uiuc.edu>
Source record: 26075

In 1995 Broadcasting & Cable Year book reported 660 all news stations in the U.S. (1635 if you add in news/talk).
The format is not dying in terms of audience. It's not dying in the terms of advertising revenue. And it's not dying in terms of number of stations.
Further, successful all news stations tend to be higher power AM's in major markets (despite declines in the AM audience).
What is dying? All news radio must increasingly compete with TV for the broadcast news audience (CNN, Headline News, increased local news in early morning, midday and weekend morning time periods). More TV news is available outside the traditional network affiliate news at 6:00 and 11:00. More people have TV's in bedrooms, bathrooms, kitchens -- even offices (including access to CNN through networked computers). The only place and time where news radio retains a monopoly as a news source is in cars.
Result: people less likely to tune in 2, 3, 4 times a day.
Corporate owners, as pointed out in other postings, are attempting to increase profits by cutting personnel. The product is not dying but fewer people are being used to produce it. In addition to staff reductions, all news stations are combining operations with co-owned TV stations and duoped radio stations (Including, CBS/Group W all news duopolies in New York, Chicago, and LA).
What's being lost? Jobs? Certainly. Quality? Maybe. Local content? Possibly, if satellite delivered all news programming continues to make in-roads as it has on talk stations.

1483. Buffalo/Toronto Radio Watch(2/6)

Newsgroup: rec.radio.broadcasting
Date: 1996-02-07 00:00:00 UTC
From: ag365@freenet.Buffalo.EDU
Message-ID: <4f9gem$761@vixen.cso.uiuc.edu>
Source record: 26077

Light docket this time around in the #40 market:

*Michelle Maloney,former traffic reporter at WBEN(NewsTalk 930)who left to work for Time Warner's Rochester-based all news channel R News, seemingly is back in the Buffalo area. She's working with Metro Traffic (based out of the Statler Building)and has been heard during AM drive on WJYE(96.1). Whether she's still with R News is unknown.

*Seems WHTT(1120/104.1;Oldies 104)_won't_ be getting new digs anytime soon. Word is that 'HTT-who was scheduled to get 4th floor digs with sister station WSJZ(92.9,NAC/jazz;Smooth Jazz 92-9)-has been behind on its rent payments.

*CFRB(1010,N/T,Raptors flagship;The Source)talker Michael Coren is in a lot of hot water,as a piece by the weekly newspaper NOW noted. Coren(who checks in from the right)and 'RB were slapped with a $4 million libel suit by poet & writer M.Nourbese Philip for on-air remarks Coren made. In a letter filed with the Toronto mayor's committee on community & race relations,Philip complained about Coren's comments that she was unworthy of an award she received because she tried to get the musical Showboat banned because it was racist,accised activist June Callwood of racism and protested the Into the Heart of Africa exhibit at the Royal Ontario Museum. However,Philip said none of this was true;Coren was later forced to retract the statements.
Philip said he asked the Toronto school board to ban trips to Showboat, criticized Callwood for her response to protests about the racial composition of PEN Canada's membership,and didn't boycott,protest or demonstrate the ROM exhibit-just criticized it in writing.
Coren had no comment,saying the matter is now a legal one. CFRB GM Gary Slaight has written to the city's race relations committee,raising concerns about a request by Philip to address them on the issue.

*Larry Fedoruk,part of Mix 99.9's morning team before Rob Christie came on board,has resurfaced in T.O.-he's now part of CISS(92.5,new country)'s morning show headed by Cliff Dumas.

*Cyber notes:Two more local radio people now have e-mail capability:

-Brother Wease(WCMF-AM/FM morning drive):browease@aol.com
-WEDG(103.3the Edge):theedge@cis.compuserve.com
(it's unknown if this is a general address)

1484. Jacor/Noble merger

Newsgroup: rec.radio.broadcasting
Date: 1996-02-07 00:00:00 UTC
From: BobSeybold@aol.com
Message-ID: <4f9gem$762@vixen.cso.uiuc.edu>
Source record: 26078

Jacor Communications, Inc. said Monday (2/5/96) it has reached an agreement to acquire Noble Broadcast Group Inc. and its 12 radio stations in four cities.

The transaction is valued at $152 million, and will create the nation's fifth largest group of radio stations, said Randy Michaels, President of Jacor, which is based in Cincinnati.

In addition to four stations in Cincinnati, Jacor operates 19 stations in other cities, including Atlanta, Tampa, Jacksonville, and Knoxville.

Jacor and Noble each have stations in Denver and San Diego. Noble also operates stations in St. Louis and Toledo.

"The Noble stations are well-positioned within their respective markets, and we intend to provide the additional financial and operational support their managers require to meet their goals," Michaels said.

Jacor has received commitments for a $300 million line of credit to finance the transaction entirely with borrowings and providing it with additional credit lines for future acquisitions, Michaels said.

The merger is subject to approval by the Federal Communications Commission, and Jacor stockholders, who will also be asked to approve a new name for the combined company.

1485. ST. LOUIS RADIO WATCH 2/6: JACOR ACQUIRES NOBLE GROUP

Newsgroup: rec.radio.broadcasting
Date: 1996-02-07 00:00:00 UTC
From: ssimon9@ix.netcom.com
Message-ID: <4f9gen$763@vixen.cso.uiuc.edu>
Source record: 26079

JACOR ACQUIRES NOBLE STATIONS,
COULD BE START FOR OTHER MERGERS

by Scott Simon
c. 1996

ST. LOUIS --- Jacor Broadcasting of Cincinnati has purchased the Noble Broadcasting Group of San Diego, acquiring it's 12 stations for $152 million, which includes KATZ-AM, and KMJM/KNJZ-FM in St. Louis.

The acquisition is subject to Federal Communication Commission approval, which is expected to take between 45 and 90 days.

KATZ-AM is an talk-format station which bills itself as "Black Information Radio", while KMJM and KNJZ are urban music formats, the former specializing in contemporary urban, while the latter targets the older adult urban audience.

KMJM, better known as "Majic 108", is the prize of the three, always in the top five ranking among stations listened to the in the St. Louis market, while KATZ is an up-and-comers in the talk arena.

No changes are expected, according to Steve Mosier, the St. Louis general manager for Noble's stations.

But the merger could be an indication of more acquisitions by Jacor in St. Louis, and nationwide, based on the profile of stations they own and operate, and recent changes in federal telecommunication laws.

Jacor secured a $300 million loan for station acquisitions, and is a strong group owner of news and information stations, such as KOA-AM in Denver, and WLW-AM in Cincinnati. It has $148 million remaining for that purpose after the Noble acquisition.

St. Louis' number one station in audience and advertising revenue is "News/Talk 1120" KMOX-AM, owned since it's inception by CBS, recently acquired by Group W.

Sources tell me that last Friday's visit to KMOX by new CBS radio executives revealed that while they are pleased with the operation and presence of the station, they are concerned about it's profit margin, compared to other stations in the new CBS group. KMOX general manager Rod Zimmerman has cut back several part-time on air personalities in recent weeks to increase profits.

Westinghouse executives are open to selling companies to pay for the debt service of acquiring CBS for $5.4 billion last year. They spun

off their highly profitable nuclear and defense companies in the last six months in response to their CBS purchase.

Under the new telecommunication laws recently passed by Congress, Jacor could buy KMOX and co-owned KLOU-FM, adding them to their trifecta of Noble stations, giving them two AM and three FM stations in the country's 17th largest radio market.

No one at CBS or Jacor/Noble is talking about such a possibility, but three media analysts at A.G. Edwards and Edward Jones brokerage groups headquartered in St. Louis compare it to what is happening in soft-drink and beer retailing.

"Soda and beer companies introduce new brands to steal shelf space at the store from the competition," said a senior analyst at Edward Jones. "The new direction in broadcasting is buy and merge, stealing audience space from smaller competitors."

1486. Distribute your playlists to playlist-l list

Newsgroup: rec.radio.broadcasting
Date: 1996-02-07 00:00:00 UTC
From: phaedra@netcom.com
Message-ID: <4f9gfu$781@vixen.cso.uiuc.edu>
Source record: 26080

********** WELCOME TO PLAYLIST-L **********

NOTE: PLEASE SAVE THIS FILE and keep it either in hard copy or in the folder with the files and messages that you will be sending and receiving. Also, when sending commands mentioned below, do not use REPLY. Commands are to be sent to LISTSERV@NETCOM.COM. Submissions are to be sent to PLAYLIST-L@NETCOM.COM.

The first section of this guide will describe PLAYLIST-L in general. The second section will give detailed instructions for various options and features of LISTSERV that will help you get the most out of PLAYLIST-L.

********** Section 1: Overview **********

WHAT IS IT?
==========
This list is for the distribution of music playlists, either from radio shows (College or other), or from club DJ's. If you wish to subscribe to this list, look for information later in this posting. This list is open, that is, anyone can send submissions to the list, regardless of whether they are subscribed to the list. To make going through the submissions of the list easier, it is requested that you include some sort of information as to what type of music the show contains in the subject line of the message. Examples follow later in this post.

Playlists of radio stations as a whole will also be accepted (ie: WXXX Top 50 records for the week of...) I am currently trying to contact record companies and people inside the record industry so that they will read this list too. This might be a good way for compaines to track airplay of their records.

********** Section 2: LISTSERV Commands and Options **********

The following is a description of various commands that enable you to use the many features of LISTSERV. It is not an exhaustive introduction to LISTSERV. For more info on LISTSERV features send for HELP (Instructions below.)

TO SUBSCRIBE:
============

Send a message to LISTSERV@NETCOM.COM. Leave the subject line blank as it will be ignored. (Note that on some online services such as AOL, you are not allowed to leave the subject line blank; therefore simply hit the spacebar once to satisfy that requirement.) The first line of the body of the message must read:

SUBSCRIBE PLAYLIST-L

TO SUBMIT PLAYLISTS TO THE LIST:
==========

Send your playlists to PLAYLIST-L@NETCOM.COM. Remember to include some sort of indication as to the type of music in the subject line. Please also include the air date of the show (if it is a radio show). You might want to include some sort of header/footer that contains information about your show/club/station and contact information. Note that there is no need to include the word PLAYLIST in the subject line since it's assumed and also takes up valuable character space that could be used for more descriptive purposes.

EXAMPLES:

>Subject: My Radio Show 8/17/95 (Ambient/Techno)

TO SEND E-MAIL MESSAGES (OTHER THAN PLAYLISTS) TO THE CONFERENCE:
==========

Send your messages to the Internet address: PLAYLIST-L@NETCOM.COM

Be sure to include a TOPIC heading (see info regarding topics further on in this guide). Use a clear Subject: header so other people can follow discussion threads easily, and the digest index accurately reflects the contents. If you change the subject when replying to a message from the list, be sure to edit the Subject: header accordingly.

Note that when you Reply to a message from PLAYLIST-L, the reply will be sent to the person who wrote the message, not to PLAYLIST-L. You can include portions of someone's message in your response to PLAYLIST-L if you Forward their message to PLAYLIST-L and add comments. If you need an explanation of the difference between replying and forwarding, contact your system administrator.

++++++++++ LISTSERV OPTIONS ++++++++++

FOR ALL COMMANDS LISTED BELOW: Send them to LISTSERV@NETCOM.COM. DO NOT send these to PLAYLIST-L or your message will be sent to all subscribers, and will have NO effect on your options! Put the commands in the body of the e-mail message, not in the Subject header.

NPR in Southern Ontario will require you to do a little
channel and band changing. In the Niagara region the best
signal will probably be from WBFO on 88.7. Then between
Hamilton and Toronto you'll move to AM 970, but lose it
east of Metro because of a tight directional pattern.

Message-ID: <4f9gg3$789@vixen.cso.uiuc.edu>
Source record: 26083

Quite by accident, I ran across a test last night (2/5) on the expanded AM band.

The US Army was performing tests using the callsign "KTRK", or "K-Truck" (go figure...)
The signal was very strong here in northern Illinois - equal or better than WJDM with better sounding audio. Reminiscent of the old clear-channel days!

Programming was classic rock, with live jocks and occasional requests. I called the phone number given and was told that they were running 5 KW from near Fort Meade MD. An address was given over the air for DX listeners.

Nice to hear the new band coming alive, even though this test was announced as a 24 hour event.

>alternative over CHR?

Because "alternative" (modern rock, whatever) is seen as being the Next
Big Thing, and everyone wants to be on the bandwagon. With a possible
exception in the early-to-mid 80s, CHR has never been considered a "cool"
format. It's true, though, very few of these stations seem to pull much
above a 2 share.

[Moderator's Note: CHR (Top 40) not cool?!?!? Don't try to tell that
to anyone who grew up on REAL top-40 in the sixties/seventies. Top-40
was VERY cool then. And the concept never dies, despite the different
musics plugged into the format. Bill]

Its the SRF-42, it receives C-QUAM AM stereo and is in the 1996 Radio Shack
Catalog. The stores in the Baltimore/Washington area have it on the shelves.
I bought one a year and a half ago form J&R Music World in New York City. It
complies with some of the AMAX specs and even sounds better when receiving
mono AM.

I can't forget the local daytimer (calls will remain anonymous
to protect the guilty) that forgot to turn its carrier off one
fine night a year or so ago. A phone call to the studios found
a couple of guys still there. The conversation went like this:

ME: "Hi. You seem to have left your transmitter on. Would
you mind terribly turning it off?"

THEM: "Oh...we don't work here. A friend let us come by to do
some recording. We'll be done in a few minutes."

ME: "I don't really care what you're using the studios for...but
you really ought to turn the transmitter off. Is there an
engineer you can call who can tell you how to do that?"

THEM: "Uhhhhh......"

As I understand it, the station later received a visit from an
FCC inspector, who issued a warning after being satisfied that it
was a one-time mistake, which it in fact appears to have been...
not like the other locals who seem to forget that their night powers
are 90 watts ore so...not 5000!

Of course this format is dead. How many times can you hear the
following:
DarkSide of The Moon
Stairway to Heaven
Foxey Lady
Ramblin Man etc etc.
There is a wealth of material that has not been played for 20 - 25
years, including cuts from those albums that get played to death.

What is wrong with free form (not labeling music) I got my first
exposure to some of the classics of Jazz & Blues listening to the old
WABC-FM/ WPLJ in NYC. How can we expose new listeners to these great
treasures if we label and segregate them.

Propagation in the medium wave band is going through an exceptional
period. This may account for the "unexpected" signal strengths from
distant stations.

The complaint WBZ and other clears are making is that stations with
marginal night time allocations aren't going off at night when they
are supposed to or are changing their pattern late. It is
particularly a problem in the winter months when the sun sets before
or during afternoon drive.

: between a fact, which anyone may arrive at independently, and an estimate
: like those found in an Arbitron report.

: Perhaps someone with better knowledge of the law can elaborate.

While copyright law is not my field, I will elaborate some. "Facts" and "estimates" are not the issue legally. The real issue goes to "form of expression" that "authors" "create". Arbitron creates its books from original data. The data is protectable, as well as their interpretations of that data. That the data is composed of numbers is immaterial.

Why should this bother anyone? If you paid to get data, then paid people to interpret it, wouldn't you want protection too? Last I heard, Arbitron is a business. I certainly don't want to pay people to produce a product for me, just to give the product away for free (unless that would generate even more business for me - like Microsoft did).

Have to admit, as someone not in the business of radio, I'm unclear what you think is unfair about this ...

Dan

[Moderator's Note" Er... Dan, I dont recall anyone saying that it was not fair. Do you? Bill]

1504. WBBM-FM

Newsgroup: rec.radio.broadcasting
Date: 1996-02-07 00:00:00 UTC
From: Doug Fleming <dfleming@arctos.Bowdoin.EDU>
Message-ID: <4f9gf4$76n@vixen.cso.uiuc.edu>
Source record: 26098

There have been a number of rumors flying about lately that WBBM-FM ("Party Radio, B-96") was going to change from Dance to CHR with their new Westinghouse ownership. This has not been the first time that rumor has surfaced. Being a Chicago native, I am very familiar with that station. In fact, I have been listening to that station since I was a kid. One thing that I have noticed about "B-96" is that they canstantly try to switch away from the dance format. They dumped their dance for CHR in 1992, but after a few months, switched back again. In 1993, they tried this again, but to no avail. Last summer, "B-96" again went CHR, but only for about two months. When I returned home from college over Christmas, I found "B-96" back to their original dance format. In fact, they had dumped pretty much any semblance of "CHR" from their playlist, incorporating mostly club cuts, dance mixes, and mainstream dance into their format.

"B-96" has had a solid Hispanic audience ever since 1988, when they first adopted the dance CHR format. It was this audience, I believe, that saved them from the same fate as CHR "Z-95" (now "Kicks Country") which died in October of 1991.

Since the death of "Z-95," WBBM-FM's ratings have ranked them between #3 and #5 in the Chicago market. It is only when they try funny stuff, such as a two month spurt of CHR, that their ratings fall. If the decision to go CHR is permanent, then they will lose their Hispanic audience, which seems to be the backbone of the station. In addition, they will probably lose people like me, who are not Hispanic, but enjoy the dance format.

I do not understand the logic of "B-96"'s proposed decision to go CHR. I can only say that when other stations have made similar decisions, their ratings were chopped down quite a bit. Here are some examples: WHYT-FM (Detroit), WLUM-FM (Milwaukee), KKFR-FM (Phoenix; which is back to the dance format), and WZAT-FM (Savannah, GA).

-Respectfully,

Doug Fleming

From: ricklew@aztec.asu.edu
Message-ID: <4f9gf6$76q@vixen.cso.uiuc.edu>
Source record: 26099

Anthony, in answer to your posting about adaptive methods at
radio stations, there are many, and for the most part, they are
not limited by anything but your imagination. For example, how do
you deal with program logs? You could have a friend or spouse read
them (not always practical, because other people's schedules won't
always coincide with yours.)
coincide with your schedule). You could have the person on the
previous shift read it to you; while seemingly a more dependent
approach, if you're in a small town where the sales staff adds
spots to the log at the drop of a hat, this may be the easiest
way. A favor or two in exchange, a Coke now and then, or your offer

of help in situations where you can enhance the skills of the log-
reader will more than compensate in most cases. And then there's
that other log solution: if the traffic department computerizes
logs and you can read the control room computer via speech or
Braille, you have a totally independent solution. Just make sure
that active sales dept. hasn't added to, ot altered the log you're
working with.
What about labeling carts and CDs? If you use Braille, there's
a wonderful template you can get from Howe Press that lets you
put Dymo tape in the Brailler; if you are doing lots of labeling,
that's your ticket. If you only use numbers on station CDs and
carts, a 3M labeler costing $45 will be a must (and if you use
it a lot, you can expect to replace it about every two years.)
For transmitter meter readings, many stations have dial-up phone
lines with voice synthesized readings, so the engineer can check
on the equipment or for unattended operation; if the equipment
talks to the engineer, it'll talk to you (just promise not to
give out the access codes!)
For reading copy, use the same solutions as with logs.
Voice mail is a plus; that way, people can leave items or changes
at their convenience, and you can check it at yours. (Allow your-
self extra leeway in case someone forgets and you have to
improvise.)
Now, here comes the nasty reality check. Blind and in
radio since 1973, I can tell you that you have other obstacles
besides blindness to overcome. Not all program directors are open-
minded about blindness; regrettably, I find that the majority are
not. Generally, if they aren't convinced that your blindness is not

a hindrance at first, they are not likely to change their minds;
move on to someone else. If, on the other hand, you don't think
they're amenable to you but they tell you to keep in touch, do it;
you wouldn't want to lose that job because you misjudged the PD,

would you? (You won't misjudge often, though. A brush-off, even done kindly, will not bypass your built-in B.S. detector.)
Your second obstacle (and my major one) is the hidden job market. By the time most job leads appear in the trades, the jobs are filled.
They're taken, quite often, by people known to management, friends of other employees with good track records, or those who have already made that good impression on the PD or GM. The only way to counter that is to be outgoing, make friends at the places you want to work, and try your darnedest to get in on the ground floor.
And about those openings (and I'm about to say something well-known in the broadcasting business but not generally acknowledged to the rest of the world): Those great job leads posted in the magazines are quite often done so station management can say they made notice of the job available to everybody. The sad truth is that people like you and me (who could use those timely job leads, if they REALLY led to jobs) usually are the last to know about them--and all in the guise of being able to tell the EEOC and the FCC, if asked, that minorities are solicited for employ-ment.)
Only my second posting here, and I'm already saying heretical things; oh, well, somebody has to, and you should be aware of them.
One last thing. Nothing I have said here is intended to discourage you. At its best, radio is the most satisfying thing I could ever imagine doing--and the radio business needs more talented and creative minds, and fewer warm bodies with no soul. I wish you the very best; grab for that brass ring, and you just might get it.
If this message has cynicism in it, however, it's because I've spent a lot of time learning my craft, and yet again, it's time for another earnest job search (and I'm better at holding a job than looking for one, because of the aforementioned factors.)
For the umpteenth time, I'm wondering if I should leave broadcasting for telemarketing, a home business, or some other arena
where my abilities may be fewer but my chances for success greater.

Remember that the
Ed Walkers are in the minority; most blind people I've known in this business are working at jobs well below their capabilities. In a business where good communicators should get the best oppor-tunities--in my opinion, whose very survival depends on our being considered important in listener's lives--it's sad that so many capable people get overlooked in the hiring process, in the name of

convenience and expediency.
But don't let anything I've said deter you, Anthony. You may just be the one to break through those barriers and show the world your stuff. And you'll never know unless you try.
If I can provide any advice, assistance or encouragement, don't hesitate to Email me at ricklew@aztec.asu.edu. I've combined my

reply to your message, Anthony, with some comments I thought would not only be of interest to you but thought-provoking (or just plain provoking!) to the other readers of this newsgroup.
Good luck, and defy the odds! Go get 'em!--Rick Lewis

I don't understand why radio programmers and owners are so reluctant to try what clearly will be the two hottest formats in the 21st Century.

1. Adult Album Contemporary

2. Kid Radio

The last remaining vast segments of unserved audience. Every time I bring it up, people just give me a million bogus reasons why they won't work. Guess that's what they told Gordan McClendon 50 years ago too.

-"Religion divides...Understanding unites!"

>listeners be able to turn for something out-of-the-ordinary?

Personally, I generally don't like music testing because I think it can ultimately make a station dull. If participants vote for their favorites and things that sound like them, and if songs repeatedly heard on the air become favorites, you have a closed loop and a station stuck in a rut.

Broadcasters should be leaders, not followers. The PD or MD who tests every song he plays is no better than the wishy-washy politician who always takes a poll before stating a position.

That said, I think that college stations _should_ do music tests. Their programmers usually don't have the experience and maturity of programmers in the "real world", and they often seem to focus more on their own likes and dislikes than those of the people they want to reach. Music testing is an excellent way to get to know listeners and their needs, especially if what are being tested are _styles_ of music rather than individual songs.

There was an earlier thread in which several people said that college radio experience is largely useless to people comtemplating careers in radio. Music testing and audience research in general is worthwhile experience in itself; if it steers college programmers toward decisions based on listeners' needs or wants, and away from programming based on petty politics or personal taste, it could make college radio not only a more valuable learning experience but a better service to listeners too.

Yes, I do. He's co-hosting an afternoon drive show on CHRW 94.7FM in London, Canada with yours truly. He joined me in January, and has definately made a great addition to the show!

Cheers!

Fum Fee.

The 12-tower array in Detroit was reduced to 9 towers several years ago
when the station requested a power reduction.

I had once heard of a 16-tower system in operation in Wisconsic quite a
few years ago but I never saw it with my own eyes.

>and for how much money???

I think you may be a bit confused. Yes, Sony MADE an AM
stereo walkman AND Radio Shack actually made an AM stereo
receiver for your component system.

I actually have BOTH! My station broadcasts in AM stereo
and the sound IS fantastic!! Too bad the FCC screwed up
because AM stations could be sounding VERY good.

Both models are now out of production. The Sony walkman
actually had a switch on the back for the listener to
switch from C-Quam to the Khan system. That's the whole AM
stereo problem...who knows what system the radio station is
using?

The Radio Shack model was strictly C-Quam.

Again, both sounded great. Today just about the only AM
stereo radios around are in cars. Most people don't even
know they have one.

Actually I liked Z-95, especially the little Spanish voice-overs they used to play. I thought they did a much better job than B-96. Obviously I was wrong since they dumped the format.

In Columbus, 105.7 used to be both the Power Pig and Hot 105. They too had kind of a "poor man's" dance format (it was somewhere between urban contemporary and dance.) They used to get very respectable ratings, especially for a 6,000 watt station with a mediocre signal broadcasting in a very white-bread midwestern city.

They eventually went to CHR and dumped that for the Arrow format, which gets lower ratings. I think it all had to do demographics. Obviously, advertisers do not covet the market that listens to dance stations.

Dan

WMAQ AM 670 has CNN Headline News as well as CNN audio on Nationally
breaking stories. They're the #1 news station.
But, instead of *just* playing the audio, if there is something that might
be visual, the local anchors tell you what is happening, and describe the
scene - just like if they were doing the covering themselves.
They used CNN during Desert Storm and the Simpson trial.
Being a 50,000 watt clear channel, they must have had a huge listenership.

1516. WYNY: Mancow vs Stern

Newsgroup: rec.radio.broadcasting
Date: 1996-02-08 00:00:00 UTC

Well, it's about time.

In NYC we have had to listen Howard Stern harange us about all of his talent, wit and wisdom since WNBC stuck us with him and then went defunct.

Stern prospers because in this era of fragmentation, a 6 share can make you number one. His best numbers come from major markets where 6% puts you on top. As the markets get smaller and the demands to get top ratings get higher in terms of audience percentage, he still gets that same 6%. Locker room adolescent gutter talk will never attract lots of people on a percentage basis. But, in a major market, 6% is enough. He is no wizard of talent. He's just lucky enough to have come along at the right time to get away with this schtick. And, up until now, no one else is trying it. At least not in NYC.

Enter Mancow Muller. Another trash talker. Our first encounter with him on YNY this past Monday was about what I expected having followed his success at RCX in Chicago. Since Evergreen is doing the format of the day thing at WYNY, who knows if Mancow will stay at YNY or not. But whatever happens, I hope he stays somewhere in NYC. Not because I paticularly like him but because I think he has a shot at giving Stern some competition for this 6% of the audience.

What happens when someone else comes along doing what you do, but does it "better"? Just ask Phil Donahue. Stern is crude, therefore, his competition has to be cruder. Stern was cruder than Imus, so it is only a matter of time before someone is cruder than Stern. Mancow may be the guy. Then that "master of all media" Stern will have to compete with others using a similar format. Just like everyone else in radio. There are lots of "Zoo" formats, lots of "talk" formats and lots of "music" formats in every market. Now there will be more than one "dirty talk" format. And guess what? That 6% will get divided up.

So much for the master.

Allan Sniffen

} Maybe I'm just getting old, maybe I'm getting too conservative in my
} old age, maybe I'm in the minority... but what has our society come to
} when Mancow and Stern attract so many people and are enjoyed by so
} many....

This is an excellent question and one that is never really answered, rather it is reacted to by those who are fans or foes of that style of radio.

I think, personally, that at the core of this attraction is the fact that Stern, et-al, push the ever-narrowing envelope of what can be said and done on the radio. Whether you love or hate the likes of Stern, Mancow and others, they are popular because their shows stand out from the mass of 'ten-in-a-row' jukeboxes, 'insipid morning zoos' and one-sided-political-ego-stroke-fests.

The talent level of a Stern not withstanding, I believe that these programs are popular for the same reason Limbaugh is popular.

1) They both speak to a specific target audience.
2) They offer an entertaining package that is *different* from the rest of the over-consulted, predictable, and ever-narrowing scope of material found on most other station.
3) They generate interest through controversy.
4) They offer an on-air product that sounds spontaneous, free and fun.

I have little personal use for Stern other than as a living testimony to the fact that despite the research that tends to sway programmers to the familiar (and overdone) formats, there is a HUGE audience out there for something, virtually *anything*, that is *different*.

It amazes me how few programmers are willing to see the writing on the (bathroom) wall. There are a LOT of people out there who are simply tired of the fare on the air, and will flock to a station that offers programs of an interesting and novel nature.

Evergreen's WLUP (The LOOP) in Chicago is one of my pet examples. They were told that what they are doing *cannot possibly work*. The research said that such a format (free-wheeling, entertaining talk 24 hours a day) was..

1) Too expensive.
2) Would not generate the ratings.
3) Would invite trouble due to the explicitness of some of the hosts.

Yet it did work, and in a -- H U G E -- way. In most dayparts they scored high in the top 10 often in the top 5) in 12+, and as #1 in the 25-54. This DESPITE the (IMHO foolish) re-arranging of schedules, switching from a regional 50,000 watt AM to a short-spaced 6000 watt FM. More importantly, LOOP listeners were/are very loyal.
